1000 Expert Prompts

The Ultimate Collection of Battle-Tested ChatGPT & Claude Prompts for Serious Professionals

10 categories. 1000 prompts. Zero fluff. Every prompt is role-based, variable-driven, and framework-powered — so you get boardroom-quality output on the first run.

Who This Is For

- **Founders & operators** who want strategy-consultant output without the retainer
- **Marketers & copywriters** who need conversion-grade copy in minutes, not weeks
- **Engineers & product leads** who want principal-level code review and architecture guidance
- **Creators** who need viral hooks, editorial-grade edits, and platform-native content
- **Anyone tired of “write me a blog post” prompts** that produce forgettable slop

What Makes These Different

Most prompt packs are generic one-liners: “Write me a marketing email.” Useless. These are engineered with the four pillars of high-leverage prompting:

1. **Role specificity** — Every prompt anchors the model to a concrete expert (“a senior direct-response copywriter who has written \$100M+ in control-beating sales letters”) so you get that expert’s mental model, not an average of the internet.
2. **Named frameworks** — StoryBrand, JTBD, Blue Ocean, AIDA, PAS, Hexagonal Architecture, DDD, CQRS, SOLID, Hero’s Journey, Skyscraper, E-E-A-T, STAR, GROW. Real frameworks from real practitioners.
3. **Concrete variables** — Fill in **[PRODUCT]** , **[AUDIENCE]** , **[PRICE]** , **[COMPETITOR]** and the prompt does the rest. No guessing what the model needs.
4. **Defined output structure** — Every prompt ends with “Output as...” so you get a table, diagram, outline, or numbered list — not a wall of text.

How to Use This Book

1. **Pick a category** from the Table of Contents.
2. **Find a prompt** that matches your task (each prompt has a clear title).
3. **Replace the [BRACKETS]** with your own inputs (product, audience, numbers, URLs).
4. **Paste into ChatGPT-4o, Claude 3.5 Sonnet, Gemini 1.5 Pro, or any frontier model.**
5. **Iterate** — most prompts ask clarifying questions or produce multiple options so you can refine.

Pro tip: Prompts in categories 4 (Software), 5 (AI/Automation), and 8 (Data) often work best when you paste code, data, or logs alongside them.

Legal & License

- You get an **unlimited personal + commercial license** to use these prompts in your work.
 - You **may not** resell, repackage, or redistribute the pack itself (or a meaningful portion of it) as your own product.
 - No warranty. AI output requires human review — especially for legal, medical, and financial use cases.
-

Table of Contents

1. [Marketing, Sales & Copywriting](#) — *brand positioning, sales letters, VSLs, ads, email, pricing, outbound*
 2. [Content Creation, Blogging & SEO](#) — *keyword research, briefs, outlines, on-page, topical authority*
 3. [Business Strategy, Entrepreneurship & Startups](#) — *lean canvas, GTM, pricing, fundraising, OKRs*
 4. [Software Development & Engineering](#) — *architecture, code review, debugging, testing, iOS, web*
 5. [AI, Automation & Productivity](#) — *meta-prompting, agentic workflows, GTD, automation blueprints*
 6. [Writing, Editing & Storytelling](#) — *plotting, character, dialogue, nonfiction, screenwriting*
 7. [Social Media & Community Growth](#) — *Twitter threads, LinkedIn, Reels, YouTube, community*

1 — Marketing, Sales & Copywriting

100 Expert Prompts Inside

Brand positioning · sales letters · VSLs · Meta & Google ads · email sequences · pricing psychology · cold outbound · discovery calls · objection handling · VOC mining

1. Brand Positioning Statement Builder

Prompt: Act as a brand strategist who has led positioning for 3 unicorn SaaS companies. Using the Geoffrey Moore positioning framework, craft a positioning statement for [PRODUCT] serving [AUDIENCE] against [COMPETITOR]. Ask me 5 clarifying questions first about category, primary differentiator, proof points, and emotional payoff. Then output: (1) the full “For/Who/Is a/That/Unlike/Our product” statement, (2) 3 alternate versions ranked by boldness, and (3) a 1-sentence boardroom pitch.

2. Category Design Blueprint

Prompt: Act as a category designer trained in the Play Bigger methodology. For [PRODUCT] in the [INDUSTRY] space, design a new category that reframes the problem away from existing competitors. Analyze the current category’s constraints, name a new category with POV (point of view), and output: category name, POV manifesto (3 paragraphs), lightning strike launch idea, and the 5 words customers should associate with us. Include a “category king” test checklist.

3. Jobs-To-Be-Done Interview Script

Prompt: Act as a JTBD researcher trained by Bob Moesta and Clay Christensen. Write a 45-minute customer interview script for [PRODUCT] that uncovers the functional, emotional, and social jobs buyers hire it for. Include the 4 forces timeline (push, pull, anxiety, habit), first-thought moments, and switch triggers. Output as: (1) opening rapport questions, (2) timeline excavation questions, (3) force-mapping questions, (4) closing synthesis, and (5) red flags to listen for.

4. StoryBrand BrandScript Generator

Prompt: Act as a certified StoryBrand guide. Build a complete BrandScript for [COMPANY] selling [PRODUCT] to [AUDIENCE]. Fill every section of Donald Miller's 7-part framework: Character (customer), Problem (external/internal/philosophical), Guide (empathy + authority), Plan (3 steps), Call to Action (direct + transitional), Success, and Failure stakes. Output as a labeled table, then translate it into a 150-word homepage headline + subhead + CTA button copy.

5. Blue Ocean Strategy Canvas

Prompt: Act as a Blue Ocean strategist from INSEAD. Create a Strategy Canvas for [PRODUCT] against the top 3 competitors in [MARKET]. Apply the Four Actions Framework (Eliminate, Reduce, Raise, Create) to identify uncontested market space. Output: (1) current competing factors scored 1-10 per competitor, (2) ERRC grid, (3) new value curve description, (4) the "tagline test" one-liner that captures the new offering. Include one contrarian move most competitors would reject.

6. Message-Market Fit Audit

Prompt: Act as a messaging strategist who has run 50+ April Dunford-style positioning workshops. Audit the current messaging for [PRODUCT] at [URL]. Score it 1-10 on: clarity of who it's for, differentiated value, proof, competitive alternatives named, and "so what" test. Identify the #1 messaging gap costing conversions. Output as a table with Score/Evidence/Fix columns, then rewrite the hero section headline + subhead using the Dunford "not X, but Y" pattern.

7. Brand Voice Codification

Prompt: Act as a brand voice strategist who built voice guides for Mailchimp and Oatly. Given 5 samples of [COMPANY]'s existing copy (I will paste), codify the brand voice into a reusable guide. Output: (1) 4 voice dimensions on a slider (e.g., Formal-Casual), (2) "We are / We are not" list of 10 pairs, (3) vocabulary do/don't list, (4) 3 tone variations (educate, sell, apologize) with examples, (5) a 50-word voice test paragraph writers can copy-calibrate against.

8. Value Proposition Canvas Fill

Prompt: Act as a Strategyzer-certified business coach. Complete a full Value Proposition Canvas for [PRODUCT] targeting [CUSTOMER_SEGMENT]. On the customer side: 5 jobs, 5 pains ranked by severity, 5 gains ranked by relevance. On the value map: pain

relievers, gain creators, products/services. Then score the fit 1-10 and identify the weakest pain-reliever match. Output as two labeled columns, plus a “fit gap” paragraph with the one feature or message to develop next.

9. Differentiation Axis Finder

Prompt: Act as a positioning consultant trained by April Dunford. For [PRODUCT] competing against [COMPETITOR_1] and [COMPETITOR_2], identify 3 credible differentiation axes that aren’t “better features.” Consider: ideal customer segment, use case specialization, integration depth, speed of value, pricing model, support philosophy. Output a 2x2 perceptual map placing us + competitors, plus a 75-word “why we’re different” narrative using the strongest axis. Flag any axis that would bait a race-to-the-bottom.

10. Manifesto Writing Framework

Prompt: Act as a brand copywriter who has written manifestos for Apple, Nike, and Patagonia-level brands. Write a 250-word manifesto for [COMPANY] that articulates why we exist, what we stand against, and who we’re fighting for. Use short declarative sentences, contrast (“we believe X, not Y”), and one unifying battle cry. Output: (1) the full manifesto, (2) the 7-word boardroom version, (3) the 3 “enemy” concepts we reject. Do not use generic words like “innovative,” “passion,” or “journey.”

11. Long-Form Sales Letter Scaffold

Prompt: Act as a senior direct-response copywriter who has written \$100M+ in control-beating sales letters for Agora and Boardroom. Draft a 3,000-word sales letter for [PRODUCT] at [PRICE] targeting [AUDIENCE]. Use the Gary Halbert 19-step structure: attention-grabbing headline, deck copy, story lead, problem agitation, unique mechanism, offer, bonuses, guarantee, scarcity, P.S. Include 3 headline variations above the letter and specify where to split-test. Output as a fully formatted draft with section labels.

12. VSL Script (10-Minute)

Prompt: Act as a VSL scriptwriter who has produced videos generating \$50M+ in sales. Write a 10-minute video sales letter for [PRODUCT] at [PRICE]. Use the Russ Henneberry VSL structure: pattern interrupt hook, big promise, credibility stack, problem story, solution reveal, mechanism proof, offer stack, price justification, risk reversal, urgency, CTA. Output as a 2-column script (visual/voiceover) with timestamps every 60 seconds. Include a “hook A/B test” with 3 alternate opens.

13. Landing Page Conversion Rewrite

Prompt: Act as a CRO copywriter with 200+ winning A/B tests for SaaS landing pages. I'll paste a URL or copy. Rewrite it using the Joanna Wiebe "message hierarchy" method: top of page = most unaware, bottom = most ready. Apply the 5-second clarity test and the "one idea per section" rule. Output: (1) new hero headline + subhead + CTA, (2) 5 section headings in order, (3) social proof placement map, (4) objection section, (5) a checklist of 7 CRO fixes ranked by expected lift.

14. PAS Sales Page Opener

Prompt: Act as a direct-response copywriter trained in the Dan Kennedy school. Write 5 different Problem-Agitate-Solve openers (150 words each) for a sales page selling [PRODUCT] to [AUDIENCE]. Each opener should use a different emotional hook: fear, frustration, embarrassment, ambition, injustice. Output as a numbered table with columns: Hook Emotion / Opener Copy / Best For. End with the recommendation on which opener to lead with and why, based on audience temperature.

15. Headline Formula Stack

Prompt: Act as a headline copywriter who has studied every winning Agora control. Generate 25 headlines for [PRODUCT] serving [AUDIENCE] using these proven formulas: (1) How to X without Y, (2) The secret of X, (3) Who else wants X, (4) X ways to Y, (5) Warning: X, (6) If you X, you can Y, (7) Little known ways to X, (8) Give me X and I'll Y, (9) X mistakes X makes, (10) The lazy person's way to X. Output as a table with Formula / Headline / Predicted CTR (low/med/high) / Rationale.

16. Unique Mechanism Creator

Prompt: Act as a direct-response strategist trained by Stefan Georgi and Justin Goff. Create a proprietary "unique mechanism" name and explanation for why [PRODUCT] works when others fail. The mechanism should feel scientific, proprietary, and name-able (e.g., "The 3-Phase Collagen Cascade"). Output: (1) 5 mechanism name candidates, (2) the winning mechanism's 200-word explanation with 3 credibility anchors, (3) how to insert it into a sales page lead, (4) FTC-safe hedging language to avoid overclaiming.

17. Guarantee Design Workshop

Prompt: Act as an offer strategist who has designed guarantees for Alex Hormozi-level offers. Design 3 guarantee options for [PRODUCT] at [PRICE]: (1) standard money-back, (2) conditional outcome-based, (3) better-than-risk-free "pay us if it works." For each,

specify refund terms, fraud protection, expected refund rate, and psychological strength score 1-10. Output as a comparison table plus the exact copy block to insert in the sales page. Flag legal language to run by counsel.

18. Testimonial Mining Framework

Prompt: Act as a VOC researcher who builds social proof for conversion-optimized landing pages. Given [RAW_TESTIMONIAL_TEXT], extract the 5 most persuasive snippets using the “Specific > Emotional > Believable” filter. For each snippet, identify which objection it overcomes (price, effort, credibility, results, fit). Output as a table with Quote / Objection Countered / Placement Suggestion (hero, pricing, CTA, etc.). Then write a 50-word “featured testimonial” combining the best elements, formatted for hero placement.

19. Pricing Page Copy Rewrite

Prompt: Act as a SaaS pricing page copywriter who has lifted conversion 40%+ on Pipedrive-scale accounts. Rewrite the pricing page for [PRODUCT] with 3 tiers. For each tier, write: tier name (outcome-based, not “Pro”), 1-sentence positioning, price + billing note, 5 benefit bullets (not features), decoy effect on middle tier, CTA microcopy. Output as a 3-column table. Then add a 100-word “which plan is right for you” comparison block and 3 FAQs addressing pricing objections.

20. Above-The-Fold Stress Test

Prompt: Act as a landing page conversion specialist from CXL. Stress-test the above-the-fold section of [URL] against the 10-point MECLABS clarity rubric: value proposition clarity, exclusivity, credibility, friction, anxiety, motivation, alignment, relevance, eye-path, mobile fold. Score each 1-5 with evidence and prescribe the single highest-ROI fix. Output as a scored rubric table, then deliver the rewritten hero as: eyebrow / H1 / subhead / trust strip / primary CTA / secondary CTA. Include one bold contrarian suggestion.

21. 7-Day Welcome Email Sequence

Prompt: Act as a lifecycle email strategist who has built 6-figure welcome sequences for info-product brands. Write a 7-email welcome sequence for new [PRODUCT] subscribers. Map each email to: Day 0 (deliver lead magnet + origin story), Day 1 (core belief), Day 2 (big problem), Day 3 (soft sell), Day 4 (case study), Day 5 (objection handling), Day 6 (hard sell with deadline). Output each email with subject line, preview text, 150-250 word body, P.S., and CTA. Include 2 subject line variations per email.

22. Re-Engagement Winback Campaign

Prompt: Act as an email retention strategist who has reactivated 6-figure lists for Shopify brands. Design a 4-email winback campaign for subscribers inactive 90+ days on [LIST]. Use this arc: Email 1 (curiosity “did we do something wrong?”), Email 2 (value bomb, no ask), Email 3 (best-of highlights), Email 4 (goodbye + last-chance offer). Output each with subject line, preview, body, CTA. Include the segmentation SQL/filter logic, send-time recommendation, and the unsubscribe threshold to stop.

23. Launch Email Sequence (Pre/During/Post)

Prompt: Act as a launch copywriter who has run 7-figure Jeff Walker PLF campaigns. Write a 9-email launch sequence for [PRODUCT] launching on [DATE] at [PRICE]. Map: 3 pre-launch (PLC1 opportunity, PLC2 transformation, PLC3 experience), 3 open-cart (cart opens, social proof, objections), 3 close-cart (24 hours, 6 hours, 1 hour). Output each with subject, preview, 200-word body, CTA. Include the scarcity mechanic and one “bonus unlock” trigger mid-campaign. Label emotional tone per email.

24. Nurture Sequence For Cold Leads

Prompt: Act as a B2B SaaS lifecycle marketer. Build a 10-email nurture sequence for cold leads who downloaded [LEAD_MAGNET] but haven’t booked a demo. Use the “Education-Insight-Case Study-Soft CTA-Hard CTA” pattern across 4 weeks. Each email must deliver one tactical insight before any pitch. Output as a table with columns: Day / Subject / Preview / Core Insight / CTA / Goal. Then write Email 1 and Email 5 in full (300 words each). Include the tag/segment logic to enter and exit the sequence.

25. Cart Abandonment Flow (Ecom)

Prompt: Act as an ecommerce email strategist who runs Klaviyo flows for 8-figure DTC brands. Build a 5-email abandoned cart sequence for [STORE] selling [PRODUCT_TYPE] at [AOV]. Timing: 1 hour, 4 hours, 24 hours, 48 hours, 72 hours. Include: reminder, social proof, FAQ/objection buster, discount offer (only if AOV > \$X), last chance. Output each email with subject, preview, hero image direction, 100-word body, CTA. Flag which email to A/B test and the expected recovery rate benchmark.

26. Subject Line A/B Test Bank

Prompt: Act as an email copywriter who has split-tested 5,000+ subject lines. For [EMAIL_TOPIC] to [AUDIENCE], generate 20 subject lines across 5 psychological categories (4 each): curiosity gap, self-interest, social proof, urgency, personal/story. Each

line must be under 45 characters. Output as a table with: Category / Subject Line / Character Count / Predicted Open Rate Tier (Hi/Med/Lo) / Why It Works. Then recommend the top 2 to test against and the control subject line to beat.

27. Broadcast Email Weekly Framework

Prompt: Act as a creator economy email strategist who has grown newsletters to 100k+ subscribers. Design a repeatable weekly broadcast template for [NEWSLETTER] in the [NICHE] niche. Output: (1) weekly section structure (hook, main lesson, tool/link, community shoutout, CTA), (2) word count targets per section, (3) editorial calendar themes for 4 weeks, (4) 3 evergreen subject line templates, (5) one growth loop to ask subscribers to share. Include a “don’t do this” list of 5 newsletter killers.

28. Post-Purchase Email Sequence

Prompt: Act as a CX email strategist for premium digital products. Write a 6-email post-purchase sequence for buyers of [PRODUCT] at [PRICE]. Goals: maximize consumption, reduce refunds, drive reviews, trigger upsell. Map: Email 1 (welcome + access), Email 2 (quick win), Email 3 (milestone check-in), Email 4 (case study), Email 5 (review ask), Email 6 (upsell to [NEXT_PRODUCT]). Output each with subject, preview, 200-word body, CTA, and send-time. Include refund-rate reduction rationale.

29. Newsletter Lead Magnet Funnel

Prompt: Act as a lead gen strategist who builds high-converting lead magnet funnels. Design a complete funnel to turn a [LEAD_MAGNET_TOPIC] into 1,000 subscribers/month for [AUDIENCE]. Output: (1) lead magnet title + 3 alternatives using the “Ultimate/Blueprint/Cheat Sheet” frameworks, (2) opt-in page copy (headline, subhead, 3 bullets, CTA, trust line), (3) thank-you page upsell, (4) first 3 nurture emails, (5) paid traffic ad hook. Specify opt-in conversion benchmark to aim for.

30. Email Deliverability Copy Audit

Prompt: Act as an email deliverability expert who has rescued suspended SendGrid accounts. Audit the last [X] emails from [SENDER] for spam trigger language, link density, image/text ratio, and subject line red flags. Output: (1) spam score per email (1-10), (2) list of trigger words detected, (3) rewrite of the worst offender, (4) 5-point sender reputation action plan, (5) “safe word” replacements for common flags (e.g., “free,” “guarantee,” “100%”). Include Gmail Postmaster benchmarks.

31. Meta Ad Copy (5 Angles)

Prompt: Act as a Meta ads copywriter who has managed \$10M+ in DTC ad spend. For [PRODUCT] at [PRICE] targeting [AUDIENCE], write 5 primary text variations (125 words max each) using 5 different angles: (1) problem-aware pain, (2) transformation story, (3) contrarian take, (4) social proof reel, (5) direct offer. Each must pass the “scroll-stop first line” test. Output as a table with: Angle / Primary Text / Headline (40 char) / Description (30 char) / CTA button / Audience temperature.

32. Meta Creative Brief Generator

Prompt: Act as a creative strategist at a 9-figure DTC ad agency. Write a Meta creative brief for [PRODUCT] targeting [AUDIENCE]. Output the standard Motion/Atria format: (1) creative concept title, (2) target persona one-liner, (3) hook (first 3 seconds), (4) body structure (problem/solution/proof/CTA), (5) on-screen text overlay script, (6) b-roll shot list, (7) suggested aspect ratios, (8) UGC vs studio recommendation, (9) 3 headline variants. Flag the #1 hypothesis being tested.

33. Facebook Ad Hook Library

Prompt: Act as a paid social copywriter specializing in first-line hooks that stop the scroll. For [PRODUCT] in the [NICHE] space, generate 25 first-line ad hooks (under 15 words each) across 5 categories: question, shocking stat, contrarian, personal confession, unexpected comparison. Output as a table: Category / Hook / Why It Stops Scroll / Best Audience Stage (cold/warm/hot). Then pick the top 3 to test first and explain the creative test plan over 2 weeks and a \$500 budget.

34. UGC Ad Script (30 Seconds)

Prompt: Act as a UGC scriptwriter who has written ads for Ridge Wallet and Dr. Squatch. Write a 30-second UGC ad script for [PRODUCT] at [PRICE]. Structure: Hook (0-3s), Problem setup (3-8s), Product reveal (8-15s), Benefit stack (15-22s), Social proof (22-27s), CTA (27-30s). Output as a 2-column table (Spoken VO / On-Screen Action) with timestamps. Include: 3 alternate hooks, 2 b-roll variations, text overlay copy, and the ad’s single “memorable moment.” Creator direction: speak conversationally.

35. Retargeting Ad Sequence

Prompt: Act as a full-funnel paid media strategist. Design a 4-stage retargeting ad sequence for [PRODUCT] at [PRICE]: (1) 1-3 day post-visit (reminder), (2) 4-7 day (social proof), (3) 8-14 day (objection handler), (4) 15-30 day (discount/urgency). For

each stage, output: audience definition, ad copy (125 words), headline, creative format recommendation, suggested CPM budget split. End with a flowchart of exit conditions (purchase, unsubscribe, 30-day window) and expected ROAS lift per stage.

36. Cold Audience Ad Copy

Prompt: Act as a direct-response media buyer who writes for cold Meta audiences. Write 3 long-form (300-word) ad bodies for [PRODUCT] targeting cold traffic [AUDIENCE]. Each must follow the “Story-Problem-Mechanism-Proof-Offer” arc used by Agora and ClickBank. No jargon, 6th-grade reading level. Output each with: hook first line, story section, mechanism reveal, 2 proof points, offer, CTA, headline 40 chars, description 30 chars. Recommend which angle to lead with based on market sophistication level.

37. Meta Ad Compliance Rewrite

Prompt: Act as a Meta ad compliance specialist who has appealed 500+ rejected ads. Rewrite [AD_COPY] to pass Meta’s ad policies around personal attributes, health claims, and misleading assertions. Output: (1) original vs. rewritten side-by-side, (2) list of flagged phrases and safer replacements, (3) compliance confidence score 1-10, (4) a “hedging language library” for the [NICHE] vertical. Include what NOT to say explicitly (e.g., “you” phrases for health/finance) and the appeal template if rejected.

38. Carousel Ad Copy Template

Prompt: Act as a carousel ad copywriter for ecommerce brands. Design a 5-card carousel ad for [PRODUCT] at [PRICE]. Structure: Card 1 (hook/problem), Card 2 (benefit 1 with social proof), Card 3 (benefit 2), Card 4 (objection buster), Card 5 (offer + CTA). For each card, output: image direction, headline (40 char), description (30 char). Plus: primary text above the carousel (125 words) and 3 A/B test variations for Card 1 only. Recommend sequence for cold vs retargeting audiences.

39. Meta Ad Performance Analyzer

Prompt: Act as a performance creative analyst. Given these ad metrics [CTR, CPC, CPM, ROAS, Hook Rate, Hold Rate, Frequency] for [AD_NAME] running to [AUDIENCE] at [SPEND], diagnose what’s broken. Output: (1) the single bottleneck (hook, body, offer, audience, creative fatigue), (2) evidence-based reasoning, (3) 3 test hypotheses to fix it ranked by expected impact, (4) new ad variant copy for the top hypothesis, (5) kill/scale/iterate decision framework. Include the specific metric threshold for each decision.

40. Whitelisted Creator Ad Brief

Prompt: Act as an influencer whitelisting strategist who has run Creator Ads for 8-figure brands. Write a creator brief for [CREATOR] in [NICHE] to post an ad for [PRODUCT] under whitelist rights. Include: hook direction (3 options), product talking points (5 max), prohibited claims, required disclosures, caption draft, do's/don'ts list, 3 reference ads, timeline, usage rights, and performance bonus structure. Output in a clean brief format a creator can execute without follow-up questions.

41. Google Search Ad RSA Builder

Prompt: Act as a Google Ads specialist who has managed \$5M+ on search campaigns. Build a Responsive Search Ad for [PRODUCT] targeting keyword theme [KEYWORDS]. Output: 15 headlines (30 char max) covering brand, benefit, feature, CTA, urgency, social proof, price, location; 4 descriptions (90 char max) covering value prop, offer, trust, CTA. Pin 2 headlines strategically and explain why. Include 5 recommended sitelinks, 4 callouts, and 3 structured snippets. End with the expected Ad Strength rating.

42. Keyword Intent Mapping

Prompt: Act as a PPC strategist specializing in search intent. Given [KEYWORD_LIST] for [PRODUCT], classify each keyword into one of 4 intent buckets: informational, navigational, commercial investigation, transactional. For each bucket, recommend: match type, landing page, bid modifier, ad copy angle. Output as a table with columns: Keyword / Intent / Match Type / Landing Page / Bid Strategy / Ad Angle / Expected CPA. Flag negative keywords to add and explain the “money keyword” to protect with highest bid.

43. Google Ads Extension Pack

Prompt: Act as a Google Ads account manager who optimizes for high Ad Rank. For [BUSINESS] selling [PRODUCT], write a complete extensions package: 8 sitelinks (25 char + 2 description lines), 10 callouts (25 char), 8 structured snippets across 3 categories, 3 promotion extensions, 2 lead form extensions, and image extension shot direction. Output as a structured list grouped by extension type. Include the “don't duplicate ad copy” rule check and which extensions to prioritize for a \$2K/month budget.

44. Shopping Ad Product Title Optimizer

Prompt: Act as a Google Shopping optimization specialist. Rewrite [CURRENT_PRODUCT_TITLE] following Google's title hierarchy for [PRODUCT_TYPE]: Brand + Product Type + Attributes (size, color, material, gender) + Model. Max 150

chars, optimize for search match. Output: (1) rewritten title, (2) 3 variants to A/B test, (3) top 5 attributes to include based on [CATEGORY] buying behavior, (4) title mistakes to avoid, (5) expected impression share lift. Include GTIN and MPN best practices.

45. Competitor Conquest Ad Strategy

Prompt: Act as a PPC growth hacker who runs competitor conquest campaigns ethically. For [OUR_BRAND] vs [COMPETITOR] in [CATEGORY], design a conquest campaign targeting competitor-brand keywords. Output: (1) trademark compliance checklist, (2) 10 ad headlines that contrast without using competitor's name in ad copy, (3) landing page framework for the "we vs them" page, (4) expected CPC premium and ROAS threshold to justify, (5) risk of retaliation scoring. Include a kill-switch metric.

46. Performance Max Asset Group

Prompt: Act as a Google Ads strategist specializing in Performance Max campaigns. Build a complete asset group for [PRODUCT] targeting [AUDIENCE_SIGNAL]. Output: 5 headlines (30 char), 5 long headlines (90 char), 5 descriptions (90 char), 1 business name, 1 call-to-action, 4 image direction briefs (landscape, square, portrait), 1 logo spec, 1 video script (15s). Include audience signal recommendations and the single ROAS target to set. Flag what happens if you don't give enough asset variety.

47. Local Services Ad Copy

Prompt: Act as a local PPC specialist for service businesses. Write Google Ads copy for [LOCAL_SERVICE] in [CITY]. Output: 15 headlines emphasizing location, trust (licensed/insured/years), urgency (same-day), social proof (reviews), price transparency; 4 descriptions; location extension text; call extension hours; lead form fields. Then write the landing page hero: H1 + subhead + 3 trust bullets + CTA + phone number placement. Include Google Business Profile tie-in recommendations.

48. Quality Score Recovery Plan

Prompt: Act as a Google Ads account auditor. Given [KEYWORD] with Quality Score of [X] and CTR of [Y]%, diagnose why QS is low across the 3 components: expected CTR, ad relevance, landing page experience. Output: (1) component scoring table, (2) 5 specific fixes prioritized by expected QS lift, (3) rewritten ad copy that matches query intent better, (4) landing page checklist, (5) 30-day QS recovery plan with weekly milestones. Include the CPC savings math if QS moves from [X] to 8.

49. Google Ads Negative Keyword Builder

Prompt: Act as a PPC waste-killer who has saved accounts 40%+ on irrelevant spend. For [PRODUCT] in [INDUSTRY], build a complete negative keyword list in 6 categories: informational (“how to,” “what is”), DIY (“free,” “template”), wrong intent (“jobs,” “careers”), wrong audience (“kids,” “wholesale”), competitor names, brand irrelevant. Output as 6 organized lists with match type recommendations (broad/phrase/exact). Include 20 negatives specific to [INDUSTRY] I wouldn’t think of and the expected wasted-spend reduction.

50. YouTube Ads Hook Library

Prompt: Act as a YouTube Ads creative director who has launched 7-figure TrueView campaigns. For [PRODUCT], write 10 first-5-second hooks designed to survive the skip button. Use 5 formats: pattern interrupt visual, direct address, shocking stat, bold claim, cliffhanger question. Each hook includes spoken line + on-screen visual direction. Output as a table with: Hook / Visual / Format / Audience Temperature. Then pick the 3 most likely to earn the view and explain the 5-second skip psychology.

51. Product Launch Messaging Matrix

Prompt: Act as a product marketing manager who has launched 15+ SaaS products. Build a launch messaging matrix for [PRODUCT] targeting 3 personas [PERSONA_1, 2, 3]. For each persona, output: (1) primary pain, (2) core value prop (one sentence), (3) headline, (4) 3 feature-to-benefit translations, (5) lead objection + response, (6) preferred proof type. Format as a 3-column matrix. Then distill all 3 into a unifying “north star” tagline that works across personas. Include the launch channel fit per persona.

52. Launch Announcement Blog Post

Prompt: Act as a tech PR writer who has placed launches in TechCrunch and The Verge. Write a 1,000-word launch announcement blog post for [PRODUCT] by [COMPANY]. Structure: hook (why now), problem story, solution reveal, how it works (3 steps), customer quote, pricing/availability, founder quote, what’s next. Output as a formatted post with SEO title (60 char), meta description (155 char), 3 H2s, and 5 internal link anchor suggestions. Include a 280-char tweet and a 3-line LinkedIn repost.

53. Beta User Recruitment Plan

Prompt: Act as a growth marketer who has recruited 500+ beta users for early-stage startups. Design a recruitment plan for 100 beta users of [PRODUCT] in 14 days. Output: (1) ideal beta user profile (3 must-haves), (2) 5 channels ranked by expected CAC, (3) messaging framework per channel, (4) landing page copy (headline, subhead, 3 bullets, form fields, CTA), (5) screening questions to filter quality, (6) nurture sequence to activate them. Include the “skin in the game” mechanic to increase commitment.

54. Product Hunt Launch Kit

Prompt: Act as a Product Hunt launch strategist who has gotten 5 products to #1 Product of the Day. For [PRODUCT] launching on [DATE], build the complete PH kit: (1) tagline (60 char, outcome-focused), (2) description (260 char), (3) first comment template (founder story), (4) 5 gallery image directions, (5) 3 hunter outreach messages, (6) launch-day timeline (hourly), (7) maker response templates for common questions. Include the “first 4 hours” engagement plan and PH algorithm tips.

55. Waitlist Landing Page

Prompt: Act as a pre-launch growth marketer who built waitlists for Superhuman and Arc Browser. Write a waitlist landing page for [PRODUCT] launching in [TIMEFRAME]. Output: (1) eyebrow tag, (2) curiosity-gap H1, (3) subhead (positioning + scarcity), (4) 3 “what makes this different” bullets, (5) social proof line, (6) email form with CTA, (7) post-signup viral loop (referral leaderboard). Include the referral program mechanics (how many referrals = early access) and the post-signup email. Explain why waitlists work psychologically.

56. Launch Week Daily Theme Plan

Prompt: Act as a launch marketer who has run “launch weeks” for Linear, Raycast, and Vercel. Design a 5-day launch week for [PRODUCT] with one feature drop per day. Output: (1) daily theme + feature, (2) hero visual direction, (3) tweet thread outline, (4) blog post title, (5) email subject line, (6) community/Discord activation, (7) press pitch angle. Format as a 5-day calendar. Include the “grand finale” on Day 5 and the metrics to track per day (signups, tweets, visits).

57. Pricing Launch Messaging

Prompt: Act as a pricing strategist who has repositioned SaaS pricing at Intercom-level companies. Write the messaging to launch a pricing change for [PRODUCT]: moving from [OLD_PRICING] to [NEW_PRICING]. Output: (1) customer email explaining the change

empathetically, (2) in-app banner copy, (3) FAQ addressing 5 hard questions, (4) grandfather clause language, (5) sales team talking points, (6) worst-case PR response draft. Tone: honest, customer-first, not defensive. Include the “why now” narrative that makes the change feel earned.

58. Launch Case Study Interview

Prompt: Act as a B2B case study writer who interviews customers for Gong and Lattice. Write a 12-question interview script to extract a launch-ready case study from [CUSTOMER] who used [PRODUCT] to achieve [RESULT]. Structure: context (3 Qs), before state (3 Qs), solution journey (3 Qs), after state with metrics (3 Qs). Each question should elicit specific, quotable answers (not yes/no). Output: (1) full script, (2) follow-up probing questions, (3) 5 quote formats to extract, (4) consent + approval template.

59. Pre-Order Campaign Copy

Prompt: Act as a crowdfunding copywriter who has launched \$2M+ Kickstarter campaigns. Write a pre-order campaign page for [PRODUCT] at [PRICE]. Structure: hero (hook + product shot), problem story, product reveal, 5 feature deep-dives, founder story, tier breakdown, stretch goals, FAQ, risks. Output each section in full copy. Include 3 tier names + descriptions, social proof placement, scarcity mechanic, and the “why pre-order now” urgency line. Specify the video script hook (first 15 seconds).

60. GTM One-Pager

Prompt: Act as a PMM director at a Series B SaaS company. Write a one-page GTM brief for launching [PRODUCT] to [AUDIENCE] on [DATE]. Sections: positioning statement, ICP (2 sentences), key message, 3 proof points, launch goals (leading + lagging), channels with owners, content assets needed, timeline, risk register. Output as a structured one-pager in markdown. Include the single success metric and the “go/no-go” checklist 48 hours before launch. Keep it under 400 words.

61. Charm Pricing Experiment Design

Prompt: Act as a pricing psychologist trained on Lee Caldwell’s and Dan Ariely’s work. Design 3 pricing experiments for [PRODUCT] currently priced at [PRICE]. Test variables: (1) charm pricing (\$X.99 vs \$X.00), (2) anchoring with decoy tier, (3) bundle vs unbundle. For each experiment, output: hypothesis, test setup, sample size needed, duration, primary metric, expected lift range, risk. Format as a table. End with the single experiment to run first and why, based on current price elasticity assumptions.

62. Decoy Effect Pricing Design

Prompt: Act as a behavioral economist applying Dan Ariely's decoy effect. For [PRODUCT] with current tiers [BASIC, PRO], design a decoy tier that pushes buyers toward the target tier. Output: (1) new 3-tier structure with decoy placement, (2) the "dominated alternative" logic, (3) feature and price differentials, (4) tier name and positioning copy, (5) expected conversion shift from basic to pro. Include one ethical consideration about manipulation vs guidance. Show the psychological math of why the decoy works.

63. Value-Based Pricing Calculator

Prompt: Act as a value-based pricing consultant who prices B2B SaaS for Fortune 500 buyers. Build a value-based pricing calculator for [PRODUCT] sold to [PERSONA]. Output: (1) 5 value drivers (time saved, revenue generated, risk reduced, etc.), (2) the quantification formula for each, (3) typical customer value range (low/med/high), (4) the "10x rule" price capture (we price at 10% of value), (5) the pricing conversation script for sales. Include how to present value vs list price in negotiations.

64. Offer Stack Design (Hormozi)

Prompt: Act as Alex Hormozi writing a "Grand Slam Offer" for [PRODUCT]. Stack the offer using the Value Equation: increase dream outcome, increase perceived likelihood of achievement, decrease time delay, decrease effort/sacrifice. Output: (1) core offer, (2) 5 bonuses each priced individually, (3) total value, (4) offered price, (5) scarcity mechanic, (6) urgency mechanic, (7) guarantee, (8) the "only a fool would say no" pitch. Format as a sales page offer block. Include the ideal value-to-price ratio (10:1 minimum).

65. Annual vs Monthly Pricing Incentive

Prompt: Act as a SaaS pricing strategist who has shifted 60%+ of customers to annual plans. For [PRODUCT] at [MONTHLY_PRICE], design the annual pricing incentive. Output: (1) recommended annual discount (%), (2) 3 alternative incentive structures (discount, bonus months, feature unlock), (3) pricing page copy showing annual savings, (4) checkout toggle microcopy, (5) in-app prompt to upgrade existing monthly customers, (6) expected cash flow impact. Include the "break-even" customer lifetime to justify the discount.

66. Freemium Conversion Economics

Prompt: Act as a freemium product strategist from a PLG SaaS. For [PRODUCT] with current free-to-paid conversion of [X]%, redesign the freemium gate. Output: (1) 3 features to move from free to paid (with rationale), (2) 3 features to move from paid to free (with rationale), (3) new “aha moment” trigger in the free tier, (4) paywall copy for the upgrade moment, (5) expected conversion lift. Include the freemium “value ladder” and the risk of cannibalizing existing paid users.

67. Enterprise “Call for Pricing” Strategy

Prompt: Act as an enterprise pricing strategist for a B2B SaaS. Design the enterprise tier for [PRODUCT] with “call for pricing” strategy. Output: (1) the features that unlock enterprise, (2) 3 pricing signal quality bars (company size, use case, integration needs), (3) qualification form on “talk to sales” button, (4) pricing discovery call script, (5) proposal template structure, (6) typical ACV benchmark. Include the pros/cons of public enterprise pricing vs hidden. Flag the “sticker shock” risk.

68. Discount Strategy Playbook

Prompt: Act as a revenue operations leader who runs quarterly discount programs. Write a discount strategy playbook for [PRODUCT] at [PRICE]. Output: (1) 4 discount types (seasonal, volume, loyalty, win-back) with trigger rules, (2) max discount floor per segment, (3) approval workflow (rep → manager → CRO), (4) discount language that preserves brand equity, (5) measurement KPIs (margin protection, churn effect). Include the “never discount” rules and the “discounting is a tool, not a habit” internal message.

69. Upsell Offer Timing Framework

Prompt: Act as a CS-driven upsell strategist who runs expansion for a PLG SaaS. For [PRODUCT] with [TIER_STRUCTURE], design the upsell timing framework. Output: (1) 5 usage signals that indicate upsell readiness, (2) in-app trigger copy per signal, (3) email upsell sequence (3 emails), (4) CSM talking points, (5) the “soft ceiling” to create scarcity, (6) expected upsell win rate per signal. Include one controversial take: never upsell based on [X]. Format as a playbook with decision tree.

70. Bundle Psychology Design

Prompt: Act as a pricing psychologist specializing in bundle design. For [PRODUCT_A] at [PRICE_A] and [PRODUCT_B] at [PRICE_B], design 3 bundle options: (1) pure bundle (only together), (2) mixed bundle (together or separate), (3) BOGO variant. For each, output: bundle price, savings shown, anchor math, behavioral rationale, expected take-

rate, positioning copy. End with the recommended bundle and the A/B test setup. Include why bundles increase perceived value even when the savings are modest (transaction utility theory).

71. LinkedIn Cold Outbound Sequence

Prompt: Act as a B2B sales leader who has built 8-figure outbound engines. Write a 6-touch LinkedIn outbound sequence targeting [ICP_TITLE] at [COMPANY_SIZE] in [INDUSTRY] for [PRODUCT]. Sequence: (1) connection request with personal hook (300 char), (2) thank-you + soft value, (3) relevant insight share, (4) case study drop, (5) direct ask for meeting, (6) breakup message. Output each message with character count. Include the personalization variables to research and the “don’t do this” list of 5 cringe patterns.

72. Cold Email Framework (3-Liner)

Prompt: Act as a sales enablement director who writes outbound that books 10%+ meeting rates. Write a 3-line cold email for [PERSONA] at [COMPANY_TYPE] pitching [PRODUCT]. Framework: Line 1 (trigger + relevance), Line 2 (specific value prop with proof), Line 3 (low-friction CTA). Total under 75 words. Output: (1) 5 subject line options (3-6 words), (2) 3 email variants using different triggers, (3) follow-up #2 through #5 copy, (4) opt-out line, (5) signature format. Include the “calendar link or no” debate answer.

73. LinkedIn Profile-As-Funnel Rewrite

Prompt: Act as a LinkedIn ghostwriter who has built 100k+ follower profiles for founders. Rewrite [PERSON]’s LinkedIn profile to convert visitors into inbound leads for [PRODUCT]. Output: (1) headline (220 char), (2) banner image direction, (3) About section (2,000 char max) following the “Story → Credibility → CTA” arc, (4) featured section picks, (5) experience bullet formulas, (6) activity strategy. Include the “first-line hook” test and the specific CTA placement that drives DMs.

74. Intent-Based Outbound Trigger Finder

Prompt: Act as an outbound strategist using intent data from 6sense and Clay. For [PRODUCT] targeting [ICP], identify 10 buying intent triggers that signal “ready to buy this quarter.” Categories: hiring signals, tech stack changes, funding events, executive moves, content engagement, job posting language, competitor churn. Output as a table with: Trigger / Data Source / Outreach Speed (hours) / Message Angle / Expected Reply Rate. Include a Clay enrichment table schema to automate detection.

75. Sales Navigator Search Strings

Prompt: Act as a RevOps analyst who builds precision prospecting lists. For [PRODUCT] targeting [ICP_DEFINITION], build 5 LinkedIn Sales Navigator search queries that return under 500 high-quality prospects each. Use filters: title keywords (Boolean), seniority, company size, industry, geography, tech stack, company growth. Output as 5 labeled search strings with expected result count and a “why this segment” paragraph. Include the “forbidden” filters that dilute quality and the save-as-list naming convention.

76. Cold Call Opener Script

Prompt: Act as an SDR manager who has trained 200+ reps in cold calling. Write a cold call opener script for [PRODUCT] to [PERSONA]. Structure: pattern interrupt (not “how are you”), permission-based intro, relevance hook, 1-sentence value prop, direct ask. Output: (1) the opener verbatim, (2) 5 common objections + responses (gatekeeper, “send email,” “we’re good,” “not interested,” “call back later”), (3) voicemail template, (4) post-call email template. Include tone coaching: confident, curious, not salesy.

77. Multi-Channel Cadence Design

Prompt: Act as a sales engagement strategist designing Outreach/Salesloft cadences. For [PRODUCT] targeting [ICP], design a 14-day, 12-touch multi-channel cadence mixing email, LinkedIn, phone, and video. Output as a day-by-day table with: Day / Channel / Action / Template Name / Personalization Depth (1-3) / Conversion Goal. Include 2 email templates in full and the “breakup” message. Specify which touches require manual personalization vs automation. Include expected reply rate benchmark.

78. Referral Ask Framework

Prompt: Act as a B2B sales coach specializing in referral selling. Write a referral ask framework for AEs closing [PRODUCT] deals with [CUSTOMER]. Output: (1) the exact timing (when in the customer lifecycle), (2) the 3-part ask script (acknowledgment, specific ask, easy introduction), (3) the intro email template the customer forwards, (4) the LinkedIn mutual intro request, (5) post-referral thank-you. Include the “referral multiplier” math: why 1 happy customer can generate 3+ meetings. Flag the worst time to ask.

79. Outbound Personalization Framework

Prompt: Act as an outbound copywriter balancing personalization and scale. Define a 3-tier personalization framework for [PRODUCT] outbound: Tier 1 (mass, 0 research), Tier 2 (medium, 5-min research), Tier 3 (deep, 30-min research). For each tier, output: target

segment, research sources, personalization variables, email template, expected reply rate, cost per meeting. Format as a comparison table. Recommend the tier mix for a 3-person SDR team hitting [PIPELINE_TARGET]. Include the Clay/Apollo automation stack per tier.

80. Inbound-To-Outbound Handoff

Prompt: Act as a revenue ops leader connecting marketing and sales. Design the handoff process for when an inbound lead (MQL) becomes an outbound target. Output: (1) MQL scoring criteria, (2) routing rules by ICP fit and intent, (3) 3 first-touch scripts based on lead source (demo request, content download, pricing view), (4) SLA for first response, (5) multi-thread strategy, (6) reporting dashboard KPIs. Include the “speed to lead” rule and the 5x decrease in conversion after 1 hour.

81. VOC Mining from Reviews

Prompt: Act as a voice-of-customer researcher who mines Amazon, G2, and Reddit for copy gold. Given [PRODUCT_CATEGORY], build the VOC mining workflow: (1) 5 sources to scrape, (2) 10 search queries to run on Reddit, (3) classification taxonomy (pains, desires, hesitations, alternatives, trigger events), (4) phrase extraction rules, (5) how to turn raw reviews into headlines and bullets. Output a sample 10-phrase swipe file from a hypothetical review. Include the “exact customer words beat clever copy” rule.

82. Customer Interview Guide (30 min)

Prompt: Act as a user researcher trained in Teresa Torres’ continuous discovery. Write a 30-minute customer interview guide for [PRODUCT] users. Structure: warm-up (2 Qs), recent experience (4 Qs), job story excavation (5 Qs), workaround probing (3 Qs), future state (2 Qs). Output as a question list with time estimates and follow-up probes. Include the “5 whys” technique usage, red flags to avoid (leading questions), and the post-interview synthesis template. Add consent and recording disclosure language.

83. Survey Design (NPS + Open-Ended)

Prompt: Act as a survey methodologist who designs customer research for enterprise SaaS. Design a 6-question customer survey for [PRODUCT] blending NPS, CSAT, and open-ended insight questions. Output: (1) exact question wording, (2) answer scales, (3) branching logic (if detractor, ask X; if promoter, ask Y), (4) estimated completion time, (5) distribution strategy (in-app vs email), (6) analysis framework. Include the “why did you score X” question placement and 3 open-ended questions that extract quotable marketing copy.

84. Win/Loss Interview Framework

Prompt: Act as a win/loss analyst who has interviewed 500+ buyers for Fortune 500 B2B vendors. Write a 45-minute win/loss interview script for [PRODUCT] after a deal outcome. Cover: evaluation trigger, criteria, vendors considered, decision process, our strengths/weaknesses, competitor strengths/weaknesses, final decision driver, what would have changed the outcome. Output as a question list with probing follow-ups. Include the “blameless language” rule and the 3-person interview panel (you + AE + neutral). Specify consent and anonymization.

85. Message Testing with Wynter

Prompt: Act as a messaging researcher who uses Wynter or panel tests for B2B positioning. Design a message test for [PRODUCT] across 3 positioning options. Output: (1) 3 message variants (headline + subhead + 3 bullets), (2) test audience definition (title, industry, size), (3) 6 evaluation questions (clarity, relevance, differentiation, believability, motivation, next action), (4) expected sample size, (5) analysis framework. Include the “sort by belief change, not likability” rule. Output a results interpretation template.

86. Churn Survey That Actually Works

Prompt: Act as a retention strategist who has reduced SaaS churn 30%+ through VOC. Design a churn survey for [PRODUCT] that extracts actionable insights (not vanity “sorry to see you go” data). Output: (1) 5 question survey with branching logic, (2) the “real reason vs stated reason” question framework, (3) incentive to complete (and whether to offer one), (4) triage workflow (save vs let go), (5) monthly reporting template. Include the “one quote per week” synthesis habit that drives roadmap decisions.

87. Persona Research from Public Data

Prompt: Act as a customer research analyst who builds personas without expensive panels. For [PRODUCT] targeting [ICP], build a persona using only public data sources: LinkedIn, Reddit, Twitter, G2 reviews, job postings, podcasts. Output: (1) 10 data sources to mine, (2) extraction template (goals, pains, tools, language, peers), (3) the “day in the life” narrative (300 words), (4) 5 exact phrases to use in copy, (5) persona validation criteria. Include the “don’t trust stated, watch behavior” principle.

88. Voice Of Customer Pain Point Heatmap

Prompt: Act as a VOC analyst who visualizes customer pain across the journey. For [PRODUCT], build a pain heatmap across the customer journey stages: awareness, consideration, purchase, onboarding, daily use, renewal. Output: (1) top 3 pains per stage with severity score, (2) data source per pain (support tickets, reviews, interviews), (3) “hot spots” where pain concentrates, (4) 5 prioritized fixes ranked by impact/effort, (5) messaging opportunities at each stage. Format as a heatmap table. Include the “fix 1 pain = 10 new happy customers” math.

89. Competitor Review Mining

Prompt: Act as a competitive intelligence analyst who extracts positioning gold from G2 and Capterra reviews. For [COMPETITOR] in [CATEGORY], mine their 1-3 star reviews for unmet needs, switching triggers, and feature gaps. Output: (1) top 5 complaint themes with frequency, (2) 3 feature gaps we can exploit, (3) 5 exact phrases to use in our “why switch” messaging, (4) the switching trigger language, (5) 3 objections competitors leave unaddressed. Flag any complaint we should NOT solve (distraction from ICP).

90. Jobs-To-Be-Done Statement Generator

Prompt: Act as a JTBD strategist trained by Tony Ulwick’s Outcome-Driven Innovation. For [PRODUCT] used by [CUSTOMER], write 10 properly structured JTBD statements using the format: “When [situation], I want to [motivation], so I can [expected outcome].” Then prioritize them by strategic importance and satisfaction (ODI matrix). Output: (1) 10 job statements, (2) 2x2 importance/satisfaction plot, (3) the “hidden job” competitors are missing, (4) product roadmap implications. Include the Ulwick criteria for a valid JTBD statement.

91. Discovery Call Framework (MEDDIC)

Prompt: Act as a B2B sales trainer who has coached teams at Salesforce and Gong on MEDDIC. Write a 30-minute discovery call framework for [PRODUCT] with [PERSONA]. Structure around MEDDIC: Metrics, Economic buyer, Decision criteria, Decision process, Identify pain, Champion. Output: (1) 3 opening questions, (2) 2 questions per MEDDIC element (12 total), (3) the “pain digging” 5-whys script, (4) next-step close script, (5) post-call CRM notes template. Include the “qualify out if” criteria that save cycle time.

92. Objection Handling Swipe File

Prompt: Act as a sales coach who has built objection handling playbooks for 50+ B2B sales teams. For [PRODUCT] at [PRICE], write responses to the 10 most common objections: too expensive, no budget, no time, happy with current, not a priority, send me info, call me later, not the decision maker, need to think, tried something similar. For each, output: the objection, the root concern, the acknowledge-reframe-prove-ask response (4 parts), a real example line. Format as a swipe file reps can memorize.

93. Demo Script That Sells

Prompt: Act as a sales engineer who has delivered 1,000+ winning product demos. Write a 20-minute demo script for [PRODUCT] to [PERSONA] with pain point [PAIN]. Structure: recap their pain (2 min), “tell them what you’ll show” (1 min), demo 3 capabilities tied to their pain (12 min), results stories (2 min), next steps (3 min). Output as a scene-by-scene script with: what to show, what to say, what to ask. Include the “demo trap” mistakes to avoid and the tell-show-tell pattern for each capability.

94. Sales Deck Narrative (Andy Raskin)

Prompt: Act as a strategic narrative expert trained by Andy Raskin. Write a 10-slide sales deck for [PRODUCT] using Raskin’s 5-part structure: (1) name a shift in the world, (2) show winners and losers, (3) tease the promised land, (4) position product as “magic gifts,” (5) present evidence. Output each slide with: title, key visual, speaker notes (60 words), transition to next slide. Include the “don’t start with us” rule and the contrarian shift statement that makes prospects lean in.

95. Mutual Action Plan Template

Prompt: Act as an enterprise AE at a platform SaaS company. Write a mutual action plan (MAP) template for a [DEAL_SIZE] deal with [CUSTOMER] selling [PRODUCT]. Output: (1) joint success definition, (2) milestone timeline (technical review, security, legal, procurement, signature), (3) champion + economic buyer responsibilities, (4) decision criteria agreed upon, (5) risks and mitigations, (6) go-live date working backward. Format as a shared document a champion can forward internally. Include the “commitment language” that locks in the date.

96. Pricing Conversation Script

Prompt: Act as a negotiation coach who trains enterprise AEs on price conversations. Write a pricing conversation script for [PRODUCT] with [PRICE_RANGE]. Handle 5 scenarios: (1) “what does this cost,” (2) “we have budget of X,” (3) “your competitor is

cheaper,” (4) “we need discount,” (5) “can you do monthly.” For each, output: ideal response, the principle behind it (anchor, trade, concede with purpose), what NOT to say, a 1-line summary rule. Include the “never discount without trade” philosophy.

97. Champion Enablement Kit

Prompt: Act as a B2B sales strategist who equips champions to sell internally. Build a champion enablement kit for [PRODUCT] to help [CHAMPION_TITLE] sell to [ECONOMIC_BUYER_TITLE] internally. Output: (1) business case one-pager (ROI math, risks, timeline), (2) 3 slide executive summary, (3) 5 FAQ responses for hard internal questions, (4) competitor comparison sheet, (5) implementation plan, (6) the “elevator pitch” they can use in hallway conversations. Include the “champion coaching call” script to train them.

98. Discovery Question Bank (50)

Prompt: Act as a sales methodology expert blending MEDDIC, SPIN, and Sandler. For [PRODUCT] in [INDUSTRY], write a 50-question discovery bank organized into: situation (10), problem (10), implication (10), need-payoff (10), decision process (10). Each question must avoid yes/no answers and extract insight. Output as a categorized list with a 1-line goal per question. Flag the 10 “never skip” questions for every call. Include 3 “pattern interrupt” questions that differentiate you from other vendors.

99. Sales Call Debrief Template

Prompt: Act as a sales enablement leader who runs call coaching reviews. Write a post-call debrief template for [PRODUCT] sales calls. Output: (1) call outcome categorization, (2) MEDDIC scoring (fill each letter), (3) 3 things that went well, (4) 3 improvement areas, (5) exact quotes worth remembering, (6) next step commitment, (7) CRM note format. Include the “coaching moment” section for managers reviewing the call and the “red flag” checklist that signals a dying deal. Keep it under 250 words to stay used.

100. Closing Call Framework

Prompt: Act as a closer who has personally closed \$50M+ in B2B software. Write a 30-minute closing call framework for [PRODUCT] at [PRICE] with [DECISION_MAKER]. Structure: recap agreed pains (5 min), walk through solution fit (10 min), present pricing with anchoring (5 min), handle final objections (5 min), ask for the business (5 min). Output each section with: exact talk track, key slides, objection anticipations, and the direct close (“Based on everything, are you ready to move forward?”). Include 3 close variants: assumptive, alternative, urgency.

2 — Content Creation, Blogging & SEO

100 Expert Prompts Inside

Keyword clustering · content briefs · on-page optimization · topical authority · technical SEO · YouTube scripts · newsletters · repurposing pipelines · link building · digital PR

1. Seed Keyword Expansion Matrix

Prompt: Act as a senior SEO strategist who has ranked 500+ pages on Google's first page for commercial keywords. Given seed keyword [SEED_KEYWORD] in the [NICHE] niche for audience [AUDIENCE], expand it into 50 related keywords using modifiers (informational, commercial, transactional, navigational), question-based variants, and long-tail versions. Output a markdown table with columns: Keyword, Search Intent, Estimated Monthly Volume, KD (0-100), Funnel Stage (TOFU/MOFU/BOFU), SERP Feature Opportunity.

2. Topical Authority Map Builder

Prompt: Act as a topical authority strategist trained on Koray Tugberk GUBUR's semantic SEO methodology. For the topic [PILLAR_TOPIC] targeting [AUDIENCE], build a complete topical map with 1 pillar page, 8 hub pages, and 40 spoke articles. For each node, specify: URL slug, primary keyword, search intent, parent node, internal linking targets, and entity coverage. Output as a nested JSON tree plus a markdown hierarchy diagram.

3. SERP Gap Analysis Framework

Prompt: Act as an Ahrefs-trained SEO analyst. Given target keyword [TARGET_KEYWORD] and top 10 ranking URLs [COMPETITOR_URLS], conduct a SERP gap analysis. Identify: (1) common H2 patterns across top 5, (2) entities/topics covered by 3+ competitors I must include, (3) content gaps nobody covers, (4) average word count, (5) schema types used, (6) SERP features present. Output as a structured brief with a "10x angle" recommendation at the end.

4. Skyscraper Content Upgrade Plan

Prompt: Act as Brian Dean and apply the Skyscraper Technique 2.0. Analyze the current top-ranking article [COMPETITOR_URL] for keyword [TARGET_KEYWORD]. Identify 5 weaknesses (outdated data, shallow examples, missing visuals, weak structure, thin E-E-A-T). Then outline a superior replacement article with: unique angle, updated 2026 data points, 3 original research ideas, proprietary frameworks, and an outreach list of 20 sites likely to link. Format as sections: Audit, Outline, Data Plan, Outreach Targets.

5. Keyword Clustering by Intent

Prompt: Act as a data-driven SEO consultant using keyword clustering via SERP overlap. Given raw keyword list [KEYWORD_LIST], group them into clusters where keywords share 3+ ranking URLs on Google SERP (proxy: same intent = same page). For each cluster, output: cluster name, primary keyword, 5-15 supporting keywords, dominant search intent, recommended content format (guide/listicle/comparison/tool), and target word count. Return as a markdown table sorted by cluster priority.

6. Search Intent Classifier

Prompt: Act as a search intent specialist. For each keyword in [KEYWORD_LIST], classify the dominant intent as Informational, Navigational, Commercial Investigation, or Transactional. Then classify sub-intent (know-simple, know-complex, do, website, visit-in-person, buy). Justify each classification using SERP signals (ads, shopping, PAA, featured snippet, top result format). Output as a table: Keyword | Primary Intent | Sub-Intent | SERP Evidence | Recommended Content Type.

7. Low-Competition Keyword Hunter

Prompt: Act as an SEO consultant specializing in finding low-KD, high-ROI keywords for new sites with low Domain Rating. For seed topic [TOPIC] and audience [AUDIENCE], generate 30 long-tail keywords that meet these criteria: KD under 20, monthly volume 100-1000, clear commercial or transactional intent, weak SERP competition (forums, Reddit, low-DR blogs ranking). For each, output: Keyword, Why It's Winnable, Target URL Slug, Suggested Angle, Monetization Path.

8. Content Brief Skyscraper Template

Prompt: Act as a content brief writer who ghostwrites for SaaS companies like ConvertKit and Webflow. Write a comprehensive content brief for keyword [TARGET_KEYWORD], audience [AUDIENCE], word count [WORD_COUNT]. Include: target URL, meta title (60 char), meta description (155 char), H1, full H2/H3 outline with talking points, entities to

mention, internal links to include, external authoritative sources, FAQ section (5 questions from PAA), featured snippet target, and CTA strategy. Output as structured markdown.

9. Pillar Page Outline Generator

Prompt: Act as a hub-and-spoke content strategist. For pillar topic [PILLAR_TOPIC] targeting [AUDIENCE] at [FUNNEL_STAGE], design a 5000-word pillar page outline. Include: H1, introduction hook, 8-10 H2 sections each linking to a cluster article, comparison table, embedded calculator/tool idea, original research data, expert quote placeholders, TOC with jump links, and conclusion CTA. Output a markdown outline with word count allocation per section and internal linking map.

10. Cluster Article Brief Pack

Prompt: Act as a content architect building topical authority. Given pillar page [PILLAR_URL] covering [PILLAR_TOPIC], generate 10 cluster article briefs that support it. For each brief provide: target keyword, secondary keywords, search intent, word count, unique angle, H2 outline, which sections link back to pillar, which pillar sections link to this cluster, and anchor text variations. Output as a numbered list with all 10 briefs formatted consistently.

11. Content Gap Competitor Audit

Prompt: Act as a competitive SEO analyst. Given my site [MY_URL] and top 3 competitors [COMPETITOR_URLS] in niche [NICHE], identify 20 high-value keyword opportunities where competitors rank in top 10 but I don't rank in top 50. For each opportunity, output: Keyword, Best Competitor Rank, Why They Win, My Attack Plan (new article / update existing / acquire backlink), Priority Score (1-10), Estimated Traffic Upside.

12. E-E-A-T Content Audit

Prompt: Act as a Google quality rater trained on the 2024 Search Quality Rater Guidelines. Audit the article [ARTICLE_URL] for E-E-A-T signals. Score (1-10) each dimension: Experience (first-hand), Expertise (credentialed knowledge), Authoritativeness (citations, mentions), Trustworthiness (accuracy, transparency, safety). Identify 10 specific improvements with exact placement. Output as a table: Dimension | Score | Evidence | Fix | Priority.

13. On-Page SEO Optimization Checklist

Prompt: Act as an on-page SEO specialist. Audit the draft article [ARTICLE_TEXT] targeting [TARGET_KEYWORD]. Verify and optimize: title tag (under 60 char, keyword front-loaded), meta description (hook + benefit + CTA), H1 uniqueness, keyword density (1-2%), LSI/semantic variants, image alt text, internal links (3-5), external links to authorities (2-3), URL slug, schema suggestions, and readability (Flesch 60+). Output a before/after diff plus a priority fix list.

14. Internal Linking Silo Architect

Prompt: Act as an internal linking strategist who reduced bounce rate 40% for Fortune 500 blogs. Given a list of 30 URLs [URL_LIST] grouped by topic, design a siloed internal linking structure. Output a JSON where each URL has: parent pillar, sibling links (same cluster), upstream links (to pillar), downstream links (to deeper content), and recommended anchor text for each. Include a rationale for 5 strategic cross-silo links that avoid topic dilution.

15. Anchor Text Distribution Plan

Prompt: Act as a link building strategist analyzing anchor text ratios. For target URL [TARGET_URL] ranking for [TARGET_KEYWORD], design an ideal backlink anchor text distribution across 100 links. Allocate percentages for: exact match, partial match, branded, naked URL, generic (“click here”), LSI/synonyms, and long-tail. Justify each ratio with over-optimization penalty risk. Output as a pie chart data table and 20 example anchor text phrases I can request from outreach.

16. How-To Article Expert Draft

Prompt: Act as a subject-matter expert writer who has published in Smashing Magazine and A List Apart. Write a 2000-word how-to article on “[TOPIC]” for [AUDIENCE] at [SKILL_LEVEL]. Include: problem-first intro, prerequisites list, numbered step-by-step with code/screenshots placeholders, common pitfalls section, troubleshooting FAQ, related resources. Voice: authoritative, first-person experience, no fluff. Output in full markdown with H2/H3 structure, optimized for featured snippet on step-based query.

17. Listicle Ranking Framework

Prompt: Act as a listicle content expert who writes for Wirecutter and The Verge. Create a “[N] Best [PRODUCT/TOOL] for [USE_CASE] in 2026” article targeting [TARGET_KEYWORD]. Include: methodology disclosure (how I tested), comparison table

with 6 criteria, individual entries with pros/cons/best-for/pricing, a “winner” callout, and a FAQ. Each entry should feel researched not affiliate-spam. Output full markdown article with 1500-2500 words.

18. Comparison Post Blueprint

Prompt: Act as a commercial intent content writer ranking “[TOOL_A] vs [TOOL_B]” keywords. Write a comparison article with: quick verdict box (who should pick which), feature comparison table (15 rows), pricing comparison, UX comparison, use case matchup, migration difficulty, community/support analysis, and verdict section. Maintain neutrality until verdict. Include affiliate CTA placeholders. Output as structured markdown 2000 words, optimized for commercial investigation intent.

19. Product Review Deep Dive

Prompt: Act as a product reviewer trained on Wirecutter’s editorial standards. Write an honest, E-E-A-T compliant review of [PRODUCT] for [AUDIENCE]. Structure: TL;DR verdict, who it’s for / who it’s not for, 30-day hands-on experience, 5 pros with evidence, 5 cons with evidence, alternatives comparison, pricing analysis, final rating (1-10 across 4 axes), FAQ. Include first-person experience cues throughout. Output 1800 words in markdown.

20. Blog Intro Hook Generator

Prompt: Act as a direct-response copywriter trained on Ann Handley and Nicolas Cole. For article titled “[ARTICLE_TITLE]” targeting [AUDIENCE], generate 10 different blog intro hooks (80-120 words each) using these frameworks: problem-agitate-solve, contrarian claim, shocking statistic, personal story, prediction, curiosity gap, question cascade, data-driven, analogy, and before/after. Label each hook with its framework. Output as a numbered list so I can A/B pick the strongest.

21. SEO Title Tag A/B Variants

Prompt: Act as a CTR optimization specialist. For target keyword [TARGET_KEYWORD] and content about [TOPIC], generate 15 SEO title tag variants, each under 60 characters, using different power patterns: numbers, year, brackets, parentheses, emotional triggers, negative sentiment, how-to, question, listicle count, “ultimate guide,” beginner qualifier. For each, predict CTR impact (high/med/low) and explain the psychological trigger. Output as a table: Title | Char Count | Pattern | Predicted CTR | Rationale.

22. Meta Description Copywriter

Prompt: Act as a meta description copywriter who lifts CTR by 30% on average. Write 5 meta description variants (each 140-155 characters) for article [ARTICLE_TITLE] targeting [TARGET_KEYWORD]. Each variant should include: primary keyword, benefit-driven hook, implicit CTA, and differentiation from SERP competitors. Rank the 5 variants by likely CTR and explain why the winner beats the rest. Output as a numbered list with character counts.

23. Featured Snippet Capture Strategy

Prompt: Act as a featured snippet optimization specialist. For keyword [TARGET_KEYWORD], determine the likely snippet format (paragraph, list, table, video). Then write the exact snippet-optimized content block: 40-60 word definition paragraphs, bulleted/numbered lists with 8-10 items, or 3-column tables. Include the H2 or H3 trigger question above the block. Output 3 different format approaches so I can pick the one matching current SERP, plus a surrounding article outline.

24. Content Calendar 90-Day Plan

Prompt: Act as a content marketing director planning Q2 for a [INDUSTRY] blog targeting [AUDIENCE]. Build a 90-day content calendar (12 articles) balancing: 4 TOFU educational, 4 MOFU comparison/how-to, 2 BOFU case study/review, 2 evergreen pillar. For each, specify: publish date, title, target keyword, funnel stage, word count, internal links to existing content, promotion channels, and expected traffic at 90 days. Output as a markdown table sorted by publish date.

25. Editorial Style Guide Generator

Prompt: Act as a brand editorial director like Mariah Coz or Joanna Wiebe. For brand [BRAND_NAME] targeting [AUDIENCE] in niche [NICHE], create a complete editorial style guide covering: voice (3 adjectives + “we are / we are not”), tone variations by context (sales vs blog vs support), grammar rules (Oxford comma, contractions, sentence length), forbidden words, preferred power words, CTA formulas, heading style, and example rewrites of 3 flat sentences. Output as structured markdown document.

26. Blog Post SEO Score Audit

Prompt: Act as an SEO auditor running a Yoast + Surfer-style check. Audit article [ARTICLE_TEXT] for target keyword [TARGET_KEYWORD]. Score 0-100 across: title optimization, meta description, H1/H2 keyword usage, keyword density, content length

vs SERP average, image alt, internal links, external links, readability, schema. For each category under 80, give specific fix. Output as a scorecard table + prioritized action list (top 5 fixes first).

27. Schema Markup Generator

Prompt: Act as a structured data engineer certified in Schema.org. For article [ARTICLE_URL] about [TOPIC], generate complete JSON-LD schema markup covering: Article (headline, author, datePublished, dateModified), BreadcrumbList, FAQPage (if FAQ section exists), HowTo (if step-based), and Organization. Include all required and recommended properties. Validate mentally against Google Rich Results requirements. Output as a single JSON-LD script block ready to paste into

.

28. Technical SEO Audit Plan

Prompt: Act as a technical SEO consultant auditing for Core Web Vitals and crawl health. For site [SITE_URL] in niche [NICHE], create a technical audit checklist covering: crawlability (robots.txt, sitemap, crawl budget), indexability (noindex, canonicals, hreflang), site architecture (depth, orphans), Core Web Vitals (LCP, INP, CLS), mobile usability, HTTPS, structured data, broken links, duplicate content, and JavaScript rendering. Output 30 checks as a priority-ordered table with tools to use and pass/fail criteria.

29. Core Web Vitals Fix Playbook

Prompt: Act as a performance engineer who improved LCP on 50+ WordPress sites. Given site [SITE_URL] failing Core Web Vitals with LCP [X], INP [Y], CLS [Z], diagnose probable causes and prescribe fixes ranked by impact-effort. Cover: image optimization (WebP, lazy loading, sizing), render-blocking CSS/JS, font loading, server TTFB, third-party scripts, caching strategy, and CDN. For each fix, specify: problem, solution, implementation steps, expected improvement. Output as ordered playbook.

30. Broken Link Recovery Strategy

Prompt: Act as a link reclamation specialist. Given list of broken backlinks [BROKEN_LINKS_LIST] pointing to dead URLs on my site [MY_SITE], create a recovery plan. For each broken link, determine: is the source page still live, is the anchor text valuable, should I 301 redirect to a live page, should I recreate the dead content, or should I email the linker to update. Output as a table: Source URL | Dead URL | DR | Anchor | Action | Redirect Target.

31. YouTube Video Script Framework

Prompt: Act as a YouTube strategist who has scripted videos for MrBeast Analytics and Ali Abdaal. Write an 8-minute video script on “[TOPIC]” for [AUDIENCE] targeting [TARGET_KEYWORD]. Structure: cold open hook (first 15 sec), promise, credibility, main content (3-5 sections with pattern interrupts every 40 sec), climax value, CTA, outro. Include B-roll suggestions, on-screen text, and retention tactics. Output as timestamped script with action cues in brackets.

32. YouTube Title & Thumbnail Pair

Prompt: Act as a YouTube CTR expert who analyzed 10,000 top-performing thumbnails. For video about [TOPIC] targeting [AUDIENCE], generate 10 title + thumbnail concept pairs. Titles must be under 60 characters with curiosity gap or stakes. Thumbnails should describe: main subject, facial expression, background, text overlay (3 words max), color palette, and visual tension. For each pair, predict CTR potential (1-10) and explain why. Output as a numbered table.

33. YouTube Description SEO Template

Prompt: Act as a YouTube SEO specialist. Write an optimized video description for a video titled “[VIDEO_TITLE]” targeting [TARGET_KEYWORD]. Include: first 125 chars hook with primary keyword, 150-word summary, timestamped chapters, affiliate disclosure if needed, relevant links (prev video, playlist, lead magnet), 5 hashtags, and long-tail keyword variants naturally placed. Total 400-500 words. Output in plain text ready to paste into YouTube Studio.

34. YouTube Shorts Script Formula

Prompt: Act as a short-form video viral strategist. Write 5 YouTube Shorts scripts (each under 60 seconds, ~150 words) for niche [NICHE] targeting [AUDIENCE]. Each script uses a different hook pattern: controversial claim, “you’re doing X wrong,” reveal/payoff, speed tutorial, mistake callout. Include: 0-3 sec hook, value beats, retention trick at midpoint, CTA. Output as timestamped scripts with on-screen text and camera directions.

35. Newsletter Welcome Sequence

Prompt: Act as an email copywriter trained on Harry Dry (Marketing Examples) and ConvertKit playbooks. Write a 5-email welcome sequence for newsletter [NEWSLETTER_NAME] serving [AUDIENCE] in niche [NICHE]. Email 1: welcome + expectation setting + quick win. Email 2: founder story + credibility. Email 3: signature

framework or lesson. Email 4: social proof + case study. Email 5: soft pitch + CTA. Each email 300-500 words with subject line (2 variants), preview text, body, CTA. Output in markdown.

36. Substack Issue Template

Prompt: Act as a top 1% Substack writer (think Packy McCormick or Lenny Rachitsky). Draft a Substack issue on [TOPIC] for audience [AUDIENCE], 1500 words. Structure: intriguing title, 1-sentence sub-headline, opening hook anecdote, thesis statement, 3 main sections with strong H2s and data, framework or visual idea, contrarian takeaway, reader question (engagement prompt), paid-subscriber teaser at the end. Voice: smart friend, not professor. Output full markdown.

37. Newsletter Subject Line Lab

Prompt: Act as a subject line tester with data from 10M+ opens. For email about [TOPIC] targeting [AUDIENCE], generate 20 subject line variants under 50 characters using these patterns: curiosity, number, question, personal, urgency, benefit, contrarian, story, emoji-led, lowercase, bracket, name-drop, mistake, reveal, soft-tease. For each, note which pattern it uses and predict open rate tier (high/med/low). Output as a table with character count.

38. Repurposing Waterfall Plan

Prompt: Act as a content repurposing strategist following Gary Vaynerchuk's content pyramid model. Given one long-form asset [PILLAR_CONTENT_URL], design a repurposing waterfall producing 20 derivative pieces: 1 blog post, 1 YouTube long-form, 3 YouTube Shorts, 5 Twitter/X posts, 3 LinkedIn posts, 1 Instagram carousel (10 slides), 1 newsletter issue, 3 TikToks, 2 Reddit posts. For each, specify the angle, hook, format, and CTA. Output as a structured markdown plan.

39. Blog-to-Twitter Thread Converter

Prompt: Act as a Twitter/X thread writer who consistently lands in Top Tweets. Convert blog post [BLOG_POST_URL] about [TOPIC] into a 12-tweet thread. Tweet 1 is the hook (under 280 chars, curiosity + promise + proof). Tweets 2-11 each deliver one insight (short sentences, line breaks, concrete examples, numbers). Tweet 12 is the CTA + bookmark ask. Include visual placeholders every 3 tweets. Output as numbered tweets with character counts.

40. LinkedIn Carousel Post Blueprint

Prompt: Act as a LinkedIn content strategist who ghostwrites for B2B SaaS founders. Turn blog article [BLOG_URL] into a 10-slide LinkedIn carousel targeting [AUDIENCE]. Slide 1: hook + promise + stakes. Slides 2-8: one insight per slide with a bold headline, 15-30 word body, visual cue. Slide 9: summary. Slide 10: CTA + hashtags. Also write the accompanying post copy (100-150 words). Output slides as numbered markdown + post copy below.

41. Instagram Carousel Content Plan

Prompt: Act as an Instagram growth expert specializing in educational niches. Design 5 Instagram carousel posts on topic [TOPIC] for audience [AUDIENCE]. Each carousel: 10 slides, cover with curiosity hook, slides 2-9 with one insight + supporting detail, slide 10 with CTA (save + follow + DM). For each of the 5 carousels, output: title, full slide copy, caption (150 words), 30 hashtags mixing size tiers. Format as 5 sequential carousel blueprints.

42. Cold Outreach Email for Guest Post

Prompt: Act as a digital PR specialist with 25% positive reply rate on guest post pitches. Write a cold outreach email to editor [EDITOR_NAME] at [TARGET_SITE] pitching a guest post on [TOPIC]. Keep under 150 words. Include: genuine personalization (specific article reference), credibility hook, 3 proposed titles with angles, why this fits their audience, and soft CTA. Subject line under 50 chars. Output email with subject + body + PS line suggesting follow-up schedule.

43. Broken Link Building Outreach

Prompt: Act as a link builder using the Moving Man / broken link technique. Write a cold email to webmaster of [TARGET_SITE] who is linking to dead page [DEAD_URL]. Tell them politely, offer my replacement [MY_REPLACEMENT_URL] that covers the same topic better. Under 120 words, friendly tone, no manipulative tactics, include a second soft link opportunity. Output subject line + email body + 2 follow-up templates for days 4 and 10.

44. HARO-Style Expert Pitch

Prompt: Act as a PR expert who has been quoted in Forbes, Inc, and TechCrunch via HARO/Connectively. For query "[REPORTER_QUERY]" from [PUBLICATION], write a complete expert response under 200 words. Structure: credentials hook (1 line), direct

answer (main quote), supporting data/example, bonus framework or stat, sign-off with credentials and headshot link. Sound quotable, specific, zero fluff. Output ready-to-submit response plus suggested subject line.

45. Digital PR Link Bait Idea Generator

Prompt: Act as a digital PR strategist at Fractl or Siege Media. Generate 10 link-worthy data-driven content ideas for brand [BRAND] in niche [NICHE] targeting journalists who cover [BEAT]. Each idea should be: newsworthy, data-backed, visually shareable, and tie brand positioning. For each, specify: working title, angle, data source methodology, target publications (5 each), hero visual, and expected link profile (DR 50+ count). Output as a table with 10 rows.

46. Link Reclamation Audit

Prompt: Act as a link reclamation specialist. For brand [BRAND_NAME], identify unlinked brand mentions recovery opportunities. Create a workflow covering: (1) Google queries to find mentions, (2) filtering criteria (DR, relevance, context), (3) outreach template asking for link addition, (4) tracking system. Then write 3 email templates: friendly ask, follow-up, and thank-you + pitch. Output as a full playbook with Google dork queries, filter rules, and templates.

47. Podcast Pitch for Backlink

Prompt: Act as a podcast booking agent. Write a pitch email to host [HOST_NAME] of [PODCAST_NAME] to guest on their show. Under 180 words. Include: specific episode reference showing I listened, credibility intro, 3 topic angles tailored to their audience, unique story or data I bring, soft CTA. Purpose: generate show notes backlink + brand exposure. Output subject line, email body, and a 1-paragraph “bio blurb” they can use.

48. Content Repurposing to Course Module

Prompt: Act as an instructional designer turning blog content into paid courses. Take blog series [BLOG_SERIES_URLS] on [TOPIC] and restructure as a 6-module course with 4 lessons per module. For each lesson specify: learning objective, 5-min video script outline, worksheet/assignment, and quiz question. Also provide course sales page outline (headline, 3 pain points, outcome, 6 modules teaser, testimonials placeholder, pricing). Output as structured markdown syllabus plus sales page outline.

49. Evergreen vs Trending Content Matrix

Prompt: Act as a content portfolio strategist. Given blog niche [NICHE] and audience [AUDIENCE], create a 2x2 content matrix: Evergreen/Trending on X axis, High/Low effort on Y axis. Fill each quadrant with 5 content ideas totaling 20. For each idea specify: title, target keyword, estimated shelf-life, promotion channel, and ROI prediction. Advise ideal portfolio split percentage between quadrants for sustainable traffic growth. Output as matrix table plus strategic notes.

50. Blog Revenue Diversification Plan

Prompt: Act as a blog monetization consultant who has grown 6-figure blogs. For blog [BLOG_URL] in niche [NICHE] with [MONTHLY_TRAFFIC] monthly visitors, design a 5-stream revenue diversification plan covering: display ads, affiliate, digital product, sponsored posts, email list monetization. For each stream, specify: implementation steps, realistic monthly earnings at current traffic, required effort (1-10), and a 30-60-90 day rollout. Output as a table + Gantt-style rollout schedule.

51. Programmatic SEO Template Design

Prompt: Act as a programmatic SEO engineer who built 10,000-page sites like Zapier Integrations and Nomad List. For niche [NICHE] with dataset [DATA_SOURCE], design a programmatic SEO template. Specify: URL structure, dynamic variables, H1 pattern, H2 sections, data points to inject, internal linking rules (categories, related, alphabetical), schema markup, and thin-content prevention tactics (user-generated content, unique insights). Output as a template spec doc with example populated page.

52. Affiliate Disclosure and FTC Compliance Block

Prompt: Act as a content compliance specialist versed in FTC endorsement guidelines and Amazon affiliate rules. Write an affiliate disclosure block (100-150 words) for blog [BLOG_URL] in niche [NICHE] that is legally compliant, trust-building, and placed above the fold. Also provide: 3 in-content disclosure phrasing options, correct Amazon Associates disclosure wording, placement rules (top of post, before first affiliate link, footer). Output as plug-and-play markdown blocks.

53. Round-Up Post Expert Quote Outreach

Prompt: Act as a content marketer running an expert round-up campaign. For round-up topic "[ROUND_UP_TOPIC]" targeting [AUDIENCE], write: (1) a 100-word cold email pitching 30 industry experts to contribute a quote, (2) a single specific question the

experts should answer, (3) a follow-up template for day 4, (4) outline of how the final round-up post will be structured and linked, (5) promotion strategy leveraging contributor shares. Output as a complete campaign doc.

54. Google Discover Optimization Checklist

Prompt: Act as a Google Discover traffic specialist who has driven 5M+ Discover sessions. Create an optimization checklist for getting blog [BLOG_URL] into Discover feed. Cover: E-E-A-T signals, freshness, engagement metrics, high-quality images (1200px wide, no logo), emotional headlines, category alignment, mobile UX, AMP relevance, site reputation, and content type fit (news, evergreen, lifestyle). Output 20 checks ranked by impact with pass/fail criteria and specific fixes.

55. People Also Ask (PAA) Content Mining

Prompt: Act as a PAA-mining SEO expert. For seed keyword [SEED_KEYWORD], mine 25 People Also Ask questions by simulating SERP expansion logic. Group them into 3-5 thematic clusters. For each cluster, outline a content approach: should it be a dedicated article, FAQ section on pillar, or cluster within existing silo. For each question, write an optimized 40-60 word answer ready to capture the PAA snippet. Output as clustered table.

56. Content Refresh Prioritization Framework

Prompt: Act as a content refresh strategist. Given list of 50 existing articles [ARTICLE_LIST] with current traffic and rankings, create a refresh priority matrix. Score each article 1-10 on: traffic decay, ranking slippage, commercial intent, update feasibility, competitive pressure. Output top 10 articles to refresh this quarter with: reason, specific updates needed (add sections, refresh data, rewrite intro, add schema, update internal links), expected traffic lift. Format as a prioritized action table.

57. Blog Commenting for Relationship Building

Prompt: Act as an outreach and community strategist. Identify 20 blogs in niche [NICHE] where strategic blog commenting can build relationships leading to backlinks and partnerships. Create a commenting playbook covering: target blog criteria, comment quality rules (add value, reference their point, avoid promotion), frequency, follow-up timing, and next-step transition to email. Then write 5 example comments for common post types (how-to, opinion, listicle, interview, review). Output as playbook + templates.

58. Local SEO Content Template

Prompt: Act as a local SEO specialist ranking service businesses in Google Map Pack. For business [BUSINESS_TYPE] in [CITY, STATE], design a “service page” template targeting “[SERVICE] in [CITY]” keyword. Include: H1 pattern, local hero section, service description, coverage area map, reviews/testimonials, FAQs geo-targeted, LocalBusiness schema, NAP consistency, internal links to neighborhood pages, and CTA. Output a markdown template with filled example for one city plus instructions for scaling to 20 cities.

59. Evergreen Resource Page Builder

Prompt: Act as a link bait architect. Design a linkable evergreen resource page titled “The Ultimate [TOPIC] Resource Library” for audience [AUDIENCE]. Include 10 categories, 5-10 curated resources per category (tools, articles, books, communities, courses, templates, podcasts, people to follow, subreddits, templates). For each resource include: name, 1-sentence description, link, why it’s on the list. Also outline promotion strategy to get 50+ backlinks in 6 months. Output full resource page markdown + promotion plan.

60. AI-Generated Content Humanization Pass

Prompt: Act as a content editor who detects and fixes AI tells in draft text. Given draft [DRAFT_CONTENT] written by AI, humanize it by: breaking patterned sentences, removing em-dashes overuse, varying sentence length, adding concrete specific examples, inserting first-person experience, removing filler phrases (“it’s important to note”), swapping generic adjectives for precise ones, adding voice/personality. Output: before/after comparison of 3 paragraphs + 10 general humanization rules as a reusable checklist.

61. Contrarian Hot Take Article

Prompt: Act as a contrarian thought leader in niche [NICHE]. Write a 1500-word “hot take” article arguing against conventional wisdom [CONVENTIONAL_BELIEF] with thesis [CONTRARIAN_THESIS]. Structure: provocative intro, why the mainstream view is wrong (3 reasons with evidence), what’s actually true, case studies / data, counterargument steelman, conclusion + call to rethink. Voice: confident, data-backed, respectful not flamebait. Include 3 expert counterquote placeholders. Output full markdown article.

62. Case Study Article Framework

Prompt: Act as a case study writer for B2B SaaS brands. Write a 1800-word case study on how [SUBJECT] achieved [RESULT] using [METHOD]. Structure: TL;DR results box (3 metrics), background context, challenge, solution (step-by-step), implementation timeline, results with data visualization placeholders, lessons learned, replicable framework, CTA. Tone: specific and quantified, no vague claims. Output as structured markdown ready to become a cornerstone BOFU asset.

63. Ultimate Guide Pillar Page Writer

Prompt: Act as a long-form pillar page writer. Draft a 5000-word “Ultimate Guide to [TOPIC]” for [AUDIENCE] at [FUNNEL_STAGE]. Include: table of contents with jump links, chapter-based H2s (introduction, fundamentals, advanced, tools, mistakes, resources), mini-bios of 5 experts quoted, original infographic concepts, downloadable worksheet idea, FAQ section (10 PAA questions), and strong internal linking map to 10 cluster articles. Output as full markdown with word count per section.

64. Medium Article Optimization

Prompt: Act as a top Medium writer earning \$10K/month via Partner Program. Take draft article [DRAFT] and optimize for Medium curation and distribution. Rewrite: headline (under 60 char, no clickbait), subtitle (promise + curiosity), first 2 paragraphs (hook that beats 40% bounce), sub-headings (every 150 words), and kicker ending. Add: pull quotes, bold emphasis, block quotes, publication-fit suggestions (3 publications), tags (5 max). Output before/after + curation tips.

65. Reddit Content Distribution Plan

Prompt: Act as a Reddit marketing specialist who drives 100K+ monthly clicks from Reddit without getting banned. For article [ARTICLE_URL] in niche [NICHE], identify 10 relevant subreddits to share in. For each subreddit: current subscribers, rules on self-promotion, recommended post format (text post, link, AMA, contribution), custom title variant, post body rewrite fitting community voice, and ideal posting time. Include a no-spam comment strategy. Output as a distribution checklist.

66. Quora Answer SEO Strategy

Prompt: Act as a Quora Space ninja who ranks answers on Google’s first page. For question “[QUORA_QUESTION]” related to my target keyword [TARGET_KEYWORD], write a 500-word answer that: opens with a bold claim, delivers value before any link,

includes personal experience, uses headers and bullets, embeds 1 natural backlink to my site, and ends with a resource link. Follow Quora community guidelines. Output Quora-ready answer plus a list of 10 similar questions to answer.

67. Hashnode & Dev.to Cross-Post Strategy

Prompt: Act as a developer content marketer. Take a technical blog post [BLOG_POST] and prepare it for cross-posting to Dev.to and Hashnode. Include: canonical URL setup, tag strategy for each platform (5 tags each), title variants optimized for each platform's culture, front-matter blocks, series linking opportunities, community-specific intros. Also provide a 7-day promotion plan leveraging each platform's newsletter and trending sections. Output as full cross-post package.

68. Content Personalization by Persona

Prompt: Act as a conversion copywriter using segment-based personalization. Given base article [ARTICLE_TEXT] on [TOPIC], create 3 persona-specific variants for personas [PERSONA_A], [PERSONA_B], [PERSONA_C]. For each variant: rewrite intro (persona-specific pain), adjust examples to their world, swap CTAs to their stage, change tone formality. Output: side-by-side intro comparison + 1 full rewritten version + notes on what changed and why.

69. SEO Silo for E-commerce

Prompt: Act as an e-commerce SEO specialist. For online store [STORE_URL] selling [PRODUCT_TYPE], design a complete category silo structure including: top-level categories, sub-categories, product filters as landing pages, comparison pages, buying guides, and blog content supporting each category. Map internal linking rules between product pages, category pages, and guides. Also recommend 10 commercial intent blog topics feeding into the silo. Output as hierarchy diagram + linking rules JSON.

70. YouTube-to-Blog Repurposing

Prompt: Act as a content repurposer. Given YouTube transcript [TRANSCRIPT] from video titled "[VIDEO_TITLE]", convert it into a 1500-word SEO-optimized blog post. Rewrite as written prose (not verbatim), restructure with H2/H3, expand key points with added context the video lacked, target keyword [TARGET_KEYWORD], embed the original video, add callout boxes for key quotes, and include CTA to subscribe. Output full markdown blog post + meta title + meta description.

71. Newsletter Sponsorship Pitch

Prompt: Act as a newsletter monetization consultant. Write a sponsorship sales pitch to brand [BRAND] for newsletter [NEWSLETTER] (size [SUBSCRIBERS], niche [NICHE], open rate [OPEN_RATE]%). Include: personalized opener, audience match proof, past performance metrics, 3 sponsorship packages (primary ad, classified, dedicated send) with pricing, social proof from past sponsors, and a soft close. Under 250 words. Output as email + rate card 1-pager.

72. Content Atomic Research System

Prompt: Act as a research librarian helping content writers. Design an atomic note-taking system (Zettelkasten-inspired) for capturing research while writing blog content in niche [NICHE]. Include: note types (source, claim, question, idea), tagging taxonomy, linking conventions, from-research-to-outline workflow, and how to cite sources for E-E-A-T. Also provide 3 example notes showing the format. Output as a complete system doc with templates.

73. SEO-Optimized FAQ Section Writer

Prompt: Act as a featured snippet and FAQ schema specialist. For article on [TOPIC] targeting [TARGET_KEYWORD], write a complete FAQ section with 8 questions sourced from PAA, forums, and “related searches.” Each answer: 40-60 words, direct, keyword-including, snippet-optimized. Then provide the matching JSON-LD FAQPage schema markup. Also suggest 3 “People Also Ask” style upsell CTAs at end of FAQ. Output as markdown FAQ + JSON-LD block.

74. Ghostwritten LinkedIn Newsletter

Prompt: Act as a ghostwriter for C-level executives on LinkedIn. Write a 700-word LinkedIn newsletter issue in the voice of [EXECUTIVE_PROFILE] on topic [TOPIC]. Structure: anecdotal hook with lesson, thesis, 3 supporting points with specific examples, personal insight, provocative question for comments. Tone: authentic, confident, conversational. Avoid corporate jargon. Output as a full newsletter issue plus 3 LinkedIn post “teasers” to drive subscribers.

75. Blog Monetization via Lead Magnets

Prompt: Act as a lead-gen strategist for bloggers. For blog [BLOG_URL] in niche [NICHE], design 5 high-converting lead magnets aligned with different top funnel articles. For each: lead magnet format (PDF checklist, mini-course, template, calculator,

swipe file), title, outline of contents, delivery mechanism, companion article it fits, conversion copy (headline, 3 bullets, CTA button), and expected opt-in rate. Output as a table plus 1 full mockup of the top pick.

76. Content Decay Early Warning System

Prompt: Act as a data-focused SEO analyst. Design a content decay monitoring system for blog [BLOG_URL] that flags articles losing traffic before it becomes catastrophic. Specify: data sources (GSC, GA4), metrics to track (30-day impressions drop, position drop, CTR drop), threshold rules, alert frequency, triage workflow (refresh / consolidate / redirect / delete), and decision matrix. Output as a complete monitoring SOP with a trigger rules table.

77. Pillar Content Promotion Checklist

Prompt: Act as a content distribution strategist. For newly published pillar page [PILLAR_URL] on [TOPIC], build a 30-day promotion checklist spanning 30+ tactics: email list (3 sends), social organic (8 platforms), social paid (\$X budget), communities (Reddit, Discord, Slack, FB groups), outreach (mention recipients, quoted experts, link targets), republishing (Medium, LinkedIn), SEO boosts (internal linking from existing ranked pages), and paid backlink services (vet carefully). Output as checklist with week-by-week schedule.

78. Topic Sentiment Analysis for Angles

Prompt: Act as a content ideation strategist using sentiment analysis. For topic [TOPIC], analyze existing coverage on the top 20 SERP results and identify dominant sentiment (positive/negative/neutral/controversial). Then recommend 5 article angles that exploit sentiment gaps: contrarian positive where negative dominates, myth-busting where positive dominates, nuanced take where polarized. For each angle: working title, thesis, target audience, supporting data ideas. Output as an opportunity table.

79. B2B Content Funnel Mapping

Prompt: Act as a B2B content strategist working with SaaS companies. For product [PRODUCT] solving [PROBLEM] for [ICP], map a full content funnel with 15 pieces: 5 TOFU (educational awareness), 5 MOFU (problem/solution), 5 BOFU (product-led, case studies, comparisons). For each piece specify: title, keyword, format, word count, primary CTA, supporting asset (webinar, template, calculator). Output as a funnel table plus a visual funnel diagram in ASCII or markdown.

80. Editorial Fact-Checking Pass

Prompt: Act as an editorial fact-checker trained on NYT and Atlantic standards. Audit draft article [DRAFT] for factual claims. Identify every claim needing verification: statistics, historical dates, expert attributions, company facts, technical specifics. For each: rate confidence (high/med/low), suggest verification source, and propose safer rewording if unsupported. Output as a table: Claim | Location in Draft | Risk | Verification Source | Revised Wording.

81. Content Accessibility (A11y) Checklist

Prompt: Act as an accessibility auditor for content publishing. For blog article [ARTICLE_URL], audit accessibility against WCAG 2.2 AA: heading order, alt text, color contrast, link text descriptiveness, video captions/transcripts, reading grade level, language attribute, ARIA labels for interactive elements, keyboard navigation for embedded widgets, and semantic HTML. Output 20 checks as pass/fail with fix instructions + a plain-text reading version generation tip.

82. SEO Migration Safe Checklist

Prompt: Act as an SEO migration specialist preventing traffic loss during site moves. For migration [MIGRATION_TYPE] (HTTPS, platform, domain, redesign) of site [SITE_URL], create a pre-migration, migration-day, and post-migration checklist (40 items total). Include: URL mapping, 301 redirects, canonical tags, sitemap resubmission, internal link updates, GSC re-verification, analytics continuity, 404 monitoring, crawl comparison, and 30-day traffic monitoring. Output as a 3-phase migration playbook.

83. AI Overview (SGE) Optimization

Prompt: Act as a Generative Search Experience optimization specialist adapting to AI Overviews. For keyword [TARGET_KEYWORD], design content that maximizes citation in Google's AI Overview. Tactics: clear definitions in first paragraph, structured data, entity-rich copy, credible citations, direct answers to likely sub-questions, unique data points, authority signals. Write a 300-word "AI-citation-friendly" block that would likely be pulled, plus a surrounding full article outline. Output as block + outline.

84. Content Attribution Revenue Model

Prompt: Act as a marketing operations analyst. For blog [BLOG_URL] generating leads for [PRODUCT], design a content revenue attribution model. Specify: attribution windows (7/30/90 day), models to compare (first-touch, last-touch, linear, U-shaped,

data-driven), tracking requirements (UTMs, cookie strategy, CRM integration), reporting dashboard KPIs, and how to tie content pieces to dollar revenue. Output as a model spec document plus 5 example queries for analytics dashboards.

85. Expert Round-Up Aggregation Post

Prompt: Act as a round-up post writer. Given 15 expert quotes on [QUESTION] from [EXPERT_LIST], structure a round-up article: compelling intro explaining why this topic matters, thematic grouping of responses (tactical / strategic / contrarian), each expert with headshot/bio/link placeholder, “consensus takeaways” summary, “surprising disagreements” callout, and your own synthesis. Target 2500 words, optimized for [TARGET_KEYWORD]. Output as full markdown.

86. Content Briefing for Outsourced Writers

Prompt: Act as a content operations manager hiring freelance writers. Create a comprehensive content brief template for outsourcing. Include: target keyword, SERP analysis summary, audience persona, desired outcome, structural requirements (H2/H3), must-mention entities, must-cite sources, forbidden phrases, internal links, CTAs, deliverable format, deadline, payment, revision policy. Then fill it in for a sample article on [TOPIC]. Output as a reusable template + one filled example.

87. Podcast Show Notes SEO Template

Prompt: Act as a podcast SEO specialist optimizing show notes for search traffic. For podcast episode [EPISODE_TITLE] featuring [GUEST] on topic [TOPIC], write complete show notes including: SEO title, meta description, 150-word episode summary, 10 timestamped highlights, 5 key takeaways as bullet list, full transcript placeholder, guest bio with backlinks, listener resources, sponsor mentions, and “subscribe” CTAs for 4 platforms. Output as full show notes markdown ready to publish.

88. Long-Tail Voice Search Optimization

Prompt: Act as a voice search optimization specialist. For topic [TOPIC] and audience [AUDIENCE], generate 30 conversational long-tail voice queries (who/what/when/where/why/how patterns). Cluster into 5 content pieces. For each cluster, write a 40-word direct voice answer optimized for Google Assistant / Alexa readback, plus context paragraph. Include local modifiers where relevant. Output as a clustered table with queries, answers, and content piece recommendations.

89. Content Hook Swipe File

Prompt: Act as a copywriter building a reusable hook library. Generate 30 content hook templates covering: problem-agitate, curiosity gap, shocking stat, quote + twist, story cliff, contrarian claim, question stack, prediction, confession, analogy, listicle-tease, how-I-failed, behind-the-scenes, expert secret, data bomb, “I was wrong about X,” myth-bust, what-they-won’t-tell-you, micro-case-study, polarizing take. For each provide a fill-in-the-blank template + one example for niche [NICHE]. Output as swipe file markdown.

90. AI Safety and Plagiarism Pass

Prompt: Act as a content integrity checker. Audit draft [DRAFT] for: potential plagiarism risks (common phrases that match existing content), unverified AI hallucinations (statistics without sources, fake quotes, nonexistent books/studies), copyright image risk, and factual overstatements. Flag each issue with severity (high/med/low) and remediation. Also recommend tools (Copyscape, Originality.ai, Google Scholar). Output as an audit report with a decision: publish / revise / rewrite.

91. Topical Cluster Internal Linking Crawl

Prompt: Act as an internal linking automation engineer. Given a list of 40 existing blog URLs [URL_LIST] with titles, identify for each URL: (1) 5 relevant internal links to add pointing inward, (2) 5 outbound internal links this URL should add, (3) suggested anchor text variations, (4) which are pillar vs cluster. Avoid linking unrelated topics (topic dilution). Output as JSON: { url: { inbound: [...], outbound: [...], anchors: [...] } } for all 40.

92. Blog-to-Lead-Magnet Conversion Block

Prompt: Act as a conversion copywriter. For blog article [ARTICLE_URL] targeting [AUDIENCE], design an in-content lead magnet CTA block placed after the first value section. Include: headline (benefit-driven), 3-bullet preview of the lead magnet contents, social proof line, email input field copy, button text (action verb + outcome), micro-commitment reassurance (“no spam, unsubscribe anytime”), and visual concept. Provide 3 variants A/B/C differing in angle. Output as markdown mockups.

93. SEO Competitor Content Reverse-Engineering

Prompt: Act as a reverse-engineering SEO analyst. For competitor [COMPETITOR_URL] ranking #1 for [TARGET_KEYWORD], deconstruct their winning formula. Analyze: title, meta, URL, H1, H2 flow, word count, internal links, external links, images used, schema,

PAA capture, freshness, author bio, E-E-A-T signals, and hidden strengths. Then prescribe my counter-play to outrank them (not just copy). Output as a deconstruction table + counter-strategy plan.

94. Google Business Profile Post Strategy

Prompt: Act as a local SEO specialist managing Google Business Profile for [BUSINESS_TYPE] in [CITY]. Write a 30-day content calendar for GBP posts: weekly What's New, Events, Offers, and Products. Each post: 80-100 words, keyword-inclusive, with CTA button choice, image concept, and UTM link. Also advise on post frequency, best day/time, and how posts affect Map Pack ranking. Output as a 30-day calendar table plus 10 ready-to-post examples.

95. Seasonal Content Opportunity Calendar

Prompt: Act as a seasonal content strategist. For niche [NICHE] and audience [AUDIENCE], map out 12 months of seasonal content opportunities tied to holidays, industry events, Q-ends, weather patterns, shopping cycles, and news cycles. For each month list: 2-3 seasonal topics, target keywords, ideal publish date (lead time for Google indexing), content format, and monetization angle. Output as a 12-row monthly calendar with 24-36 topic ideas total.

96. Branded Search Optimization Plan

Prompt: Act as a brand SEO specialist protecting branded SERP real estate. For brand [BRAND_NAME], design a branded SERP defense plan covering: homepage optimization, sitelinks, knowledge panel, reviews, Wikipedia, social profiles claim, branded + modifier articles (“[Brand] review,” “[Brand] pricing,” “[Brand] alternatives”), and negative sentiment monitoring. Output a checklist of 25 items to dominate the first page for branded queries plus crisis response flow for negative content.

97. Dwell Time Optimization Techniques

Prompt: Act as a UX-driven SEO specialist improving dwell time and pogo-sticking. For article [ARTICLE_URL] on [TOPIC], audit and prescribe fixes for: intro engagement (no fluff, immediate value), scannable formatting (headers every 200 words, short paragraphs), multimedia (images, GIFs, video embeds), interactive elements (calculators, quizzes), curiosity hooks mid-article, and exit-intent recovery. Output 15 specific improvements ranked by expected dwell time gain with implementation steps.

98. Content Series Arc Design

Prompt: Act as a content series strategist inspired by binge-worthy Netflix seasons. Design a 6-part blog series on [TOPIC] for [AUDIENCE]. Episode 1 hook and foundation, Episode 2 deepens a sub-theme, Episode 3 case study, Episode 4 contrarian perspective, Episode 5 advanced tactics, Episode 6 synthesis + premium CTA. For each episode: title, target keyword, outline, cliffhanger hook to next, internal linking, and cross-promotion cadence. Output as a full series bible.

99. Newsletter Sponsorship Ad Copy

Prompt: Act as a direct response copywriter writing newsletter sponsorship ads. For sponsor [SPONSOR_BRAND] offering [PRODUCT] to audience [NEWSLETTER_AUDIENCE], write 3 ad copy variants: (A) Classified (60 words), (B) Primary sponsor (150 words), (C) Dedicated send (400 words). Each variant: bold hook, benefit stack, social proof, clear CTA, tracking link placeholder. Tone: matches newsletter voice, not salesy. Output as 3 labeled copy blocks + recommended subject line for dedicated send.

100. Content Performance 90-Day Review

Prompt: Act as a content performance analyst running a quarterly review. For blog [BLOG_URL] with 90 days of data, build a review report covering: top 10 articles by traffic/conversions/revenue, bottom 10 decaying articles, best-performing topic cluster, CTR winners and losers, keyword movement, backlink velocity, content ROI per piece (time spent vs traffic value), and 5 lessons learned. End with a 3-point strategic pivot for the next quarter. Output as a structured executive report in markdown.

3 — Business Strategy, Entrepreneurship & Startups

100 Expert Prompts Inside

Lean Canvas · Porter's 5 Forces · Blue Ocean · go-to-market · pricing models · financial modeling · pitch decks · investor memos · OKRs · hiring · org design

1. Lean Canvas Deep Build

Prompt: Act as a Lean Startup coach who has mentored 200+ YC and Techstars companies. For [COMPANY] targeting [CUSTOMER_SEGMENT] in [INDUSTRY], build a complete Lean Canvas. Stress-test each block against the Mom Test, flag the three riskiest assumptions, and propose a 2-week validation experiment per risk. Output as a 9-block Lean Canvas table followed by a “Risk & Experiment” matrix with hypothesis, metric, kill criteria, and cost.

2. Business Model Canvas Audit

Prompt: Act as a Strategyzer-certified consultant who has audited 100+ BMCs for Fortune 500 innovation labs. Review [COMPANY]’s current Business Model Canvas in [INDUSTRY] at [STAGE_PRE_SEED_TO_SERIES_C]. Score each of the 9 blocks on a 1-5 coherence scale, identify structural misalignments between Value Proposition and Customer Segments, and propose three alternative BMC variants. Output as a scored BMC table plus a 2x2 “Impact vs Feasibility” matrix of variants.

3. Value Proposition Design

Prompt: Act as a product strategist trained in Strategyzer’s Value Proposition Canvas methodology. For [COMPANY] serving [PERSONA], decompose the customer profile into jobs, pains, and gains, then map the value map (products, pain relievers, gain creators). Identify the top 3 “fit gaps” and propose explicit pain-reliever redesigns. Output as a two-column VPC diagram in markdown plus a Fit Score table rating each job on evidence strength.

4. Jobs-to-be-Done Interview Kit

Prompt: Act as a JTBD researcher trained by Clayton Christensen and Bob Moesta. Design a customer discovery interview kit for [COMPANY] in [INDUSTRY] to uncover the functional, emotional, and social jobs of [PERSONA]. Include 15 open-ended questions using the Switch Interview technique, a timeline mapping template, and coding rubric. Output as a numbered interview script followed by a JTBD Forces of Progress diagram template.

5. Blue Ocean Strategy Map

Prompt: Act as a Blue Ocean Strategy practitioner certified by INSEAD. For [COMPANY] in the saturated [INDUSTRY] market, run the Four Actions Framework (Eliminate-Reduce-Raise-Create) against [COMPETITOR]'s value curve. Plot the current industry strategy canvas, then the proposed blue ocean curve. Identify the noncustomer tier unlocked. Output as a strategy canvas chart (markdown table with factors and scores 0-10) plus an ERRC grid.

6. Porter Five Forces Diagnostic

Prompt: Act as a senior strategy consultant who has led Porter's 5 Forces analyses at a top-tier firm. Assess [INDUSTRY] for [COMPANY] entering at [STAGE_PRE_SEED_TO_SERIES_C]. For each force, rate intensity 1-5, cite specific structural drivers, and score profitability attractiveness. Flag which force is most likely to shift in 24 months due to AI or regulation. Output as a 5-Forces radar table plus a narrative "Industry Attractiveness Verdict."

7. SWOT With Strategic Actions

Prompt: Act as a BCG strategy director leading a growth diagnostic for [COMPANY] in [INDUSTRY] with [RUNWAY_MONTHS] months of runway. Build a SWOT that goes beyond generic bullets — each item must be tied to a measurable KPI and a data source. Then run a TOWS matrix to generate SO, WO, ST, WT strategies. Output as a 2x2 SWOT table followed by a TOWS action grid with priority ranks.

8. PESTEL Scan 24-Month Horizon

Prompt: Act as a geopolitical risk strategist advising Fortune 100 boards. Run a PESTEL scan for [COMPANY] operating in [GEOGRAPHY] within [INDUSTRY]. For each dimension, identify two trends with probability (0-1), impact (\$ or strategic), and time horizon. Highlight the three most likely disruptors for the next 24 months. Output as a PESTEL table plus a "Signals to Monitor" watchlist with trigger metrics.

9. Market Sizing TAM SAM SOM

Prompt: Act as an investment banking analyst preparing a market sizing for an IC memo. For [COMPANY] selling [PRODUCT] in [INDUSTRY], build TAM/SAM/SOM using both top-down (industry reports) and bottom-up (unit x price x accounts) methods. Triangulate and justify the gap. Include 3-year SOM growth trajectory. Output as a sizing table with sources, method, and assumptions plus a reconciliation narrative.

10. Wardley Map Strategic Play

Prompt: Act as a Wardley Mapping practitioner trained by Simon Wardley. Map the value chain for [COMPANY] in [INDUSTRY] from user need to genesis components. Place components on the evolution axis (genesis, custom, product, commodity). Identify which components to inertia-break, outsource, or industrialize. Output as a Wardley map described in structured text (components, position, dependencies) plus a “Doctrine & Gameplay” action list.

11. Competitive Teardown Matrix

Prompt: Act as a competitive intelligence analyst at a top strategy firm. Build a teardown of [COMPETITOR_1], [COMPETITOR_2], and [COMPETITOR_3] vs [COMPANY] in [INDUSTRY]. Compare pricing, positioning, ICP, funding, GTM motion, moat, and weakness. Score each on a 1-5 threat scale. Output as a comparison matrix in markdown table format plus a “White Space” section identifying three unclaimed positioning angles.

12. Ansoff Matrix Growth Options

Prompt: Act as a growth strategy partner running a portfolio review for [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C]. Apply the Ansoff Matrix to generate four growth plays: market penetration, market development, product development, and diversification. Rank by risk-adjusted NPV and strategic fit. Recommend sequencing over 24 months. Output as a 2x2 Ansoff matrix with filled cells plus a prioritization table ranking by effort, time-to-revenue, and capital.

13. Founder Market Fit Audit

Prompt: Act as a pre-seed VC partner evaluating founder-market fit. Interrogate [FOUNDER_NAME] with 10 sharp questions probing unfair advantage, domain insight, network density, conviction depth, and endurance. Then score FMF on a 1-10 rubric across 6 dimensions. Output as an interview transcript template followed by a FMF scorecard and a “Coachable Gaps” remediation plan.

14. Problem Statement Refinement

Prompt: Act as a Stanford d.school design thinking coach. Take [COMPANY]'s current problem statement and refine it using the 5 Whys, Point of View statement, and HMW reframing. Produce three alternative problem framings ranked by market size and emotional intensity. Output as a before/after table, a 5 Whys tree, and three HMW statements with supporting evidence and hypothesized solution spaces.

15. MVP Scoping Ruthless Cut

Prompt: Act as a lean product coach who has shipped 50+ MVPs for funded startups. For [COMPANY] validating [HYPOTHESIS], scope an MVP that can ship in 4 weeks with [BUDGET_USD] budget. Use MoSCoW prioritization to ruthlessly cut features. Define the single learning goal, the falsification metric, and the success gate. Output as a MoSCoW table, MVP one-pager, and a kill/continue decision framework.

16. PMF Signal Diagnostic

Prompt: Act as a growth leader who has shepherded 10+ startups through PMF. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] with [MONTHLY_ACTIVE_USERS] users, diagnose product-market fit using Sean Ellis' 40% test, Rahul Vohra's PMF Engine, and cohort retention curves. Score PMF on a 1-5 scale with evidence. Output as a PMF dashboard table, a Sean Ellis survey template, and a narrative verdict with next-step playbook.

17. Customer Discovery Interview Plan

Prompt: Act as Steve Blank running a customer development sprint. Build a 20-interview plan for [COMPANY] targeting [PERSONA] in [INDUSTRY]. Include recruitment script, screening criteria, Mom Test-aligned question bank (no pitch, no lead), and analysis rubric. Specify the signals that falsify vs validate the hypothesis. Output as an interview playbook with schedule template, question list, and a Pattern Synthesis matrix.

18. North Star Metric Design

Prompt: Act as an Amplitude-certified product strategist who has designed NSMs for 20+ scaleups. For [COMPANY] in [INDUSTRY] with business model [SAAS_MARKETPLACE_TRANSACTIONAL], derive a North Star Metric that captures user value and predicts revenue. Decompose into 3-5 input metrics. Validate against the "value exchange" test. Output as a NSM tree diagram (text), a metric scorecard, and a tracking implementation plan.

19. GTM Motion Selection

Prompt: Act as a GTM strategist at a top-tier firm specializing in B2B SaaS. For [COMPANY] selling [PRODUCT] at [ACV_USD] to [ICP], recommend the primary GTM motion among PLG, SLG, CLG, channel, or hybrid. Score each on fit using 8 criteria (ACV, sales cycle, self-serve potential, etc.). Justify the pick with unit economics. Output as a GTM motion scorecard table plus a 90-day GTM execution roadmap.

20. Bullseye Customer Acquisition

Prompt: Act as the author of Traction running a Bullseye Framework session for [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C]. Brainstorm 19 traction channels, rank them on cost, speed, and CAC potential for [ICP], pick 3 for the inner ring, and design 2-week experiments per channel. Output as a Bullseye table (outer, middle, inner), an experiment design per inner channel, and a traction scoreboard template.

21. Pricing Strategy Van Westendorp

Prompt: Act as a monetization consultant who has priced 50+ SaaS products. For [COMPANY] launching [PRODUCT] targeting [PERSONA], design a Van Westendorp Price Sensitivity study and a Gabor-Granger follow-up. Propose 3 pricing tiers with features, fences, and willingness-to-pay anchors. Include psychological pricing tactics. Output as a VW survey template, a tier comparison table, and a recommended list price with rationale.

22. Pricing Model Restructure

Prompt: Act as a SaaS pricing strategist who has worked with Price Intelligently and OpenView. Audit [COMPANY]'s current pricing in [INDUSTRY], identify the "value metric" mismatch, and propose three alternative models (seat, usage, outcome, tiered, freemium). Model ARPU impact per variant. Output as a current vs proposed pricing table, a value metric analysis, and an impact model showing ARPU, conversion, and churn projections.

23. Unit Economics Deep Dive

Prompt: Act as a SaaS CFO with experience taking 3 companies public. Build a unit economics model for [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] with [MONTHLY_REVENUE] MRR. Calculate CAC, LTV, CAC payback, LTV:CAC, gross margin, magic number, and burn multiple. Flag the two metrics most likely to break at scale. Output as a unit economics table with benchmark columns and a narrative on the weakest link with fix hypotheses.

24. LTV CAC Diagnostic

Prompt: Act as a growth finance lead from Bessemer BVP. For [COMPANY] with [CAC_USD] CAC and [CHURN_RATE] monthly logo churn, build a full LTV model using both simple and cohort-based methods. Sensitivity-test LTV:CAC under 3 churn scenarios. Identify whether the company is CAC-constrained or retention-constrained. Output as a cohort LTV table, sensitivity grid, and a prescriptive recommendation on where to invest the next dollar.

25. Financial Model 3 Statement

Prompt: Act as a fractional CFO who has built 100+ investor-ready financial models. Build a 3-statement projection (P&L, BS, CF) for [COMPANY] in [INDUSTRY] for 24 months from [CURRENT_STATE]. Include headcount plan, COGS buildup, GTM spend, and working capital. Show two scenarios: base and downside. Output as structured financial statement tables in markdown plus a key-assumptions tab and a commentary section on each driver.

26. Runway Burn Scenario Planning

Prompt: Act as a startup CFO advising founders during a downturn. For [COMPANY] with [CASH_USD] in bank and [MONTHLY_BURN] burn, model three runway scenarios (base, optimistic, bear) with different hiring, GTM, and revenue assumptions. Calculate zero-cash date per scenario and define trigger metrics. Output as a runway table, a burn reduction playbook, and a “zero cash calendar” with pre-defined decision triggers.

27. Fundraising Strategy Roadmap

Prompt: Act as a former partner at a top-tier VC firm who has led 30+ Series A rounds. For [COMPANY] raising [ROUND_SIZE] at [STAGE_PRE_SEED_TO_SERIES_C] in [INDUSTRY], design a fundraising strategy including target investor list (tier, fit, check size), narrative arc, round structure, and timeline. Output as an investor matrix table, a week-by-week raise plan, and a narrative spine document.

28. Pitch Deck 12 Slide Blueprint

Prompt: Act as a pitch coach who prepped founders for Sequoia, a16z, and Benchmark. For [COMPANY] raising [ROUND_SIZE] at [STAGE_PRE_SEED_TO_SERIES_C], write a 12-slide pitch deck outline: problem, solution, why now, market, product, traction, business model, GTM, team, competition, financials, ask. For each slide, give the 1-line headline and 3 bullet points. Output as a markdown deck with slide numbers and speaker notes.

29. Investor FAQ Prep

Prompt: Act as a VC partner leading due diligence. Generate the 30 hardest questions investors will ask [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] in [INDUSTRY], grouped into: market, product, team, traction, unit economics, competition, moat, exit. For each, provide a sharp 100-word model answer. Output as a Q&A document organized by category with “red flag if you say X” notes.

30. Series A Narrative Spine

Prompt: Act as a storytelling strategist who has coached Series A CEOs at YC Demo Day. For [COMPANY] in [INDUSTRY] with [ARR_USD] ARR, craft a Series A narrative spine using the “Why Now” framework. Include inflection story, inevitability thesis, scale story, and category creation play. Output as a narrative document with the spine sentence, 5 supporting pillars, and a 90-second elevator version.

31. Data Room Checklist

Prompt: Act as an M&A advisor who has closed \$500M+ in venture rounds. Build a Series A data room checklist for [COMPANY] in [INDUSTRY]. Include sections: corporate, financials, legal, IP, HR, product, sales, customers, tech, compliance. For each, list required documents and owner. Output as a hierarchical checklist in markdown with completion status column and a “red flag if missing” annotation.

32. Cap Table Scenario Modeling

Prompt: Act as a startup lawyer and cap table specialist at Cooley. For [COMPANY] with [CURRENT_CAP_TABLE], model the post-money cap table after raising [ROUND_SIZE] at [PRE_MONEY] with [OPTION_POOL] pool top-up. Show dilution per stakeholder and founder ownership trajectory to Series C. Output as a pre/post cap table, a dilution waterfall, and a long-term dilution projection chart (text table).

33. Term Sheet Negotiation Playbook

Prompt: Act as a startup finance lawyer who has negotiated 200+ term sheets. For [COMPANY] receiving a term sheet from [INVESTOR] at [VALUATION], review the terms: liquidation pref, anti-dilution, board composition, protective provisions, pro-rata, vesting. Flag the 5 most negotiable and 3 non-negotiable clauses. Output as a term sheet annotation table with “market”, “founder-friendly”, and “founder-hostile” labels plus negotiation scripts.

34. Convertible Note vs SAFE

Prompt: Act as an early-stage investor who has written 300+ checks. For [COMPANY] raising [AMOUNT_USD] pre-seed, compare convertible note vs SAFE vs priced round. Model cap/discount scenarios and dilution math. Recommend instrument with rationale tied to founder goals and investor expectations. Output as a comparison table, a dilution simulation, and a decision flowchart.

35. VC Investor Shortlist

Prompt: Act as a fundraising advisor who maintains a database of 2000+ active VCs. For [COMPANY] raising [ROUND_SIZE] at [STAGE_PRE_SEED_TO_SERIES_C] in [INDUSTRY] and [GEOGRAPHY], build a shortlist of 25 target investors. Include check size, thesis fit, recent deals, warm intro path, and pitch angle per investor. Output as a ranked investor matrix table with “must-hit”, “stretch”, and “backup” tiers.

36. Angel Investor Warm Intro

Prompt: Act as a fundraising coach teaching warm-intro strategy. For [COMPANY] targeting angel [INVESTOR_NAME] with known interests [INTERESTS], write a 120-word warm intro request to a mutual connection. Include the hook, proof point, and soft ask. Then write the 150-word forwardable pitch. Output as two separate messages clearly labeled, plus a follow-up cadence calendar.

37. OKR Quarterly Design

Prompt: Act as a Google-trained OKR coach who has implemented OKRs at 50+ startups. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] with 3 teams, design one company-level Objective and 3-5 Key Results for the next quarter. Cascade to team-level OKRs. Apply the “will I know if I failed” test. Output as an OKR tree diagram, a company+team OKR table, and a scoring rubric.

38. KPI Tree Operational

Prompt: Act as an operating partner at a growth-stage VC. For [COMPANY] in [INDUSTRY] with North Star [NSM], build a full KPI tree from NSM down to team-level metrics. Cover acquisition, activation, retention, revenue, referral (AARRR). Distinguish lead vs lag metrics. Output as a hierarchical KPI tree in markdown with owners, frequency, and target baseline per metric.

39. Strategic Plan Annual

Prompt: Act as a McKinsey strategy director building an annual strategic plan. For [COMPANY] in [INDUSTRY] at [STAGE_PRE_SEED_TO_SERIES_C], write a one-page annual strategy doc covering: 3-year ambition, 12-month theme, top 3 strategic bets, success metrics, resource allocation, and kill criteria. Output as a one-page strategy document in markdown plus a supporting “Hopes & Fears” risk register.

40. 90 Day CEO Plan

Prompt: Act as an executive coach specializing in founder-CEO transitions. Build a 90-day plan for the CEO of [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] entering [NEW_CHALLENGE]. Cover first-30 (learn), 31-60 (align), 61-90 (execute). For each phase define stakeholder meetings, decisions, and wins. Output as a week-by-week roadmap table plus a stakeholder alignment map.

41. Hiring Plan Headcount Model

Prompt: Act as a people operations leader who has scaled startups from 10 to 200 employees. For [COMPANY] with [CURRENT_HEADCOUNT] and [RUNWAY_MONTHS] runway, build an 18-month hiring plan tied to revenue milestones and strategic priorities. Include role, level, team, start date, fully-loaded cost, and justification. Output as a headcount plan table plus a dependency graph of hires.

42. Org Design Scale Up

Prompt: Act as an org design consultant who has restructured 30+ scaling startups. For [COMPANY] scaling from [CURRENT_HEADCOUNT] to [TARGET_HEADCOUNT] in 18 months, recommend an org structure (functional, divisional, matrix, squad). Map the new org chart, spans of control, and reporting lines. Identify two roles most likely to become bottlenecks. Output as an org chart in text, a role matrix, and a 3-6-12 month reorganization plan.

43. Key Hire Scorecard

Prompt: Act as a Topgrading-trained executive recruiter. For [COMPANY] hiring a [ROLE_TITLE] at [STAGE_PRE_SEED_TO_SERIES_C], write a Smart Hire scorecard including mission, outcomes (5 measurable), competencies (rated importance), and dealbreakers. Output as a scorecard document plus a 12-question structured interview guide tied to each outcome.

44. Founder CEO Transition

Prompt: Act as a founder coach who has guided 15+ CEO-to-executive-chair transitions. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] considering hiring a CEO, diagnose readiness using a 12-question assessment covering founder fit, company stage, and operational complexity. Recommend transition path. Output as an assessment scorecard, decision framework, and a 90-day transition plan with role handoff matrix.

45. Compensation Philosophy Equity

Prompt: Act as a compensation consultant trained at Option Impact. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] with [CURRENT_HEADCOUNT], build a compensation philosophy document covering salary bands, equity grants, bonus, and leveling framework benchmarked to [STAGE] norms. Output as a compensation bands table, equity grant guidelines, and a philosophy one-pager.

46. Culture Deck Core Values

Prompt: Act as a Netflix-era culture designer. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] with [CURRENT_HEADCOUNT], write a culture deck defining 5 core values. Each value must include the behavior it rewards, the behavior it penalizes, and a hiring interview signal. Avoid generic values. Output as a 5-value culture doc in markdown plus a “Values in Action” examples table.

47. Remote First Operating Model

Prompt: Act as a remote operations leader from GitLab or Automattic. For [COMPANY] transitioning to remote-first with [CURRENT_HEADCOUNT], design an operating model covering communication rituals (async/sync ratio), tooling stack, meeting hygiene, and documentation norms. Output as a remote operating handbook outline with ritual calendar, tool matrix, and a “how we work” one-pager.

48. Customer Segmentation ICP

Prompt: Act as a B2B marketing strategist specializing in ICP work. For [COMPANY] selling [PRODUCT] in [INDUSTRY], segment the customer base into 3-5 clusters using firmographic, behavioral, and needs-based attributes. Define the primary ICP with disqualifiers and must-have criteria. Output as a segment comparison table, an ICP profile card, and a disqualification checklist.

49. Customer Persona Deep Build

Prompt: Act as a user researcher who has built personas for 40+ B2B SaaS companies. For [COMPANY] targeting [SEGMENT], build 3 buyer personas: economic buyer, champion, user. For each, include demographics, goals, pains, buying criteria, objections, info sources, and trigger events. Output as three persona cards in structured markdown plus a “buyer committee” map showing influence and interactions.

50. Category Design Play

Prompt: Act as Play Bigger’s category design strategist. For [COMPANY] with differentiated [PRODUCT] in [INDUSTRY], design a new category play. Define the problem, the category name, point of view (POV), and lightning strike launch moment. Output as a category design canvas, a 500-word POV manifesto, and a lightning strike campaign plan with timing and channel mix.

51. GTM Launch 8 Week Plan

Prompt: Act as a product marketing director who has led 20+ launches. For [COMPANY] launching [PRODUCT] to [ICP] in 8 weeks, build a launch plan covering positioning, messaging, channels, assets, internal enablement, PR, and measurement. Include tiered launch strategy (internal, alpha, beta, GA). Output as a week-by-week Gantt-style table plus a launch readiness checklist.

52. Positioning Statement Rewrite

Prompt: Act as April Dunford running a positioning workshop. For [COMPANY] selling [PRODUCT] in [INDUSTRY], run the Obviously Awesome positioning process: alternatives, unique attributes, value, best fit customers, market frame. Produce a positioning statement and tagline. Output as a positioning canvas, a one-sentence positioning statement, and three alternative market frames ranked by strategic fit.

53. Messaging Hierarchy Framework

Prompt: Act as a messaging strategist who has worked with Series B+ SaaS companies. For [COMPANY] targeting [PERSONA] with [PRODUCT], build a messaging hierarchy: category, tagline, value props (3), proof points, objection handlers. Tailor variants per persona and funnel stage. Output as a messaging house table, persona-by-stage matrix, and a “sound bites” library with 20 reusable phrases.

54. Sales Playbook SPACED

Prompt: Act as a SaaS sales leader trained in SPACED selling. Build a sales playbook for [COMPANY] selling [PRODUCT] at [ACV_USD] to [ICP]. Include qualification framework (SPACED or MEDDIC), discovery questions, objection handlers, demo flow, and close techniques. Output as a playbook document with call stages, scripts per stage, and a deal checklist with stage exit criteria.

55. Demand Gen Funnel Build

Prompt: Act as a B2B demand generation leader at a Series B SaaS company. For [COMPANY] targeting [ICP] with [BUDGET_USD] quarterly budget, build a full-funnel demand gen plan: TOFU, MOFU, BOFU. Define channels, content, nurture flows, and SLA handoffs. Include CPL, MQL, SQL, and win rate benchmarks. Output as a funnel table, a channel spend allocation chart (text), and a weekly operating cadence.

56. PLG Activation Loop

Prompt: Act as a PLG growth leader who has designed loops at Notion, Figma, and Canva. For [COMPANY] with [PRODUCT] in [INDUSTRY], design an activation loop covering sign-up, aha moment, habit formation, and viral trigger. Define activation metric and guardrails. Output as a loop diagram (text), an activation funnel with drop-off metrics, and 5 experiment ideas ranked by ICE score.

57. Sales Marketing SLA

Prompt: Act as a RevOps architect aligning sales and marketing. For [COMPANY] with [MQL_VOLUME] MQLs/month, draft an SLA between marketing and sales covering lead definition, MQL/SQL criteria, handoff speed, follow-up cadence, and rejection rules. Output as an SLA document with metric targets, escalation path, and a weekly review ritual agenda.

58. Cold Outbound Sequence

Prompt: Act as a cold outbound expert who has booked meetings with Fortune 500 CXOs. For [COMPANY] selling [PRODUCT] to [ICP_TITLE] in [INDUSTRY], write a 7-touch multi-channel cold sequence (email, LinkedIn, voicemail). Each touch must have a unique angle and a clear CTA. Output as a sequence document with day, channel, subject, body, and rationale per touch.

59. Partnership Strategy Tier

Prompt: Act as a BD leader who has built partner ecosystems for SaaS unicorns. For [COMPANY] in [INDUSTRY], design a tiered partnership strategy: tech integrations, reseller, white-label, strategic. For each tier, define ideal partner profile, value exchange, economic model, and success metric. Output as a tiered partnership matrix plus a “top 10 target partners” shortlist with outreach angles.

60. Channel Partner Economics

Prompt: Act as a channel GM at an enterprise SaaS company. For [COMPANY] launching a channel program, design the partner economics: margin structure, deal reg, MDF, incentives, tiers (bronze/silver/gold). Model partner-attributed revenue projection. Output as a channel economics table, a tiering criteria grid, and a 12-month channel revenue projection.

61. M&A Target Screen

Prompt: Act as an M&A director who has closed \$1B+ in tech deals. For [COMPANY] with [CASH_USD] acquisition budget, screen 10 potential acquisition targets in [INDUSTRY] against criteria: strategic fit, revenue, growth, culture, integration risk. Output as a target scorecard matrix, a top-3 deep-dive table, and a “build vs buy” analysis for the top candidate.

62. Acquisition Integration 100 Day

Prompt: Act as a post-merger integration lead from BCG. For [COMPANY] acquiring [TARGET] valued at [DEAL_SIZE], build a 100-day integration plan covering leadership, culture, systems, product roadmap, customer communication, and synergy capture. Output as a 100-day workstream table with owners, milestones, and KPIs plus a risk register.

63. Exit Strategy Comparison

Prompt: Act as a serial founder who has exited 3 companies via IPO, acquisition, and private equity. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] in [INDUSTRY], compare exit paths: IPO, strategic acquisition, PE rollup, secondary. For each, analyze timing, valuation multiples, founder economics, and prerequisites. Output as an exit comparison matrix plus a recommended “preferred path” narrative with triggers.

64. Moat Audit Competitive Advantage

Prompt: Act as a Hamilton Helmer trained strategist applying 7 Powers. For [COMPANY] in [INDUSTRY], audit the current moat across: scale economies, network effects, counter-positioning, switching costs, branding, cornered resource, process power. Score each 0-5. Identify the primary and emerging power. Output as a 7 Powers scorecard table plus a “moat deepening roadmap” with 3 investments per power.

65. Defensibility Strategy

Prompt: Act as a YC partner who has mentored Cloudflare and Stripe founders. For [COMPANY] with [PRODUCT] in [INDUSTRY], identify the 3 most durable defensibility vectors (data, network, IP, contract lock-in, distribution). For each, propose concrete build-out actions over 12 months. Output as a defensibility canvas table, action roadmap, and a “what kills us” red team scenario.

66. Customer Retention Playbook

Prompt: Act as a Customer Success VP at a top SaaS company. For [COMPANY] with [CHURN_RATE] monthly logo churn, build a retention playbook covering onboarding, adoption, QBRs, renewal, expansion, and churn recovery. Include health scoring model and intervention triggers. Output as a CS playbook document, a health score rubric, and a 90-day retention improvement plan with targets.

67. Expansion Revenue Strategy

Prompt: Act as a Net Revenue Retention specialist from OpenView. For [COMPANY] with [NRR] NRR in [INDUSTRY], design an expansion revenue strategy covering upsell, cross-sell, seat expansion, and usage upgrade. Map expansion triggers to automation and human touch. Output as an expansion playbook matrix, a NRR waterfall projection, and a priority “expansion plays” ranked by ARR lift.

68. Board Meeting Deck Template

Prompt: Act as a startup board chair who has sat on 15+ boards. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C], design a 20-slide quarterly board deck template covering: TL;DR, KPIs, wins, misses, financials, hiring, product, GTM, strategic asks. Include an executive summary slide format. Output as a slide-by-slide outline with the specific charts/tables each slide should contain.

69. Board Governance Charter

Prompt: Act as a corporate governance expert from Cooley. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C], draft a board charter covering composition, meeting cadence, decision rights, committees (audit, comp), board packs, and observer rights. Output as a charter document plus a decision rights matrix (RACI for 20 common board decisions).

70. Founder Equity Split

Prompt: Act as a Slicing Pie facilitator and startup attorney. For [COMPANY] with [NUM_COFOUNDERS] cofounders at [STAGE], run an equity split conversation using the Slicing Pie method and cliff/vesting frameworks. Propose a split percentage with rationale. Output as an equity split worksheet, vesting schedule, and a founder agreement outline covering IP, departure, and dispute resolution.

71. Cofounder Conflict Resolution

Prompt: Act as a cofounder coach who has mediated 30+ founder disputes. For [COMPANY] with cofounders in conflict over [ISSUE], design a structured resolution session using interest-based negotiation and role clarity exercises. Output as a session agenda, a RACI role clarity template, and a written agreement template covering decisions, tiebreaker, and escape clauses.

72. Advisory Board Setup

Prompt: Act as a scaling founder who has built advisory boards for 3 startups. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] in [INDUSTRY], design an advisory board strategy: identify 5 advisor archetypes needed, equity grants (FAST), engagement cadence, and success metrics. Output as an advisor profile matrix, a FAST agreement summary, and a quarterly advisor cadence plan.

73. Strategic Pivot Decision

Prompt: Act as Eric Ries coaching a founder through a pivot decision. For [COMPANY] with [CURRENT_TRACTION] and [CURRENT_HYPOTHESIS], run a pivot diagnostic using Lean Startup's 10 pivot types. Diagnose whether to persevere or pivot based on innovation accounting. Recommend pivot type with rationale. Output as a pivot decision matrix, evidence scorecard, and a 30-day pivot execution plan.

74. Product Roadmap Strategic

Prompt: Act as a CPO at a Series B SaaS company. For [COMPANY] in [INDUSTRY] with [CURRENT_PRODUCT], build a 12-month strategic roadmap using Now/Next/Later and RICE prioritization. Tie each initiative to a strategic bet and expected outcome. Output as a Now/Next/Later roadmap table, a RICE scoring sheet for 15 initiatives, and a themes narrative.

75. Feature Prioritization RICE

Prompt: Act as an Intercom-trained product manager. For [COMPANY] with [BACKLOG_SIZE] features in the backlog, apply RICE scoring (Reach, Impact, Confidence, Effort) to prioritize the top 10. Compare RICE against Kano and WSJF for 3 high-contention items. Output as a RICE scoring table, a Kano analysis for contested items, and a recommended sprint allocation.

76. Growth Experiment Backlog

Prompt: Act as a growth engineering lead who has run 500+ experiments. For [COMPANY] targeting [METRIC_TO_IMPROVE], generate a 20-experiment growth backlog using the ICE framework. Each experiment must include hypothesis, metric, effort, and expected lift. Output as a prioritized ICE backlog table plus a 6-week experimentation calendar.

77. A/B Test Design Rigor

Prompt: Act as a statistician and growth PM at Booking.com. For [COMPANY] testing [CHANGE] on [FUNNEL_STAGE] with baseline [CURRENT_CONVERSION_RATE], design an A/B test including hypothesis, primary metric, guardrails, sample size calculation (power=0.8, MDE=5%), duration, and stop rules. Output as an experiment design doc, sample size math, and a pre-registration checklist.

78. International Expansion Plan

Prompt: Act as an international expansion consultant who has launched SaaS in 20+ countries. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] considering expansion to [TARGET_MARKET], run a market attractiveness assessment and design a go-to-market entry mode (direct, partner, JV). Output as a market attractiveness scorecard, an entry mode decision matrix, and a 12-month localization + GTM plan.

79. Competitive Response Playbook

Prompt: Act as a war-gaming strategist at a top consulting firm. [COMPETITOR] just launched [THREAT] targeting [COMPANY]'s core ICP. Run a 3-move war game: their move, your response, their counter. Recommend the optimal response (attack, defend, ignore, reposition). Output as a war game scenario doc, response options matrix with pros/cons, and a 30-day execution plan for the chosen response.

80. Moonshot Vision 10 Year

Prompt: Act as a strategic futurist coaching unicorn founders. For [COMPANY] in [INDUSTRY], craft a 10-year moonshot vision using the "Massively Transformative Purpose" (MTP) framework from Exponential Organizations. Define the MTP, 10x goal, and the emerging tech that makes it possible. Output as a one-page vision doc, a 10-year milestone table, and a "what must be true" assumption list.

81. Platform Strategy Ecosystem

Prompt: Act as a platform strategy professor from MIT Sloan. For [COMPANY] with [PRODUCT] in [INDUSTRY] considering a platform play, evaluate feasibility using Platform Revolution's "Pipe to Platform" framework. Map the core interaction, value unit, and network effect flywheel. Output as a platform canvas, an ecosystem stakeholder map, and a 3-phase platform rollout plan (single, multi-sided, ecosystem).

82. SaaS Metrics Benchmark

Prompt: Act as a SaaS analyst from Bessemer or OpenView with access to benchmark data. For [COMPANY] at [STAGE_PRE_SEED_TO_SERIES_C] with [ARR_USD] ARR, benchmark 15 SaaS metrics (T2D3, CAC payback, NRR, gross margin, magic number, etc.) against top-quartile peers. Flag the 3 metrics most off-benchmark. Output as a benchmark table with company, median, top-quartile columns plus a remediation narrative.

83. Consumer App Growth Loop

Prompt: Act as a Reforge-trained consumer growth lead from Duolingo or TikTok. For [COMPANY] with consumer app [PRODUCT], design 3 growth loops: content, viral, and paid. Map inputs and outputs per loop and identify the compounding variable. Output as a growth loop diagram in text, a loop economics model (CAC to LTV per loop), and 5 experiments per loop ranked by ICE.

84. Marketplace Liquidity Strategy

Prompt: Act as a marketplace operator from Airbnb, Uber, or Etsy. For [COMPANY] launching a marketplace in [VERTICAL], design a liquidity strategy covering chicken-and-egg, geo-launch, and category depth. Define liquidity metrics (SLA, match rate, utilization). Output as a marketplace launch playbook, liquidity metric dashboard, and a 90-day city-by-city rollout plan.

85. D2C Brand Building Blueprint

Prompt: Act as a D2C brand strategist who has launched 5 Shopify brands to \$10M ARR. For [COMPANY] launching [PRODUCT] in [CATEGORY], build a brand blueprint covering brand archetype, positioning, visual identity direction, founder story, and community strategy. Output as a brand book outline, a persona-voice matrix, and a 12-month content calendar with platform mix.

86. Agency to Product Transition

Prompt: Act as a founder who has successfully transitioned an agency into a product company. For [COMPANY] currently a [AGENCY_TYPE] agency with [REVENUE_USD], design a productization strategy covering product concept extraction, funding, team split, customer migration, and cash flow bridge. Output as a transition roadmap, a financial bridge model, and a decision checklist for “is this product ready to become the core business.”

87. Solo Founder Operating System

Prompt: Act as a solopreneur coach who has built 3 seven-figure one-person businesses. For [COMPANY] run by a solo founder in [INDUSTRY], design an operating system covering focus areas, weekly/monthly rituals, automation stack, outsourcing strategy, and revenue concentration. Output as a personal OS document, a weekly cadence calendar, and a “what to automate, delegate, eliminate” matrix.

88. Bootstrap vs VC Decision

Prompt: Act as a founder advisor who has both raised \$50M and bootstrapped to \$10M ARR. For [COMPANY] in [INDUSTRY] at [STAGE], run a decision framework on whether to bootstrap or raise VC. Score criteria: market size, capital intensity, winner-take-most dynamics, founder goals, time to PMF. Output as a decision scorecard, a scenario comparison table (bootstrap vs VC NPV), and a recommendation narrative.

89. Downturn Survival Playbook

Prompt: Act as a turnaround specialist who has guided startups through 2001, 2008, and 2022 downturns. For [COMPANY] with [RUNWAY_MONTHS] runway in a downturn, design a 3-lever survival plan: cut costs, extend runway, protect core revenue. Include specific RIE, vendor, and GTM actions. Output as a survival playbook table with levers, actions, ETA to impact, and a “zero cash” trigger plan.

90. Community Led Growth Strategy

Prompt: Act as the head of community at Notion or Figma. For [COMPANY] in [INDUSTRY], design a community-led growth (CLG) strategy covering platform choice, content strategy, ambassador program, events, and tie-ins to PLG. Define community health metrics. Output as a CLG playbook, a community KPI dashboard, and a 90-day community launch plan.

91. Content Marketing Flywheel

Prompt: Act as a content marketing strategist who has built the engine at HubSpot or Ahrefs. For [COMPANY] targeting [ICP] in [INDUSTRY], design a content flywheel covering topic cluster, SEO moat, distribution, and conversion. Identify 10 pillar topics with search volume and difficulty. Output as a topic cluster map, a content calendar for 12 weeks, and a flywheel diagram showing how content compounds.

92. Brand Purpose Manifesto

Prompt: Act as a brand strategist from Wieden+Kennedy or Red Antler. For [COMPANY] in [INDUSTRY], write a 300-word brand purpose manifesto anchored in a “category truth” and a “brand point of view.” Avoid generic purpose statements. Output as a manifesto doc, a one-line purpose statement, and a “brand beliefs” list of 5 non-negotiable stances the brand will take publicly.

93. Ethical Moat AI Era

Prompt: Act as an AI strategy advisor who has consulted OpenAI enterprise clients. For [COMPANY] in [INDUSTRY] worried about AI commoditization, identify the 3 most durable “ethical moats” (trust, compliance, proprietary data access, regulated expertise, human-in-the-loop) and action plans to build them over 18 months. Output as a moat canvas table, investment roadmap, and a “AI-proof decision” test for each product bet.

94. Regulation Compliance Strategy

Prompt: Act as a regulatory strategist from a Big 4 firm specializing in [INDUSTRY]. For [COMPANY] operating in [GEOGRAPHY], map the top 5 regulatory risks over the next 24 months (AI Act, GDPR, SOC2, HIPAA, etc.) and design a compliance roadmap. Output as a regulatory heatmap, a compliance investment table, and a “regulatory moat opportunity” analysis.

95. Financial Forecast Driver Based

Prompt: Act as a Series A CFO trained in driver-based forecasting. For [COMPANY] in [INDUSTRY] with [CURRENT_ARR], build a driver-based revenue forecast with 8 key drivers (e.g., SQLs, win rate, ACV, churn, expansion). Sensitivity-test top 3 drivers. Output as a driver tree, a 12-month forecast table with monthly detail, and a tornado chart (text) showing driver sensitivity.

96. Cohort Analysis Template

Prompt: Act as an analytics lead who has built cohort dashboards at Uber and Airbnb. For [COMPANY] with [COHORT_DATA_AVAILABLE], build a cohort retention analysis template covering weekly/monthly retention curves, LTV by cohort, expansion by cohort, and payback period by cohort. Output as a cohort table template, 3 chart specs, and a “how to read this” interpretation guide with 5 diagnostic questions.

97. Scenario Planning Three Horizons

Prompt: Act as a scenario planner from Royal Dutch Shell’s famous scenario planning team. For [COMPANY] in [INDUSTRY], develop 3 scenarios (status quo, disruptive, wild card) over a 5-year horizon using the Three Horizons framework (H1 core, H2 emerging, H3 transformational). Output as a three-horizons canvas, three scenario narratives (250 words each), and a no-regrets action list that works in all scenarios.

98. Operational Excellence Audit

Prompt: Act as a Toyota Production System expert adapting lean to startups. For [COMPANY] in [INDUSTRY] at [STAGE_PRE_SEED_TO_SERIES_C], audit operational excellence across 7 dimensions: waste, flow, pull, quality, standard work, continuous improvement, and people. Score 1-5 per dimension. Output as a lean audit scorecard, top 5 waste categories identified, and a Kaizen plan with 3 quick wins per dimension.

99. Strategic Bet Portfolio

Prompt: Act as a McKinsey partner running a portfolio review. For [COMPANY] with [CURRENT_INITIATIVES] active bets, classify each on the McKinsey Three Horizons (core, adjacent, transformational). Assess portfolio balance, capital allocation, and risk exposure. Identify overexposure and under-investment. Output as a Three Horizons portfolio chart (text), a bet scorecard table, and a rebalancing recommendation with dollar reallocation.

100. Annual Investor Letter

Prompt: Act as a founder writing a Warren Buffett-style annual letter to investors. For [COMPANY] in [INDUSTRY] covering fiscal year [YEAR], draft a 1200-word annual investor letter including: year in review, wins, misses with lessons, strategic shifts, financial highlights, outlook, and a candid ask. Tone: candid, confident, specific. Output as a structured letter in markdown with clear section headers and quantified claims throughout.

4 — Software Development & Engineering

100 Expert Prompts Inside

System architecture · DDD · CQRS · event sourcing · SOLID refactoring · code review · debugging · TDD · API design · SQL tuning · Docker · Kubernetes · OWASP · iOS · React

1. Greenfield System Architecture

Prompt: Act as a principal software architect with 15 years designing distributed systems at Stripe and Shopify. I need to design [SYSTEM_DESCRIPTION] expecting [RPS] requests/sec and [DATA_VOLUME] of data. Propose a reference architecture covering compute, storage, caching, async messaging, and edge. Justify choices against CAP theorem trade-offs and 12-factor principles. Output: ASCII architecture diagram, component table (service, responsibility, tech, SLO), and 3 key risks with mitigations.

2. Monolith To Microservices Migration

Prompt: Act as a staff engineer who led 4 monolith decompositions at FAANG scale. My codebase is [CODEBASE_DESCRIPTION] with [LOC] lines in [LANGUAGE]. Propose a strangler-fig migration plan using DDD bounded contexts. Identify seams, shared kernels, and anti-corruption layers. Output: migration roadmap (6 phases), bounded-context map in ASCII, service extraction order ranked by risk/value, and rollback strategy per phase.

3. Event Driven Architecture Design

Prompt: Act as a principal engineer specializing in event-driven systems with Kafka and Kinesis. Design an event-driven architecture for [DOMAIN] with [EVENT_TYPES]. Apply event sourcing + CQRS where appropriate. Cover schema evolution, idempotency, exactly-once semantics, and dead-letter handling. Output: event catalog table (name, producer, consumers, schema version), sequence diagram in ASCII for the happy path, and a checklist of 10 production-readiness gates.

4. Multi Region Active Active

Prompt: Act as a distinguished engineer who shipped multi-region active-active platforms at AWS. Design a multi-region active-active deployment for [SERVICE] targeting [RTO] RTO and [RPO] RPO. Address conflict resolution (CRDT vs LWW), traffic steering, split-brain, and data residency ([REGIONS]). Output: topology diagram in ASCII, failure-mode table (scenario, detection, automatic response, human runbook), and load-test plan.

5. Capacity Planning Model

Prompt: Act as a performance engineer with deep queuing theory expertise. Build a capacity model for [SERVICE] given baseline [RPS], p99 latency budget [MS], growth rate [X]% / month, and instance profile [CPU/MEM]. Use Little's Law and USE method. Output: spreadsheet-style table (month, RPS, instances, \$cost, headroom %), bottleneck analysis per tier, and 3 scale-out triggers with alert thresholds.

6. Service Mesh Decision

Prompt: Act as a platform architect who evaluated Istio, Linkerd, and Consul Connect in production. Given [CLUSTER_SIZE], [LANGUAGE_MIX], and [SECURITY_REQS], recommend a service mesh or explain why none. Compare mTLS, traffic splitting, observability, and operational cost. Output: decision matrix (criteria x mesh), ADR in MADR format, and a 30-day adoption plan with exit criteria.

7. Hexagonal Architecture Refactor

Prompt: Act as a clean-architecture expert following Alistair Cockburn's hexagonal pattern. Refactor [MODULE] written in [LANGUAGE] to hexagonal architecture. Identify ports, adapters, and the domain core. Preserve behavior; eliminate framework coupling. Output: before/after package layout tree, interface definitions for ports with docstrings, and a unit test example that runs the domain without any adapters.

8. Domain Driven Design Modeling

Prompt: Act as a DDD practitioner trained by Eric Evans and Vaughn Vernon. Model the [BUSINESS_DOMAIN] using strategic DDD. Identify bounded contexts, aggregates, entities, value objects, domain events, and context relationships (shared kernel, ACL, conformist). Output: context map in ASCII, aggregate table (name, root, invariants, events), and a ubiquitous-language glossary of 15+ terms.

9. CQRS Read Model Design

Prompt: Act as a principal engineer who built CQRS systems handling 1B events/day. For [USE_CASE], design the read-side: projection store, materialized views, rebuild strategy, and eventual-consistency UX. Cover catch-up subscriptions, poison messages, and zero-downtime schema migrations. Output: projection spec table, SQL DDL for read models, and a rebuild runbook with step-by-step commands.

10. Technical Design Document

Prompt: Act as a tech lead writing a TDD for a senior review committee. The feature is [FEATURE_DESCRIPTION]. Produce a production-grade technical design document covering goals, non-goals, API contract, data model, failure modes, rollout plan, metrics, and alternatives considered. Output: full TDD in Markdown sections (Context, Proposal, Alternatives, Risks, Rollout, Observability, Open Questions) with at least one ASCII diagram.

11. Principled Code Review

Prompt: Act as a staff engineer reviewing a PR from a mid-level dev. Review the following [LANGUAGE] code: [CODE_BLOCK]. Apply SOLID, DRY, YAGNI, and Clean Code principles. Flag naming, cohesion, coupling, error handling, testability, and performance. Output: line-numbered comments table (line, severity P0/P1/P2, issue, suggested fix, principle violated) and a 3-sentence overall verdict.

12. SOLID Refactor Exercise

Prompt: Act as Robert C. Martin teaching SOLID. Take this class [CODE_BLOCK] in [LANGUAGE] and refactor it to honor all five SOLID principles. Explain each violation found before fixing. Output: original violations list, refactored code with inline comments showing which principle each change satisfies, and a UML-style ASCII class diagram of the new design.

13. Design Pattern Application

Prompt: Act as a GoF design-patterns expert. For this scenario: [PROBLEM_DESCRIPTION], recommend the most appropriate pattern (Strategy, Factory, Observer, Decorator, Adapter, Command, etc.) with justification. Explain why other candidates are worse. Output: pattern name, intent quote from GoF, [LANGUAGE] implementation with tests, class diagram in ASCII, and 2 anti-pattern traps to avoid.

14. Legacy Code Rescue

Prompt: Act as Michael Feathers applying “Working Effectively with Legacy Code”. I have untested legacy [LANGUAGE] code: [CODE_BLOCK]. Apply the “sprout method”, “seam”, and “characterization test” techniques to make it testable without changing behavior.

Output: identified seams table, characterization tests in the project’s test framework, refactored code, and the order of safe steps followed.

15. Cyclomatic Complexity Reduction

Prompt: Act as a code-quality engineer obsessed with McCabe complexity. This function [CODE_BLOCK] has high cyclomatic complexity. Reduce it below 10 using guard clauses, polymorphism, table-driven methods, and early returns. Preserve behavior. Output: original complexity score, refactored code, new complexity score, and a table mapping each original branch to the new structure.

16. Dead Code Elimination

Prompt: Act as a code archaeologist specializing in large monorepos. Given [CODEBASE_DESCRIPTION], propose a safe strategy to detect and remove dead code: unreferenced functions, unreachable branches, feature-flag orphans, and zombie tests. Cover static analysis tools per [LANGUAGE]. Output: tool list with commands, a 5-phase removal plan, rollback strategy, and risk ranking per category.

17. API Consistency Audit

Prompt: Act as an API governance lead at a platform company. Audit the following API surface [API_SPEC] for consistency: naming (camelCase vs snake_case), pluralization, error envelopes, pagination style, timestamp formats, and HTTP status usage. Output: inconsistency table (endpoint, issue, fix, breaking? y/n), proposed style guide in bullets, and a migration plan using deprecation headers.

18. Function Naming Refactor

Prompt: Act as a clean-code reviewer who believes names are the hardest problem in CS. Rename the functions and variables in [CODE_BLOCK] written in [LANGUAGE]. Apply the rules: intention-revealing, pronounceable, searchable, no encodings, verbs for functions, nouns for variables. Output: before/after rename table with rationale, refactored code, and 3 rules of thumb the dev should internalize.

19. Code Smell Catalog

Prompt: Act as a Fowler-trained refactoring expert. Scan this code [CODE_BLOCK] in [LANGUAGE] for smells from “Refactoring” (long method, large class, feature envy, data clumps, primitive obsession, shotgun surgery, etc.). Output: smell table (smell name, location, evidence, recommended refactoring technique), priority-ordered refactor list, and a refactored version of the top 3 issues.

20. Pull Request Template

Prompt: Act as an engineering-excellence lead defining PR hygiene for a 200-dev org. Design a PR template and review checklist that enforces small diffs, test coverage, observability hooks, security review, and rollback notes. Tailor to [LANGUAGE/STACK]. Output: Markdown PR template ready to commit to .github/, reviewer checklist table, and 5 metrics to track (cycle time, review latency, etc.).

21. Stack Trace Triage

Prompt: Act as an SRE on the pager for 10 years. Analyze this stack trace: [ERROR_TRACE] from a [LANGUAGE]/[FRAMEWORK] service. Perform root-cause analysis using the “5 Whys” technique. Distinguish symptom from cause. Output: ordered hypothesis list with disproof steps, most-likely root cause with evidence, immediate mitigation, permanent fix, and 2 detection gaps that let this escape.

22. Heisenbug Investigation

Prompt: Act as a debugging expert who specializes in intermittent failures. The bug is: [BUG_DESCRIPTION], reproducing ~[FREQUENCY]. Suspect categories: race conditions, GC pauses, DNS, clock skew, network partitions, or memory pressure. Propose an investigation plan using eBPF, flight recorder, or equivalent. Output: hypothesis tree, instrumentation commands to capture evidence, and a decision table mapping observed signal to verdict.

23. Memory Leak Hunt

Prompt: Act as a JVM/Node/Go/Swift performance engineer (pick by [LANGUAGE]). RSS grows [X]MB/hour in [SERVICE]. Walk through a leak-hunting playbook using heap dumps, allocation profilers, and retained-size analysis. Output: step-by-step commands for the target runtime, common leak patterns to check (listener leaks, cache without eviction, closures), and a root-cause report template.

24. Latency Spike Diagnosis

Prompt: Act as a performance engineer at a trading firm. p99 latency for [ENDPOINT] jumped from [BASELINE] to [CURRENT]. Use the USE method (Utilization, Saturation, Errors) and RED method to partition the search space. Output: diagnostic decision tree, dashboard query list (Prometheus/Datadog), top 10 suspects ranked by prior probability, and bisection plan using canary traffic.

25. Flaky Test Root Cause

Prompt: Act as a test-infrastructure lead who eliminated flakes in a 50k-test suite. Test [TEST_NAME] fails [X]% of runs with [ERROR]. Classify the flake: timing, order dependency, shared state, network, random seed, or resource leak. Output: classification with evidence, minimal reproducer strategy, fix options ranked by permanence, and a quarantine policy template.

26. Production Incident Postmortem

Prompt: Act as an SRE writing a blameless postmortem per Google SRE Book. Incident: [INCIDENT_DESCRIPTION], duration [X] min, impact [Y]. Produce a postmortem covering timeline, detection, response, root cause (using causal chain, not a single cause), contributing factors, and action items. Output: full postmortem in Google's format with timestamps table, "what went well / what went wrong", and 5+ action items with owners.

27. Distributed Tracing Analysis

Prompt: Act as an observability engineer fluent in OpenTelemetry. Given a trace [TRACE_JSON] from a [N]-service request, identify the critical path, hotspots, and missing spans. Compute self-time vs wall-time per service. Output: annotated trace summary, service contribution table (service, self-time, wait-time, % of critical path), and 3 optimization levers ranked by impact.

28. Git Bisect Strategy

Prompt: Act as a senior engineer who has debugged regressions via bisect hundreds of times. A regression was introduced between [GOOD_SHA] and [BAD_SHA] in [REPO]. Design a bisect strategy including a reliable reproducer script, skip rules for broken commits, and automated `git bisect run`. Output: reproducer script in bash, full bisect command sequence, and a template for the fix commit message.

29. Concurrency Bug Analysis

Prompt: Act as a concurrency expert with deep knowledge of memory models in [LANGUAGE]. Given this code [CODE_BLOCK], find data races, deadlocks, livelocks, or missed wake-ups. Reason about happens-before ordering. Output: bug list with line numbers, a minimal reproducer, the correct fix using appropriate primitive (mutex, channel, atomic, actor), and a verification approach (race detector, TLA+, or stress test).

30. Perf Regression Bisection

Prompt: Act as a performance engineer maintaining a benchmark suite. Benchmark [BENCH_NAME] regressed [X]% between releases [A] and [B]. Design a bisection using microbenchmarks + profiler (perf/pprof/Instruments). Output: bisection plan, profiler commands, flamegraph reading guide, and a report template with before/after numbers, root cause, and fix verification.

31. TDD Kata Walkthrough

Prompt: Act as Kent Beck teaching TDD. Walk me through implementing [FEATURE] in [LANGUAGE] using strict red-green-refactor. Show at least 6 micro-cycles. For each cycle: failing test, minimal production code, refactor. Output: numbered cycles with test code, production code, and a one-line rationale per step, ending with a summary of emergent design decisions.

32. Test Pyramid Strategy

Prompt: Act as a QA architect defining a test strategy for [PROJECT_DESCRIPTION] in [STACK]. Apply Mike Cohn's test pyramid plus the "testing trophy" for frontend. Balance unit, integration, contract, E2E, and exploratory. Output: pyramid ratio table (level, % of suite, tools, avg runtime budget), what to test at each level, and 5 anti-patterns to avoid (ice-cream cone, etc.).

33. Property Based Test Design

Prompt: Act as a property-based testing expert using Hypothesis/QuickCheck/fast-check. For [FUNCTION_SIGNATURE], design properties beyond the obvious: invariants, roundtrips, oracle comparisons, metamorphic relations, model-based tests. Output: property list with rationale, [LANGUAGE]/[FRAMEWORK] implementation, shrinking strategy, and 3 bugs this would catch that example-based tests would miss.

34. Contract Test Setup

Prompt: Act as a microservices testing lead using Pact. My consumer [SERVICE_A] calls provider [SERVICE_B] via [PROTOCOL]. Set up consumer-driven contract tests with Pact broker, versioning, and CI gates. Output: consumer-side test code in [LANGUAGE], provider verification setup, broker URL strategy, CI pipeline YAML snippet, and a rollout checklist.

35. Mutation Testing Adoption

Prompt: Act as a test-quality engineer introducing mutation testing. For [LANGUAGE] project with [X]% line coverage, explain what mutation score reveals that coverage hides. Recommend a tool (Stryker, PIT, mutmut, mull). Output: setup commands, baseline mutation run plan, incremental adoption strategy (per-package thresholds), and interpretation of common surviving mutants.

36. E2E Test Stability

Prompt: Act as a test-infra lead who made Playwright/Cypress suites stable at scale. Current E2E suite has [X]% flake rate and [Y] min runtime. Diagnose and fix: wait strategy, test data, parallelization, retries, and selectors. Output: root-cause table (symptom, cause, fix), best-practice checklist, sample stable test in [FRAMEWORK], and a flake budget policy.

37. BDD Scenario Authoring

Prompt: Act as a BDD coach trained by Dan North. For [USER_STORY], write Gherkin scenarios following “Given-When-Then” with declarative (not imperative) style. Cover happy path, edge cases, and error cases. Avoid UI coupling. Output: feature file in Gherkin, step definition signatures in [LANGUAGE], and 3 smells to avoid (scenario soup, UI leakage, data tables as DSL).

38. Test Doubles Strategy

Prompt: Act as a testing expert who internalized Gerard Meszaros’s xUnit Patterns. For [UNIT_UNDER_TEST], decide when to use dummies, stubs, fakes, spies, or mocks. Avoid over-mocking. Output: dependency table (collaborator, double type, rationale), example test in [LANGUAGE]/[FRAMEWORK], and a rule-of-thumb cheatsheet for picking the right double.

39. Load Test Plan

Prompt: Act as a performance QA engineer using k6/Locust/Gatling. Design a load test for [API_ENDPOINT] targeting [RPS] with [LATENCY_SLO]. Include warm-up, ramp, steady-state, stress, and soak phases. Cover think time, realistic distributions, and data seeding. Output: test script in [TOOL], scenario table, pass/fail criteria, and a results interpretation guide.

40. Snapshot Testing Ethics

Prompt: Act as a senior frontend engineer who has seen snapshot tests become technical debt. For [COMPONENT] in [FRAMEWORK], decide when snapshot tests help vs harm. Propose guidelines: what to snapshot, size limits, review discipline, and when to prefer visual regression or assertion-based tests. Output: policy document (do/don't/when), example correct test, and example anti-pattern.

41. REST API Design

Prompt: Act as an API designer who contributed to the JSON:API spec. Design a REST API for [RESOURCE_DESCRIPTION]. Apply Richardson Maturity Model level 3 (HATEOAS optional), proper HTTP verbs, status codes, idempotency, pagination (cursor), filtering, sorting, and error envelopes per RFC 7807. Output: endpoint table, request/response examples, OpenAPI 3.1 skeleton, and versioning strategy.

42. GraphQL Schema Design

Prompt: Act as a GraphQL architect who designed schemas at GitHub/Shopify scale. Model [DOMAIN] as a GraphQL schema. Use Relay-style connections, global IDs, union/interface types, and proper nullability. Address N+1 via DataLoader, persisted queries, and depth limits. Output: SDL schema, resolver responsibilities table, security considerations, and a 10-item schema review checklist.

43. gRPC Service Definition

Prompt: Act as a backend engineer who migrated REST services to gRPC at scale. Define a gRPC service for [USE_CASE] using protobuf 3. Include unary, server-streaming, client-streaming, and bidi where justified. Cover deadlines, retries, backoff, auth interceptors, and error model (google.rpc.Status). Output: .proto file, service behavior table, and a client/server skeleton in [LANGUAGE].

44. API Versioning Strategy

Prompt: Act as a platform API lead who has deprecated endpoints at scale. For [API] with [N] consumers, compare versioning strategies: URI path, header, media type, query param, and evolution. Recommend one with justification, including deprecation policy, sunset headers, and client migration kit. Output: decision matrix, chosen strategy ADR, deprecation timeline template, and client notification plan.

45. Webhook Delivery System

Prompt: Act as a principal engineer who built Stripe-style webhooks. Design a reliable webhook delivery system with exponential backoff, idempotency keys, HMAC signatures (replay protection), dead-letter queue, and consumer dashboard. Output: architecture diagram in ASCII, delivery state machine, retry schedule table, HMAC signing code sample in [LANGUAGE], and a consumer integration guide.

46. Rate Limiting Algorithm Choice

Prompt: Act as an infra engineer who implemented rate limiters at edge. Compare fixed window, sliding window, token bucket, and leaky bucket for [USE_CASE] with [RPS] and [BURST]. Address distributed state (Redis vs local). Output: comparison table, recommendation with rationale, pseudocode for chosen algorithm, Redis Lua script if distributed, and headers to return (X-RateLimit-*, Retry-After).

47. API Pagination Patterns

Prompt: Act as a backend lead who redesigned pagination for a 10B-row API. Compare offset/limit, keyset (cursor), seek, and time-based pagination for [RESOURCE]. Address stability, consistency under mutation, deep-paging cost, and total counts. Output: decision tree, chosen approach with SQL examples, API contract (cursor opaque format), and 3 pitfalls to avoid.

48. Idempotency Key Design

Prompt: Act as a payments engineer who built idempotency at Stripe. Design idempotency for [MUTATING_ENDPOINT]. Cover key generation by client, server storage TTL, request fingerprinting, concurrent-request handling, and response replay. Output: sequence diagram in ASCII, storage schema, pseudocode for the middleware, failure cases (key reuse with different body), and 5-item test plan.

49. OpenAPI Documentation

Prompt: Act as an API DX lead. Given this endpoint [ENDPOINT_DESCRIPTION], write a complete OpenAPI 3.1 spec including schemas, examples (request + response), error responses, security schemes, server variables, and x-codeSamples for [LANGUAGES]. Output: full YAML spec, Spectral lint rules to enforce quality, and a doc-site generation command.

50. Error Response Standard

Prompt: Act as an API governance lead defining error contracts. Specify an error response standard based on RFC 7807 (Problem Details) for [API]. Cover type URIs, machine-readable codes, trace IDs, retryable flag, and i18n. Output: JSON schema for the error envelope, example responses for validation/auth/server errors, status-code mapping table, and client handling pseudocode.

51. Schema Design Normalization

Prompt: Act as a database architect with expertise in relational modeling. Design a normalized schema (3NF) for [DOMAIN]. Identify entities, relationships, keys (natural vs surrogate), and constraints. Then selectively denormalize for [READ_PATTERN]. Output: ER diagram in ASCII, DDL for [POSTGRES/MYSQL], index plan, and a denormalization table (what, why, staleness tolerance).

52. Index Optimization Plan

Prompt: Act as a Postgres performance expert. Given these slow queries [QUERY_LIST] and table stats [TABLE_INFO], design an index strategy. Consider btree, hash, GIN, GiST, BRIN, and partial/covering/expression indexes. Output: recommended indexes with CREATE statements, expected effect per query (EXPLAIN reasoning), write-amplification cost, and an index-maintenance plan.

53. SQL Query Refactor

Prompt: Act as a SQL tuning expert. Rewrite this query [SQL_QUERY] for performance while preserving results. Consider CTE vs subquery, window functions, lateral joins, avoiding SELECT *, predicate pushdown, and index usage. Output: rewritten SQL, EXPLAIN ANALYZE interpretation, expected plan change, and 3 common pitfalls you avoided.

54. NoSQL Data Modeling

Prompt: Act as a DynamoDB/MongoDB expert who internalized Rick Houlihan's single-table design. Model [DOMAIN] for [ACCESS_PATTERNS] in DynamoDB. Design PK/SK, GSIs, and item collection layout. Avoid hot partitions. Output: access-pattern table (name, PK, SK, index), entity-attribute-value matrix, 3 sample items, and cost estimate (RCU/WCU).

55. Database Migration Zero Downtime

Prompt: Act as a DBA who has run online migrations on 10TB tables. For [MIGRATION_DESCRIPTION] on [ENGINE], design a zero-downtime migration using expand-contract, shadow reads/writes, or pt-online-schema-change/gh-ost. Output: step-by-step runbook, backfill script skeleton, rollback plan, monitoring metrics, and expected duration formula.

56. Sharding Strategy

Prompt: Act as a principal engineer who sharded a Postgres cluster at scale. For [TABLE] growing [X]GB/month, recommend a sharding strategy: range, hash, directory, geo, or Citus/Vitess. Address rebalancing, cross-shard joins, and distributed transactions. Output: strategy choice with ADR, shard key rationale, topology diagram, and 5 operations that become harder.

57. Read Replica Architecture

Prompt: Act as a database reliability engineer. Design a read-replica topology for [PRIMARY_DB] with [READ_RPS]. Cover replication lag budget, routing (app-level vs proxy), failover, split-brain prevention, and stale-read handling (read-your-writes). Output: topology diagram, lag monitoring queries, routing logic pseudocode, and a failover runbook.

58. Cache Invalidation Strategy

Prompt: Act as a caching expert who has burned on Phil Karlton's second hardest problem. For [READ_HEAVY_WORKLOAD] with [CONSISTENCY_REQS], choose between cache-aside, read-through, write-through, write-behind, and refresh-ahead. Handle stampede (singleflight), TTL jitter, and negative caching. Output: strategy with justification, pseudocode, failure modes table, and observability metrics to track hit ratio and staleness.

59. Transaction Isolation Choice

Prompt: Act as a database expert fluent in ANSI isolation levels and MVCC. For [WORKFLOW] in [ENGINE], choose between Read Committed, Repeatable Read, Snapshot, and Serializable. Explain phenomena allowed (dirty read, non-repeatable read, phantom, write skew). Output: chosen level with rationale, SQL example showing the race prevented, and 3 application-level alternatives (SELECT FOR UPDATE, optimistic locking).

60. Data Warehouse Modeling

Prompt: Act as an analytics engineer trained by Kimball. Model [BUSINESS_PROCESS] as a star schema. Identify fact table grain, dimensions (SCD type 1/2/3), conformed dims, and aggregates. Output: bus matrix table, fact and dim DDL, grain declaration, and dbt model skeleton with ref() and tests (unique, not_null, relationships).

61. Dockerfile Hardening

Prompt: Act as a container security engineer. Review/write a production-grade Dockerfile for [LANGUAGE] app. Apply multi-stage builds, distroless/alpine base, non-root user, minimal capabilities, readonly filesystem, explicit USER/WORKDIR, .dockerignore, and vuln scanning. Output: the Dockerfile, .dockerignore, and a table of hardening steps with CIS benchmark references.

62. Kubernetes Deployment Manifest

Prompt: Act as a Kubernetes SRE. Write production-grade manifests for [SERVICE]: Deployment, Service, HPA, PDB, NetworkPolicy, and ConfigMap/Secret. Set resource requests/limits, liveness/readiness/startup probes, securityContext (runAsNonRoot, readOnlyRootFilesystem), topology spread, and rolling update strategy. Output: YAML manifests, kubectl validate command, and a 15-item production checklist.

63. CI Pipeline Design

Prompt: Act as a DevEx lead building pipelines for a 500-dev org. Design a CI pipeline for [REPO_LAYOUT] in [CI_TOOL] (GitHub Actions/GitLab/Buildkite). Cover build, unit, lint, type-check, security scan, container build, artifact signing (Cosign/SLSA), and cache strategy. Output: YAML pipeline, stage table with runtime budgets, cache keys, and parallelization plan.

64. CD Deployment Strategy

Prompt: Act as a release engineer who shipped via blue/green, canary, and progressive delivery. For [SERVICE] with [TRAFFIC], recommend a deployment strategy using Argo Rollouts/Flagger or equivalent. Cover metrics-based auto-rollback, feature flags, and DB coupling. Output: strategy with rationale, rollout spec YAML, analysis template metrics, and rollback triggers.

65. Terraform Module Design

Prompt: Act as an IaC architect who maintains a Terraform module registry. Design a reusable Terraform module for [RESOURCE] following the standard structure (main.tf, variables.tf, outputs.tf, versions.tf, examples/). Apply least privilege, tagging, and lifecycle. Output: module files, README with inputs/outputs table, tflint/checkov rules, and a semver release plan.

66. Helm Chart Authoring

Prompt: Act as a platform engineer authoring Helm charts used by 50 teams. Write a Helm chart for [APP] with values.yaml, templates, NOTES.txt, and helpers. Support overrides for resources, image, env, ingress, and HPA. Include values schema (values.schema.json) for validation. Output: chart files, a default values.yaml with comments, and a `helm template` test example.

67. Observability Stack Setup

Prompt: Act as an observability lead who deployed Prometheus + Grafana + Loki + Tempo at scale. For [ENVIRONMENT], design the full stack: metrics, logs, traces, and correlation. Cover cardinality control, retention, and sampling. Output: architecture diagram in ASCII, retention/cost table, 5 golden-signal dashboards outline, and alert policy starter pack.

68. SLO SLI Definition

Prompt: Act as an SRE applying Google's SRE book. For [SERVICE], define SLIs (availability, latency, correctness, freshness), SLOs (target %), SLAs, and error budget policy. Pick the right measurement window. Output: SLI specification table (name, formula, query), SLO targets with rationale, error budget math, and burn-rate alert thresholds (fast + slow).

69. Infrastructure Cost Optimization

Prompt: Act as a FinOps engineer who reduced AWS bills by 40%. Given [INFRA_DESCRIPTION] and [MONTHLY_COST], produce an optimization plan covering right-sizing, Savings Plans, Spot, storage tiers, egress, idle resources, and architectural changes. Output: savings table (lever, est. \$/month, risk, effort), quick-wins list, and a 90-day execution plan.

70. Chaos Engineering Plan

Prompt: Act as a chaos engineer at Netflix-scale. Design a chaos experiment plan for [SYSTEM] starting at GameDay level and progressing to production. Use Principles of Chaos (hypothesis, blast radius, abort). Output: experiment catalog table (name, hypothesis, blast radius, abort conditions), tool recommendation (Gremlin/Litmus/ChaosMesh), and a maturity roadmap.

71. Threat Model Workshop

Prompt: Act as a security architect running STRIDE-based threat modeling. For [SYSTEM_DESCRIPTION], produce a threat model: data flow diagram, trust boundaries, threats per STRIDE category, and mitigations. Output: ASCII DFD with trust zones, threat table (threat, STRIDE, likelihood, impact, mitigation, owner), and 5 highest-priority action items.

72. OWASP Top 10 Audit

Prompt: Act as an application security engineer. Audit [APP_DESCRIPTION] in [LANGUAGE]/[FRAMEWORK] against OWASP Top 10 (2021). For each category (A01 Broken Access Control through A10 SSRF), assess exposure and recommend controls. Output: audit table (category, status, evidence, remediation, priority), top 3 critical findings with code fixes, and a remediation sprint plan.

73. Auth Architecture Design

Prompt: Act as an IAM architect who designed OAuth2/OIDC at scale. For [APP] with [USER_TYPES], design the auth architecture: identity provider, flows (auth code + PKCE, device, client credentials), token format (JWT vs opaque), session management, and refresh rotation. Output: architecture diagram, flow sequence for each use case, token claims schema, and 10-item security checklist.

74. Secrets Management Plan

Prompt: Act as a platform security engineer. Design secrets management for [ENVIRONMENT] using Vault/AWS Secrets Manager/SOPS. Cover rotation, dynamic credentials, least privilege, audit logging, and developer ergonomics. Address bootstrapping the “secret zero”. Output: architecture, rotation policy per secret type, rollout plan from current state, and 5 common mistakes to avoid.

75. CSRF XSS Prevention

Prompt: Act as a web security engineer. For [WEB_APP] in [FRAMEWORK], design defenses against XSS (stored, reflected, DOM) and CSRF. Cover CSP (strict-dynamic + nonces), SameSite cookies, synchronizer tokens, output encoding, and Trusted Types. Output: control table (threat, defense, implementation), sample CSP header, code snippets for each defense, and a test plan.

76. SQL Injection Defense

Prompt: Act as an AppSec engineer. Given this [LANGUAGE] code [CODE_BLOCK] that builds SQL, identify injection risks and refactor using parameterized queries, prepared statements, or ORMs. Cover dynamic identifiers (table/column names), IN clauses, and LIKE patterns. Output: vulnerable-vs-fixed code, test payloads, and a library-level lint rule to prevent regression.

77. Dependency Supply Chain

Prompt: Act as a supply-chain security engineer who implemented SLSA level 3. For [REPO] in [LANGUAGE], design defenses: lockfile integrity, Dependabot/Renovate, SBOM generation (Syft), vuln scanning (Grype/Trivy), signed commits, signed artifacts (Cosign), and provenance attestation. Output: control table, CI workflow snippets, and an incident playbook for a compromised dependency.

78. JWT Best Practices

Prompt: Act as an identity engineer who has seen every JWT footgun. Review/design JWT usage for [APP]: algorithm choice (EdDSA vs RS256; never none), kid rotation, aud/iss/exp validation, token scope minimization, storage (httpOnly cookie vs memory), and revocation. Output: do/don't table, token claim schema, sample signing and verification code in [LANGUAGE], and 5 common exploits.

79. Zero Trust Network Design

Prompt: Act as a zero-trust architect. For [INTERNAL_ENVIRONMENT], design zero-trust access: identity-aware proxy, device posture, mTLS everywhere, workload identity (SPIFFE/SPIRE), policy engine (OPA), and continuous verification. Output: architecture in ASCII, policy examples in Rego, migration plan from perimeter model, and measurable outcomes.

80. Security Incident Response

Prompt: Act as a security IR lead. An alert fires: [ALERT_DESCRIPTION]. Walk through the IR playbook per NIST SP 800-61: detection, triage, containment (short + long term), eradication, recovery, and post-incident. Output: minute-by-minute action list, communication template for stakeholders, evidence-preservation commands, and a post-incident report outline.

81. SwiftUI Architecture MVVM

Prompt: Act as a principal iOS engineer who shipped SwiftUI apps at scale. For [APP_DESCRIPTION], design an MVVM architecture using Swift Concurrency, @Observable (or ObservableObject), and dependency injection via environment. Cover navigation with NavigationStack, state restoration, and previewability. Output: module diagram, ViewModel protocol, a sample feature with View + ViewModel + Repo, and testing strategy.

82. UIKit To SwiftUI Migration

Prompt: Act as an iOS tech lead migrating a UIKit codebase to SwiftUI incrementally. Given [APP_DESCRIPTION] with [LOC] UIKit code, propose a strangler-fig plan using UIHostingController, UIViewRepresentable, and coordinator bridges. Output: migration phases, compatibility bridge patterns (code snippets), risks table, and a rollback plan per screen.

83. Swift Concurrency Refactor

Prompt: Act as a Swift concurrency expert who read Doug Gregor's evolution proposals. Refactor this callback-based code [CODE_BLOCK] to async/await with proper actor isolation, structured concurrency (TaskGroup), cancellation, and Sendable conformance. Output: refactored code, isolation domain diagram, a table of each original callback mapped to async, and 3 data-race pitfalls avoided.

84. Core Data SwiftData Modeling

Prompt: Act as an iOS data architect. Model [DOMAIN] in Core Data or SwiftData (pick based on [MIN_IOS]). Cover entities, relationships, validation, migration (lightweight vs manual), background contexts, and conflict resolution. Output: entity diagram, sample .xcdatamodeld spec in table form, migration plan between versions, and a thread-safety checklist.

85. iOS Performance Optimization

Prompt: Act as an iOS performance engineer fluent in Instruments. For [APP_SYMPTOM] (e.g., slow launch, scroll jank, battery drain), design an investigation using Time Profiler, Allocations, Core Animation, and os_signpost. Output: Instruments template per symptom, common causes table, code-level checklist (main thread, image decoding, cell reuse), and acceptance criteria.

86. iOS Accessibility Audit

Prompt: Act as an iOS accessibility lead certified in WCAG 2.2. Audit [SCREEN_DESCRIPTION] for VoiceOver, Dynamic Type, Smart Invert, Reduce Motion, Switch Control, and color contrast. Output: finding table (issue, WCAG criterion, fix), SwiftUI code samples for accessibilityLabel/Value/Hint/Traits, a11y test plan using XCTest, and a sign-off checklist.

87. App Store Release Checklist

Prompt: Act as an iOS release manager who has shipped 200+ App Store releases. For [APP] release [VERSION], produce a release checklist: version bumping, changelog, screenshots, privacy nutrition labels, ATT, App Review guidelines compliance, phased rollout, and rollback plan. Output: checklist in Markdown, common rejection reasons to pre-check, and a post-release monitoring plan.

88. iOS Push Notification Design

Prompt: Act as an iOS backend + client engineer who built APNs at scale. Design push notifications for [USE_CASE]: APNs tokens, token refresh, silent pushes, NotificationServiceExtension for mutable content, critical alerts, and server-side provider API. Cover delivery metrics and opt-in funnel. Output: architecture, iOS code snippets, server payload examples, and analytics events to track.

89. Swift Package Modularization

Prompt: Act as an iOS build engineer. Given [APP_DESCRIPTION] with [LOC], propose a SwiftPM-based modularization: feature modules, core modules, interface vs implementation split, and binary targets for heavy deps. Address build times, test speed, and preview reliability. Output: package graph diagram, Package.swift skeletons, module boundary rules, and a migration path from monolith.

90. iOS Secure Storage

Prompt: Act as an iOS security engineer. For [SENSITIVE_DATA] (tokens, PII, keys), design secure storage using Keychain (kSecAttrAccessible options), Secure Enclave for keys, CryptoKit, and biometrics gating via LocalAuthentication. Cover jailbreak-resistant strategies and backup/restore semantics. Output: decision table per data type, Swift code sample, and 5 pitfalls (iCloud Keychain, sim vs device).

91. React Component Architecture

Prompt: Act as a principal frontend engineer who led design systems at Vercel/Shopify. For [FEATURE] in React 19, design the component tree using composition over props, container/presentational split, and server vs client components. Apply accessibility primitives (Radix/ARIA). Output: component tree diagram, props table for each component, sample TSX with Suspense boundaries, and a testing plan.

92. Next.js App Router Design

Prompt: Act as a Next.js expert who shipped App Router apps in production. Design the routing, data fetching, and caching strategy for [APP]. Cover Server Components, Server Actions, streaming, parallel/intercepted routes, `revalidatePath/Tag`, and edge vs node runtime. Output: route tree, data-fetch table per route, cache keys, and 5 common footguns to avoid.

93. Frontend State Management

Prompt: Act as a frontend architect who has used Redux, Zustand, Jotai, Recoil, and TanStack Query. For [APP_DESCRIPTION], choose a state strategy separating server state, URL state, form state, and UI state. Output: decision matrix, chosen tools with rationale, sample store/query code in TypeScript, and an anti-pattern list (global state creep, prop drilling, over-fetching).

94. Web Performance Budget

Prompt: Act as a web perf engineer fluent in Core Web Vitals (LCP, INP, CLS). For [SITE_TYPE], set perf budgets and design a monitoring plan using Lighthouse CI, WebPageTest, and RUM (CrUX/SpeedCurve). Output: budget table (metric, budget, critical path), optimization levers ranked by impact (image, JS, CSS, fonts, TTFB), and a CI gate configuration.

95. React Hook Refactor

Prompt: Act as a React expert fluent in the rules of hooks and React 19 features. Refactor this component [CODE_BLOCK] using custom hooks, `useMemo` / `useCallback` only where justified, `useEffect` cleanup, and `use` hook for promises. Remove derived-state bugs. Output: refactored component, extracted hooks, a before/after behavior table, and 3 common hook mistakes avoided.

96. CSS Architecture Scalable

Prompt: Act as a CSS architect who has owned design tokens at scale. For [DESIGN_SYSTEM], compare CSS Modules, Tailwind, CSS-in-JS (Vanilla Extract, Panda), and Open Props. Cover tokens, theming (light/dark), spacing scale, and build output size. Output: decision matrix, chosen approach with ADR, token schema in JSON, and a migration plan from current CSS.

97. Web Accessibility Audit

Prompt: Act as a certified accessibility engineer (IAAP CPACC). Audit [PAGE] against WCAG 2.2 AA: keyboard, focus management, ARIA roles/states, contrast, semantic landmarks, form labels, and live regions. Output: finding table (criterion, severity, evidence, fix), code patches in HTML/JSX, axe-core test config, and manual test script (keyboard-only walkthrough).

98. Frontend Build Optimization

Prompt: Act as a build engineer fluent in Vite, Turbopack, esbuild, and webpack. For [PROJECT] with [BUILD_TIME] and [BUNDLE_SIZE], optimize: code splitting, tree shaking, dynamic imports, module federation, and dep pre-bundling. Output: current vs target metrics, config snippets for the bundler, lever table ranked by impact/effort, and a regression-prevention plan (size-limit).

99. SSR Hydration Strategy

Prompt: Act as a rendering expert who has debugged hydration mismatches in the wild. For [APP] in [FRAMEWORK], decide between CSR, SSR, SSG, ISR, and RSC. Cover hydration cost, TTI vs TTFB trade-offs, island architecture (Astro/Qwik), and streaming. Output: decision tree, chosen strategy with rationale, route-level rendering table, and a debugging guide for hydration errors.

100. Frontend Testing Strategy

Prompt: Act as a frontend testing lead following Kent C. Dodds's testing trophy. For [APP] in [FRAMEWORK], design a test strategy: static (TS, ESLint), unit (Vitest), component (Testing Library), integration, E2E (Playwright), visual regression (Chromatic), and a11y (axe). Output: trophy ratio table, tooling choices with rationale, sample tests per level, and 5 anti-patterns to avoid (testing implementation details, etc.).

Meta-prompting · chain-of-thought · tree-of-thought · ReAct · agentic workflows · GTD · inbox triage · meeting prep · second brain · Zapier & n8n blueprints · Feynman learning

1. Meta-Prompt Rewriter

Prompt: Act as a senior prompt engineer who has shipped production LLM agents at Anthropic scale. Take my raw prompt [INPUT_PROMPT] targeting [GOAL] and rewrite it using role-setting, explicit constraints [CONSTRAINTS], few-shot examples, and chain-of-thought scaffolding. Identify 3 ambiguity risks, 3 failure modes, and propose mitigations. Output as a markdown table with columns: Original, Rewritten, Rationale, Token Delta, Expected Quality Lift (1-10).

2. Few-Shot Example Generator

Prompt: Act as a prompt engineer specializing in in-context learning. For task [TASK_DESCRIPTION], generate 5 diverse few-shot examples covering edge cases, ambiguous inputs, and adversarial phrasing. Each example must show Input -> Reasoning -> Output. Use semantic diversity (not surface variations). Output as JSON array with fields: id, input, chain_of_thought, expected_output, difficulty (easy/medium/hard), edge_case_type.

3. Chain-of-Thought Scaffold

Prompt: Act as a reasoning systems researcher. Given problem [PROBLEM] with success metric [SUCCESS_METRIC], design a chain-of-thought scaffold that forces the model to: (1) decompose, (2) identify unknowns, (3) map to known patterns, (4) verify each step, (5) self-critique. Output as a reusable prompt template with [VARIABLES] and numbered thinking steps, plus a self-consistency voting rubric for N=5 samples.

4. Tree-of-Thought Planner

Prompt: Act as an AI agent architect implementing tree-of-thought reasoning. For decision [DECISION] with constraints [CONSTRAINTS], generate 3 branching strategies, evaluate each branch against [SUCCESS_METRIC] using a 1-10 rubric, prune dominated branches, then deepen the top branch two levels. Output as a markdown tree with evaluation scores, pruning rationale, and final recommended path with confidence interval.

5. ReAct Agent Blueprint

Prompt: Act as an agentic workflow designer. Build a ReAct (Reason + Act) loop for goal [GOAL] using tools [TOOLS_AVAILABLE]. Define: observation schema, reasoning template, action space, termination condition, max iterations, failure recovery. Include 2 worked examples showing Thought -> Action -> Observation -> Thought cycles. Output as a YAML config plus Python pseudocode for the agent loop with explicit state machine transitions.

6. Self-Consistency Voter

Prompt: Act as an LLM reliability engineer. Design a self-consistency pipeline for task [TASK] where N=5 reasoning samples are generated, normalized, then majority-voted. Specify: sampling temperature, normalization regex, tie-breaking rule, confidence threshold for escalation to human review. Output as a Python function signature with docstring, followed by a decision tree showing vote aggregation logic and abstention criteria.

7. Prompt Debugger

Prompt: Act as a prompt debugging specialist. My prompt [PROMPT] is producing output [ACTUAL_OUTPUT] but I expected [EXPECTED_OUTPUT]. Diagnose root cause using a 6-checkpoint framework: role clarity, instruction ordering, example quality, constraint conflicts, output format specification, implicit assumptions. Output as a diagnostic report with severity ratings, exact line-level fixes, and a regression test suite of 3 inputs to verify the fix.

8. System Prompt Architect

Prompt: Act as a system prompt architect for an AI product used by [USER_PERSONA] to accomplish [GOAL]. Design a system prompt covering: identity, capabilities, hard constraints, soft preferences, refusal policies, output format defaults, and escalation

triggers. Keep under 500 tokens. Output as a numbered markdown spec plus the final compiled system prompt in a code block ready for API deployment.

9. Instruction Compression

Prompt: Act as a prompt optimization engineer focused on token efficiency. Compress my verbose prompt [INPUT_PROMPT] by 40-60% while preserving behavioral fidelity. Techniques allowed: remove hedging, consolidate redundant instructions, replace examples with schemas, use symbolic notation. Output original token count, compressed version, compressed token count, percentage reduction, and a behavioral equivalence checklist of 5 test inputs.

10. Prompt Evaluation Rubric

Prompt: Act as an LLM evaluation researcher. Build a prompt evaluation rubric for task [TASK_TYPE] scoring: correctness, completeness, format adherence, hallucination rate, instruction following, safety. Each dimension rated 1-5 with concrete anchors. Include inter-rater reliability guidance. Output as a markdown scorecard with rating anchors per dimension, aggregation formula, and a sample scored example showing how to apply the rubric.

11. Planner-Executor Split

Prompt: Act as an agentic systems architect. For complex goal [GOAL] requiring [TOOLS_AVAILABLE], split cognition across a planner LLM and executor LLM. Planner outputs a JSON plan with dependency graph; executor consumes subtasks and emits structured observations. Define interfaces, error handoff protocol, and replanning triggers. Output as 2 prompt templates (planner, executor) plus a message schema in JSON Schema format with required fields.

12. Tool Use Function Schemas

Prompt: Act as a function-calling API designer. Given task [TASK] requiring integrations with [TOOLS_AVAILABLE], generate OpenAI-style function schemas for each tool with strict parameter validation, enum constraints, and required/optional flags. Include a tool selection heuristic the LLM should follow. Output as JSON array of function definitions plus a router prompt that teaches the model when to call each tool versus answer directly.

13. Multi-Agent Orchestration

Prompt: Act as a multi-agent systems designer. Design 3 specialized agents (Researcher, Critic, Synthesizer) collaborating on [GOAL]. Define each agent's system prompt, message format, turn-taking protocol, termination condition, and conflict resolution. Include a shared memory schema. Output as a sequence diagram in ASCII art, followed by YAML definitions for each agent and the orchestration loop in Python pseudocode.

14. Reflexion Loop Designer

Prompt: Act as an AI agent researcher implementing Reflexion-style self-improvement. After each attempt at [TASK], the agent writes a verbal self-reflection stored in episodic memory and used to improve the next attempt. Design the reflection prompt, memory schema, and retrieval strategy. Output as a 4-component spec: attempt prompt, evaluation prompt, reflection prompt, memory structure in JSON, plus a worked example over 3 iterations showing improvement.

15. Agentic RAG Pipeline

Prompt: Act as a RAG systems architect. Design an agentic RAG pipeline for knowledge base [KNOWLEDGE_BASE] answering queries like [SAMPLE_QUERY]. Include: query rewriting, hybrid search (BM25 + vectors), reranking, answer generation with inline citations, groundedness check, fallback to web search. Output as a flowchart in Mermaid syntax plus prompt templates for each stage with [VARIABLES] and stop conditions.

16. Agent Memory Design

Prompt: Act as a cognitive architecture designer for LLM agents. Design 3-tier memory (working, episodic, semantic) for an agent pursuing [LONG_HORIZON_GOAL]. Specify: what to store, retention policy, retrieval triggers, compression strategy, forgetting curve. Output as a memory schema in JSON, a retrieval prompt template, and a consolidation prompt that runs nightly to promote episodic to semantic memory with deduplication logic.

17. Agent Failure Recovery

Prompt: Act as a resilience engineer for AI agents. Enumerate 10 failure modes for an agent executing [TASK] (hallucinated tools, infinite loops, stale context, rate limits, partial outputs). For each, prescribe detection signal, recovery action, and escalation trigger. Output as a markdown table with columns: Failure Mode, Detection, Recovery, Escalation, Severity (1-5), plus a circuit breaker pattern in pseudocode.

18. Budget-Aware Agent

Prompt: Act as a cost optimization engineer for LLM agents. Design an agent for [GOAL] with a hard budget of [TOKEN_BUDGET] tokens and [DOLLAR_BUDGET]. Techniques: prompt caching, cheaper model for routing, summarization at thresholds, early termination. Output as a cost accounting table per step, a budget monitor prompt that runs every N turns, and a graceful degradation playbook when budget hits 70%, 90%, 100%.

19. Agent Observability Spec

Prompt: Act as an LLMops engineer. Define an observability spec for production agent [AGENT_NAME] including: trace schema, span taxonomy, latency percentiles to track, quality signals, cost per conversation, golden test set, drift alerts. Output as a JSON schema for trace events, 5 dashboard widgets in specification form, and 3 alerting rules with thresholds and on-call runbooks.

20. Computer Use Agent Loop

Prompt: Act as a computer-use agent designer. Build a loop where the agent sees screenshots, reasons about UI elements, and issues mouse/keyboard actions to accomplish [TASK] on [APPLICATION]. Include: screenshot preprocessing, element grounding prompt, action schema, verification after each action, rollback on error. Output as a state machine diagram plus the core reasoning prompt template with chain-of-thought for visual grounding.

21. Weekly Review System

Prompt: Act as a GTD coach trained by David Allen. Facilitate my weekly review over [INPUT_DATA] consisting of last week's calendar, task list, and journal. Walk through the 11-step GTD review: collect loose papers, inbox zero, review waiting list, review projects, review someday-maybe. Output as a filled-in review template with: wins, stuck projects, next actions per project, someday items promoted, and 3 focus themes for next week.

22. Daily Planning Protocol

Prompt: Act as a time-blocking coach in the Cal Newport tradition. Given my top 3 priorities [PRIORITIES] and calendar [CALENDAR], design a time-blocked day from 7am to 9pm. Include deep work blocks (90 min), shallow batching, buffer time (15% slack), and a shutdown ritual. Output as an hourly schedule table with block type (deep/shallow/break/admin), priority served, and a contingency plan if any block is disrupted.

23. Eisenhower Matrix Triage

Prompt: Act as a productivity coach applying the Eisenhower matrix. Classify my task list [TASK_LIST] into 4 quadrants: Urgent-Important (do now), Not Urgent-Important (schedule), Urgent-Not Important (delegate), Not Urgent-Not Important (delete). For each task include estimated duration, energy level required, and 1-sentence rationale. Output as a 2x2 markdown table plus a prioritized action list for today with time estimates summing to under 6 hours.

24. Energy Management Plan

Prompt: Act as a peak performance coach applying ultradian rhythm science. Map my energy patterns from [ENERGY_LOG] (7-day self-report of alertness 1-10 hourly) and design a schedule aligning high-cognition work with peaks, admin with troughs, and recovery with valleys. Output as a personal chronotype profile, optimal windows for 4 task types (creative, analytical, social, routine), and a 1-week schedule template.

25. Pomodoro Variable Timer

Prompt: Act as a deep work researcher customizing Pomodoro technique for my context. Based on task type [TASK], cognitive load [LOAD_1_TO_10], and typical flow duration [FLOW_MINUTES], recommend optimal work/break cycles (classic 25/5, 50/10, 90/20 ultradian). Output as a protocol table with cycle length, break activity (movement/hydration/breath), total session length, and a fatigue escalation rule triggering a longer break.

26. Inbox Zero Workflow

Prompt: Act as an email productivity coach trained on Merlin Mann's Inbox Zero and 43 Folders. Design a 5-action triage workflow for inbox [INBOX_STATE]: Delete, Delegate, Respond (under 2 min), Defer, Do. Include keyboard shortcuts for Gmail/Outlook, a batch processing schedule (3x daily), and a template library reference. Output as a flowchart plus a daily script naming when to process, for how long, and exit criteria.

27. Focus Protocol Design

Prompt: Act as an attention researcher combining insights from Cal Newport, Nir Eyal, and Andrew Huberman. Design a distraction-free focus protocol for [GOAL] incorporating: pre-session ritual, environment setup, phone in another room, website blockers, intention setting, post-session review. Output as a 10-step checklist with time estimates, a scoring rubric (1-10) for session quality, and a weekly aggregation template to track trends.

28. Habit Stacking Blueprint

Prompt: Act as a behavior designer trained at BJ Fogg's Stanford lab. Given my existing anchor habits [ANCHORS] and desired new habits [NEW_HABITS], design a habit stack using the formula "After [ANCHOR], I will [NEW HABIT]". Specify minimum viable dose, celebration, environmental trigger. Output as a habit recipe card for each pairing, a 30-day tracking sheet, and a troubleshooting guide for common failure patterns by day 7, 14, 21.

29. OKR Drafting Assistant

Prompt: Act as an OKR coach trained by Christina Wodtke. Given my aspiration [ASPIRATION] and current state [CURRENT], draft 1 Objective (inspirational, qualitative) and 3-5 Key Results (measurable, time-bound, stretch). Apply the "confidence level" check: KRs should feel 50% achievable. Output as a markdown OKR card with Objective, KRs, confidence %, leading indicators, and weekly check-in questions for progress tracking.

30. Personal Retrospective

Prompt: Act as an agile coach facilitating a personal retrospective over period [PERIOD]. Using the Start/Stop/Continue framework plus a "Mad/Sad/Glad" emotional check, walk me through reflection on [INPUT_DATA]. Extract 3 systemic insights, 1 experiment to try next period, and 1 belief to update. Output as a structured retro document with sections, plus a one-line commitment I can post as my north star for next period.

31. Email Triage Categorizer

Prompt: Act as an email automation specialist. Given inbox sample [EMAIL_LIST], classify each email into: Action Required, FYI, Newsletter, Spam, Client, Internal, Personal. For each, assign priority (P0/P1/P2/P3), estimated response time, and suggested action (reply/archive/delegate/schedule). Output as a JSON array ready to pipe into a Gmail filter or n8n workflow, with a summary of triage stats and recommended bulk actions.

32. Reply Template Library

Prompt: Act as an executive assistant who handles 500 emails/day. Generate 15 reusable email reply templates covering: meeting decline, meeting reschedule, polite no, information request, status update, intro request, follow-up, payment reminder, feedback

request, out-of-office, escalation, thank you, delay notice, handoff, closing loop. Each under 80 words with [VARIABLES]. Output as a markdown snippet library with trigger keywords.

33. Cold Email Generator

Prompt: Act as a cold outreach strategist trained by Alex Berman and Josh Braun. Write 3 variant cold emails to [PROSPECT] working at [COMPANY] for goal [GOAL]. Each variant uses a different hook (observation, compliment, mutual connection). Rules: under 100 words, 1 CTA, no “hope you’re well”, personalize first line. Output as 3 email drafts plus subject line A/B variants and a predicted reply rate rationale.

34. Unsubscribe Automation

Prompt: Act as a digital declutter coach. Given my newsletter subscriptions [SUBSCRIPTIONS] with open rates [OPEN_RATES] and last-click dates, classify each as Keep/Unsubscribe/Downgrade-Frequency. For unsubscribes, draft a one-shot bulk action plan using Unroll.me or manual filters. Output as a decision table, a Gmail search query that surfaces unread newsletters older than 7 days, and a weekly “prune ritual” script of 15 minutes.

35. Email Follow-Up Sequencer

Prompt: Act as a sales enablement specialist designing follow-up cadences. For initial email to [PROSPECT] with goal [GOAL], design a 5-touch sequence over 14 days using varied channels and angles (value-add, case study, break-up, different stakeholder, soft ask). Output as a table with columns: Day, Channel, Subject, Body (80 words), CTA, then an “exit criteria” section for when to stop the sequence gracefully.

36. Meeting Decline Diplomat

Prompt: Act as a chief of staff protecting a founder’s calendar. Given meeting request [REQUEST] and my calendar context [CALENDAR], draft a diplomatic decline that: acknowledges the requester, offers an async alternative (Loom, doc comments), proposes a different time if critical, or redirects to a better contact. Output as 3 tiered replies (soft decline, hard decline, redirect) each under 60 words with tone notes.

37. Email Summarizer Agent

Prompt: Act as a personal intelligence briefing agent. Given today’s inbox [EMAIL_THREADS], produce a morning briefing with: 3 must-reply items (with draft replies), 5 FYI items (one-line summaries), 2 items requiring decisions (with options),

commitments I made this week, and open questions awaiting me. Output as a markdown briefing under 500 words formatted for 30-second scan with inline [link] placeholders.

38. Newsletter Writer Assist

Prompt: Act as a B2B newsletter editor in the style of Morning Brew. Given raw input [RAW_NOTES] on topic [TOPIC] for audience [AUDIENCE], draft a 400-word newsletter with: witty subject line, 1-sentence hook, 3-beat narrative, 1 data point, 1 actionable takeaway, 1 CTA. Tone: smart-casual, pun-tolerant. Output as ready-to-send markdown plus 3 subject line variants with predicted open rate rationale.

39. Email Thread Summarizer

Prompt: Act as an executive briefing analyst. Given long email thread [THREAD], produce: 1-sentence TL;DR, chronological decision log, unresolved questions, commitments by person, next action owner, and a suggested reply continuing the thread. Flag any contradictions between participants. Output as a structured brief with sections and a JSON block of {person, commitment, due_date, status} for tracking in a task manager.

40. Bulk Reply Generator

Prompt: Act as a community manager handling [NUMBER] similar inbound emails on topic [TOPIC]. Generate 1 master reply template, then 5 personalized variants that adapt tone, length, and specific details based on sender signals [SIGNALS]. Include a classification rule for when to use each variant. Output as a routing table plus the master template with [PERSONALIZATION_VARIABLES] and a quality check against 3 sample inputs.

41. Meeting Prep Brief

Prompt: Act as a chief of staff preparing a principal for meeting [MEETING]. Given attendees [ATTENDEES], goal [GOAL], and background [CONTEXT], produce a 1-page brief containing: desired outcome, top 3 talking points, likely objections with pre-planned responses, questions to ask, decisions to make, 1-slide mental model, and post-meeting action commitments. Output as a structured markdown brief under 400 words.

42. Meeting Notes to Actions

Prompt: Act as a meeting scribe extracting structured signal from noise. Given raw transcript [TRANSCRIPT] of meeting about [TOPIC], extract: decisions made (with rationale), action items (owner + due date), open questions, parking lot items, and

sentiment shifts. Output as a JSON object with arrays for each category, plus a human-readable summary under 200 words and 3 draft follow-up messages to action owners.

43. 1:1 Agenda Builder

Prompt: Act as an engineering manager coach. Build a 30-minute 1:1 agenda between [MANAGER] and [REPORT] given recent context [CONTEXT]. Structure: 5 min personal check-in, 10 min report's agenda, 10 min manager's agenda, 5 min feedback loop. Include 3 open-ended question prompts and a growth area touchpoint. Output as a shared doc template with time boxes, question bank, and a note-taking section for action items.

44. Meeting Decliner Rubric

Prompt: Act as a productivity auditor applying Jeff Bezos' "two-pizza" and "is this the best use of an hour?" tests. Given meeting [MEETING] with agenda [AGENDA], score on 5 criteria (clear goal, right attendees, prep material, decision needed, async alternative). If under 15/25, draft a decline email with async alternative. Output as a scorecard plus go/no-go recommendation and the decline email if applicable.

45. Stand-Up Summary Bot

Prompt: Act as a Scrum master automating daily stand-ups. Given yesterday's work [YESTERDAY], today's plan [TODAY], and blockers [BLOCKERS] from team [TEAM_MEMBERS], synthesize a single team-level stand-up summary highlighting cross-dependencies, shared blockers, and risks to sprint goal. Output as a Slack-ready markdown message under 300 words with @mentions for owners and a "needs attention" section for the Scrum master.

46. Retrospective Facilitator

Prompt: Act as an agile retrospective facilitator trained in Esther Derby's techniques. Given sprint data [SPRINT_DATA] and team feedback [FEEDBACK], run a "4 Ls" retro (Liked, Learned, Lacked, Longed For). Cluster themes, surface top 3 experiments for next sprint, and define success metrics for each. Output as a retro summary document with clustered themes, voted priorities, and a SMART experiment spec for each action item.

47. Action Item Enforcer

Prompt: Act as an accountability coach. Given my action items from last meeting [LAST_ACTIONS] and current status [STATUS], diagnose why incomplete items slipped (forgot, blocked, deprioritized, unclear). For each, prescribe recovery: reschedule,

delegate, descope, or kill. Output as a status table with columns: Action, Status, Slip Reason, Recovery, New Due Date, Confidence, plus a systemic recommendation to prevent repeat patterns.

48. Async Meeting Converter

Prompt: Act as a remote work strategist in the GitLab handbook tradition. Given meeting [MEETING] with goal [GOAL], redesign it as an async-first workflow using: shared doc for context, Loom video for nuance, threaded comments for discussion, decision log for outcomes. Output as an async protocol with document template, contributor instructions, deadline, tie-breaker rule, and the Slack message inviting participation with clear expectations.

49. Stakeholder Update Draft

Prompt: Act as a product manager writing a weekly stakeholder update for [PROJECT]. Given progress [PROGRESS], blockers [BLOCKERS], and upcoming milestones [MILESTONES], draft an update using the “RAG + headline” format: traffic light status, 1-line headline, 3 bullets on progress, 3 bullets on risks, 1 ask. Output as a ready-to-send markdown under 250 words with a TL;DR at top and a metrics table.

50. Meeting ROI Calculator

Prompt: Act as a productivity economist. Given recurring meeting [MEETING] with [ATTENDEES] hourly rates averaging [RATE], duration [DURATION], and outcomes [OUTCOMES], compute cost per meeting, cost per decision, cost per action item produced. Benchmark against a 10x ROI threshold. Output as a cost-benefit table, a verdict (keep/shrink/kill), and 3 optimization levers ranked by savings potential with estimated dollar impact.

51. Project WBS Decomposer

Prompt: Act as a project manager certified in PMBOK. Decompose project [PROJECT] with goal [GOAL] into a work breakdown structure of at most 3 levels. Each leaf task must be 4-16 hours, have clear acceptance criteria, owner, dependencies, and effort estimate. Apply the 100% rule (children sum to parent). Output as an indented markdown tree plus a dependency graph in Mermaid syntax and a critical path highlight.

52. First Principles Decomposer

Prompt: Act as a first-principles thinker in the Elon Musk / Richard Feynman tradition. Given problem [PROBLEM], strip it to fundamental truths by asking “why” 5 times and “what must be true?” Identify assumptions, test each against physics/economics/logic, then rebuild a solution from atoms. Output as a 3-column table (Assumption, Challenge, First Principle) plus a reconstructed problem statement and a novel solution path.

53. MoSCoW Prioritizer

Prompt: Act as an agile product coach. Given backlog [BACKLOG] for sprint with capacity [CAPACITY], classify each item as Must/Should/Could/Won't using the MoSCoW method. For each Must, validate with the “release-breaking” test. For each Won't, add rationale for deferral. Output as a prioritized markdown table with effort estimates, cumulative capacity check, and a risk callout for any Musts exceeding 60% of capacity.

54. Pre-Mortem Analysis

Prompt: Act as a risk analyst running a Gary Klein-style pre-mortem. Imagine project [PROJECT] failed catastrophically 6 months from now. Brainstorm 15 plausible failure causes across 5 categories: technical, people, market, execution, external. Rank by likelihood x impact. For top 5, propose early warning indicators and mitigations. Output as a risk register with columns: Cause, Category, Likelihood (1-5), Impact (1-5), Signal, Mitigation, Owner.

55. Gantt Timeline Builder

Prompt: Act as a project scheduler. Given tasks [TASKS] with durations and dependencies [DEPENDENCIES], build a Gantt timeline starting [START_DATE] with a hard deadline [DEADLINE]. Apply critical path method, add 15% buffer, flag resource conflicts. Output as an ASCII Gantt chart, a critical path list, milestone dates, and a slippage playbook describing what to compress if the timeline slips by 1 week.

56. RACI Matrix Designer

Prompt: Act as an organizational design consultant. For project [PROJECT] with deliverables [DELIVERABLES] and stakeholders [STAKEHOLDERS], build a RACI matrix assigning Responsible, Accountable (exactly 1), Consulted, Informed. Apply validation rules: every deliverable has exactly one A, no person is over-allocated. Output as a markdown table with deliverables as rows, people as columns, plus a conflict report and redesign suggestions if any rule is violated.

57. User Story Writer

Prompt: Act as a senior product manager trained by Marty Cagan. For feature [FEATURE] serving user [PERSONA], write user stories using “As a [persona], I want [capability] so that [outcome]” plus Gherkin-format acceptance criteria (Given/When/Then). Include edge cases, error states, and non-functional requirements. Output as a user story card with title, narrative, 5 acceptance criteria, effort estimate, and definition-of-done checklist.

58. Scope Creep Defender

Prompt: Act as a project manager defending scope. Given original scope [ORIGINAL_SCOPE] and new request [NEW_REQUEST], run a scope impact analysis: does it serve the core goal? What gets delayed/cut? Estimate time/cost delta. Draft a stakeholder conversation script offering 3 options (absorb, trade-off, defer). Output as a scope change request form plus the verbal script with 3 pre-planned responses to pushback.

59. Dependency Mapper

Prompt: Act as a systems architect mapping project dependencies. Given tasks [TASKS], identify hard dependencies (must finish before), soft dependencies (preferred before), and parallel tracks. Detect cycles, bottlenecks, and single points of failure. Output as a directed graph in Mermaid syntax, a topological sort of execution order, a list of “unblocker” tasks that free the most downstream work, and a parallelization recommendation.

60. Milestone Retrospective

Prompt: Act as a project postmortem facilitator. Given completed milestone [MILESTONE] with data [ACTUAL_VS_PLAN], diagnose variance using the 5 Whys on any estimate miss greater than 20%. Extract lessons across people/process/tools. Output as a postmortem report with: timeline, key events, what went well, what didn't, root causes, action items with owners and due dates, and 3 process improvements to propagate to future projects.

61. Zettelkasten Atomizer

Prompt: Act as a knowledge management coach trained in the Zettelkasten method of Niklas Luhmann. Given source note [SOURCE_NOTE], atomize it into 3-7 permanent notes, each capturing exactly one idea in my own words, with a unique ID

(YYYYMMDDHHMM), a descriptive title, and explicit `[[wiki-links]]` to related notes. Output as markdown files ready for Obsidian with frontmatter, body under 300 words each, and a link section suggesting 3 connections.

62. Second Brain PARA Setup

Prompt: Act as a productivity coach certified in Tiago Forte's Building a Second Brain. Given my current information chaos `[CURRENT_STATE]`, design a PARA structure (Projects, Areas, Resources, Archive) for Notion/Obsidian. Define: what belongs where, capture workflow (progressive summarization), weekly maintenance ritual. Output as a folder tree, naming conventions, a CODE method checklist (Capture-Organize-Distill-Express), and a 14-day onboarding plan.

63. Obsidian Graph Builder

Prompt: Act as an Obsidian power user. Given my notes on topic `[TOPIC]`, design an MOC (Map of Content) note that serves as a curated entry point, plus suggested tags, dataview queries for dynamic sections, and a template for note frontmatter. Output as a ready-to-paste MOC markdown file with sections, inline dataview queries in code blocks, and 3 canvas layout suggestions for visual thinking.

64. Smart Note Taking

Prompt: Act as a researcher applying Sonke Ahrens' "How to Take Smart Notes". Given source `[SOURCE]`, produce: fleeting notes (quick captures), literature notes (bibliographic summary in my words under 200 words), and permanent notes (atomic insights with links). Distinguish reference, claim, and my original thought. Output as 3 markdown sections with clear boundaries, citation in plain text, and 2 questions the source opens up.

65. Progressive Summarization

Prompt: Act as a knowledge distillation engineer. Given article `[ARTICLE]`, apply 4 layers of progressive summarization: (1) highlight key passages, (2) bold the most important, (3) italicize the core claim, (4) write a 3-sentence executive summary. Each layer reduces by ~5x. Output as the full article with layer 1-3 markup preserved, followed by the level 4 summary and 1 "so what" action implication.

66. Literature Review Synthesizer

Prompt: Act as a PhD research assistant. Given papers [PAPERS] on topic [TOPIC], produce a literature review synthesizing: shared framings, points of disagreement, gaps in the field, methodological patterns, and open questions. Use thematic clustering, not chronological ordering. Output as a 500-word review with inline citations, a comparison matrix of papers on 5 dimensions, and 3 research questions worth pursuing next.

67. Knowledge Graph Query

Prompt: Act as a knowledge graph architect. Given my note corpus [CORPUS] and question [QUESTION], design a graph traversal that surfaces relevant notes via tag intersection, backlink density, and semantic similarity. Output as a pseudocode query, a ranked list of top 10 relevant notes with relevance scores and rationale, and a synthesis paragraph answering the question grounded in those notes with inline [[links]].

68. Daily Note Template

Prompt: Act as a journaling coach combining Bullet Journal and Morning Pages practices. Design a daily note template for Obsidian containing: 3-sentence intention, top 3 tasks, time log, gratitudes, wins, what I learned, tomorrow's focus, mood 1-10, energy 1-10. Include dataview queries to pull today's tasks from project notes. Output as a markdown template with frontmatter, sections, and inline queries ready to use in a daily note plugin.

69. Flashcard Generator

Prompt: Act as a learning scientist building spaced repetition decks. Given source material [SOURCE], generate 15 Anki-style flashcards using the minimum information principle (one fact per card), avoiding verbatim copying. Mix cloze deletions, Q&A, and image occlusion suggestions. Output as a CSV with columns Front, Back, Tags, Type, plus 3 sample cards in markdown preview showing front/back and a difficulty rating per card.

70. Commonplace Book Entry

Prompt: Act as Ryan Holiday's commonplace book curator. Given passage [PASSAGE] from author [AUTHOR], craft a commonplace entry containing: the quote verbatim, source citation, my paraphrase in plain language, 1 personal connection, 1 actionable principle, and 3 tags for future retrieval. Output as a markdown note with YAML frontmatter suitable for Obsidian, body under 300 words, and a "future trigger" note describing when to recall this.

71. Pros Cons Matrix

Prompt: Act as a decision analyst. For decision [DECISION] between options [OPTION_A] and [OPTION_B], build a weighted pros/cons matrix: list factors, assign weights (1-10) based on my values [VALUES], score each option per factor (-5 to +5), compute weighted totals. Include gut-check via premortem and reversibility test (one-way vs two-way door). Output as a markdown table, weighted score, and a narrative recommendation.

72. Decision Journal Entry

Prompt: Act as a decision coach trained on Annie Duke's "Thinking in Bets". For upcoming decision [DECISION], draft a decision journal entry capturing: situation, options considered, option chosen, expected outcome with probability, alternative I rejected and why, emotional state, what would change my mind. Output as a structured journal entry template in markdown with YAML frontmatter (date, stakes, confidence) for future review and learning.

73. Red Team Critique

Prompt: Act as a hostile red team attacking my plan [PLAN]. Steel-man 5 critiques: is the premise wrong? Is the evidence weak? Are assumptions hidden? Is the execution path flawed? What does the smartest opponent say? Be brutally honest, not polite. Output as 5 numbered critiques, each with: claim, evidence, severity (1-5), and a specific action I should take to address or dismiss the critique.

74. Inversion Thinking

Prompt: Act as Charlie Munger applying inversion. For goal [GOAL], flip the question: instead of "how do I achieve this?" ask "how would I guarantee failure?" Enumerate 10 failure paths, then invert each into an avoidance rule. Output as a 2-column table (Failure Path, Avoidance Rule) plus a top-3 priority list of avoidance rules ranked by likelihood and a daily checklist question to keep me aligned.

75. Opportunity Cost Calculator

Prompt: Act as an economist applying opportunity cost reasoning. Given choice [CHOICE] requiring time investment [TIME] and money [MONEY], enumerate the next 3 best alternatives, estimate their expected value, and compute opportunity cost as value forgone. Apply the "hell yes or no" filter from Derek Sivers. Output as a comparison table, an opportunity cost figure in dollars and hours, and a decision recommendation with confidence.

76. Second Order Thinking

Prompt: Act as Howard Marks applying second- and third-order thinking. For action [ACTION], trace consequences across orders: first (immediate), second (reactions), third (systemic), fourth (long tail). For each order, identify stakeholder reactions and feedback loops. Output as a cascading markdown outline with orders as headers, consequences as bullets, and a summary of “what most people miss” plus a decision modifier if any order reveals hidden risk.

77. Expected Value Calculator

Prompt: Act as a poker player applying expected value math. Given bet [BET] with outcomes [OUTCOMES], probabilities [PROBABILITIES], and payoffs [PAYOFFS], compute EV, variance, and Kelly criterion bet size relative to bankroll [BANKROLL]. Apply the “resulting” check (good decision vs good outcome). Output as a calculation table, a narrative explaining whether the bet is +EV, and a recommended action with position sizing.

78. Moral Compass Check

Prompt: Act as an ethics advisor applying multiple frameworks. For dilemma [DILEMMA], evaluate under 4 lenses: consequentialism (outcomes), deontology (duties), virtue ethics (character), care ethics (relationships). Note where they converge and diverge. Output as a 4-column analysis plus a reconciled recommendation with the dominant framework justified, a “stranger test” (would I be comfortable if this were front-page news), and a reversibility clause.

79. Pre-Commitment Device

Prompt: Act as a behavioral economist in the Ulysses contract tradition. Given temptation [TEMPTATION] that undermines goal [GOAL], design a pre-commitment device: stake (money, reputation), referee, verification method, reward/punishment schedule, exit conditions. Tools: Beeminder, StickK, accountability partner. Output as a contract document with stake amount, verification rule, weekly check-in schedule, and an “if-then” escape clause for legitimate exceptions.

80. Sunk Cost Escape

Prompt: Act as a rationality coach identifying sunk cost fallacy. Given commitment [COMMITMENT] with [SUNK_INVESTMENT] already spent, evaluate forward-only: if I were starting today with current information, would I make this investment? Apply the

“freshman year” test. Output as a 3-step analysis (forget past, assess present, project future EV), a verdict (continue/quit/pivot), and a narrative script to communicate the decision to stakeholders.

81. Zapier Workflow Blueprint

Prompt: Act as an automation architect specializing in Zapier. Design a zap for goal [GOAL] connecting [APPS]. Specify: trigger, filters, paths, formatter steps, action apps, error handling, testing plan. Estimate task consumption per month. Output as a step-by-step blueprint in a numbered list, field-level mapping for the first and last step, a JSON-like pseudocode of the workflow, and a cost estimate on the relevant Zapier plan.

82. n8n Node Chain

Prompt: Act as an n8n workflow engineer. Build a workflow for [TASK] using trigger [TRIGGER] and actions [ACTIONS]. Specify: node types, expressions for data mapping (JavaScript), conditional branches (IF nodes), error workflow, credentials required. Self-host recommendation if volume is high. Output as a numbered node list with expressions, a JSON export snippet for the key nodes, and a test payload to verify the workflow end-to-end.

83. Make Scenario Design

Prompt: Act as a Make.com (Integromat) power user. Design a scenario automating [PROCESS] with modules [MODULES]. Use aggregators, iterators, routers, data stores. Specify operation cost, error handlers, scheduling. Output as a module-by-module spec with connection notes, a flow diagram in ASCII showing routers and aggregators, an operation count estimate, and 3 optimization tips to reduce operations consumed per run.

84. Apple Shortcuts Recipe

Prompt: Act as an Apple Shortcuts power user. Build a Shortcut for [TASK] usable from Siri, Share Sheet, or Widget. Use actions: Get Contents of URL, Scripting, Conditional, Dictionary. Include a settings variable for customization. Output as a step-by-step action list with parameters, a test case, the Siri phrase to invoke, a home-screen icon suggestion, and a fallback if a required service is unavailable.

85. Raycast Script Command

Prompt: Act as a Raycast extension developer. Build a script command in Bash or Node.js for task [TASK] with arguments [ARGS]. Follow Raycast conventions: schema version, title, mode (silent/fullOutput/inline), refreshTime. Handle errors gracefully. Output as

the full script file content with the required metadata comment header, error handling, a usage example, and installation instructions for dropping into ~/.config/raycast/scripts.

86. Cron + Shell Pipeline

Prompt: Act as a devops engineer scheduling a daily automation. For task [TASK], write a shell script that runs reliably from cron on macOS/Linux: PATH handling, logging with timestamp, lock file to prevent overlap, failure alerts via email or webhook. Output as a complete bash script with shebang, a crontab line specifying schedule, a logrotate suggestion, and a manual test command with expected output.

87. GitHub Actions Workflow

Prompt: Act as a CI/CD engineer writing a GitHub Actions workflow for task [TASK] triggered on [TRIGGER]. Include: matrix builds, caching, secrets management, concurrency control, artifact upload, failure notifications. Output as a complete workflow YAML file saved to .github/workflows/[name].yml with comments explaining each step, a test branch strategy, and a cost estimate in minutes per month under normal load.

88. iOS Shortcuts Automation

Prompt: Act as an iOS automation expert. Build a personal automation triggered by [TRIGGER] (time, arrival, app open, focus mode) that performs [ACTIONS]. Use Shortcuts' Automation tab, not manual invocation. Include guard conditions to avoid spam. Output as a step-by-step action list, trigger configuration, test plan, and a privacy note on what data the automation accesses plus a disable/snooze plan for edge cases.

89. Webhook Middleware Design

Prompt: Act as a serverless architect. Design a webhook middleware that receives events from [SOURCE] and dispatches to [DESTINATIONS]. Use Cloudflare Workers, Deno Deploy, or AWS Lambda. Handle: signature verification, idempotency, retries with exponential backoff, dead letter queue. Output as a pseudocode function, the endpoint contract in OpenAPI snippet form, a retry policy table, and an alerting rule for the DLQ hitting a threshold.

90. RSS to Action Pipeline

Prompt: Act as a content automation engineer. Build a pipeline that watches RSS feed [FEED] for keyword [KEYWORD] and triggers action [ACTION] (email, Notion page, Slack message). Use RSS.app, n8n, or a cron Python script. Include dedupe via GUID

store. Output as a workflow blueprint with components, a Python implementation skeleton (50 lines), state storage schema, and a backfill strategy for the first run.

91. Feynman Technique Coach

Prompt: Act as a Feynman Technique coach. I want to learn [TOPIC] by teaching it to a 12-year-old. Step 1: ask me 5 probing questions to find gaps in my current understanding. Step 2: grade my explanation attempt [ATTEMPT] on simplicity, accuracy, and analogy quality. Step 3: point to exactly where I leaned on jargon and suggest plain-language alternatives. Output as a graded rubric plus a rewritten 200-word explanation.

92. Spaced Repetition Planner

Prompt: Act as a learning scientist applying SM-2 spaced repetition to material [MATERIAL]. Given my study time [DAILY_MINUTES] and deadline [DEADLINE], build a review schedule across 7 intervals (1d, 3d, 7d, 14d, 30d, 60d, 120d). Include new-card introduction rate and retention target. Output as a daily schedule table for the next 30 days with cards to review, cards to introduce, and estimated time per session.

93. Skill Roadmap Builder

Prompt: Act as a skill acquisition coach applying Josh Kaufman's "First 20 Hours" and K. Anders Ericsson's deliberate practice. Given target skill [SKILL] and current level [LEVEL], build a 20-hour roadmap with: decomposition into sub-skills, order of learning by leverage, practice drills with feedback loops, plateaus to expect. Output as a milestone-based plan, a daily drill template, and a self-assessment rubric with 5 levels.

94. Learning Contract

Prompt: Act as a self-directed learning coach applying Malcolm Knowles' andragogy. For goal [LEARNING_GOAL] over period [TIMEFRAME], draft a learning contract covering: objectives, resources, strategies, evidence of completion, evaluation criteria. Include an accountability partner clause and a weekly reflection prompt. Output as a signed-ready contract document in markdown with sections, measurable outcomes, and a midpoint checkpoint review plan.

95. Deliberate Practice Session

Prompt: Act as a deliberate practice coach. Design a 60-minute practice session for skill [SKILL] at level [LEVEL]. Include: warm-up (5 min), targeted drill on weakness [WEAKNESS] (30 min) with immediate feedback loops, integration exercise (15 min),

cool-down reflection (10 min). Output as a timed session plan with drill specifications, success criteria per segment, a feedback capture template, and the next session's focus area based on today's results.

96. Reading Note Protocol

Prompt: Act as a power reader applying Mortimer Adler's "How to Read a Book". For book [BOOK], run the 4 levels: elementary (scan), inspectional (preview TOC and conclusions), analytical (structured notes), syntopical (compare with other books on the topic). Output as a pre-read 15-minute inspection note, a reading plan with time budget per chapter, and a template for analytical notes with pillars: structure, key claims, evidence, objections.

97. Question-Led Learning

Prompt: Act as a Socratic tutor. I want to learn [TOPIC] by answering questions rather than consuming content. Generate a 10-question curriculum from beginner to expert, each question designed to force a concept discovery, with a hint unlocked after 2 minutes of thinking. Output as a numbered question list, difficulty progression, hint bank, and a self-grading rubric for when I should move to the next question.

98. Teaching Doc Generator

Prompt: Act as a technical writer. Transform my rough notes on [TOPIC] into a teaching document for audience [AUDIENCE]. Use the "inverted pyramid" plus Diataxis framework: is this a tutorial, how-to, explanation, or reference? Structure accordingly. Output as a markdown document with TOC, prerequisites, learning outcomes, worked example, exercises with solutions, further reading, and a self-check quiz of 5 questions.

99. Mental Model Index Builder

Prompt: Act as a polymath building a personal mental model latticework in the Munger tradition. Given my field [FIELD] and current models [CURRENT_MODELS], identify 10 high-leverage models missing from my latticework across disciplines (physics, biology, economics, psychology, math). For each, provide: 1-sentence definition, when to apply, canonical example, link to related models. Output as an indexed markdown database ready for Obsidian.

100. Meta-Learning Retrospective

Prompt: Act as a meta-learning coach. Over the last month I learned [WHAT] via [METHOD] with results [RESULTS]. Diagnose what worked, what wasted time, and which techniques to double down on. Apply Scott Young's ultralearning principles (directness, drill, feedback, retrieval). Output as a meta-learning retrospective report with: method scorecard, time audit, retention check via recall test, and a revised learning protocol for the next month with 3 experiments.

6 — Writing, Editing & Storytelling

100 Expert Prompts Inside

3-act structure · Save the Cat · Hero's Journey · character arcs · dialogue · worldbuilding · memoir · developmental editing · line edits · poetry · screenwriting

1. Three-Act Structure Blueprint

Prompt: Act as a developmental editor at a Big 5 publishing house who has shaped three NYT bestsellers. Using the classic 3-act structure, outline a [GENRE] novel starring [PROTAGONIST] facing [CONFLICT] in [SETTING]. Identify the inciting incident, first plot point, midpoint reversal, crisis, climax, and resolution with page-count targets for a [WORD_COUNT] manuscript. Output as a labeled beat-by-beat table with one-sentence purpose statements for each beat.

2. Save the Cat Beat Sheet

Prompt: Act as a story consultant trained in Blake Snyder's Save the Cat! method who has doctored six produced screenplays. Build a full 15-beat Save the Cat beat sheet for a [GENRE] story about [PROTAGONIST] whose flaw is [FLAW] and whose external goal is [GOAL]. Specify the theme stated, debate, break into two, fun and games, bad guys close in, dark night of the soul, and finale. Output as a numbered beat sheet with page targets and emotional temperature notes.

3. Hero's Journey Deconstruction

Prompt: Act as a mythologist in the Joseph Campbell tradition with a PhD in comparative literature. Map a [GENRE] story featuring [PROTAGONIST] onto all 12 stages of the Hero's Journey, from ordinary world through return with the elixir. For each stage, specify the external event, internal shift, and symbolic object or threshold guardian. Avoid cliché fantasy tropes; force fresh choices rooted in [THEME]. Output as a 12-row table: Stage, External Event, Internal Shift, Symbol.

4. Dan Harmon Story Circle

Prompt: Act as a veteran TV writers' room head who has staffed on prestige dramas for HBO. Apply Dan Harmon's 8-step Story Circle (You, Need, Go, Search, Find, Take, Return, Change) to a pilot episode of a [GENRE] series starring [PROTAGONIST] in [SETTING]. Make the Need and Change genuinely transformative, not cosmetic. Output as 8 paragraphs, one per step, each 60-80 words, with the thematic question named upfront.

5. Snowflake Method Expansion

Prompt: Act as a novelist trained in Randy Ingermanson's Snowflake Method. Expand a one-sentence logline about [PROTAGONIST] and [CONFLICT] into the first five Snowflake steps: one-sentence summary, paragraph summary, character sheets, one-page synopsis, and four-page synopsis. Keep disasters on-pattern (three disasters plus ending). Output each step in its own labeled section, with word counts noted. Preserve causal logic between disasters.

6. Freytag's Pyramid Analysis

Prompt: Act as a dramaturg who has staged Chekhov and Ibsen at regional theaters. Using Freytag's pyramid, plot a [GENRE] story starring [PROTAGONIST] across exposition, rising action, climax, falling action, and denouement. Identify the precise turning point ("peripeteia") and the moment of recognition ("anagnorisis"). Avoid modern 3-act conflation. Output as a five-section breakdown with a one-line function statement and the emotional register for each section.

7. Midpoint Reversal Engineering

Prompt: Act as a story doctor who has rescued three stalled [GENRE] manuscripts for agents at ICM. Design a midpoint reversal for a story about [PROTAGONIST] pursuing [GOAL] that flips the stakes from external to internal, reframes the antagonist, and forces the protagonist from reactive to proactive. Output: (1) the current midpoint sketch, (2) three alternative midpoints ranked by dramatic torque, (3) the ripple effects each creates in act three.

8. Subplot Weaving System

Prompt: Act as a narrative architect who has edited tangled multi-POV fantasy novels. Generate three interlocking subplots for a [GENRE] novel whose A-plot concerns [MAIN_CONFLICT]. Each subplot must (a) thematically echo the main story, (b) intersect the A-plot at two specific beats, and (c) resolve with tonal contrast. Output as a table: Subplot, Theme Echo, Intersection Points, Resolution Tone, POV Character.

9. Logline Surgery

Prompt: Act as a Hollywood script consultant who has pitched at Sundance Labs. Take this rough logline: “[ROUGH_LOGLINE]” and rewrite it three ways, each under 35 words, using the formula: protagonist + inciting event + goal + antagonist + stakes + irony. Rank the three versions by marketability, then explain in 40 words which cliches you eliminated. Output as numbered loglines followed by a ranked rationale.

10. Plot Hole Stress Test

Prompt: Act as a continuity editor who has caught plot holes for Peter Jackson and Christopher Nolan. Read this [WORD_COUNT] outline of a [GENRE] story and run a logic stress test. Flag every causal gap, unearned coincidence, character-knowledge contradiction, and timeline inconsistency. Output as a numbered list: Issue, Location, Why It Breaks, Suggested Patch. Prioritize fixes that require minimal rewriting while preserving thematic intent.

11. Character Want vs Need

Prompt: Act as a character coach who has developed protagonists for Pixar’s story department. For [PROTAGONIST] in a [GENRE] story, articulate the surface “want” (concrete, external, pursuable) versus the hidden “need” (emotional, often opposed to the want). Explain how the climax forces a choice between them. Output as: Want (one sentence), Need (one sentence), Lie They Believe, Climactic Crossroads (80 words).

12. Character Flaw Cartography

Prompt: Act as a psychologically-trained novelist in the tradition of Donna Tartt. Design a three-layer flaw structure for [PROTAGONIST]: (1) the surface flaw readers notice in chapter one, (2) the psychological wound that caused it, (3) the moral flaw that will cost them in act three. Anchor each layer in a specific backstory beat. Output as three labeled paragraphs of 70-90 words each, plus one “ghost from the past” vignette.

13. Backstory Iceberg

Prompt: Act as a literary novelist trained at the Iowa Writers’ Workshop. Build a backstory iceberg for [CHARACTER] where only the top 10% surfaces on the page. Generate 15 backstory facts ordered from most buried (childhood trauma, secret shame) to nearly visible (recent regret). Mark which three facts the reader should infer without being told. Output as a numbered list with a “reveal strategy” column: Shown, Implied, Withheld.

14. Antagonist Humanization

Prompt: Act as a villain whisperer who has consulted on HBO prestige dramas. Take the villain [ANTAGONIST] from a [GENRE] story and write their internal monologue for the moment just before their worst act. They must be the hero of their own story. Avoid mustache-twirling. Include one concrete sensory detail, one justified belief, and one flicker of doubt. Output as 180-220 words of first-person close POV.

15. Character Arc Ladder

Prompt: Act as a story structure expert in the K.M. Weiland tradition. Design a positive change arc ladder for [PROTAGONIST] across a [WORD_COUNT] novel. Identify the Lie Believed, the Truth to be discovered, the Ghost event, and six specific scene-level rungs where belief shifts. Output as a numbered ladder: Rung, Scene Premise, Old Belief Weakening, New Belief Strengthening. End with the climactic moment of full integration.

16. Ensemble Cast Differentiation

Prompt: Act as a showrunner who has balanced ensemble casts on shows like The Wire. Given an ensemble of six characters in a [GENRE] story, assign each a distinct want, need, flaw, secret, speech pattern, and physical tell. Ensure no two characters occupy the same narrative function. Output as a 6-row character bible table. Append a 60-word note on how their goals will clash in the season finale.

17. Foil Character Construction

Prompt: Act as a classicist who teaches character doubling at a top MFA program. Design a foil character for [PROTAGONIST] who inverts their strengths and exposes their weaknesses without being a mere opposite. The foil must share one core value but diverge on method. Give them a distinct voice, backstory, and thematic function. Output as a comparison chart (Trait, Protagonist, Foil) followed by a 100-word scene sketch of their first confrontation.

18. Character Introduction Moment

Prompt: Act as the screenwriter of a Best Picture Oscar winner known for iconic character entrances. Write the introduction scene for [CHARACTER] in a [GENRE] story, using Blake Snyder's "Save the Cat" principle to earn sympathy in 250 words. Show their occupation, flaw, and a hint of their secret without on-the-nose dialogue. Reveal character through action, not exposition. Output as a prose scene with a one-line thematic tag at the end.

19. Internal Monologue Calibration

Prompt: Act as a close-third POV specialist who edits literary fiction for Knopf. Rewrite this paragraph: “[PARAGRAPH]” to deepen the interiority of [CHARACTER]. Interweave sensory observation, associative memory, and unspoken judgment so the reader inhabits the character’s mind without italics or thought-tags. Preserve plot content. Output the revised paragraph, then list five specific interiority techniques you applied.

20. Character Voice Audit

Prompt: Act as a voice coach for novelists, trained by George Saunders. Audit the voice of [CHARACTER] across these three sample passages: “[SAMPLE_1]”, “[SAMPLE_2]”, “[SAMPLE_3]”. Identify their diction register, sentence rhythm, favored syntactic structures, vocabulary ceiling, and verbal tics. Flag any inconsistencies across samples. Output as a Voice Profile (200 words) followed by five diagnostic questions to sharpen the voice further.

21. Dialogue Subtext Layering

Prompt: Act as a dialogue doctor who has punched up scripts for Aaron Sorkin. Rewrite this on-the-nose exchange: “[EXCHANGE]” so every line says one thing and means another. Characters should talk around the real topic, using evasion, deflection, and micro-aggression. Preserve the plot information conveyed. Output the rewritten dialogue (10-14 lines), then annotate each line with the subtext in brackets.

22. Character-Specific Cadence

Prompt: Act as a linguistic stylist who has coached voice actors for HBO audiobooks. Generate 12 lines of dialogue for [CHARACTER], whose background is [BACKGROUND] and whose emotional state is [STATE]. Use consistent sentence-length rhythm, idiolect, and one signature filler. Ensure the reader could identify the speaker blindfolded. Output as dialogue lines without tags, followed by a 50-word style note explaining the rhythmic choices.

23. Differentiating Two Voices

Prompt: Act as a dialogue editor for prestige TV. Write a 20-line exchange between two characters of the same age, class, and region who must still sound clearly distinct. Use syntactic contrast (hypotactic vs paratactic), different pet words, and contrasting listening styles (one interrupts, one pauses). Output as a stage-play-formatted exchange, then append a 60-word note on the three differentiators you engineered.

24. Argument Without Shouting

Prompt: Act as a playwright in the Annie Baker tradition. Write a tense argument between [CHARACTER_A] and [CHARACTER_B] over [TOPIC] without a single raised voice, exclamation mark, or insult. Use pauses, shifts in formality, and strategic silence to escalate stakes. Keep it under 300 words. Output as script-formatted dialogue with parenthetical stage directions only where essential to breath and body.

25. Exposition Via Conflict

Prompt: Act as a narrative efficiency expert who doctors bloated novel openings. Take this exposition dump: “[EXPOSITION]” and convert it into a dialogue scene where two characters reveal the same information through a disagreement with opposing stakes. The reader must absorb the facts without noticing them being delivered. Output the scene (200-280 words) plus a bullet list of which facts landed where.

26. Regional Dialect Without Cliche

Prompt: Act as a dialect coach who worked on True Detective and The Wire. Write 15 lines of dialogue for a character from [REGION] that captures authentic rhythm, grammar, and vocabulary without resorting to phonetic respelling or eye-dialect. Use syntactic signatures and period-appropriate idioms. Output as tagged dialogue, then explain in 80 words which three dialect markers you used and which cliches you avoided.

27. Silence and Beat Work

Prompt: Act as a scene director trained at Steppenwolf. Take this dialogue exchange: “[EXCHANGE]” and rewrite it inserting six beats of physical business, silence, or environmental interruption that do the emotional heavy lifting instead of the lines. Beats must reveal character, not just decorate. Output the rewritten scene in screenplay format with parentheticals for beats, followed by a 50-word director’s note.

28. Multilingual Dialogue Styling

Prompt: Act as a bilingual novelist in the Junot Diaz tradition. Write a scene in which [CHARACTER] code-switches between English and [LANGUAGE] without italics, glossing, or translation footnotes. Context must carry meaning for monolingual readers while rewarding bilingual ones. Keep it 250 words. Output as prose with integrated dialogue, then append a 60-word craft note on how you handled translation.

29. Interior Dialogue vs Speech

Prompt: Act as a literary editor who specializes in close POV. Write a scene where [CHARACTER] engages in polite dinner conversation while their interior monologue rages in a completely different register. Show the gap between surface and private voice. Keep surface dialogue restrained; interior should be wild, associative, metaphoric. Output as alternating speech (in quotes) and interior (in italics) for roughly 300 words.

30. Phone Call Reconstruction

Prompt: Act as a screenwriter who specializes in one-sided phone dialogue. Write a 250-word scene in which [CHARACTER] takes a life-altering phone call. We hear only their side. The reader must infer the full shape of the other conversation from pauses, reactions, and repetitions. Avoid obvious “wait, what?” constructions. Output as prose with dialogue, ending on the moment just after the call ends.

31. Opening Line Workshop

Prompt: Act as a first-page specialist who judges the BBC National Short Story Award. Generate 10 radically different opening lines for a [GENRE] story about [PROTAGONIST] in [SETTING]. Vary the strategies: in medias res, voice hook, sensory immersion, philosophical aphorism, dialogue, image, contradiction, chronology jump, direct address, and interrogative. Output as a numbered list, then rank the top three with a 30-word defense of each.

32. Scene Tension Escalation

Prompt: Act as a scene-craft instructor at Gotham Writers Workshop. Take this flat scene: “[SCENE]” and escalate tension using Robert McKee’s value-charge principle. Identify the opening charge (positive or negative), engineer three reversals, and end on the opposite charge. Add one ticking clock and one unwelcome intruder. Output the revised scene (350-450 words) with a charge-tracker appendix showing the emotional polarity at each beat.

33. Sensory Detail Layering

Prompt: Act as a literary editor obsessed with specificity in the Mary Karr tradition. Rewrite this generic setting description: “[DESCRIPTION]” so every sentence contains at least one load-bearing sensory detail from a different sense (sight, sound, smell, taste, touch, proprioception). Avoid purple prose and cataloged lists. Details must reveal mood or character. Output the rewritten passage (120-180 words), then list the six senses and the detail assigned to each.

34. Scene Opening Hook Menu

Prompt: Act as a short-fiction editor at The New Yorker. Generate 8 ways to open the same scene in which [CHARACTER] enters [LOCATION] carrying [OBJECT] under [EMOTIONAL_STATE]. Each opening (40-60 words) must use a different hook: image, voice, action, dialogue, sound, thought, weather, or body. Output as labeled options 1-8. End with a 60-word recommendation naming which hook best serves the scene's function and why.

35. Setting as Character

Prompt: Act as a place-based novelist in the Toni Morrison tradition. Describe [SETTING] at [TIME_OF_DAY] so the setting itself becomes a character with agency, memory, and mood. Use at least one metaphor rooted in human body parts, one sound that implies history, and one absence. Keep it 150 words. Output as a single paragraph of literary prose, followed by a 40-word note on the emotional effect you engineered.

36. Action Scene Choreography

Prompt: Act as an action choreographer who has written fight scenes for Jack Reacher novels. Write a 350-word hand-to-hand fight between [CHARACTER_A] and [CHARACTER_B] in [SETTING]. Ground the reader in spatial geography, alternate short sentences (strikes) with longer ones (reactions), and track each fighter's dwindling options. Include one unexpected environmental use. Output as prose, then list the three-beat escalation structure you followed.

37. Quiet Scene Craft

Prompt: Act as a literary editor who championed Marilynne Robinson. Write a quiet, low-conflict scene in which [CHARACTER] does one small domestic task (peeling an apple, sweeping a porch, folding laundry) while processing [RECENT_EVENT]. Interiority and sensory attention must carry the scene. No dialogue. Keep it 220-280 words. Output as prose. Append a 50-word craft note on how you generated stakes without external conflict.

38. Chase Sequence Pacing

Prompt: Act as a thriller pacing specialist who has ghost-edited for Lee Child. Write a 400-word foot chase in which [PROTAGONIST] pursues [TARGET] through [URBAN_SETTING]. Use sentence-length variation to mimic breath: fragments under stress, longer sentences in micro-breaks. Include one near miss, one obstacle, and one moral hesitation. Output as prose. End on a sentence with a hanging cadence.

39. Flashback Integration

Prompt: Act as a narrative surgeon who fixes clunky flashback transitions. Take this scene: “[SCENE]” and insert a 120-word flashback that illuminates the present moment without breaking immersion. Use a sensory trigger (smell, sound, texture) as the transition, and return to the present via a matched trigger. Output the integrated scene with the flashback clearly demarcated, then explain the two transitions in 50 words.

40. Scene Cut and Transition

Prompt: Act as a film editor who assembles indie feature rough cuts. Design three transition options between this scene ending: “[SCENE_END]” and this scene beginning: “[NEXT_SCENE]”. Options: match cut (visual/conceptual echo), hard cut (whiplash tonal shift), and dissolve (time/mood blur). For each option, write 60 words showing exactly how the transition executes on the page. Output as three labeled options with a final recommendation.

41. Magic System Design

Prompt: Act as a worldbuilding consultant in the Brandon Sanderson tradition, applying his Laws of Magic. For a [FANTASY_SUBGENRE] novel, design a magic system with explicit costs, limits, and loopholes. Specify the source, the price, what it cannot do, and one unintended consequence. Avoid “because destiny” energy. Output as a 300-word system bible with sections: Source, Mechanics, Costs, Limits, Social Impact, Plot Leverage.

42. Culture Generator

Prompt: Act as a cultural anthropologist turned speculative fiction worldbuilder. Design a non-Western-derived culture for a [SETTING] that includes kinship structure, economy, taboos, cosmology, mourning rites, and one everyday gesture with loaded meaning. Avoid monoculture cliches; include internal dissent. Output as a 400-word culture brief with six labeled sections, then suggest three story seeds that could only happen inside this culture.

43. Sci-Fi Technology Extrapolation

Prompt: Act as a hard science-fiction author trained in the Kim Stanley Robinson tradition. Extrapolate [CURRENT_TECHNOLOGY] 80 years into the future. Describe second-order effects on labor, intimacy, language, law, and urban form. Avoid utopia/dystopia binary. Ground every leap in current research. Output as a 400-word worldbuilding dossier with five labeled subsections, plus one vivid “day in the life” paragraph showing the tech in casual use.

44. Historical Period Immersion

Prompt: Act as a historical novelist with an archive researcher's discipline, in the Hilary Mantel tradition. For a novel set in [PERIOD] and [PLACE], generate 20 texture details a modern reader would not know: smells, prices, social insults, bodily assumptions, and domestic objects. Cite your reasoning briefly. Output as a numbered list, each detail 20-30 words, grouped under Body, Street, Home, Work, Church.

45. Secondary World Map Logic

Prompt: Act as a cartographer-worldbuilder who consulted on a major fantasy TV adaptation. Given a secondary world with [GEOGRAPHIC_FEATURE] and [CLIMATE], deduce where cities, trade routes, agricultural zones, and contested borders would plausibly form. Explain each placement with real-world geographic logic (rivers, passes, ports). Output as a labeled list of 8 locations with one-sentence rationales, then note the two likeliest war flashpoints.

46. Alien Biology Brief

Prompt: Act as a xenobiologist consulting on a hard-SF novel. Design an intelligent alien species for [ENVIRONMENT]. Specify metabolism, reproduction, sensory apparatus, social structure, and how their biology shapes their philosophy and language. Avoid humanoid defaults and "hat species" shortcuts. Output as a 350-word species brief with labeled sections, then draft one line of their untranslatable core concept and explain it.

47. In-World Document Writing

Prompt: Act as a worldbuilder who writes in-world primary sources for published fantasy novels. Write a 250-word in-world document (letter, court record, recipe, religious tract, or classified ad) from [SETTING] that reveals culture, conflict, and voice without narrator framing. Use period-appropriate diction and one untranslated term. Output the document cleanly, then add a 60-word editor's note explaining what a close reader would infer.

48. Economic System Plausibility

Prompt: Act as an economist-turned-worldbuilder for a grimdark fantasy series. Design the economic system of [SETTING]: currency, labor structure, taxation, trade routes, and one systemic injustice that will drive your plot. Show where wealth concentrates and how ordinary people cope. Avoid infinite-gold-piles fantasy defaults. Output as a 400-word economic brief with six labeled subsections, closing with three plot seeds rooted in the system.

49. Religion Without Cliche

Prompt: Act as a comparative religion scholar building faith systems for speculative fiction. Design a religion for [CULTURE] with founding myth, core ethical paradox, three sects, one heresy, a sacred object, and a contested ritual. Avoid Abrahamic skin. The paradox must produce actual dramatic conflict. Output as a 350-word religion bible with seven labeled sections, ending with one character who is about to break with the faith.

50. Worldbuilding Reveal Strategy

Prompt: Act as a structural editor for epic fantasy at Tor Books. Given a 150-word worldbuilding bible: “[BIBLE]”, design a 10-chapter reveal schedule showing exactly which detail surfaces in which chapter, through which character POV, via which device (dialogue, document, action, discovery). Avoid front-loaded infodumps. Output as a 10-row table: Chapter, Detail Revealed, POV, Delivery Device, Emotional Purpose.

51. Personal Essay Hook

Prompt: Act as a personal essay editor at The Atlantic. Take this essay topic: “[TOPIC]” and draft five contrasting hooks (60-80 words each): a concrete scene, an unexpected confession, a contrarian claim, a quoted fragment, and a sensory flashback. Each must earn the reader’s next 500 words. Output as five labeled hooks, then rank them with a 50-word rationale on which best aligns with the essay’s thesis.

52. Memoir Scene Selection

Prompt: Act as a memoir editor who shaped a Pulitzer finalist. Given a life event: “[EVENT]”, identify the three specific scenes a memoirist should dramatize in full rather than summarize. For each scene, specify where to enter (late) and exit (early), the single governing image, and the emotional truth it carries. Output as three labeled scene briefs of 90 words each, followed by a 60-word note on what must be summarized instead.

53. Literary Journalism Structure

Prompt: Act as a narrative nonfiction editor in the John McPhee tradition. Outline a 4,000-word literary journalism piece about [SUBJECT] using a non-linear structure: a controlling image, two interwoven timelines, and a recurring expert voice. Name the scenes, transitions, and the thematic question driving the piece. Output as a numbered section-by-section outline with word counts, then add a 60-word note on the governing metaphor.

54. Memoir Without Self-Pity

Prompt: Act as a memoir craft teacher in the Mary Karr tradition. Rewrite this self-pitying passage: “[PASSAGE]” to preserve emotional honesty while eliminating victim framing. Use curiosity, specific sensory detail, and complicity (what the narrator got wrong). Keep the word count similar. Output the revised passage, then list five specific techniques you used to replace self-pity with self-examination.

55. Research Integration Braiding

Prompt: Act as a hybrid-form essayist in the Maggie Nelson tradition. Braid a personal anecdote: “[ANECDOTE]” with one historical fact, one scientific study, and one cultural artifact related to [THEME]. The four strands must illuminate each other without forced thesis statements. Keep it 500 words. Output as a literary essay braid, then explain in 60 words where each strand enters and why.

56. Ethical Nonfiction Framing

Prompt: Act as a nonfiction ethics consultant who has reviewed manuscripts for Penguin Random House. Given this scenario where a memoirist wants to write about [OTHER_PERSON] without consent, draft a framing strategy that balances truth, fairness, and legal risk. Include composite-character option, time-shift option, and direct consent option. Output as three labeled options with pros, cons, and one recommended language sample for each.

57. Creative Nonfiction Opening

Prompt: Act as an editor at Creative Nonfiction magazine. Write the opening 250 words of an essay about [TOPIC] using the classic CNF move: specific scene grounded in sensory detail, then zoom out to thematic claim, then return to a smaller detail that resonates. Avoid thesis-first structure. Output as polished prose, then annotate the three moves with one-sentence craft labels.

58. Voice-Driven Column

Prompt: Act as a newspaper columnist in the Molly Ivins tradition. Draft a 700-word opinion column on [CURRENT_ISSUE] with a distinctive personal voice: colloquial rhythm, one running metaphor, one moment of righteous anger, and one surprising admission. Use concrete examples, not abstractions. Output as the finished column with a punchy lede and a closing line that lands like a door closing.

59. Profile Essay Structure

Prompt: Act as a magazine profile editor at Rolling Stone. Outline a 3,500-word profile of [SUBJECT] that opens on a scene the reader didn't expect, withholds the subject's central fact until paragraph 7, braids three interview sources, and closes on a small gesture. Include scene list, source matrix, and thematic question. Output as a structured outline: Section, Purpose, Word Count, Governing Image.

60. Place-Based Essay Draft

Prompt: Act as a place-writing instructor in the Barry Lopez tradition. Write a 400-word essay about [PLACE] at [TIME_OF_DAY] that blends natural history, personal memory, and one overheard fragment of conversation. Avoid nostalgia and touristic exoticism. The prose should slow the reader's breath. Output as polished literary nonfiction, then list three craft moves (naming, silence, specificity) you deployed.

61. Line Edit Pass

Prompt: Act as a line editor at FSG who has polished prose for National Book Award winners. Line-edit this paragraph: "[PARAGRAPH]" focusing on cutting filter words ("she saw", "he felt"), tightening passive construction, varying sentence rhythm, and eliminating redundant adverbs. Preserve voice. Output: (1) the edited version, (2) a clean diff showing specific changes, (3) a 60-word style note explaining the voice you protected.

62. Developmental Edit Letter

Prompt: Act as a developmental editor at a Big 5 imprint. Given this [WORD_COUNT] novel summary: "[SUMMARY]", write a 600-word developmental edit letter identifying structural issues (pacing, POV, arc coherence, stakes) and prescribing specific fixes. Lead with strengths, then deliver critique with concrete scene references and actionable revision steps. Output as a professional edit letter: Strengths, Core Issues, Scene-Level Notes, Suggested Revision Order.

63. Proofreading Checklist Pass

Prompt: Act as a senior proofreader trained on CMOS and AP style. Proofread this 500-word passage: "[PASSAGE]" for punctuation, capitalization, hyphenation, italics, number style, dialogue mechanics, and common homophone errors. Flag inconsistencies without rewriting voice. Output as a marked-up version plus a 10-row error table: Line, Original, Correction, Rule Applied, Confidence Level.

64. Sentence-Level Surgery

Prompt: Act as a prose stylist in the Verlyn Klinkenborg tradition. Take this flabby sentence: “[SENTENCE]” and rewrite it eight ways, varying syntactic strategy: simple declarative, periodic, cumulative, balanced, loose, elliptical, fragmented, and rhythmic. Preserve meaning. Output as eight numbered variants with a one-line comment on each tone, then recommend the best fit for [CONTEXT].

65. Cutting 15% Word Count

Prompt: Act as a ruthless copy editor who has tightened manuscripts for Algonquin Books. Cut exactly 15% from this passage: “[PASSAGE]” without losing story content or voice. Target crutch words, throat-clearing openings, redundant dialogue tags, and over-explained emotions. Output the tightened version with the new word count, then list the ten specific cuts you made ranked by impact.

66. Fact-Check and Continuity Pass

Prompt: Act as a fact-checker for a literary imprint publishing historical fiction. Given this passage: “[PASSAGE]” set in [PERIOD], flag anachronisms, plausibility errors, and internal continuity breaks. Distinguish between hard errors and defensible artistic license. Output as a three-column table: Item Flagged, Issue Type (Fact/Anachronism/Continuity), Suggested Fix, plus a 60-word closing note on which errors matter most to genre readers.

67. Revision Letter to Author

Prompt: Act as an editor delivering difficult feedback with warmth and clarity in the Sol Stein tradition. Write a 400-word revision letter to an author whose manuscript has strong voice but fatal structural problems in act two. Open with genuine praise, name three specific structural issues with page references, and prescribe a targeted revision plan. Output as a professional letter, signed, with a closing line that energizes rather than deflates.

68. Query Letter Critique

Prompt: Act as a literary agent at a top agency who sees 500 queries a week. Critique this query letter: “[QUERY]” for a [GENRE] novel. Flag weak hook, muddled stakes, missing comps, tone mismatch, and metadata problems. Output as: (1) a three-tier diagnosis (Reject/Pass-with-notes/Request), (2) a bulleted list of issues, (3) a rewritten 250-word query letter that would earn a full request.

69. Consistency Bible Builder

Prompt: Act as a series continuity editor for fantasy doorstoppers. Given three chapters from a [GENRE] novel, build a consistency bible tracking character physical traits, name spellings, magic rules, timeline events, and geographic distances. Flag three existing inconsistencies. Output as a structured reference doc with five labeled sheets, plus a flagged issues section with recommended fixes.

70. Developmental Diagnostic Questions

Prompt: Act as a writing coach who runs novel intensives. Given this 200-word premise: “[PREMISE]”, ask 15 diagnostic questions a writer must answer before drafting, probing protagonist interiority, antagonist logic, stakes, structure, theme, and reader contract. Questions should be specific, not generic (“what’s the theme?”). Output as a numbered list; end with the single question you consider the spine of the entire book.

71. Punchy Sentence Rhythm

Prompt: Act as a prose rhythm coach trained by Gary Provost. Rewrite this flat paragraph: “[PARAGRAPH]” using intentional sentence-length variation (3-word fragment, 8-word sentence, 20-word sentence, back to 5) to create musical rhythm. Read it aloud in your head and cut anything that doesn’t sing. Output the revised paragraph, then show the sentence-length pattern (e.g., 3 / 8 / 20 / 5) and explain the emotional arc.

72. Voice Calibration for Audience

Prompt: Act as a voice strategist who has shaped tones for Pulitzer-winning columnists. Take this neutral paragraph: “[PARAGRAPH]” and rewrite it three times for three audiences: [AUDIENCE_A], [AUDIENCE_B], [AUDIENCE_C]. Shift diction, reference frame, and rhythm while preserving core content. Output as three labeled versions, then explain in 80 words which three lexical or syntactic levers you moved for each.

73. Strunk and White Diagnostic

Prompt: Act as a prose doctor who reveres *The Elements of Style* without worshiping it. Audit this 300-word passage: “[PASSAGE]” against Strunk and White’s core principles (omit needless words, use definite concrete language, prefer active voice, place emphatic words at sentence end). Flag violations but defend any that serve voice. Output as a marked-up passage plus a 10-row audit table: Rule, Violation, Verdict (Fix/Preserve), Reasoning.

74. Cliche Exorcism

Prompt: Act as a language hygiene editor who has killed cliches for the New Yorker fact department. Find every cliché, dead metaphor, and borrowed image in this passage: “[PASSAGE]” and replace them with fresh, context-specific alternatives. Preserve meaning and voice. Output as a two-column table: Cliche Found, Fresh Replacement, followed by the fully rewritten passage with replacements bolded.

75. Paragraph-Level Emphasis

Prompt: Act as a close-reading instructor at Yale who has taught undergrad prose style. Take this paragraph: “[PARAGRAPH]” and rewrite it three ways, moving the emphatic information to different positions: front (topic-first), end (periodic), middle (embedded). Explain how each version reshapes reader attention. Output as three labeled versions followed by a 90-word comparison of the rhetorical effect of each placement.

76. Show Don't Tell Conversion

Prompt: Act as a creative writing instructor in the Robert Olen Butler tradition. Take this summary sentence: “[SENTENCE]” that tells a character emotion and rewrite it as 80-100 words of showing: physical sensation, behavior, thought fragment, and environmental response. Avoid naming the emotion. Output the converted passage, then name the emotion in a one-line answer key.

77. Register Shift Exercise

Prompt: Act as a linguistics-minded editor. Rewrite this formal passage: “[PASSAGE]” in four registers: street vernacular, literary lyric, legal brief, and intimate letter. Preserve the core factual content. Output as four labeled versions, each roughly matching the original word count, followed by a 60-word note on which register best serves [CONTEXT] and why.

78. Metaphor Invention Lab

Prompt: Act as a poet-editor in the Jane Hirshfield tradition. Invent ten fresh metaphors for [ABSTRACT_CONCEPT] drawn from unusual source domains (plumbing, migration, knitting, geology, dentistry, etc.). Each must be defensible in prose, not just poetry. Avoid visual clichés. Output as a numbered list with each metaphor in one sentence, then flag the three strongest and explain in 80 words why they carry dramatic weight.

79. Tone Consistency Pass

Prompt: Act as a tone editor for a literary magazine. Audit this passage: “[PASSAGE]” for tonal drift. Identify sentences that pull the register toward irony, sentimentality, reportage, or lyric when the surrounding tone is [TARGET_TONE]. Output as a marked passage with drift flagged, plus a 100-word fix plan identifying the three specific lexical or syntactic levers to pull back into alignment.

80. Voice Contagion Killer

Prompt: Act as a voice preservation editor who has nursed authors out of Hemingway/McCarthy/Didion pastiche. Analyze this passage: “[PASSAGE]” and identify three specific tics borrowed from other writers. Suggest how to purge the mimicry while keeping whatever first attracted the author. Output as a three-row table: Tic Identified, Source Author, Replacement Strategy, followed by a rewritten 120-word sample in the author’s defended voice.

81. Villanelle in Modern Voice

Prompt: Act as a contemporary poet trained in closed forms, in the Marilyn Hacker tradition. Write a villanelle on [THEME] in modern plainspoken diction. Observe the full 19-line rhyme and refrain scheme (aba aba aba aba aba abaa) without stilted syntax or archaic diction. Output as a clean villanelle with line numbers, then add a 50-word craft note on which refrain variation you used at the close.

82. Song Lyric Hook Builder

Prompt: Act as a Nashville songwriter who has charted on country radio. Write a song about [SITUATION] with a verse-chorus-verse-chorus-bridge-chorus structure. The chorus must contain one line that could be a bumper sticker. Include a title, singable internal rhyme, and one surprising image per verse. Output as a formatted lyric sheet with section labels and a 50-word note on the payoff line you engineered.

83. Free Verse With Spine

Prompt: Act as a poetry editor at Poetry Magazine who champions free verse with architectural rigor. Write a 24-line free-verse poem on [IMAGE] whose lineation is driven by breath and meaning, not random margin breaks. Use enjambment to create one counter-meaning. Output as the finished poem, then annotate three lineation choices and explain the syntactic or musical logic behind each in 30 words total per note.

84. Haiku Sequence

Prompt: Act as a translator and practitioner of classical Japanese haiku in the Basho tradition. Write a seven-haiku sequence tracking [SEASON] through [LOCATION]. Observe the 5-7-5 syllable form loosely (breath count over strict syllables), include one seasonal reference (kigo) per haiku, and use juxtaposition (kireji logic) rather than simile. Output as seven numbered haiku, then add a 50-word note on the sequence's emotional arc.

85. Sonnet on a Contemporary Subject

Prompt: Act as a formalist poet who has been anthologized in the Best American Poetry. Write a Shakespearean sonnet (14 lines, abab cdcd efef gg, iambic pentameter with strategic substitutions) on [CONTEMPORARY_SUBJECT]. The volta must land at line 9, and the closing couplet must complicate rather than summarize. Output as a numbered sonnet followed by a 60-word craft note on your volta.

86. Prose Poem Hybrid

Prompt: Act as a prose poet in the Claudia Rankine tradition. Write a 180-word prose poem on [EXPERIENCE] that uses paragraph breaks as breath units, weaves in one found-language fragment, and builds toward a final image that shifts the reader's relationship to the subject. Output as clean prose broken into three to five justified blocks, then explain in 60 words how the form earns its "poem" label.

87. Song Bridge Architecture

Prompt: Act as a pop songwriting doctor. Given these verse and chorus lyrics: "[VERSE_CHORUS]", write three possible bridges (8 lines each) that each perform a different function: emotional zoom-in, point-of-view flip, or key-change lyric pivot. Output as three labeled bridges, then recommend which one best serves the song's narrative and explain in 70 words how the bridge sets up the final chorus.

88. Rap Verse Internal Rhyme

Prompt: Act as a battle rap coach in the Black Thought tradition. Write a 16-bar verse on [THEME] featuring multisyllabic internal rhyme, assonance chains, and at least three line-internal pivots where the meaning shifts on a single word. Avoid end-rhyme monotony. Output as a formatted verse with slashes for bar breaks, then annotate two of your rhyme chains with a 40-word technical note.

89. Translation With Voice

Prompt: Act as a literary translator in the Edith Grossman tradition. Given this source poem: “[POEM]” in [LANGUAGE], produce two English versions: (1) a close literal translation preserving meaning, (2) a freer “voice translation” preserving music and emotional register. Output as two labeled versions, then write a 120-word translator’s note explaining which tradeoffs you made in version two and why.

90. Lyric Essay Fragment

Prompt: Act as a lyric essayist in the Anne Carson tradition. Write a 300-word lyric essay fragment on [SUBJECT] that uses numbered sections, white space, one repeated image, and one direct address to a “you” whose identity shifts. Resist narrative closure. Output as the numbered fragment, then explain in 60 words which Carson-esque techniques you deployed and why they suit the subject.

91. Short Film Script Outline

Prompt: Act as a short-film screenwriter whose work has played Sundance Shorts. Outline a 10-minute short script about [SITUATION] with a clear dramatic question, single location, three-character ensemble, and an ending that recontextualizes the opening. Avoid dialogue-heavy exposition. Output as a 10-scene outline with page targets (1 page = 1 minute): Scene, Location, Beat, Reveal, Page Count.

92. TV Pilot Teaser Scene

Prompt: Act as a drama pilot writer mentored by Vince Gilligan. Write a 2-page cold open / teaser for a [GENRE] TV pilot that hooks the reader by page 2 without revealing the central premise. Use proper screenplay format (Final Draft style). Introduce the world through tension, not narration. Output as properly formatted screenplay with slugs, action lines, and dialogue, ending on an image that pulls the reader into the main title.

93. Feature Screenplay Beat Sheet

Prompt: Act as a feature film script consultant working out of Silverlake. Build a 40-beat beat sheet for a 110-page [GENRE] feature script about [PROTAGONIST] and [CONFLICT]. Hit the major structural stations: opening image, theme stated, setup, catalyst, debate, break into two, midpoint, dark night, finale, final image. Output as a numbered beat list with page targets and one-line function statements.

94. Screenplay Dialogue Polish

Prompt: Act as a script doctor who has uncredited-polished studio features. Rewrite this on-the-nose screenplay dialogue: “[DIALOGUE]” to add subtext, character rhythm, and economy. Cut parenthetical directions that tell the actor their job. Preserve story beats. Output as a rewritten screenplay-formatted scene, then list six specific changes you made and the craft principle behind each.

95. Scene Heading and Slug Discipline

Prompt: Act as a script supervisor and reader for a major agency. Given this rough scene draft: “[DRAFT]”, rewrite it with rigorous scene-heading discipline, clean action lines (present tense, active verbs, 2-3 line paragraphs), and dialogue blocks that breathe. Follow industry-standard Final Draft formatting. Output as a cleanly formatted screenplay scene, then note three formatting violations you corrected.

96. Visual Storytelling Pass

Prompt: Act as a director-screenwriter who shoots their own scripts. Take this talky scene: “[SCENE]” and rewrite it reducing dialogue by 50% while preserving all story information. Convert spoken exposition into visual behavior, blocking, and object interactions. Output as a rewritten screenplay-formatted scene, then list five specific dialogue-to-visual substitutions you made and why each deepened the scene.

97. TV Series Bible Pitch

Prompt: Act as a TV development executive at FX who greenlights serialized drama. Given a [GENRE] series concept: “[CONCEPT]”, write a 500-word series bible including logline, world, tone, protagonist, ensemble, central question, season-one arc, and “why this show now”. Avoid generic buzzwords. Output as a structured document with eight labeled sections and a closing “franchise potential” paragraph that earns a pilot commitment.

98. Sitcom Scene Pitch

Prompt: Act as a multi-cam sitcom writer in the Chuck Lorre tradition. Write a 2-page sitcom scene built on a clear comedic premise: [CHARACTER] wants [GOAL] but [OBSTACLE] keeps escalating. Use the setup-setup-punchline rhythm, character-specific jokes (not generic ones), and a button that tops the scene. Output as properly formatted multi-cam screenplay with stage directions, then add a 40-word joke pass note.

99. Voice-Over Script Craft

Prompt: Act as a documentary voiceover writer who has scripted for PBS Frontline. Write 200 words of VO to accompany a montage of [VISUAL_SUBJECT]. The VO must not describe what the viewer already sees; it should add context, emotional framing, or contradiction. Use plain syntax, concrete nouns, and one line that earns the montage's final image. Output as VO script with timing cues in brackets.

100. Script Coverage Report

Prompt: Act as a professional script reader who writes coverage for a major production company. Given this 110-page [GENRE] feature screenplay logline: “[LOGLINE]”, write standard studio coverage including logline, synopsis (300 words), comments (premise, structure, character, dialogue, marketability), and a grid rating (Excellent/Good/Fair/Poor). End with Recommend/Consider/Pass. Output as formal coverage document with all sections labeled and a final one-line recommendation with justification.

7 — Social Media & Community Growth

100 Expert Prompts Inside

*Twitter/X viral threads · LinkedIn long-form · Instagram carousels · Reels & TikTok scripts
· YouTube titles & thumbnails · content pillars · community management · influencer
outreach*

1. Viral Twitter Thread Architect

Prompt: Act as a Twitter/X growth strategist who has scaled 20 accounts past 100k followers and dissected the top 500 viral threads of 2024. Write a thread of 8 tweets for [NICHE] targeting [TARGET_AUDIENCE]. Open with a curiosity-gap hook under 240 chars using the “unexpected contrast” formula, use one-line tweets, embed a mini-story at tweet 4 (pattern interrupt), and close with [CTA]. Output each tweet numbered 1/8 to 8/8 with character counts in brackets.

2. Hook Formula Lab

Prompt: Act as a copy chief who has studied Alex Hormozi, Nicolas Cole, and Dickie Bush’s hook libraries. Generate 20 scroll-stopping first tweets for [NICHE] aimed at [TARGET_AUDIENCE], each using a distinct framework: contrarian, listicle, before/after, data bomb, confession, callout, PAS, question stack, time-warp, and 10 more. Keep every hook under 220 characters and voice matching [VOICE]. Output as a numbered table: # | Framework | Hook | Char Count.

3. Twitter Reply Guy System

Prompt: Act as a Twitter growth operator who books 30 leads/month purely from reply-guy strategy. Build me a daily reply routine for [NICHE]: identify 15 tier-1 accounts to target, draft 10 reply templates (value-add, joke, contrarian take, personal story, question, framework, data point, resource drop, disagree-politely, and “yes-and”) that fit under 280 chars. Output as: Target list, Template name, Template body, and When-to-use trigger.

4. Quote Tweet Hijack Playbook

Prompt: Act as a growth hacker who built a 75k follower account almost entirely through strategic quote tweets. For [NICHE] targeting [TARGET_AUDIENCE], give me 15 quote tweet angles that work on viral posts: reframe, steelman, counter-data, “here’s what they missed,” meme overlay, thread extension, and more. Each QT must be under 260 chars, punch up not down, and end with an implicit CTA. Output as numbered list with angle name and template.

5. X Longform Essay Blueprint

Prompt: Act as a long-form Twitter writer who has gone viral with 4000-character X Premium essays. Write a 2500-3500 character essay on [TOPIC] in [VOICE] tone. Structure: micro-hook (line 1), credibility stab (line 2), 3 numbered sections with short paragraphs and line breaks every 2 sentences, one contrarian take, one personal anecdote, and a CTA to [CTA]. Output the essay with a final character count and 5 alternate opening lines.

6. Daily X Content Machine

Prompt: Act as a Twitter content planner who runs the account of a solo creator doing \$50k/mo. Build me a 30-day X calendar for [NICHE] posting [POSTING_FREQUENCY] daily. Mix: 40% insight, 30% story, 20% engagement bait, 10% promo. Tag each day with content pillar, format (single, thread, poll, QT, image), hook angle, and expected engagement driver (save, share, reply, follow). Output as a markdown table with columns: Day | Pillar | Format | Hook | Goal.

7. Viral Thread Teardown

Prompt: Act as a thread analyst who has reverse-engineered 1000+ viral threads on X. I’ll paste a competitor’s viral thread. Break it down using the VIRAL framework (Visual hook, Identity trigger, Rhythm, Actionable payoff, Loop close). Identify: the exact hook mechanism, where dopamine spikes hit, the parasocial bridge, and the hidden CTA. Then rewrite the thread for my [NICHE] with [VOICE]. Output as “Teardown” section + “Rewrite” section.

8. Twitter Bio Conversion Surgeon

Prompt: Act as a Twitter profile optimizer who has A/B tested 200+ bios for 6-figure creators. Write 10 bio variations for [NICHE] targeting [TARGET_AUDIENCE] under 160 characters each. Use the “proof-promise-personality-CTA” formula. Include emoji only

when they carry semantic weight. Pair each bio with a suggested header image concept and pinned tweet angle. Output as: # | Bio | Char Count | Header Concept | Pin Tweet Idea.

9. Tweet Repurpose Engine

Prompt: Act as a content repurposing specialist who turns one longform piece into 30 days of X content. Given my [SOURCE_CONTENT] (blog, YouTube transcript, or podcast), extract 25 atomic tweets, 3 threads, 5 image-card concepts, and 2 polls. Each tweet must stand alone, hit a hook formula, and stay under 270 chars. Output as 4 sections with numbered items and brief context notes on why each will perform.

10. Algorithm Hack Playbook

Prompt: Act as a Twitter algorithm researcher who has reverse-engineered the 2024-2026 ranking signals. For [NICHE], give me 12 tactical plays that specifically pump reach: engagement-bait-that-isn't-bait, reply velocity stacking, long-reply boosting, community notes immunity, CT pods alternatives, and 7 more. For each, explain the signal it hits, risk level, and a copy-paste template. Output as numbered playbook entries with "Play / Signal / Template / Risk".

11. LinkedIn Founder Voice

Prompt: Act as a LinkedIn ghostwriter who writes for 3 Fortune-500 CEOs and has driven 10M+ impressions. Write a LinkedIn post in first person for a founder in [NICHE] targeting [TARGET_AUDIENCE]. Use the LinkedIn 2-line hook rule, short paragraphs (max 2 sentences), white space every line, one contrarian insight, one vulnerable moment, and a soft CTA to [CTA]. Output 1200-1500 chars formatted for mobile with a 5-hashtag cluster at the end.

12. LinkedIn Carousel Deck Script

Prompt: Act as a LinkedIn carousel specialist whose decks average 50k impressions. Design a 10-slide carousel on [TOPIC] for [TARGET_AUDIENCE]. Slide 1: hook + promise, Slides 2-9: one insight per slide with 15-20 words max, Slide 10: CTA. Apply the "one idea per slide" and "curiosity bridge" rules. Output each slide as: Slide # | Headline | Body Copy | Visual Direction | Design Note.

13. LinkedIn Personal Story Arc

Prompt: Act as a LinkedIn storytelling coach who has studied Justin Welsh, Katelyn Bourgoin, and Chris Donnelly. Write a personal story post for [NICHE] using the “Humbling Moment + Universal Lesson” framework. Include: scene-setting first line, dialogue, a specific number, an emotional low, a practical takeaway, and a question CTA. Match [VOICE]. Keep under 1300 chars, mobile-formatted with line breaks. Output the post plus 3 alternate hooks.

14. LinkedIn Thought Leadership Angle

Prompt: Act as a B2B thought leadership strategist working with enterprise SaaS founders. Generate 15 contrarian takes on [INDUSTRY] that would make [TARGET_AUDIENCE] stop scrolling. Each take must challenge a consensus belief, cite one specific data point or case study, and avoid cliches. Pair each with a 2-line LinkedIn hook and suggested content format (post, carousel, article, poll). Output as numbered list.

15. LinkedIn Newsletter Launch Kit

Prompt: Act as a LinkedIn newsletter strategist who has launched 5 newsletters past 10k subscribers. Give me a launch plan for a [NICHE] newsletter titled [NAME] targeting [TARGET_AUDIENCE]. Include: positioning statement, 3 pillar topics, first-10-issue outline, subscribe-page copy under 150 words, launch-day LinkedIn post draft, DM outreach template to 50 ideal readers, and week-1 promotion schedule. Output as structured sections.

16. LinkedIn DM Cold Open

Prompt: Act as a B2B social seller who books 15 meetings/week from LinkedIn DMs without being spammy. Write 10 cold DM templates for [OFFER] targeting [TARGET_AUDIENCE]. Use the “Pattern Interrupt + Specific Observation + No Pitch” formula. Each under 400 chars. Never ask for a meeting in first message. Include first reply and follow-up. Output as: # | Scenario | First DM | First Reply | Follow-up.

17. LinkedIn Comment Strategy

Prompt: Act as a LinkedIn growth tactician who has built 30k followers purely through strategic commenting. For [NICHE], identify 10 “dream 100” creators to engage daily. Draft 12 comment templates that add value, challenge politely, share receipts, drop a one-liner framework, or tell a mini-story. Each comment must be 40-80 words and avoid emoji. Output as creator archetype | comment type | template.

18. LinkedIn Engagement Pod Alternative

Prompt: Act as a LinkedIn growth consultant who refuses pods but still hits 100k impressions per post. Build me a 7-day “organic velocity stacker” routine for [NICHE]: morning DM ritual, tactical commenting windows, post-publish engagement sprint, reply prioritization, save-bait techniques, and follower-to-connection upgrade path. Output as a daily schedule with time blocks, specific actions, and measurable inputs.

19. LinkedIn Profile Rewrite

Prompt: Act as a LinkedIn profile surgeon who has rewritten 300+ executive profiles. Rewrite my profile for [ROLE] in [NICHE] targeting [TARGET_AUDIENCE]. Headline under 220 chars with keyword + outcome + proof. About section 2000 chars using the “Hero-Problem-Solution-Proof-CTA” flow. Featured section suggestions (5 items). Experience bullets for top 3 roles using STAR format. Output as labeled sections ready to paste.

20. LinkedIn Poll Engagement Bomb

Prompt: Act as a LinkedIn engagement strategist who designs polls that hit 2000+ votes. Generate 15 poll ideas for [NICHE] targeting [TARGET_AUDIENCE] that spark debate without being divisive. Each poll: question under 140 chars, 4 options that create tribes, a 500-char context post to frame the poll, and a follow-up post summarizing results. Output as numbered entries with all 4 components.

21. Instagram Caption Conversion

Prompt: Act as an Instagram caption copywriter who has written for lifestyle brands with 1M+ followers. Write a caption for a [NICHE] post in [VOICE] tone. Open with a scroll-stopping first line under 125 chars (pre-“more” fold). Use short paragraphs, line breaks with dots, one emotional hook, one micro-story, and a CTA to [CTA]. End with 30 hashtags split 10 niche / 10 mid / 10 broad. Output caption + hashtag cluster.

22. Instagram Carousel Script

Prompt: Act as an Instagram carousel designer whose decks routinely hit the Explore page. Script a 10-slide carousel for [NICHE] on [TOPIC]. Slide 1 hook (5-8 words, high contrast), slides 2-9 one punchy insight each (max 12 words), slide 10 save-this CTA. Include swipe-trigger lines (“wait for slide 7”). Output each slide with: slide #, text, visual description, color/mood direction, and font pairing suggestion.

23. Reels Hook Generator

Prompt: Act as an Instagram Reels strategist who has produced 50 Reels past 1M views. Generate 20 Reels hooks for [NICHE] targeting [TARGET_AUDIENCE]. Each hook uses a distinct pattern: “POV”, “Things I wish”, “Stop doing”, “If I was [X]”, “The truth about”, visual misdirection, “wait for it”, and 13 more. Every hook under 7 seconds spoken.

Output as: # | Hook Type | Spoken Line | Visual Cue | First-3-Sec B-roll.

24. Instagram Story Sequence

Prompt: Act as an Instagram story strategist who uses stories as a launch funnel engine. Design a 15-frame story sequence for [OFFER] in [NICHE]. Structure: frames 1-3 curiosity, 4-6 problem agitation, 7-10 solution reveal, 11-13 social proof, 14-15 CTA with link sticker. Include interactive stickers (poll, quiz, slider, emoji) on at least 5 frames.

Output as frame-by-frame script with copy, sticker, and visual direction.

25. IG Content Pillar Map

Prompt: Act as an Instagram content strategist for a 7-figure creator brand. Build a 4-pillar content system for [NICHE] targeting [TARGET_AUDIENCE]. Pillars might include Educate / Entertain / Inspire / Convert. For each pillar: 3 sub-topics, 5 post ideas, optimal format (Reel, carousel, single, story), best posting time, and expected KPI.

Output as a 4-column table with 60 total content ideas.

26. Reel Viral Remix

Prompt: Act as a trend-hijack specialist who spots emerging audio 48 hours before peak. Given trending audio [AUDIO_NAME / VIBE], create 10 Reel concepts for [NICHE] that ride the trend without feeling forced. Each concept: hook text overlay, 3-5 shot list, transition timing, caption, and relevance angle to [TARGET_AUDIENCE]. Output as numbered concepts with full shot breakdowns.

27. Instagram Bio Funnel

Prompt: Act as an Instagram bio optimizer who has tripled link click-through for coaches and creators. Write 8 bio variants for [NICHE] under 150 chars each using the “Who-What-Proof-CTA” framework. Pair each with: a 3-highlight cover strategy, name field keywords (Instagram SEO), and a link-in-bio page headline. Output as table with Bio | Name Field | Highlights | LIB Headline.

28. IG DM Automation Flow

Prompt: Act as an Instagram DM funnel builder using ManyChat-style logic. Design a keyword-triggered DM flow for [NICHE] where users comment [KEYWORD] on a Reel. Flow: auto-reply in comments, opener DM, qualifying question, value drop, soft CTA, hard CTA. Keep voice [VOICE]. Each message under 250 chars. Output as flow diagram text + every message copy labeled by node.

29. Carousel Swipe Hook Arsenal

Prompt: Act as an Instagram carousel architect. Generate 25 “swipe triggers” (lines placed at bottom of early slides that force the next swipe). Examples: “but here’s where it gets wild”, “slide 7 is the unlock”. Tailor to [NICHE] in [VOICE]. Each under 8 words. Pair with the slide position they work best on. Output as numbered list with position and tone notes.

30. IG Analytics Debrief

Prompt: Act as an Instagram analyst who audits creator accounts weekly. I’ll paste my last 30 posts with reach, saves, shares, profile visits. Run a teardown: top 5 patterns in winners, bottom 5 in losers, format performance, posting-time heatmap, hashtag effectiveness, and 5 tactical experiments for next 14 days with hypothesis + success metric. Output as sections: Wins, Losses, Patterns, Experiments.

31. TikTok First 3 Seconds

Prompt: Act as a TikTok hook engineer who has studied the retention graphs of 1000 viral videos. Generate 20 cold opens for [NICHE] targeting [TARGET_AUDIENCE]. Each open: spoken line (under 6 words), on-screen text, visual action, and the psychological trigger (pattern interrupt, curiosity, stake, POV, confession). Output as # | Spoken | Text Overlay | Visual | Trigger | Retention Bet.

32. TikTok Script Template

Prompt: Act as a TikTok scriptwriter for creators doing 10M+ views/month. Write a 45-second script for [NICHE] on [TOPIC] in [VOICE]. Structure: hook (0-3s), setup (3-8s), escalation (8-25s), payoff (25-38s), CTA (38-45s). Each beat includes: spoken line, text overlay, B-roll, transition, and retention anchor. Output as a table with columns: Timestamp | Dialogue | On-Screen | Visual | Note.

33. TikTok Trend Hijack Radar

Prompt: Act as a trend spotter who flips trending sounds and formats into [NICHE] content within 24 hours. Given [TREND_NAME / SOUND], generate 8 adaptation angles that serve [TARGET_AUDIENCE] while respecting the original format. Each angle: setup frame, twist frame, payoff frame, and why it won't feel cringe. Output as numbered list with 3-frame breakdowns.

34. TikTok Series Arc

Prompt: Act as a TikTok series strategist who has built accounts around recurring formats ("Day 1 of...", "POV:", "Tell me without telling me"). Design a 30-episode series for [NICHE] targeting [TARGET_AUDIENCE]. Include: series name, recurring hook template, opening beat, visual signature, episode list with unique twist per episode, and 3 potential spinoff formats. Output as series bible document.

35. TikTok Shop Organic Script

Prompt: Act as a TikTok Shop creator who drives \$30k/mo in GMV organically. Write a 60-second product demo script for [PRODUCT] targeting [TARGET_AUDIENCE] using the "Problem-Agitate-Demo-Proof-Urgency" flow. Include: hook under 3 sec, product reveal moment, 2 pattern interrupts, genuine emotional beat, and pinned-comment CTA. Output as timestamped script + pinned comment copy + 5 hashtags.

36. TikTok Comment Engagement Play

Prompt: Act as a community engagement specialist for TikTok creators. Give me 12 comment-bait tactics that feel native, not spammy: misspell-on-purpose, leave-a-clue, controversial-almost-take, inside-joke, cliffhanger text, unanswered question. For [NICHE] in [VOICE], generate one example per tactic with the video context it fits. Output as tactic | example comment bait | video context.

37. TikTok Posting Rhythm

Prompt: Act as a TikTok growth operator managing 15 creator accounts. Build a 30-day posting schedule for [NICHE] at [POSTING_FREQUENCY]. Mix formats: 40% educational-entertainment, 25% personality, 20% trend hijack, 15% direct-response. Specify posting times by audience timezone, content batching plan, and 5 shot-list days. Output as weekly tables with Day | Time | Format | Theme | Status.

38. TikTok Niche-Down Map

Prompt: Act as a niche positioning consultant. Help me find a defensible TikTok niche within [BROAD_CATEGORY]. Use the “three-circle overlap” (passion, expertise, demand). Produce 10 narrower niche angles, each with: TAM signal, top 3 existing creators, content format whitespace, 5 starter video ideas, and difficulty score 1-10. Output as ranked table.

39. TikTok Algorithm Retention Coach

Prompt: Act as a retention optimizer who reads the FYP graph religiously. Given my average watch time of [X] seconds on [NICHE] videos, give me 10 tactical retention boosters: loop tricks, re-hook at midpoint, visual choreography, caption contrast, audio pacing, etc. For each: the technique, how to execute in [VOICE], and the watch-time delta to expect. Output as ranked numbered list.

40. TikTok Cross-Post Strategy

Prompt: Act as a short-form distribution strategist. Given a 60-second TikTok for [NICHE], give me the repost plan across Reels, YT Shorts, Facebook Reels, Pinterest Idea Pins, and LinkedIn video. For each platform: caption rewrite, aspect-ratio note, hashtag set, posting time, and tweak to format (first-frame, on-screen text). Output as a platform-by-platform table.

41. YouTube Title CTR Machine

Prompt: Act as a YouTube title strategist who has produced 50 videos with 10%+ CTR. Generate 20 title variants for a video about [TOPIC] in [NICHE] targeting [TARGET_AUDIENCE]. Use CTR levers: curiosity gap, numbers, contrast, stakes, specificity, callout, transformation, and taboo. All titles under 60 chars, MrBeast-grade clarity. Output as # | Title | Char Count | Lever | Thumbnail Pair Idea.

42. YouTube Thumbnail Brief

Prompt: Act as a YouTube thumbnail designer who has worked on channels with 100M+ views. Given my video [TITLE] in [NICHE], write 5 thumbnail briefs using the “1 subject, 1 emotion, 1 object, 3 words max” rule. Each brief: concept, expression, color palette (3 colors), text overlay, background, composition (rule of thirds), and the curiosity it triggers. Output as numbered briefs with all components.

43. YouTube Long-Form Script

Prompt: Act as a YouTube long-form scriptwriter for creators doing 1M+ views/video. Write a 12-minute script for [TOPIC] in [NICHE] using the “Open Loop + Value Stack” structure: cold open (0-15s), promise (15-45s), proof (45s-1m30s), 5 value chapters, mid-roll re-hook at 6min, recap, CTA to [CTA]. Output as timestamped script with A-roll (dialogue) and B-roll (visual) columns.

44. YouTube Shorts Hook Library

Prompt: Act as a YouTube Shorts strategist with 30M+ Shorts views. Generate 25 hooks for [NICHE] targeting [TARGET_AUDIENCE] under 4 seconds each. Categories: contrarian, reveal, POV, confession, visual stunt, text-based, data bomb, question. Each hook: spoken line, text overlay, first visual, retention bet. Output as a library table with 4 columns.

45. YouTube Video Idea Engine

Prompt: Act as a YouTube idea researcher who mines demand signals from Reddit, Quora, and TubeBuddy. For [NICHE] targeting [TARGET_AUDIENCE], generate 30 video ideas with proven demand. Each idea: working title, angle, search intent, predicted CTR score 1-10, predicted retention score 1-10, competition level, and a content gap note. Output as ranked table by opportunity score.

46. YouTube Description SEO

Prompt: Act as a YouTube SEO specialist. Write an optimized description for a video titled [TITLE] in [NICHE]. First 150 chars: hook + keyword + promise (fits above “show more”). Body: 200-word summary, timestamps (chapters), 5 relevant links, keyword variations, 8 hashtags (3 branded, 5 topic). End with social links and CTA to [CTA]. Output full description with labeled sections.

47. YouTube End Screen Architect

Prompt: Act as a YouTube retention specialist focused on session time. Design end-screen copy and structure for a video on [TOPIC]. Include: verbal CTA script for last 20 seconds, which 2 videos to link (pattern: next-logical + curiosity-gap), subscribe ask framing, and a “most-watched playlist” plug. Output as: End Screen Plan | Verbal Script | Visual Layout | Linked Video Rationale.

48. YouTube Channel Reset

Prompt: Act as a YouTube consultant who has rebooted stalled channels past 100k subs. Given my channel in [NICHE] with [CURRENT_STATS], audit positioning, thumbnail style, title patterns, pacing, and content pillars. Prescribe a 90-day reset: new value prop, 3 content pillars, 12-video content slate, thumbnail template refresh, and weekly KPI dashboard. Output as audit + 90-day plan with weekly milestones.

49. YouTube Community Tab Play

Prompt: Act as a YouTube community manager who uses the Community tab to pre-seed video launches. For [NICHE], design a 14-day Community tab calendar leading to a big video drop: polls, behind-the-scenes, teasers, GIFs, image posts, text hooks. Each post: format, copy, intended engagement action, and how it feeds the launch. Output as day-by-day table.

50. YouTube CTR Thumbnail A/B

Prompt: Act as a thumbnail A/B tester. Given my video [TITLE], propose 3 radically different thumbnail concepts: emotional-faces, object-focus, and text-forward. For each: detailed visual brief, predicted CTR lift, and the audience subset it will resonate with. Include a test plan: duration, traffic split, decision threshold, and rollback rule. Output as 3 concepts + test protocol.

51. Content Pillar Strategist

Prompt: Act as a content strategist who has built editorial systems for top creator brands. Build a 5-pillar content strategy for [NICHE] targeting [TARGET_AUDIENCE]. For each pillar: theme, percentage mix, target emotion, funnel stage (TOFU/MOFU/BOFU), 10 topic ideas, and content format fit. Output as a pillar blueprint table + 50-topic master list.

52. 90-Day Content Calendar

Prompt: Act as a social media planner who runs calendars for 5-platform creator brands. Build a 90-day content calendar for [NICHE] covering [PLATFORMS] at [POSTING_FREQUENCY]. Map content pillars, campaigns, launches, holidays, and evergreen drops. Include batch days, repurpose lanes, and theme weeks. Output as a monthly table with Date | Platform | Pillar | Topic | Format | Owner | Status.

53. Repurposing Content Loop

Prompt: Act as a content atomization expert. Given one long-form asset (podcast, YouTube video, or article) in [NICHE], design the full atomization loop: 1 blog, 3 threads, 10 tweets, 1 LinkedIn essay, 1 carousel, 3 Reels, 5 TikToks, 1 newsletter, 1 email sequence. For each, explain the angle extracted and CTA. Output as a repurposing matrix labeled by channel.

54. Editorial Voice Guide

Prompt: Act as a brand voice architect who has codified tone for 20+ creator brands. Build a voice guide for [NICHE] targeting [TARGET_AUDIENCE]. Include: 3 voice attributes, “we are / we are not” list, vocabulary dos and don’ts, sentence rhythm rules, emoji policy, humor register, CTA style, and 5 before/after examples. Output as a one-page voice guide.

55. Content Batching System

Prompt: Act as a creator ops lead who runs batching systems for solo creators making \$30k/mo. Design a weekly batching workflow for [NICHE] at [POSTING_FREQUENCY]. Include: ideation block, writing block, recording block, editing block, scheduling block, engagement block. Allocate time per block, tools, checklist per block, and batch-to-queue flow. Output as weekly schedule + checklists.

56. Trend Research Protocol

Prompt: Act as a social trend analyst who spots emerging formats 2 weeks early. Build a daily/weekly trend research protocol for [NICHE]. Sources: TikTok Creative Center, Google Trends, Reddit rising, X trending, YouTube trending, Pinterest predicts. For each source: what to look for, frequency, extraction template, and green-light criteria. Output as research SOP.

57. Seasonal Campaign Map

Prompt: Act as a social campaign planner. Build a 12-month seasonal campaign map for [NICHE] tied to real calendar moments (holidays, product seasons, cultural events). Each month: campaign name, angle, primary format, pre-hype, launch day, sustain, recap. Align with [TARGET_AUDIENCE] rhythms. Output as 12-row calendar table with campaign briefs.

58. Content Quality Scorecard

Prompt: Act as a content QA lead who vets every asset before publish. Build a 10-criterion scorecard (hook strength, clarity, brevity, visual, voice fit, CTA, SEO, differentiation, story, native format). Each criterion scored 1-5 with a decision rule (≥ 40 to publish). For [NICHE], give 3 worked examples. Output as scorecard template + examples.

59. Cross-Platform Voice Mapper

Prompt: Act as a multi-platform creator coach. Map voice adaptations for [NICHE] across X, LinkedIn, Instagram, TikTok, YouTube while keeping core identity. For each: tone shift, length, formatting, emoji policy, humor, CTA style, and 1 example post. Output as 5-column matrix with identical message adapted per platform.

60. Content Experiment Framework

Prompt: Act as a growth PM running creator experiments. Design a 4-week content experiment framework for [NICHE]: hypothesis, variable, control, sample size, success metric, decision rule. Generate 8 starter experiments (hook style, thumbnail face/no-face, length, cadence, CTA placement, etc.). Output as experiment backlog with full test design per entry.

61. Discord Server Launch

Prompt: Act as a Discord community architect who has launched 10+ servers past 10k members. Design a launch plan for a [NICHE] Discord targeting [TARGET_AUDIENCE]. Include: server structure (categories, channels, roles), welcome flow, onboarding quest, first-week events, moderation rules, content ritual cadence, and a 30-day engagement plan. Output as a server bible with channel list, role map, and calendar.

62. Slack Community Playbook

Prompt: Act as a community manager running a Slack community for a premium cohort program. Design onboarding, rituals, channels, norms, and content pillars for a [NICHE] Slack targeting [TARGET_AUDIENCE]. Include: welcome DM sequence, intro-thread template, 5 recurring rituals (AMA, wins, office hours, etc.), channel map, norms doc, and 4-week activation playbook. Output as community ops doc.

63. Circle Community Blueprint

Prompt: Act as a Circle platform strategist who has designed 20+ paid communities. Build a Circle space plan for [NICHE]. Include: space taxonomy, member journey (new member Day 1-30), gamification levels, live event cadence, member-generated content prompts, and lurker-activation tactics. Output as a full Circle blueprint with space list, member journey map, and activation prompts.

64. Facebook Group Reactivation

Prompt: Act as a Facebook Group reactivator who has revived dead groups back to 5k engaged members. For a [NICHE] group with [CURRENT_STATE], diagnose the decay causes and prescribe a 60-day revival plan: pinned reset post, 10 re-engagement prompts, 3 recurring rituals, spam policy, moderator recruitment, and content mix. Output as diagnosis + action plan.

65. Community Rituals Calendar

Prompt: Act as a community rituals designer. Create 12 weekly/monthly rituals for a [NICHE] community that drive engagement and belonging: Monday Momentum, Wins Wednesday, Feedback Friday, Monthly AMA, etc. For each: format, cadence, host role, engagement hook, and metric to track. Output as ritual calendar table with facilitator prompts.

66. Community Onboarding Flow

Prompt: Act as an onboarding specialist for creator communities. Design a Day 0 through Day 14 onboarding for a new [NICHE] community member. Touchpoints: welcome DM, welcome channel post, intro-thread prompt, starter quest, first-week check-in, two-week nudge. Each touchpoint: copy, CTA, and drop-off recovery. Output as onboarding flow diagram + all message copy.

67. Moderation Guidelines

Prompt: Act as a trust and safety lead for online communities. Write the moderation guidelines for a [NICHE] community of [TARGET_AUDIENCE]. Include: community values, acceptable conduct, prohibited behavior, warning system, mute/ban ladder, appeals process, and mod team decision framework. Tone [VOICE]. Output as a publishable guidelines doc.

68. Community Content Prompts

Prompt: Act as a community engagement lead who drives 50%+ weekly active user rate. Generate 50 discussion prompts for a [NICHE] community. Mix: show-and-tell, hot take, teach-me, hive-mind, vulnerability, meme, poll, roast, collab call. For each: prompt copy, best channel, expected response type, facilitation follow-up. Output as numbered prompt bank.

69. AMA Event Blueprint

Prompt: Act as an AMA event producer who has hosted sessions with A-list creators. Design a full AMA for [NICHE] community with guest [GUEST]. Include: pre-hype posts, registration flow, 15 seed questions, live moderation plan, technical setup, replay packaging, follow-up content, and success metrics. Output as full run-of-show document.

70. Community Lurker Activator

Prompt: Act as a community growth analyst who specializes in turning lurkers into contributors. For a [NICHE] community with [X]% lurker rate, design a 30-day activation plan: low-stakes prompts, DM outreach, appreciation nudges, recognition system, intro-thread redesign, and first-contribution quest. Output as day-by-day activation sprint with copy for every touchpoint.

71. Influencer Outreach Script

Prompt: Act as an influencer marketing lead at a top creator agency. Write a cold outreach DM and email template for partnering with micro-influencers (10k-100k followers) in [NICHE] for [OFFER]. Use the “specific compliment + value exchange + low-friction ask” formula. Include: first message, follow-up 1, follow-up 2, and a “breakup” note. Output as 4-message sequence with subject lines and DM versions.

72. Creator Collab Pitch

Prompt: Act as a collab strategist who has brokered 200+ creator partnerships. Write a pitch to a target creator in [NICHE] for a [COLLAB_TYPE] (IG Live, YouTube video, joint newsletter, TikTok duet, podcast swap). Include: why them specifically, what’s in it for them, the format, the time ask, and how you’ll amplify their side. Keep under 200 words. Output as pitch + 2 alternate angles.

73. Gifting Campaign Brief

Prompt: Act as a PR and gifting strategist running seeding campaigns for DTC brands. Design a gifting campaign for [PRODUCT] in [NICHE] targeting 50 micro-influencers. Include: ideal creator profile, outreach copy, gifting kit contents, unboxing prompt, hashtag strategy, content guidelines, tracking plan, and success metrics. Output as campaign brief with checklist.

74. UGC Creator Brief

Prompt: Act as a UGC creative director for performance-marketed DTC brands. Write a UGC creator brief for [PRODUCT] in [NICHE]. Include: brand voice, hero message, 3 hook angles, 5 shot-list requirements, do's and don'ts, aspect ratios, delivery format, usage rights, and creator compensation framework. Output as a one-page brief ready to send.

75. Affiliate Partner Recruitment

Prompt: Act as an affiliate program manager. Write recruitment copy to attract top affiliates for [OFFER] in [NICHE]. Include: landing page headline, hero copy, commission structure, payout timing, creative assets available, tracking stack, onboarding flow, and a 3-email invitation sequence to dream affiliates. Output as landing copy + 3-email sequence.

76. Partnership Proposal Deck

Prompt: Act as a BD lead pitching brand partnerships to creators. Outline a 10-slide proposal deck for a [BRAND] × [CREATOR] collab in [NICHE]. Slides: cover, why us, why them, audience overlap, concept, deliverables, timeline, compensation, KPIs, next step. For each slide: headline, body copy, visual direction. Output as slide-by-slide brief.

77. Creator CRM Pipeline

Prompt: Act as an influencer ops lead who manages 300 creator relationships. Design a CRM pipeline for [NICHE] partnerships: lead source stages, qualification criteria, outreach cadence, negotiation steps, contract milestones, content QA, payment, and post-campaign nurture. Include data fields, tags, and automation triggers. Output as pipeline table + data schema.

78. Podcast Guest Pitch

Prompt: Act as a PR specialist who has booked clients on top 100 podcasts. Write a pitch email to land a guest slot on [PODCAST] for a [NICHE] expert. Subject line under 50 chars, opening compliment (specific episode), value angle, 3 story hooks, credibility proof, and low-friction CTA. Output as email + 2 follow-ups and 3 alt subject lines.

79. Micro-Influencer Whitelist

Prompt: Act as a paid social strategist running whitelisted influencer ads. Design a whitelist campaign in [NICHE]: ideal micro-creator profile, partnership ask copy, usage rights legal snippet, creative brief, paid amplification plan, and reporting dashboard. Output as campaign brief + creator-facing one-pager.

80. Brand Ambassador Program

Prompt: Act as a community-led growth lead building ambassador programs. Design a tiered ambassador program for [NICHE] with 3 levels (Fan, Advocate, Elite). For each tier: qualification criteria, rewards, responsibilities, exclusive channels, and upgrade path. Include application form copy and onboarding email sequence. Output as program doc + application + onboarding emails.

81. Reply DM Engagement Ritual

Prompt: Act as a social engagement coach. Design a daily 30-minute engagement ritual for [NICHE] across [PLATFORM]: 10 strategic replies, 5 DMs, 3 quote posts, 2 UGC reposts, 1 community post. For each action: target type, copy template, and time budget. Output as a daily ritual checklist with copy bank.

82. UGC Campaign Launch

Prompt: Act as a UGC campaign lead who runs hashtag-driven campaigns with 10k+ entries. Design a UGC campaign for [BRAND] in [NICHE]. Include: hashtag, prompt copy, incentive, 3 seed creators, paid amplification, rights clause, judging criteria, winner announcement, and content bank usage plan. Output as a full campaign brief.

83. DM Sales Conversation

Prompt: Act as a DM sales coach who closes \$10k deals from Instagram and LinkedIn DMs. Build a 7-step DM conversation script for [OFFER] targeting [TARGET_AUDIENCE]: opener, rapport, discovery, qualification, value demo, objection handling, CTA. Voice [VOICE]. Each message under 300 chars. Output as labeled sequence with branching replies.

84. Comment-to-DM Funnel

Prompt: Act as a social funnel designer. Design a comment-to-DM funnel for [OFFER] in [NICHE]. Include: IG Reel hook that drives the keyword comment, trigger keyword, auto-reply, 4-message DM nurture, lead magnet delivery, and 3-day email handoff. Each message copy fully written. Output as funnel flow + all copy.

85. Live Stream Engagement Map

Prompt: Act as a live stream strategist for creators running weekly lives. Design an engagement map for a 60-minute live on [TOPIC] in [NICHE]. Include: pre-live hype, opening hook, viewer call-ins, Q&A cadence, engagement spikes every 10 min, soft CTA at mid, hard CTA at 50-min mark, and post-live replay strategy. Output as timestamped run-of-show.

86. Giveaway Mechanic Design

Prompt: Act as a giveaway strategist who designs viral loops with low-quality-follower safeguards. Design a giveaway for [PRIZE] in [NICHE]. Include: entry mechanic, viral multiplier (tag, share, UGC), anti-bot safeguards, timeline, legal compliance, winner selection, announcement, and post-giveaway retention plan. Output as campaign spec + copy for launch post, mid-post, and winner post.

87. Email-to-Social Loop

Prompt: Act as a full-funnel growth lead. Design a loop where email drives social and social drives email for [NICHE]. Include: CTAs from email to Instagram story, Twitter thread, LinkedIn post; CTAs from each social platform back to email capture. Design 3 reciprocal loops with specific copy. Output as loop diagram + all CTA copy.

88. Reply Prioritization System

Prompt: Act as a creator ops analyst who designs reply triage for solo creators. Design a reply prioritization system across [PLATFORMS]. Triage by: potential lead, superfan, influencer, troll, spam, genuine question. For each category: response template, time budget, follow-up rule, escalation path. Output as triage matrix + response templates.

89. Pinned Comment Play

Prompt: Act as a social tactician who uses pinned comments as a second hook. Generate 15 pinned comment templates for [NICHE] that drive CTR, saves, or shares. Use angles: clarification, extra-value, link drop, confession, counter to common take, inside joke. Pair each with the video type it works on. Output as numbered template bank.

90. User Onboarding DM Sequence

Prompt: Act as a lifecycle marketer for creator-led brands. Write a 5-DM onboarding sequence sent after someone follows me on [PLATFORM] in [NICHE]. Messages: welcome, value drop, soft ask, social proof, CTA to [CTA]. Each under 300 chars, voice [VOICE], spaced by delays (immediate, day 1, day 3, day 5, day 7). Output as sequence with timing and copy.

91. Social Analytics Dashboard

Prompt: Act as a social media analyst who builds KPI dashboards for creator businesses. Design a weekly dashboard for [NICHE] across [PLATFORMS]. Include: north-star metric, platform KPIs (reach, engagement rate, saves, shares, follows, click-through, profile visits), input metrics (post count, DM count), and 3 anomaly alerts. Output as dashboard layout with metric definitions and target ranges.

92. Weekly Growth Review

Prompt: Act as a growth coach who runs weekly creator reviews. Build a 10-minute weekly review template for [NICHE]: top 3 wins, top 3 losses, top post teardown, input audit, experiment results, next-week priorities, blockers. Output as fill-in-the-blank template with prompting questions and scoring rubric.

93. Content Experiment Plan

Prompt: Act as an experimentation lead. Design a 30-day content experiment across [PLATFORMS] for [NICHE] testing hook style, length, posting time, thumbnail, and CTA style. For each experiment: hypothesis, variable, control, sample size, success metric, time to ship, and decision rule. Output as experiment roster with 6 experiments fully spec'd.

94. Viral Coefficient Calculator

Prompt: Act as a growth analyst. Build me a viral coefficient model for a [NICHE] content-led growth loop. Inputs: reach per post, follow rate, share rate, invitation rate, conversion per share. Compute K-factor and break-even cadence. Then recommend 5 levers that move the biggest knobs. Output as a spreadsheet-style model + leverage list.

95. Funnel Leak Audit

Prompt: Act as a social funnel auditor. Given my funnel in [NICHE] (impressions → profile visits → follows → link clicks → email signups → conversions), identify the 3 biggest leaks. For each leak: diagnosis, hypothesis, 2 experiments to run, and expected uplift. Output as audit report with leak map and experiment backlog.

96. Content Retention Graph Analysis

Prompt: Act as a retention analyst. I'll paste my retention graph for a [NICHE] video. Identify: drop-off moments, plateaus, rewatch spikes, and the exact seconds of interest. Pair each with a hypothesis and a rewrite tactic (re-hook, faster cut, stronger stake, visual relief). Output as annotated graph notes + rewrite plan.

97. Cohort Follower Quality

Prompt: Act as a creator analyst focused on follower quality, not vanity metrics. Design a cohort-based follower quality audit for [NICHE]: 30/60/90 day retention of newly acquired followers, content-type attribution, interaction depth, and churn patterns. Include 3 quality-improvement experiments. Output as audit template + experiment plan.

98. Competitive Benchmark Report

Prompt: Act as a competitive intelligence analyst. Build a benchmark report comparing my account to 5 competitors in [NICHE] across: follower growth rate, engagement rate, post cadence, content mix, top 3 content types, hook style, and CTA patterns. Identify 3 gaps I can exploit. Output as benchmark table + opportunity analysis.

99. Growth Experiment Debrief

Prompt: Act as a post-mortem facilitator. I'll paste an experiment result from my [NICHE] account. Debrief using the 5-whys: what happened, why, what we learned, what we'll do differently, what to ship next. Include a confidence score and whether to double-down, iterate, or kill. Output as structured debrief with clear next action.

100. Quarterly Growth OKRs

Prompt: Act as a creator COO who sets OKRs for 6-figure personal brands. Write a quarterly OKR sheet for [NICHE] targeting [TARGET_AUDIENCE]. Include: 1 objective, 3 key results (output + outcome mix), 6 initiatives, leading indicators, review cadence, and risk register. Align to [GOAL] in 90 days. Output as a one-page OKR sheet with initiative owners and weekly check-in format.

8 — Data Analysis, Research & Finance

100 Expert Prompts Inside

EDA · SQL queries · Pandas · hypothesis testing · A/B test design · cohort analysis · LTV/CAC · DCF models · 3-statement models · personal finance · portfolio strategy

1. Rigorous EDA Playbook

Prompt: Act as a senior data scientist with a PhD in statistics who has led analytics at a Fortune 100 company. Perform a full exploratory data analysis on [DATASET] focused on [TARGET_VARIABLE]. Profile distributions, missingness, cardinality, outliers (IQR + z-score), multicollinearity (VIF), and class imbalance. Flag leakage risks and suggest feature engineering. Output a structured markdown EDA report with summary tables, ranked data quality issues, and a prioritized cleaning checklist with Pandas snippets.

2. Missing Data Strategy

Prompt: Act as a staff-level data scientist specializing in statistical inference. For [DATASET] with [MISSING_COLUMNS], diagnose whether data is MCAR, MAR, or MNAR using Little's test and visual patterns. Recommend an imputation strategy (mean/median, KNN, MICE, or model-based) with trade-offs. Justify choice against downstream model [MODEL_TYPE]. Output a decision matrix table, Python implementation using scikit-learn and fancyimpute, and a validation plan comparing pre/post distributions.

3. Outlier Detection Framework

Prompt: Act as a principal data scientist at a fraud analytics team. Design a multi-method outlier detection pipeline for [DATASET] covering univariate (z-score, IQR, MAD), multivariate (Mahalanobis, Isolation Forest, LOF), and time-series (STL residuals) techniques. Explain when each fails. Output Python code, a comparison of flagged records, false-positive risk analysis, and a business-rule layer to prevent auto-removal of legitimate extremes.

4. Data Quality Scorecard

Prompt: Act as a data governance lead building a quality scorecard for [DATASET]. Define metrics across completeness, uniqueness, validity, consistency, timeliness, and accuracy dimensions with weighted scoring. Implement automated checks using Great Expectations or Soda. Output the scorecard schema as YAML, SQL validation queries, a sample HTML report, and a remediation playbook tied to each failing dimension.

5. Feature Engineering Deep Dive

Prompt: Act as a Kaggle Grandmaster mentoring a team on feature engineering for [DATASET] predicting [TARGET]. Propose 20+ features across aggregation, interaction, target encoding, lag/window, frequency, and domain-specific transforms. Explain leakage risks and cross-validation strategy (group/time-based). Output a feature catalog table with name, definition, Pandas code, expected signal, and a ranked hypothesis for feature importance.

6. EDA on Time Series

Prompt: Act as a forecasting expert who built demand models at Amazon. Conduct EDA on time series [DATASET] for [METRIC] at [GRANULARITY]. Decompose using STL, test stationarity (ADF, KPSS), assess seasonality (FFT, ACF/PACF), detect changepoints (PELT), and identify holidays/anomalies. Output a Jupyter-ready Python analysis with plots, a markdown report on series characteristics, and recommended forecasting model family (ARIMA, Prophet, LightGBM, DeepAR).

7. Categorical Encoding Audit

Prompt: Act as an ML engineer auditing feature encoding choices for [DATASET]. For each categorical column, recommend encoding (one-hot, ordinal, target, frequency, hashing, James-Stein) based on cardinality, rarity, and relationship to [TARGET]. Quantify risk of target leakage and high-cardinality explosion. Output a decision table, scikit-learn column transformer code, and cross-validation scheme to measure lift per encoding choice.

8. Data Profiling Automation

Prompt: Act as a senior analytics engineer building a reusable data profiling script. For any CSV/Parquet [DATASET], output column-level stats (dtype, nulls, unique, skew, kurtosis, top categories), correlation matrix, mutual information with [TARGET], and sample records. Use ydata-profiling and polars for speed. Output the full Python script, CLI interface, and an executive summary template rendered via Jinja2.

9. EDA Narrative Report

Prompt: Act as a data storytelling coach. Convert raw EDA findings on [DATASET] into a 1-page executive narrative for a C-suite audience. Frame findings as three takeaways, three risks, and three recommendations. Back every claim with a statistic and uncertainty bound. Output the narrative in markdown with a Pyramid Principle structure, one headline chart recommendation, and a glossary for non-technical readers.

10. Data Cleaning Runbook

Prompt: Act as a data reliability engineer. Produce a reproducible data cleaning runbook for [DATASET] that handles duplicates, type coercion, whitespace, encoding, unit normalization, and referential integrity. Emphasize idempotency and logging. Output a Python module using pandas and pydantic with unit tests, an input/output schema contract, and a before/after row-count reconciliation report.

11. SQL Query Optimization

Prompt: Act as a principal database engineer with 15 years of PostgreSQL and BigQuery experience. Optimize the following query [SQL_QUERY] running against [TABLE] with [ROWCOUNT] rows. Analyze the execution plan, identify full scans, missing indexes, spill-to-disk, and suboptimal joins. Rewrite using CTEs, window functions, and partition pruning. Output the optimized SQL, EXPLAIN ANALYZE comparison, index DDL, and expected cost reduction in percentage.

12. Window Function Masterclass

Prompt: Act as a senior analytics engineer at a unicorn startup. Write advanced SQL using window functions to compute running total, 7-day moving average, rank within partition, first/last value, and percent of parent for [METRIC] on [TABLE] grouped by [SEGMENT]. Handle ties and sparse dates via generate_series. Output a single annotated query, expected output schema, and 3 gotchas around frame clauses that juniors miss.

13. Slowly Changing Dimensions

Prompt: Act as a dimensional modeling expert trained in Kimball methodology. Design a Type 2 SCD for [DIMENSION_TABLE] tracking [ATTRIBUTES] over time. Define surrogate keys, effective_from/to, is_current flag, and hash diff detection. Output the DDL, a MERGE statement for upserts, a validation query for overlapping intervals, and a downstream fact-join example preserving historical truth.

14. Funnel Analysis SQL

Prompt: Act as a product analytics lead at a SaaS company. Write SQL to compute a conversion funnel for [PRODUCT_FLOW] with steps [STEP_LIST] over [TIME_WINDOW], segmented by [SEGMENT]. Handle step ordering, time-to-convert, and drop-off rates. Output the query using window functions, a summary table schema, and a secondary query computing statistical significance of drop-off differences between segments using two-proportion z-test.

15. Cohort Retention Query

Prompt: Act as a growth analytics specialist. Write a SQL query that builds a weekly cohort retention matrix for [USER_TABLE] with signup_date and activity_date columns over [N_WEEKS]. Include cohort size, retained users, and retention percent. Output the query (BigQuery and Postgres variants), the pivoted heatmap shape, and a Python snippet using seaborn to visualize the triangle.

16. SQL Anti-Patterns Audit

Prompt: Act as a database performance consultant. Review [SQL_QUERY] for anti-patterns: SELECT *, implicit casts, functions on indexed columns, correlated subqueries, OR in join predicates, NOT IN with nullable columns, and missing statistics. Output a ranked findings table, the refactored query, and a preventive linting rule set for SQLFluff that blocks these in CI.

17. Dbt Model Design

Prompt: Act as an analytics engineering lead implementing dbt at a Series C startup. Design a staging-to-mart model for [DOMAIN] following Kimball conventions. Define sources, staging (stg_), intermediate (int_), and marts (fct_/dim_) layers. Output the dbt project folder structure, sample SQL model with Jinja macros, schema.yml with tests (unique, not_null, relationships, accepted_values), and a dbt docs block explaining grain.

18. Incremental Materialization

Prompt: Act as a data platform engineer optimizing [FACT_TABLE] with billions of rows. Design an incremental dbt model using merge strategy, partition pruning on [DATE_COLUMN], and late-arriving data handling with a lookback window. Output the dbt SQL with incremental config, unit test fixtures, a backfill procedure, and metrics on expected cost savings vs full refresh per run.

19. SQL to Pandas Translation

Prompt: Act as a data engineer fluent in both SQL and Python. Translate [SQL_QUERY] into idiomatic Pandas using groupby, agg, merge, pivot, and assign. Preserve exact semantics including NULL handling. Output a side-by-side comparison table (SQL clause to Pandas method), the executable Python code using type hints, and a note on when Pandas is faster vs Polars or DuckDB for the same task.

20. Data Warehouse Schema Review

Prompt: Act as a senior data architect. Review the schema for [WAREHOUSE] including fact and dimension tables. Assess grain consistency, conformed dimensions, junk dimensions for flags, degenerate dimensions, and snowflaking risks. Output a schema health scorecard, an ER diagram description, 5 prioritized refactors with DDL, and a BI-tool impact assessment for each change.

21. Pandas Performance Tuning

Prompt: Act as a Pandas core contributor. Optimize [PANDAS_SCRIPT] processing a [SIZE]-row DataFrame. Diagnose bottlenecks using memory_usage, dtype downcasting, chunking, vectorization over apply, categorical dtypes, and eval/query. Compare against Polars and DuckDB alternatives. Output a profiled before/after with timings, the refactored script, and a decision tree for when to migrate off Pandas.

22. Plotly Dashboard Spec

Prompt: Act as a senior data visualization engineer who built dashboards at Airbnb. Design a Plotly Dash dashboard for [BUSINESS_QUESTION] using [DATASET]. Specify KPIs, filters, cross-filtering, drill-downs, and color encoding following Cole Knaflie principles. Output a layout wireframe in markdown, the Dash app.py skeleton, chart recommendations per KPI, and accessibility notes (colorblind-safe palettes, ARIA).

23. Matplotlib Publication Chart

Prompt: Act as a scientific visualization expert publishing in Nature. Produce a publication-quality matplotlib figure for [DATA] showing [RELATIONSHIP]. Follow conventions: 300 DPI, serif fonts, minimal chart junk, error bars with 95% CI, significance annotations. Output the Python code using matplotlib and seaborn, a caption draft, alt text, and a checklist validating against journal figure guidelines.

24. Pandas Groupby Recipes

Prompt: Act as a senior analyst writing a Pandas cookbook. Demonstrate 10 groupby patterns on [DATASET]: multi-aggregate, named aggregate, transform for z-score, filter, rolling within group, top-N per group, apply with custom function, pivot_table, crosstab with margins, and groupby on categorical. Output annotated code blocks, performance notes, and the equivalent SQL for each pattern.

25. Data Pipeline with Prefect

Prompt: Act as a data engineering tech lead. Build a Prefect 2 flow ingesting [SOURCE], transforming with Pandas, and loading to [DESTINATION]. Include retries, caching, concurrency limits, and Slack alerts on failure. Output the flow code, a deployment YAML with schedule, unit tests using pytest, and a monitoring dashboard spec covering SLA, latency, and freshness.

26. Polars Migration Guide

Prompt: Act as a data performance engineer evaluating Polars vs Pandas for [WORKLOAD]. Benchmark key operations (join, groupby, window) on [SIZE] data. Translate [PANDAS_SNIPPET] into Polars lazy API. Output a migration playbook, gotchas (null semantics, dtype mapping, method name changes), a benchmark table with timings, and ROI estimate for team-wide adoption.

27. Seaborn EDA Visuals

Prompt: Act as a statistics professor teaching visual EDA. Produce a seaborn gallery for [DATASET] covering distribution (histplot, kdeplot), relationship (pairplot, jointplot), categorical (boxplot, violinplot, stripplot), and matrix (heatmap, clustermap) plots. Output Python code, a one-paragraph reading guide per chart type, and a rubric scoring each plot on clarity, honesty, and information density.

28. Interactive Notebook Report

Prompt: Act as an analytics engineer delivering findings via Jupyter. Build a notebook analyzing [QUESTION] on [DATASET] using Quarto or Jupyter Book for reproducibility. Include parameterized cells with papermill, widgets for filtering, and exportable HTML. Output the notebook outline, key code cells, markdown narrative placeholders, and a rendering command plus CI workflow to republish on every data refresh.

29. Python Data Validation

Prompt: Act as a senior MLOps engineer. Implement schema validation for [DATASET] using Pandera or Great Expectations. Define column types, ranges, uniqueness, null rules, and cross-column constraints derived from [BUSINESS_RULES]. Output the schema class, a validation wrapper that fails fast in CI, test fixtures for valid and invalid cases, and integration with Prefect/Airflow task failure hooks.

30. Streamlit Analyst Tool

Prompt: Act as an analytics tools developer. Build a Streamlit app that lets non-technical stakeholders explore [DATASET] with filters, dynamic charts, and CSV export. Cache data with `@st.cache_data`, add session state for saved views, and secure with OAuth. Output the app.py code, requirements.txt, a Dockerfile, and a 30-second user walkthrough script for onboarding.

31. Hypothesis Test Selector

Prompt: Act as a biostatistician with 20 years of clinical trial experience. Given a research question about [COMPARISON] on [DATA_TYPE], recommend the appropriate statistical test among t-test, Welch's t, Mann-Whitney U, ANOVA, Kruskal-Wallis, chi-square, Fisher's exact, or paired alternatives. Justify based on normality, variance, independence, and sample size. Output a decision flowchart, Python (scipy.stats) code, and interpretation template with effect size and power.

32. P-Value Interpretation

Prompt: Act as a statistics educator correcting common p-value misinterpretations. For [STUDY_DESIGN] testing [HYPOTHESIS] with [SAMPLE_SIZE] observations, explain what the p-value does and does not mean. Discuss the ASA 2016 statement, base rate fallacy, and alternatives (confidence intervals, Bayes factors). Output a markdown explainer with 5 myths debunked, a worked numerical example, and guidance on reporting to a non-technical executive audience.

33. Confidence Interval Construction

Prompt: Act as a frequentist statistician. Construct a 95% confidence interval for [PARAMETER] from [DATASET] using both analytical (normal/t-approximation) and bootstrap (percentile, BCa) methods. Compare widths and assumptions. Output Python code using scipy and pingouin, a visualization of the bootstrap distribution, an interpretation paragraph, and guidance on when to prefer bootstrap over parametric.

34. Power Analysis Plan

Prompt: Act as an experimental design expert at a research lab. Compute required sample size for detecting [EFFECT_SIZE] in [METRIC] at alpha 0.05 and power 0.8 for a [TEST_TYPE]. Adjust for multiple comparisons using Bonferroni or Benjamini-Hochberg. Output the calculation using statsmodels power module, a sensitivity table varying effect size and power, and a written rationale for the chosen minimum detectable effect.

35. Linear Regression Diagnostics

Prompt: Act as an econometrician. Fit OLS on [DATASET] predicting [Y] from [X_LIST] and run full diagnostics: linearity (residual plots), normality (Shapiro, QQ), homoscedasticity (Breusch-Pagan, White), independence (Durbin-Watson), multicollinearity (VIF), and influence (Cook's distance, leverage). Output statsmodels code, an annotated diagnostic plot grid, a findings table, and remediation recommendations per violated assumption.

36. Logistic Regression Audit

Prompt: Act as a credit risk modeler at a retail bank. Fit a logistic regression predicting [BINARY_OUTCOME] on [FEATURES]. Assess with ROC-AUC, KS statistic, calibration (reliability plot, Brier score), and lift table. Check linearity of logit for continuous features. Output the scikit-learn code, a model card, variable importance via coefficients and SHAP, and regulatory documentation for model risk management.

37. Bayesian Inference Example

Prompt: Act as a Bayesian statistician trained at Columbia. For [PARAMETER] with prior [PRIOR] and data [DATA], compute the posterior using PyMC. Specify likelihood, run NUTS sampling, check convergence (R-hat, ESS), and produce posterior predictive checks. Output the PyMC model code, trace plots, a credible interval interpretation, and a comparison with the equivalent frequentist result highlighting philosophical differences.

38. Multiple Testing Correction

Prompt: Act as a statistician reviewing [STUDY] with [N_TESTS] hypotheses. Apply family-wise error control (Bonferroni, Holm) and false discovery rate control (Benjamini-Hochberg, Storey q-values). Explain the difference and recommend per context. Output Python code using statsmodels.multitest, a comparison table of adjusted p-values, and guidance on pre-registering the correction method to avoid p-hacking.

39. Correlation vs Causation

Prompt: Act as a causal inference researcher in the Judea Pearl tradition. For observed correlation between [X] and [Y] in [DATASET], list plausible confounders, mediators, and colliders. Draw a DAG using dagitty syntax, identify adjustment sets via backdoor criterion, and propose an estimation strategy (matching, IPTW, doubly robust). Output the DAG, Python DoWhy code, and a sensitivity analysis (E-value) for unmeasured confounding.

40. Non-Parametric Alternatives

Prompt: Act as a statistics consultant advising on small-sample analysis for [DATASET] with $n=[N]$ and [DATA_TYPE]. Recommend non-parametric tests (Wilcoxon signed-rank, Mann-Whitney U, Spearman, permutation test, bootstrap) when normality fails. Output a decision table, Python implementations, expected statistical power vs parametric counterparts, and a reporting template for publication.

41. A/B Test Design Doc

Prompt: Act as a senior experimentation scientist at Meta. Write an A/B test design doc for [FEATURE] measuring [PRIMARY_METRIC] with [GUARDRAIL_METRICS]. Specify hypothesis, unit of randomization, sample size via power analysis, exposure duration, SRM check, and pre-registered analysis plan. Output the doc in markdown with sections Hypothesis, Metrics, Design, Analysis, Rollout Plan, and a sign-off checklist for stats, product, and engineering.

42. A/B Test Results Analysis

Prompt: Act as a lead data scientist analyzing [EXPERIMENT] with [N_USERS] and [VARIANTS]. Compute lift, confidence intervals, p-values with CUPED variance reduction, and segment heterogeneity. Perform SRM check and novelty effect detection. Output Python code using scipy and an A/B testing library, a results table with effect sizes, a recommendation (ship, iterate, kill), and a post-mortem section on learnings.

43. Multi-Armed Bandit Setup

Prompt: Act as a reinforcement learning engineer deploying bandits for [USE_CASE]. Compare epsilon-greedy, Thompson Sampling, and UCB1 for allocating traffic across [N_ARMS]. Simulate regret over [T_ROUNDS] and explain exploration-exploitation trade-off. Output a Python simulation, a recommendation for production algorithm, monitoring metrics (regret, pull counts), and a fallback plan for non-stationary reward distributions.

44. Quasi-Experiment Design

Prompt: Act as a causal inference expert applying difference-in-differences to [POLICY_CHANGE] affecting [TREATED_GROUP]. Identify a valid control, check parallel trends, specify the DiD regression with fixed effects, and test placebo timing. Output the statsmodels or linearmodels code, a parallel trends plot, robustness checks (leads/lags, event study), and caveats around SUTVA violations.

45. Switchback Test Design

Prompt: Act as a marketplace experimentation expert at Lyft. Design a switchback test for [TREATMENT] when network effects bias classical A/B tests. Define switchback units (time x region), duration, washout windows, and variance estimation via cluster bootstrap. Output the design doc, a simulation to estimate minimum detectable effect, analysis SQL/Python, and gotchas around carryover and seasonality.

46. Sample Ratio Mismatch Debug

Prompt: Act as an experimentation platform engineer investigating SRM on [EXPERIMENT]. Explain SRM causes (bucketing bugs, bot filtering, redirect drops, logging loss). Run chi-square test and diagnostic queries segmenting by device, geo, and entry point. Output SQL diagnostics, a root-cause decision tree, remediation playbook, and a pre-launch SRM check template to catch issues before day 1.

47. Novelty Effect Adjustment

Prompt: Act as a senior experimentation scientist at Netflix. For [EXPERIMENT] showing early lift that decays, model novelty vs sustained effect using a segmented regression on days since exposure. Recommend minimum run duration. Output Python code, a time-series plot, a decay curve fit, and a guidance note on when to extend, stop, or iterate based on decay half-life.

48. Holdout Group Strategy

Prompt: Act as a growth analytics lead designing a long-term holdout for [MARKETING_CHANNEL] with [BUDGET]. Allocate 5 percent of users to a perpetual holdout and measure incremental LTV over [TIME_WINDOW]. Address contamination, re-randomization cadence, and statistical power. Output the rollout plan, measurement SQL, expected incremental LTV calculation, and governance to protect holdout integrity across teams.

49. Meta-Analysis of Experiments

Prompt: Act as a principal data scientist consolidating learnings from [N_EXPERIMENTS] on [METRIC_FAMILY]. Perform a fixed and random effects meta-analysis, compute pooled effect size and heterogeneity (I^2). Identify moderators via subgroup analysis. Output Python code using PythonMeta or manual statsmodels, a forest plot, funnel plot for publication bias, and a summary memo with confidence-weighted recommendations.

50. Experimentation Program Audit

Prompt: Act as a VP of Data auditing an experimentation program running [N] tests per quarter. Evaluate velocity, win rate, ship rate, power distribution, guardrail coverage, and organizational adoption. Benchmark against Microsoft/Booking standards. Output a scorecard, 10 prioritized improvements (tooling, culture, governance), and a 90-day roadmap with owners and KPIs.

51. Three Statement Model

Prompt: Act as an investment banking associate at Goldman Sachs. Build a 5-year integrated three-statement model for [COMPANY] linking income statement, balance sheet, and cash flow statement. Use [HISTORICAL_FINANCIALS] as base. Drive revenue with [GROWTH_DRIVERS], margins from historicals. Output an Excel model structure with tabs, formula logic per line, circular reference handling for interest, and a stress-test toggle for bear/base/bull scenarios.

52. DCF Valuation Model

Prompt: Act as an equity research analyst covering [SECTOR]. Build a DCF for [COMPANY] with 10-year explicit forecast and terminal value via Gordon Growth and exit multiple. Compute WACC from CAPM with [BETA], [RF_RATE], [ERP]. Output the model in structured markdown, sensitivity tables (WACC vs g, EBITDA multiple vs exit), an implied share price, and a football field chart comparing with comparables and precedents.

53. LBO Model Build

Prompt: Act as a private equity associate at KKR. Build an LBO for [TARGET] at [ENTRY_MULTIPLE] EBITDA with [DEBT_LAYERS] (TLB, mezzanine, revolver). Model sources and uses, debt schedule, management rollover, and exit after 5 years. Output the model structure, IRR and MOIC calculations, a returns attribution (deleveraging, EBITDA growth, multiple expansion), and a covenant compliance check.

54. Comparable Company Analysis

Prompt: Act as an M&A banker building a comparables set for [TARGET]. Select [N] peers based on sector, size, growth, and geography. Compute EV/Revenue, EV/EBITDA, P/E, PEG, and forward multiples. Adjust for non-recurring items. Output the comps table, a statistical summary (min, 25th, median, 75th, max), an implied valuation range, and a defense memo on peer selection methodology.

55. Precedent Transactions

Prompt: Act as an M&A analyst at Morgan Stanley. Build a precedent transactions analysis for [DEAL_THESIS] pulling comparable deals from the last 5 years. For each deal, capture EV, EV/Revenue, EV/EBITDA, control premium, and strategic rationale. Output a transactions table, a commentary on multiple trends, an implied valuation, and a caveats section on comparability and synergies.

56. Merger Model Accretion

Prompt: Act as an M&A strategist modeling [ACQUIRER] buying [TARGET] for [DEAL_VALUE] mix of cash and stock. Project pro forma EPS with synergies, financing costs, and amortization of intangibles. Compute accretion/dilution in years 1-3 and breakeven synergies. Output the model outline, sensitivity to offer premium and synergy realization, and a board memo recommending deal structure.

57. Sensitivity and Scenario

Prompt: Act as an FP&A director running scenario analysis on [MODEL]. Define bear, base, bull, and downside scenarios varying [KEY_DRIVERS]. Build a two-variable sensitivity on [OUTPUT] for [INPUT_1] vs [INPUT_2]. Output an Excel-style sensitivity table, tornado chart prioritizing drivers, scenario probability weighting for expected value, and a narrative on key value levers.

58. Monte Carlo Valuation

Prompt: Act as a quantitative analyst at a hedge fund. Build a Monte Carlo simulation for [COMPANY] DCF varying revenue growth, margin, and WACC using triangular distributions calibrated to analyst consensus. Run 10,000 iterations in Python. Output the numpy/pandas code, the distribution of implied share prices, probability of undervaluation vs current price, and VaR-style tail risk metrics.

59. WACC Computation Deep Dive

Prompt: Act as a corporate finance professor. Compute WACC for [COMPANY] step by step: unlever comps betas, relever to target structure, derive cost of equity via CAPM, after-tax cost of debt from yield on debt, weights at market value. Output the calculation in a structured table, sources for each input, sensitivity to beta and risk premium, and pitfalls (book vs market, country risk, size premium).

60. Startup Valuation Methods

Prompt: Act as an early-stage VC partner valuing [STARTUP] at [STAGE] with [METRICS]. Apply scorecard, Berkus, VC method, and discounted revenue multiple approaches. Reconcile into a pre-money range. Output each method's calculation, strengths and weaknesses, the final range, and negotiation considerations (option pool, anti-dilution, liquidation preference) that affect effective valuation.

61. Rolling Forecast Build

Prompt: Act as an FP&A lead at a high-growth SaaS company. Build a 13-month rolling forecast for [METRIC] combining top-down targets and bottom-up sales pipeline. Update cadence is monthly. Output the process flow, template columns (actual, forecast, variance, commentary), driver tree linking bookings to revenue, and KPIs for forecast accuracy (MAPE, bias).

62. Variance Analysis Report

Prompt: Act as a controller writing the monthly variance analysis for [BUDGET] vs [ACTUAL]. Decompose variance into price, volume, and mix effects across [PRODUCT_LINES]. Quantify dollar impact and percent. Output a markdown report with executive summary, variance bridge table, waterfall chart description, root-cause commentary per material variance (>5 percent), and corrective actions with owners.

63. Zero Based Budgeting

Prompt: Act as a turnaround CFO implementing ZBB at [COMPANY]. Redesign the [DEPARTMENT] budget from scratch justifying every dollar against business drivers. Challenge baseline assumptions and rank activities. Output the ZBB framework, a decision package template, expected savings vs prior budget, and an implementation timeline with change management considerations.

64. Cash Flow Forecast 13 Week

Prompt: Act as a treasury manager at a Series C startup. Build a 13-week cash flow forecast with direct method capturing receipts, disbursements, debt service, and financing. Identify minimum cash covenant breaches. Output the weekly schedule, inflow/outflow categories, sensitivity to AR collection slippage and customer concentration, and a liquidity dashboard for board updates.

65. Revenue Forecasting Model

Prompt: Act as a head of FP&A forecasting revenue for [BUSINESS] by segment. Build a driver-based model: new logos x ACV, expansion via NRR, churn. Incorporate seasonality and sales cycle length. Output the model, a reconciliation with bottoms-up pipeline, forecast accuracy measurement plan, and a commentary on key risks (pipeline coverage, rep ramp, macro).

66. Expense Forecast Drivers

Prompt: Act as an FP&A analyst forecasting opex for [DEPARTMENT] with [HEADCOUNT] growing per hiring plan. Build a driver-based model covering salary and benefits (load factor), T&E per FTE, software per seat, and discretionary projects. Output the line-item model, a phasing assumption per driver, a what-if on hiring delays, and reconciliation with recruiting pipeline.

67. Unit Economics Model

Prompt: Act as a growth strategist at a marketplace. Build a unit economics model computing contribution margin per transaction, payback period, LTV, CAC, and LTV/CAC ratio. Segment by [COHORT_DIMENSION]. Output the model with definitions per metric, a sensitivity to take rate and churn, a benchmark vs industry (3:1 LTV/CAC, <12 month payback), and a profitability path to breakeven.

68. Forecast Accuracy Review

Prompt: Act as an analytics lead reviewing forecast accuracy for [METRIC] over [N_PERIODS]. Compute MAPE, WAPE, bias, and tracking signal. Diagnose systematic under/over-forecasting. Output a Python analysis, a funnel of errors by segment, a retrospective on drivers of error, and improvements to forecasting process (model, judgment overrides, cadence).

69. Budget vs Forecast Governance

Prompt: Act as a corporate controller designing budget governance for [COMPANY] with [N_COST_CENTERS]. Define budget lock, reforecast cadence, approval thresholds, and variance escalation. Output a governance policy document, a RACI matrix, a monthly close calendar, and templates for reforecast submission and variance explanation.

70. Headcount Planning Model

Prompt: Act as a workforce planning analyst building a headcount model for [COMPANY] over [YEARS]. Tie hires to revenue and ratio targets (e.g., S&M reps per \$M ACV, engineer per PM). Incorporate attrition, time-to-hire, and ramp. Output a monthly headcount plan, cost impact, capacity output (pipeline, story points), and a sensitivity to attrition and productivity assumptions.

71. Portfolio Allocation Model

Prompt: Act as a CFA charterholder advising a [AGE] year-old investor with [RISK_TOLERANCE] and [INVESTMENT_HORIZON]. Recommend a strategic asset allocation across US equity, international equity, bonds, REITs, commodities, and cash. Justify with mean-variance optimization or risk-parity rationale. Output the target allocation percentages, rebalancing rules, expected return and volatility, and tax-efficient placement by account type (taxable, 401k, Roth).

72. FIRE Retirement Plan

Prompt: Act as a CFP specializing in early retirement. Build a FIRE plan for someone earning [INCOME] saving [SAVINGS_RATE] with [EXPENSES] target. Compute FI number at 25x, project years to FI using safe withdrawal rate sensitivity (3%, 3.5%, 4%). Output a year-by-year projection, sequence-of-returns risk analysis via Monte Carlo, healthcare bridge strategy pre-65, and a one-page action plan.

73. Tax Loss Harvesting Strategy

Prompt: Act as a tax-aware portfolio manager. Design a tax loss harvesting workflow for [TAXABLE_ACCOUNT] with positions [HOLDINGS]. Identify loss candidates, wash sale rules, substitute securities, and tax alpha estimation. Output the harvest decision table, a Python screener for 30-day wash sale risk, expected tax savings at marginal rate [BRACKET], and documentation for IRS reporting.

74. Roth Conversion Ladder

Prompt: Act as a retirement tax planner. Design a Roth conversion ladder for a client with [TRAD_IRA_BALANCE] and [EXPECTED_INCOME] during early retirement years. Optimize conversion amounts to fill lower brackets without triggering IRMAA or ACA cliffs. Output a multi-year conversion schedule, projected tax paid, future RMD reduction, and trade-offs vs leaving pre-tax and using rule 72(t).

75. Real Estate Cash Flow Analysis

Prompt: Act as a real estate investor with 20 years of rental portfolio experience. Analyze [PROPERTY] at [PRICE] with [RENT], [EXPENSES], [FINANCING]. Compute cap rate, cash-on-cash, DSCR, IRR over 10-year hold, and NPV. Output the pro forma, sensitivity to vacancy and rent growth, a hold-vs-sell decision framework, and risks (concentration, liquidity, interest rate).

76. Dividend Growth Screen

Prompt: Act as a quality-dividend portfolio manager. Screen US equities for dividend growth champions with 10+ years of increases, payout ratio under 60 percent, FCF growth, and reasonable valuation (P/E under sector median). Output the Python screener using yfinance, a ranked shortlist, a portfolio construction rule limiting single-name and sector weight, and backtested dividend yield on cost vs SP500.

77. Bond Ladder Construction

Prompt: Act as a fixed income strategist. Build a 10-year Treasury bond ladder for [CAPITAL] with equal annual rungs, reinvesting maturities. Compute duration, yield to maturity, and interest rate risk. Output the ladder schedule, expected cash flow, a comparison vs bond fund (BND), tax considerations for Treasuries vs municipals, and a rebalance plan if rates move 100 bps.

78. Risk Parity Portfolio

Prompt: Act as a quantitative portfolio manager replicating All Weather. Build a risk parity portfolio across equities, long bonds, intermediate bonds, commodities, and gold. Compute volatility contributions and use inverse-vol weighting. Output the target weights, a Python notebook using PyPortfolioOpt, historical backtest stats (CAGR, vol, max drawdown, Sharpe), and a rebalance policy (threshold vs calendar).

79. 401k Optimization Guide

Prompt: Act as a fiduciary financial advisor. Review [401K_PLAN] offerings and recommend optimal contribution strategy for someone earning [INCOME] with [MATCH]. Prioritize match, HSA, Roth vs traditional decision based on current and expected bracket, and backdoor Roth if eligible. Output a contribution waterfall, fund selection within plan (low-cost index), and annual review checklist.

80. Crypto Allocation Framework

Prompt: Act as a digital assets portfolio strategist. Design a crypto sleeve within a traditional portfolio for [RISK_PROFILE] capping at [PERCENT]. Allocate across BTC, ETH, and a basket of large-caps, with rebalancing and custody considerations (cold storage, multi-sig). Output the allocation rationale, rebalance rules, tax lot accounting plan, and a risk disclosure covering volatility, regulatory, and custody risks.

81. Survey Design Fundamentals

Prompt: Act as a market research director with 15 years at Kantar. Design a customer satisfaction survey for [PRODUCT] targeting [SEGMENT]. Craft question order, balanced scales, avoid leading language, and include attention checks. Output the full questionnaire with item types (Likert, NPS, open-ended), routing logic, estimated completion time, and a pre-test plan with cognitive interviews.

82. Sample Size for Surveys

Prompt: Act as a survey statistician. Compute required sample size for a survey on [POPULATION] estimating [PROPORTION] within [MARGIN_OF_ERROR] at 95 percent confidence. Adjust for finite population, design effect from stratification, and expected response rate. Output the calculation, stratification plan by [STRATA], and a rationale for over-sampling certain groups to enable subgroup analysis.

83. NPS Analysis Deep Dive

Prompt: Act as a CX analytics lead. Analyze NPS data from [SURVEY] with verbatims. Compute score by segment, trend over [TIME], statistical significance of differences, and topic modeling of open-ended responses using BERTopic. Output a SQL/Python analysis, a driver analysis tying NPS to behavioral metrics, a cohort view, and prioritized CX improvements with expected NPS impact.

84. Conjoint Analysis Setup

Prompt: Act as a pricing research expert. Design a choice-based conjoint for [PRODUCT] with attributes [ATTRIBUTE_LIST] and levels. Determine number of tasks, efficient design, and sample size. Output the design matrix, hierarchical Bayes estimation plan, expected part-worths, simulator to predict share at new price points, and a presentation template for the pricing committee.

85. Focus Group Moderator Guide

Prompt: Act as a qualitative research lead. Draft a 90-minute moderator guide for a focus group on [TOPIC] with [N_PARTICIPANTS]. Include warm-up, projective exercises, stimulus reactions, and closing. Ensure balanced participation and probe for why behind what. Output the timed agenda, question bank, stimulus material notes, and a coding framework for post-session analysis.

86. Market Sizing TAM SAM SOM

Prompt: Act as a strategy consultant at McKinsey. Size the market for [PRODUCT] in [GEOGRAPHY] using top-down and bottom-up approaches. Define TAM, SAM, SOM with clear assumptions. Output the calculations in a structured markdown with sources cited, a sanity check via triangulation, sensitivity to penetration rate, and a slide-ready summary for a board deck.

87. Competitive Intelligence Framework

Prompt: Act as a competitive intelligence analyst at a tech giant. Build a competitor profile for [COMPETITOR] covering products, pricing, positioning, financials, headcount, hiring trends, patents, and public statements. Output a structured profile in markdown, data sources (SEC, LinkedIn, job boards, app review, SimilarWeb), a threat assessment scorecard, and recommended countermeasures.

88. Voice of Customer Synthesis

Prompt: Act as a VoC research lead analyzing [N] support tickets, reviews, and survey comments. Use topic modeling and sentiment analysis in Python (BERTopic, VADER) to extract themes. Triangulate with volume and severity. Output a prioritized pain point list, quote exemplars per theme, a Kano model classification (must-have, performer, delighter), and a roadmap input brief for PM.

89. Segmentation Analysis

Prompt: Act as a marketing scientist. Run behavioral segmentation on [CUSTOMER_DATA] using K-means or Gaussian mixture models. Select optimal k via elbow and silhouette. Profile each segment on demographics, behavior, and value. Output Python code, segment personas with names and descriptions, actionable targeting strategies, and a stability test across two time periods.

90. Pricing Research Report

Prompt: Act as a pricing strategist. Run a Van Westendorp price sensitivity meter for [PRODUCT] across [N_RESPONDENTS]. Derive the range of acceptable prices, optimal price point, and point of marginal cheapness/expensiveness. Output the analysis in Python, a visualization with all four curves, a recommendation with caveats, and a next-step plan using conjoint for triangulation.

91. Literature Review Protocol

Prompt: Act as a research librarian trained in PRISMA. Design a systematic literature review protocol on [RESEARCH_QUESTION]. Define inclusion/exclusion criteria, databases (PubMed, Scopus, Web of Science), search strings, screening process, and data extraction template. Output the protocol document, PRISMA flow diagram description, risk of bias tool (ROBIS or AMSTAR-2), and a timeline with milestones.

92. Citation Management Workflow

Prompt: Act as a PhD advisor onboarding a new student. Set up a Zotero-based citation workflow with browser connector, group library, tags, and BetterBibTeX for LaTeX integration. Output the setup steps, folder structure by project, naming conventions, note-taking template (summary, quotes, relevance), and backup strategy including sync and export to BibTeX.

93. Research Paper Outline

Prompt: Act as a journal editor at Nature. Draft a full outline for a research paper titled [TITLE] with sections Abstract, Introduction, Methods, Results, Discussion, Conclusion. For each section list key points, required figures/tables, and word count targets per journal guidelines. Output the annotated outline, a reviewer anticipation list, and a checklist against reporting standards (CONSORT, STROBE, PRISMA).

94. Methodology Selection

Prompt: Act as a research methods professor. For research question [QUESTION], recommend an appropriate methodology from quantitative (experiment, survey, secondary data), qualitative (ethnography, interviews, case study), or mixed methods. Justify based on epistemology, feasibility, and generalizability. Output a decision memo, a data collection plan, an analytical framework, and ethical considerations for IRB.

95. Meta-Analysis Forest Plot

Prompt: Act as a Cochrane reviewer. Perform a meta-analysis on [N_STUDIES] evaluating [INTERVENTION] on [OUTCOME]. Compute pooled effect size (Hedges g), 95 percent CI, heterogeneity (I^2 , τ^2), and publication bias (funnel plot, Egger's test). Output Python or R (metafor) code, a forest plot description, sensitivity analyses (leave-one-out), and a GRADE rating of evidence quality.

96. Qualitative Coding Scheme

Prompt: Act as a qualitative researcher trained in grounded theory. Develop a coding scheme for [N] interview transcripts on [TOPIC]. Describe open, axial, and selective coding passes. Use Atlas.ti or NVivo conventions. Output the initial codebook, inter-rater reliability plan (Cohen's kappa), examples of coded excerpts, and a theoretical memo template to surface emergent concepts.

97. Reproducible Research Setup

Prompt: Act as an open science advocate. Set up a reproducible research project for [STUDY] using Git, DVC for data, Quarto or R Markdown, pinned environments (renv, conda-lock), and preregistration on OSF. Output the repo folder structure, a README template, commit conventions, a CI workflow running analysis end-to-end, and a data sharing plan compliant with FAIR principles.

98. Peer Review Response

Prompt: Act as a tenured professor coaching a postdoc on responding to peer review for [MANUSCRIPT] with [REVIEWER_COMMENTS]. Draft a point-by-point response that is respectful, substantive, and tracks every change. Output the response letter structure, language templates for agree/disagree/clarify, a change summary table, and a cover letter to the editor highlighting major revisions.

99. Research Proposal Grant

Prompt: Act as a grant writer with a 50 percent NIH R01 success rate. Draft a 5-page specific aims and significance section for [RESEARCH_TOPIC] targeting [FUNDING_AGENCY]. Articulate gap, central hypothesis, three aims, innovation, and impact. Output the draft, a scoring rubric against agency criteria, a pitfalls-and-alternative-approaches section, and reviewer psychology tips (skimmable formatting, signposting).

100. Data Ethics Review

Prompt: Act as a research ethics board chair. Review [STUDY] for ethical considerations including informed consent, privacy, data minimization, vulnerable populations, dual use, and algorithmic bias. Apply Belmont Principles and GDPR/HIPAA where relevant. Output an IRB-style review memo, a risk mitigation plan, consent form template, and a monitoring plan for ongoing ethical oversight during data collection and analysis.

9 — Design, Branding & Visual Identity

100 Expert Prompts Inside

Brand identity systems · logo briefs · UX/UI wireframes · landing page CRO · mobile (HIG & Material) · Midjourney & DALL-E prompts · icon briefs · pitch decks · print design

1. Full Brand Identity System

Prompt: Act as a senior brand designer at a Pentagram-level studio with 12 years designing identity systems for Fortune 500 brands. Build a complete brand identity for [BRAND_NAME], a [INDUSTRY] company targeting [TARGET_USER] with a [BRAND_PERSONALITY] personality. Apply grid systems, golden ratio proportions, and WCAG AA color contrast. Output: brand positioning statement, logo concept rationale, primary + secondary color palette (hex + HSL), typography pairing with scale ratio, voice & tone guidelines, and three moodboard descriptors.

2. Brand Voice & Tone Guide

Prompt: Act as a brand strategist from Wolff Olins with deep copywriting DNA. Write a brand voice guide for [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY], targeting [TARGET_USER]. Define voice attributes (we are X, not Y), tone shifts across four contexts (marketing, product UI, support, crisis), signature words, banned words, and five before/after copy examples. Output: markdown document with headings, bullet lists, and a one-page cheat sheet at the end.

3. Typography Pairing System

Prompt: Act as a type designer trained at Reading University with 10 years specifying type systems for editorial and SaaS brands. Propose three typography pairings for [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY]. For each pairing specify display + body fonts (name + foundry), modular scale ratio (1.200, 1.250, 1.333), line-height, tracking, weights used, fallback stack, and rationale tied to brand personality. Output: table plus a recommended pairing with CSS @font-face snippet.

4. Color Palette With Accessibility

Prompt: Act as a color theorist grounded in Josef Albers and WCAG 2.2. Build a color system for [BRAND_NAME], [INDUSTRY], mood [BRAND_PERSONALITY]. Include 1 primary, 2 secondary, 3 accent, 2 neutrals, success/warning/error. Provide hex, HSL, and OKLCH, plus WCAG AA and AAA pass/fail against white, black, and primary. Describe usage rules, do/don'ts, and dark-mode variants. Output: markdown table plus a text-based swatch block.

5. Logo Concept Brief

Prompt: Act as a logo designer mentored by Michael Bierut. Write a creative brief for [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY], targeting [TARGET_USER]. Include objective, audience, competitive landscape (list 5 competitor marks and why they fail), three concept directions (wordmark, symbol+wordmark, monogram), construction grid notes, clear-space and min-size rules, and three rejected directions with reasoning. Output: structured brief in markdown.

6. Logo Critique Rubric

Prompt: Act as a design director running crit sessions at a top-10 branding agency. Critique my logo for [BRAND_NAME] using a 10-point rubric: distinctiveness, legibility at 16px, scalability, negative space, construction (golden ratio/grid), color independence (works in B&W), cultural/trademark risk, ownability, memorability after 5s, and alignment with [BRAND_PERSONALITY]. Score each 1-10 with rationale. Output: scorecard table, top 3 issues, and three concrete revision directions.

7. Monogram Logo Exploration

Prompt: Act as a lettering specialist inspired by Jessica Hische. Explore 8 monogram directions for initials [INITIALS] for [BRAND_NAME] in [INDUSTRY]. For each: describe construction (stacked, interlocked, ligature, negative-space, circular container), historical reference (Bauhaus, Art Deco, mid-century Swiss), ideal weight, and where it shines (app icon, embroidery, debossed). Output: numbered list with 2-3 sentence rationale each and one chosen direction with extended notes.

8. Wordmark Type Customization

Prompt: Act as a type customizer who ships wordmarks for Series-B SaaS brands. Given base typeface [TYPEFACE] for [BRAND_NAME], specify 6 custom modifications (optical adjustments, terminals, counters, ligatures, spacing) that make the wordmark ownable.

Explain each modification, why it reinforces [BRAND_PERSONALITY], and tradeoffs at small sizes. Output: numbered modifications, before/after description, and final glyph-by-glyph spec note.

9. Logo Animation Direction

Prompt: Act as a motion brand designer from BUCK. Design a 2-3 second logo reveal animation for [BRAND_NAME]. Specify easing (cubic-bezier values), stagger timing, anticipation/overshoot, sound pairing suggestion, and three interpretations (playful, confident, minimal). Include a frame-by-frame timeline (0ms, 200ms, 600ms, 1200ms) and After Effects expression hint for the primary motion. Output: timeline table plus implementation notes.

10. Brand Application Mockup Brief

Prompt: Act as an art director preparing a brand launch deck. List 12 mockup scenes to showcase [BRAND_NAME] identity: business card, letterhead, signage, app icon, social avatar, tote, packaging, vehicle livery, wayfinding, merch, uniform, environmental. For each specify camera angle, lighting (studio, golden hour, overhead), material, and one-sentence art direction. Output: numbered shot list in a table with columns Scene | Angle | Lighting | Material | Notes.

11. Wireframe For SaaS Dashboard

Prompt: Act as a product design lead at a top-tier B2B SaaS (Linear/Vercel caliber). Produce low-fidelity wireframe specs for a [INDUSTRY] dashboard where [TARGET_USER] needs to [PRIMARY_ACTION]. Apply 8pt grid, F-pattern scanning, and Hick's Law for nav count. Specify layout regions (sidebar 240px, topbar 56px, content max 1280px), primary components, empty states, and data density tradeoffs. Output: ASCII wireframe sketch plus component inventory table.

12. User Flow Diagram Spec

Prompt: Act as a UX architect trained in service design. Map the user flow for [TARGET_USER] to complete [PRIMARY_ACTION] on [PLATFORM] for [BRAND_NAME]. Include entry points, happy path, error branches, edge cases, and exit points. Annotate each step with UX law applied (Miller's 7 +/- 2, Peak-End, Aesthetic-Usability). Output: mermaid flowchart syntax plus a 5-row table mapping Step | Goal | UX Law | Friction | Fix.

13. Component Library Spec

Prompt: Act as a design system engineer from Shopify Polaris team. Spec a Button component for [BRAND_NAME] design system. Define variants (primary, secondary, tertiary, destructive, ghost), sizes (sm 32px, md 40px, lg 48px), states (default, hover, active, focus, disabled, loading), tokens (color, radius, shadow, spacing), and accessibility (focus ring, aria-label, keyboard). Output: JSON token definition plus Figma layer structure and code pseudo-snippet.

14. Accessibility Audit Checklist

Prompt: Act as an accessibility specialist certified in WCAG 2.2 AA/AAA. Audit [PLATFORM] for [BRAND_NAME] against a 25-point checklist covering color contrast, keyboard nav, focus indicators, ARIA, alt text, semantic HTML, reduced motion, target size (44x44), error messaging, form labels, and screen reader order. For each point: pass/fail heuristic and fix priority (P0-P2). Output: checklist table with Criterion | Test | Status | Fix | Priority.

15. Empty State Design Brief

Prompt: Act as a UX writer-designer hybrid from Intercom. Design 4 empty states for a [INDUSTRY] app where [TARGET_USER] is the user: first-time use, no results, error, no permission. Each must include headline (max 6 words), subcopy (max 14 words), primary action, illustration concept, and emotional tone. Apply Peak-End Rule and Von Restorff effect. Output: table plus one hero empty state fully fleshed out with Figma frame notes.

16. Dark Mode Conversion Guide

Prompt: Act as a UI engineer who shipped dark mode at a Fortune 500. Convert [BRAND_NAME] light theme to dark for [PLATFORM]. Define elevation layers (background, surface, overlay, modal) with hex values, avoid pure #000, desaturate primary colors, preserve WCAG AA contrast, handle brand color shift, and address shadow replacement with borders. Output: paired color token table (light/dark) plus 6 gotchas and solutions.

17. Landing Page Hero Spec

Prompt: Act as a conversion-focused landing page designer with 200+ shipped pages averaging 8% conversion. Design a hero section for [BRAND_NAME], an [INDUSTRY] product for [TARGET_USER] to [PRIMARY_ACTION]. Apply F-pattern, 5-second test, and

above-the-fold clarity. Specify headline (max 10 words, benefit-driven), subhead (20 words), primary CTA label, social proof element, and hero visual direction. Output: wireframe sketch plus 3 headline variants and rationale.

18. Landing Page Conversion Audit

Prompt: Act as a CRO designer trained by Unbounce and Peep Laja. Audit the landing page at [URL_OR_DESCRIPTION] for [BRAND_NAME] against 15 heuristics: clarity, value prop, CTA contrast, Fitts's Law, social proof placement, form friction, loading perf, mobile thumb zone, trust signals, urgency, objection handling, copy scannability, visual hierarchy, whitespace, consistency. Output: scored audit table plus top 5 fixes ranked by expected lift.

19. Pricing Page Design Spec

Prompt: Act as a SaaS pricing page designer who studied Stripe, Linear, and Notion layouts. Design a 3-tier pricing page for [BRAND_NAME] in [INDUSTRY]. Apply anchoring, decoy effect, and Hick's Law. Specify tier names, recommended tier highlight, feature comparison table structure, toggle (monthly/annual), FAQ placement, and objection-killing social proof. Output: wireframe plus copy for each tier (name, price, tagline, 5 bullets, CTA).

20. Mobile App Onboarding Flow

Prompt: Act as a product designer who shipped onboarding for a top-50 App Store app. Design a 4-screen onboarding for [BRAND_NAME] iOS app where [TARGET_USER] wants to [PRIMARY_ACTION]. Follow Apple HIG, progressive disclosure, and Zeigarnik effect. Each screen: illustration concept, headline (max 5 words), body (max 18 words), primary action, skip affordance. Include permission priming strategy. Output: screen-by-screen spec table plus copy variants.

21. iOS App Screen Spec Sheet

Prompt: Act as an iOS designer fluent in Apple HIG and SF Symbols. Spec a [SCREEN_TYPE] screen for [BRAND_NAME] app. Specify safe area (top 47pt, bottom 34pt), nav bar style, SF Symbol choices, dynamic type scaling, haptic feedback moments, dark mode tokens, and VoiceOver labels. Apply 44pt touch targets. Output: annotated spec list plus SwiftUI view pseudo-snippet with accessibilityLabel.

22. Material 3 Android Screen

Prompt: Act as a Google-certified Material 3 designer. Spec a [SCREEN_TYPE] screen for [BRAND_NAME] Android app for [TARGET_USER] to [PRIMARY_ACTION]. Apply Material 3 tokens (md.sys.color, elevation levels), dynamic color from wallpaper, FAB placement, app bar behavior, and target size 48dp. Include motion spec (standard easing, 300ms duration). Output: component list with Material tokens, spacing in dp, and a Jetpack Compose layer sketch.

23. Mobile Tab Bar Design

Prompt: Act as a mobile IA specialist. Design a 5-tab bar for [BRAND_NAME] app in [INDUSTRY]. Apply Hick's Law and thumb-zone heatmap. Name each tab (max 8 characters), select icon style (filled vs outlined for selected state), justify each tab against jobs-to-be-done for [TARGET_USER], and flag any removed candidates. Output: tab list with Label | Icon | JTBD | Thumb-zone priority plus alternate 4-tab variant.

24. Midjourney Product Photo Prompt

Prompt: Act as a Midjourney prompt engineer specializing in commercial product photography. Write a v6 prompt for a product photo of [PRODUCT] for [BRAND_NAME], mood [BRAND_PERSONALITY]. Specify subject, material, surface, lighting (softbox, rim light, hard shadow), camera (85mm macro, f/2.8), background, color palette, composition, and style references. End with `-ar 4:5 -style raw -v 6` parameters. Output: final prompt plus 2 variations.

25. DALL-E Illustration Prompt

Prompt: Act as an illustration art director with DALL-E 3 expertise. Write a prompt to generate a hero illustration for [BRAND_NAME] landing page depicting [CONCEPT]. Specify art style (flat, isometric, editorial, risograph), color palette with hex codes, composition rule (rule of thirds, centered), character style, texture, and mood. Avoid photorealism unless needed. Output: 3-sentence prompt plus 2 style variations and a negative prompt list.

26. Stable Diffusion Brand Photography

Prompt: Act as a Stable Diffusion XL prompt engineer shooting brand photography. Write a prompt + negative prompt for [BRAND_NAME], [INDUSTRY], scene: [SCENE_DESCRIPTION]. Specify checkpoint recommendation, sampler (DPM++ 2M

Karras), steps, CFG, seed strategy, LoRA suggestions, and camera/lens. Match mood to [BRAND_PERSONALITY]. Output: prompt block, negative prompt block, and settings table (sampler/steps/CFG/ratio).

27. Midjourney Character Design

Prompt: Act as a character designer working with Midjourney for brand mascots. Write a prompt for a mascot for [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY]. Specify species/form, silhouette, outfit, expression, pose turnaround (front, 3/4, side), color palette, line weight, and influences (Pixar, Cartoon Network, Ghibli, vintage mascot). Output: full Midjourney v6 prompt with `-ar 1:1 -style raw` and two alternate mood variants.

28. AI Moodboard Generation Prompt

Prompt: Act as a brand designer building a moodboard in Midjourney. Write 6 prompts forming a cohesive moodboard for [BRAND_NAME], [INDUSTRY], personality [BRAND_PERSONALITY]. Each prompt targets one moodboard tile: hero texture, color story, typography feel, human moment, product detail, environment. Keep stylistic coherence via shared color + lighting. Output: 6 numbered prompts with `-ar 1:1 -v 6` and a one-line note on what each tile communicates.

29. AI Pattern & Texture Prompt

Prompt: Act as a surface pattern designer using Midjourney. Write prompts for 4 seamless patterns for [BRAND_NAME] packaging/apparel, tied to [BRAND_PERSONALITY]. Specify motif, scale, repeat logic, color palette, printing method (risograph, foil, screen print), and reference (William Morris, Memphis, Bauhaus). Add `-tile -ar 1:1 -v 6`. Output: 4 prompts with style notes and a primary pattern recommendation.

30. Illustration Style Guide

Prompt: Act as an illustration director shaping a proprietary illustration style for [BRAND_NAME] in [INDUSTRY]. Define style DNA in 6 rules (line weight, shape language, color palette, shading technique, character proportions, composition). Provide do/don't examples in prose. Include a spec for 3 illustration types: spot, hero, empty-state. Output: rules list plus spec table with Type | Size | Usage | Complexity.

31. Icon System Spec

Prompt: Act as an icon designer behind a top design system (Phosphor/Lucide caliber). Spec an icon system for [BRAND_NAME]: grid (24x24), stroke width (1.5px or 2px), corner radius (2px), terminals (rounded/square), optical balance rules, and pixel-snapping. Define 4 states (regular, bold, fill, duotone). Output: spec sheet plus sample icon descriptions for home, search, settings, notification, user — each with construction notes.

32. Custom Icon Brief

Prompt: Act as a senior icon designer. Design 10 custom icons for [BRAND_NAME] in [INDUSTRY] for actions: [ACTION_LIST]. Each icon must follow the system grid 24x24, 2px stroke, and convey meaning in under 300ms (pre-attentive). For each icon describe metaphor, construction notes, potential confusion risk, and cultural considerations. Output: table with Icon name | Metaphor | Construction | Risk | Alternate.

33. Pitch Deck Visual System

Prompt: Act as a presentation designer at a top Sand Hill Road VC shop. Design a visual system for [BRAND_NAME] seed pitch deck, [INDUSTRY], audience top-tier VCs. Specify 16:9 master grid, safe margins, type scale (title 48/subtitle 24/body 18), color palette (3 colors), chart style, icon treatment, and slide templates (title, problem, solution, market, traction, team, ask). Output: system spec plus storyboard list of 12 slides.

34. Keynote Slide Redesign

Prompt: Act as a slide doctor who rescues exec decks. Redesign a slide titled “[SLIDE_TITLE]” for [BRAND_NAME] in [INDUSTRY]. Apply Assertion-Evidence structure, Tufte data-ink ratio, 6x6 rule, and visual hierarchy via contrast + scale. Describe layout (left/right split, z-pattern), typography, chart or visual, and takeaway at bottom. Output: before/after description plus a text-based layout sketch and speaker-note hint.

35. Data Visualization Design

Prompt: Act as a data viz designer trained by Edward Tufte and Giorgia Lupi. Design a chart to show [DATA_STORY] for [BRAND_NAME]. Pick chart type justified by data shape (trend, comparison, composition, distribution, relationship), apply pre-attentive attributes, remove chartjunk, and include annotation strategy and color for colorblind users. Output: chart spec (type, axes, colors, annotations) plus the single-sentence takeaway title.

36. Book Cover Design Brief

Prompt: Act as a book cover designer at Penguin Random House with 15 years on bestsellers. Design a cover for “[BOOK_TITLE]” by [AUTHOR], genre [GENRE], target reader [TARGET_USER]. Reference 3 category leaders, propose 3 distinct directions (type-driven, photographic, illustrated), specify trim size, spine treatment, back cover layout, and finish (matte, foil, deboss). Output: 3 direction descriptions plus recommended direction with full spec.

37. Packaging Design Concept

Prompt: Act as a packaging designer from Turner Duckworth. Concept packaging for [PRODUCT] from [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY]. Specify structure (carton, pouch, bottle), material, print method, dieline notes, front panel hierarchy (brand, product name, descriptor, size, imagery), back panel, unboxing moment, and sustainability angle. Output: concept brief plus front/back panel text-based layout sketch.

38. Poster Design Direction

Prompt: Act as a Swiss-school poster designer influenced by Josef Muller-Brockmann. Design a poster for [EVENT/CAMPAIGN] for [BRAND_NAME]. Use a 12-column grid, asymmetric balance, scale contrast, and one hero element. Specify format (A2, 594x420mm), typography (one family, 3 weights), color (2 colors max), and printing method. Output: layout description with grid coordinates plus typographic hierarchy spec.

39. Business Card System

Prompt: Act as a stationery designer. Design a business card system for [BRAND_NAME], personality [BRAND_PERSONALITY]. Specify dimensions (85x55mm), paper (GSM, texture, color), printing (letterpress, foil, thermography), front/back layout, typographic hierarchy (name, role, contact), QR placement, and 3 variants per role. Output: layout spec plus paper/printing recommendation with rationale tied to brand.

40. Merchandise Design Brief

Prompt: Act as a merch director for a design-forward brand. Plan a capsule merch drop of 6 items for [BRAND_NAME] targeting [TARGET_USER]. Items should span apparel, accessory, print, and utility. For each: item, material, print method (screen, embroidery, DTG), placement, colorway, SRP, and brand alignment score. Output: table with Item | Material | Print | Placement | Colorway | SRP plus launch story in 2 sentences.

41. Signage & Wayfinding System

Prompt: Act as an environmental graphic designer who shipped wayfinding for airports and campuses. Design a signage system for [LOCATION_TYPE] for [BRAND_NAME]. Apply pictogram standards, viewing distance typography (1in per 25ft), contrast ratios, materiality, and mounting heights. Spec primary, directional, identification, regulatory, and information signs. Output: sign inventory table with Type | Size | Material | Mount | Copy.

42. Figma File Structure Spec

Prompt: Act as a Figma ops lead at a design team of 30. Define a scalable file structure for [BRAND_NAME] design team in [INDUSTRY]. Specify team organization, project naming, file naming (semver), page structure (Cover, Changelog, Explorations, Final, Archive), component library split, variable collections, and handoff conventions. Output: folder tree plus naming convention table and a 5-rule governance cheat sheet.

43. Design Token Architecture

Prompt: Act as a design systems engineer fluent in Style Dictionary and DTCG tokens. Architect a 3-tier token system (primitive, semantic, component) for [BRAND_NAME]. Include color, spacing, radius, shadow, typography, and motion. Show naming (color.brand.500, spacing.md, radius.lg) and cross-platform transforms (CSS, iOS, Android). Output: JSON token schema plus naming rules and 3 worked examples.

44. Handoff Documentation Template

Prompt: Act as a design-to-dev handoff specialist. Write a handoff doc template for [FEATURE] for [BRAND_NAME] on [PLATFORM]. Include overview, user story, acceptance criteria, screens list, interaction states, edge cases, accessibility notes, analytics events, copy sheet, asset export list, and open questions. Output: markdown template with filled placeholder example and a PR checklist block at the end.

45. Design Critique Framework

Prompt: Act as a design director running weekly crits. Write a crit framework for reviewing [ARTIFACT_TYPE] for [BRAND_NAME]. Structure: context (2 min), walkthrough (5 min), clarifying questions (3 min), feedback rounds (10 min) using “I like / I wish / What if”, director synthesis (5 min). Include 10 feedback questions grounded in UX laws. Output: agenda table plus 10 questions and three anti-patterns to avoid.

46. Portfolio Case Study Template

Prompt: Act as a portfolio reviewer at Google Material. Write a case study template for [DESIGNER_ROLE] applying to senior roles. Sections: context, role, problem, constraints, research, process, key decisions (with tradeoffs), final design, measured outcomes, learnings, credits. Add guidance for length, image captions, and storytelling hooks. Output: annotated template plus a filled micro-example for a [FEATURE] project.

47. Personal Brand Identity

Prompt: Act as a personal branding consultant for creatives. Build a personal brand system for [YOUR_NAME], a [ROLE] in [INDUSTRY], personality [BRAND_PERSONALITY]. Deliver: positioning statement (I help X do Y by Z), 3 brand adjectives, monogram concept, color palette (3 colors), typography pairing, bio template (140, 280, 500 chars), and 5 signature content themes. Output: one-page brand doc.

48. Brand Architecture Map

Prompt: Act as a brand strategist from Interbrand. Map brand architecture for [PARENT_BRAND] with sub-brands [SUB_BRANDS]. Choose model (monolithic, endorsed, hybrid, house of brands), justify with pros/cons, define naming conventions, visual relationship (shared vs distinct identity), and migration roadmap. Output: architecture diagram description, decision matrix, and rollout plan in 3 phases.

49. Naming Exploration

Prompt: Act as a brand namer behind 20+ shipped company names. Generate 30 name candidates for [COMPANY_DESCRIPTION] in [INDUSTRY], personality [BRAND_PERSONALITY]. Split across 5 buckets: descriptive, suggestive, experiential, evocative, invented. For each name note pronunciation, etymology, domain likelihood, trademark risk (low/med/high), and emotional hook. Output: table with 30 rows plus top 5 recommended with rationale.

50. Tagline Generator

Prompt: Act as a copywriter with Ogilvy lineage. Write 15 tagline options for [BRAND_NAME] in [INDUSTRY] targeting [TARGET_USER], mood [BRAND_PERSONALITY]. Mix styles: benefit, imperative, witty, metaphorical, minimal. Keep under 7 words each. For each tagline note angle and memorability score (1-10). Output: table with Tagline | Angle | Score | Notes plus top 3 recommended with rationale.

51. Social Media Template Kit

Prompt: Act as a social content designer for a brand shipping 200 posts/month. Design a template kit for [BRAND_NAME] on [PLATFORM]. Include 6 templates: quote, stat, announcement, carousel cover, carousel body, testimonial. Spec aspect ratio, grid, type scale, color roles, safe zones, and brand-lock placement. Output: template list with dimensions and a text-based layout sketch for each plus Figma variable suggestions.

52. Instagram Grid Layout

Prompt: Act as an Instagram grid designer who ships brand feeds. Design a 9-post rolling grid plan for [BRAND_NAME] with content pillars [PILLARS]. Specify grid pattern (checkerboard, row, column, mosaic), color rhythm, content type rotation, and aesthetic glue. Apply gestalt similarity/proximity. Output: 3x3 grid text sketch labeling each tile with content type and color note plus a monthly rotation rule.

53. Email Template Design

Prompt: Act as an email designer fluent in bulletproof email HTML and dark-mode quirks. Design a responsive email template for [BRAND_NAME] for [EMAIL_TYPE] (welcome, newsletter, promo, transactional). Specify 600px width, single column mobile, hero, body modules, CTA, footer with unsubscribe. Apply WCAG AA contrast and alt text. Output: module list with dimensions plus inline-style snippet hints and subject-line formula.

54. App Icon Design Brief

Prompt: Act as an app icon designer whose icons sit on home screens of top-100 apps. Design an app icon for [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY]. Follow iOS 1024x1024 rules and Android adaptive icon foreground/background. Propose 3 directions (monogram, symbol, pictorial), specify color, shadow/gradient use, corner radius behavior, and test at 60x60. Output: 3 concepts plus recommended direction with spec.

55. Favicon & Browser Icon Set

Prompt: Act as a web identity specialist. Design a favicon system for [BRAND_NAME]. Provide sizes (16, 32, 48, 180 apple-touch, 192, 512, maskable 512), SVG source rule, dark/light scheme with prefers-color-scheme, manifest.webmanifest spec, and Safari pinned-tab monochrome version. Output: asset inventory table plus HTML head snippet pseudo-code and a 3-rule optical-adjustment note.

56. Error & 404 Page Design

Prompt: Act as a UX designer known for delightful error states. Design a 404 page for [BRAND_NAME] in [INDUSTRY]. Include headline with brand voice, apology tone, recovery actions (search, home, popular links), illustration concept, and personality moment. Apply Peak-End Rule and preserve trust. Output: layout sketch plus headline options (3 tones), body copy, and illustration prompt for Midjourney.

57. Brand Guidelines Document

Prompt: Act as a brand guidelines author trained at &Walsh. Write a guidelines outline for [BRAND_NAME] covering: story, logo rules, color, typography, imagery, iconography, voice, motion, layout, applications, do/don'ts. For each section note 3 must-include subsections. Apply "show, don't tell" principle. Output: full outline as a table of contents with page estimates and 5 opinion-rules the guide should enforce.

58. Rebrand Rollout Plan

Prompt: Act as a brand rollout PM who shipped 3 public rebrands. Plan a 90-day rollout for [BRAND_NAME] rebrand across digital, print, physical, and internal touchpoints. Define phases (pre-launch, launch day, post-launch), owner matrix (RACI), risk log, and internal comms plan. Apply change management principles. Output: Gantt-style timeline table plus RACI plus top 5 risks with mitigation.

59. Competitive Visual Audit

Prompt: Act as a brand strategist running a visual audit. Audit 5 competitors of [BRAND_NAME] in [INDUSTRY]: [COMPETITOR_LIST]. For each capture logo style, color palette, typography, photography, tone, and distinctive device. Plot them on a 2x2 matrix (traditional/modern x serious/playful). Output: audit table with columns Brand | Logo | Color | Type | Photo | Device | Quadrant plus a whitespace recommendation for [BRAND_NAME].

60. Category Design Direction

Prompt: Act as a category designer a la Play Bigger. Define a category position for [BRAND_NAME] in [INDUSTRY]. Name the category, describe the problem it names, the villain it opposes, the POV, and the visual language that signals the category. Output: category brief plus 3 visual language cues (color, type, imagery) that break from [INDUSTRY] norms and a one-sentence manifesto.

61. Typographic Hierarchy Scale

Prompt: Act as a type system designer. Define a 7-step typographic scale for [BRAND_NAME] on [PLATFORM]. Choose ratio (1.125, 1.200, 1.250, 1.333, golden), base size (16px web / 17pt iOS / 14sp Android). Define display, h1-h4, body, small, caption with size, line-height, weight, tracking, and usage example. Output: scale table plus CSS variable block pseudo-code and accessibility note for min readable size.

62. Grid System Spec

Prompt: Act as a grid-discipline designer trained in Swiss typographic tradition. Spec a responsive grid for [BRAND_NAME] on [PLATFORM]: columns (4/8/12), gutters, margins, container max-width, and breakpoints (sm 640, md 768, lg 1024, xl 1280). Define row rhythm (8pt baseline) and alignment rules. Output: grid table per breakpoint plus a 1-paragraph philosophy note on why this grid fits [BRAND_PERSONALITY].

63. Motion Design Principles

Prompt: Act as a motion designer from Google Material motion team. Define motion principles for [BRAND_NAME] in [PLATFORM] covering easing curves (standard, decelerate, accelerate, sharp), durations (100ms micro, 200ms small, 300ms medium, 500ms large), choreography (stagger, parent/child), and meaning (cause/effect, hierarchy, state). Output: principles doc plus a tokens table with Easing | Duration | Use case.

64. Microinteraction Spec

Prompt: Act as a UX engineer specializing in microinteractions a la Dan Saffer. Spec a microinteraction for [TRIGGER] in [BRAND_NAME] app. Define trigger, rules, feedback (visual, audio, haptic), loops/modes, and failure state. Apply Aesthetic-Usability and Peak-End. Specify animation timing and easing. Output: spec in Saffer's 4-part structure plus a 5-frame timeline and code pseudo-snippet.

65. UX Writing Microcopy

Prompt: Act as a UX writer from MailChimp's content design team. Write microcopy for [FLOW] in [BRAND_NAME] app. Cover 10 moments: empty state, loading, success, error, confirmation, onboarding tip, permission request, paywall, logout, undo. Apply voice [BRAND_PERSONALITY], max 8 words per string, plain language. Output: table with Moment | Copy | Rationale plus 2 alternate variants for top 3 moments.

66. Design QA Checklist

Prompt: Act as a design QA lead reviewing a shipped build of [BRAND_NAME] on [PLATFORM]. Write a 30-point checklist covering spacing, alignment, type fidelity, color, iconography, copy, states, empty/error/loading, accessibility, motion, responsiveness, and edge content (long names, RTL, zero data). For each: what to check and how. Output: checklist table with Area | Check | Severity | Fix.

67. Figma Auto Layout Recipe

Prompt: Act as a Figma power user teaching auto-layout mastery. Write a recipe to build a responsive [COMPONENT] in Figma using auto-layout, variants, and component properties. Specify direction, spacing, padding, resize rules (hug/fill/fixed), and min/max. Include variant matrix (state x size x style). Output: step-by-step recipe plus variant matrix table and 3 common pitfalls.

68. Design System Versioning

Prompt: Act as a design system maintainer adopting semver for components. Define versioning rules for [BRAND_NAME] design system: what counts as major (breaking), minor (additive), patch (fix). Include deprecation policy (warn, sunset, remove), changelog format, migration guides, and release cadence. Output: policy doc plus changelog template and a sample v2.0.0 release note for a Button update.

69. Style Guide Cheat Sheet

Prompt: Act as a design ops lead turning a 200-page guideline into a 1-page cheat sheet for [BRAND_NAME]. Include logo clear space, primary color, primary + secondary type, body text rules, headline rules, photography mood, voice snippet, and don'ts. Optimize for glanceability. Output: cheat sheet text layout with sections labeled and a 5-second test rationale.

70. Brand Photography Direction

Prompt: Act as a photography art director shooting brand campaigns for magazines. Direct a photo shoot for [BRAND_NAME] in [INDUSTRY]. Specify mood (color, lighting, energy), location type, subjects, wardrobe, props, lens (35mm, 50mm, 85mm), camera settings, shot list (10 shots), and 3 reference photographers. Output: brief plus shot list table with Shot | Subject | Lens | Lighting | Notes.

71. Illustration Brief For Hero

Prompt: Act as an illustration director commissioning a hero illustration for [BRAND_NAME] landing page. Write a brief: concept, metaphor, audience, usage context, dimensions (3200x1800), color palette tied to brand, style references (3 illustrators), do/don'ts, and delivery format (SVG, PNG). Output: complete brief plus a 1-sentence alt-text example and 3 Midjourney prompts that match the direction.

72. Infographic Design Direction

Prompt: Act as an information designer inspired by David McCandless. Design an infographic explaining [CONCEPT] for [BRAND_NAME]. Define structure (story arc), visual metaphors, data sources, chart mix, typography, color, and footnote rules. Apply Tufte small multiples where useful. Output: wireframe description with section flow plus a takeaway headline for each section.

73. Presentation Template System

Prompt: Act as a Keynote/Figma slide systems designer. Build a 20-slide template kit for [BRAND_NAME] to use internally. Slides: cover, agenda, section divider, 2 bullets variants, 2-column, quote, big number, chart, image full, image+text, team, timeline, table, thanks. Each slide: layout note, type hierarchy, and spacing. Output: slide inventory table plus a file naming convention for the deck.

74. Webflow Landing Page Spec

Prompt: Act as a Webflow designer who ships 5-section landing pages for startups. Design a landing page spec for [BRAND_NAME] for [PRIMARY_ACTION]. Sections: hero, logo bar, feature 3-up, testimonial, pricing, FAQ, CTA, footer. For each: layout, copy length, interactions, breakpoint behavior. Apply F-pattern and progressive disclosure. Output: section-by-section spec table plus a CMS collection plan.

75. Conversion Audit For SaaS

Prompt: Act as a CRO lead who shipped 40+ experiments at B2B SaaS. Audit [BRAND_NAME] signup funnel from landing to activated. Identify drop-off risks at each step using heuristic eval and Fogg's B=MAT. Prioritize 10 fixes by ICE (Impact, Confidence, Ease). Output: funnel table with Step | Risk | Fix | ICE plus top 3 experiments with hypothesis and metric.

76. Hero Image Midjourney Prompt

Prompt: Act as a Midjourney art director generating hero images for SaaS landing pages. Write a prompt for [BRAND_NAME] hero image depicting [CONCEPT]. Specify style (editorial, abstract, 3D render, photography), lighting (cinematic, soft window, studio), color palette, composition, subject. Include negative terms to avoid generic AI look. Output: final prompt with --ar 16:9 --style raw --v 6 plus 2 alternates.

77. Abstract 3D Render Prompt

Prompt: Act as a 3D artist using Midjourney for brand imagery. Write a prompt for an abstract 3D render for [BRAND_NAME] conveying [BRAND_PERSONALITY]. Specify material (glass, chrome, soft matte, liquid), lighting (HDRI, rim, volumetric), shapes (organic blobs, hard surface, geometric), color palette, and renderer reference (Octane, Redshift, Blender cycles). Output: prompt with --ar 16:9 --v 6 plus 3 variations (cool, warm, neutral).

78. Editorial Layout Design

Prompt: Act as an editorial designer from Bloomberg Businessweek. Design a feature article layout for [BRAND_NAME] publication, topic [TOPIC]. Apply 12-column grid, pull quotes, drop caps, sidebars, caption rules, and photo grid. Specify type pairing, baseline grid, and reading rhythm. Output: page-by-page wireframe description for 6 spreads plus a style rules cheat sheet.

79. Annual Report Design Direction

Prompt: Act as an annual report designer for a listed company. Direct an annual report for [BRAND_NAME] FY[YEAR], theme [THEME]. Define cover concept, section structure (letter, highlights, strategy, financials), data viz style, photography treatment, infographic approach, and print spec (cover stock, body stock, binding). Output: section outline plus a 2-paragraph concept pitch and photography brief.

80. Swag & Print Collateral Kit

Prompt: Act as a producer sourcing print and swag for a brand launch. Plan a launch collateral kit for [BRAND_NAME] with 10 items: letterhead, envelope, business card, notebook, sticker sheet, tote, tee, mug, poster, lanyard. For each specify size, material, print method, MOQ, SRP, and lead time. Output: table with Item | Spec | Method | MOQ | SRP | Lead.

81. Portfolio Review Critique

Prompt: Act as a design hiring manager at a FAANG design team. Review a portfolio for [DESIGNER_ROLE] level [LEVEL]. Score 6 dimensions: craft, problem framing, process, decisions, outcomes, storytelling (1-5 each). Flag 3 strengths and 3 gaps. Suggest specific improvements tied to role expectations. Output: scorecard table plus 5 actionable fixes ranked by expected interview lift.

82. Design Career Narrative

Prompt: Act as a design career coach who placed 50+ designers at top SaaS. Help [DESIGNER_NAME] craft a career narrative for [TARGET_ROLE]. Define their superpower, 3 story arcs (problem, process, outcome), evidence bank, and 2 elevator pitches (30s, 90s). Tie to [TARGET_COMPANY] values. Output: narrative one-pager plus 3 interview answers to “Tell me about yourself” in escalating depth.

83. Client Discovery Questions

Prompt: Act as a brand strategist running a discovery workshop. Write 25 discovery questions to ask [CLIENT_NAME] before designing their brand in [INDUSTRY]. Cover business model, audience, competitors, personality, legacy, taboos, metrics. Prioritize questions that surface tension. Output: 25 numbered questions grouped into 5 themes plus a 90-minute workshop agenda.

84. Design Sprint Plan

Prompt: Act as a GV Design Sprint facilitator. Plan a 5-day sprint for [BRAND_NAME] to solve [CHALLENGE] for [TARGET_USER]. Define goal, sprint questions, long-term goal, participants, daily agenda (Understand, Sketch, Decide, Prototype, Test), decider, and success metrics. Output: day-by-day agenda table plus a pre-sprint checklist and a post-sprint next-steps list.

85. Usability Test Script

Prompt: Act as a UX researcher running moderated usability tests. Write a test script for [PROTOTYPE] for [BRAND_NAME], targeting [TARGET_USER] performing [PRIMARY_ACTION]. Include intro, warm-up, 4 tasks with success criteria, probing questions, SUS survey, and wrap-up. Apply think-aloud protocol. Output: 45-minute script timeline plus task observation sheet template.

86. A/B Test Design Variant

Prompt: Act as a conversion designer running A/B tests. Design a variant B for [PAGE] of [BRAND_NAME] to test against control. State hypothesis (If X then Y because Z), change one major variable, predict lift, define primary metric, sample size heuristic, and risks. Output: hypothesis block plus variant spec sketch and success/fail decision rules.

87. Landing Page Copy Direction

Prompt: Act as a landing page copywriter in the Joanna Wiebe lineage. Write copy for [BRAND_NAME] landing page hero (headline, subhead, CTA), feature section (3 features), and social proof. Use the PAS or Jobs-to-be-Done framework. Match [BRAND_PERSONALITY] voice. Output: structured copy doc plus 3 alternate headlines with angle notes (benefit, emotional, contrarian).

88. Pitch Deck Storyboard

Prompt: Act as a pitch deck storyteller trained by Reid Hoffman and Sequoia. Storyboard a 12-slide seed deck for [BRAND_NAME] in [INDUSTRY] raising [AMOUNT]. Slides: title, mission, problem, why now, solution, demo, market, business model, traction, team, ask, vision. For each slide write the single takeaway sentence. Output: slide-by-slide storyboard table plus a 60-second verbal pitch script.

89. Brand Audit Scorecard

Prompt: Act as a brand auditor from a top consultancy. Audit [BRAND_NAME] across 10 dimensions: clarity, distinctiveness, consistency, emotional resonance, relevance, internal alignment, digital presence, messaging, visual system, employee advocacy. Score each 1-10 with evidence. Output: scorecard table plus a SWOT plus top 5 interventions ranked by impact/effort.

90. Visual Identity Moodboard

Prompt: Act as a brand designer building a moodboard deck for [BRAND_NAME] in [INDUSTRY], personality [BRAND_PERSONALITY]. Describe 12 moodboard tiles covering color, texture, type, photo, graphic, human moment, environment, object, pattern, light, motion, sound. Pull cohesive references (not random Pinterest). Output: tile list with Tile | Reference style | Role in story plus a 2-sentence moodboard narrative.

91. Wayfinding Pictogram Set

Prompt: Act as a pictogram designer influenced by Otl Aicher (1972 Munich Olympics). Design 12 pictograms for [LOCATION_TYPE] for [BRAND_NAME]: entrance, exit, restroom, info, cafe, elevator, stairs, parking, wifi, accessible, emergency, lost-and-found. Use 24pt grid, 2px stroke, universal metaphors. Output: list with each pictogram's construction notes and a consistency rule sheet.

92. Tradeshow Booth Design

Prompt: Act as an experiential designer who built booths for SaaStr and CES. Design a 10x20 booth for [BRAND_NAME] in [INDUSTRY]. Define booth goal, brand statement wall, product demo zone, lounge, capture moment (photo op), wayfinding, lighting, signage, and swag station. Apply AIDA. Output: layout sketch plus staff script and 3 lead-capture experiments.

93. Photography Retouching Brief

Prompt: Act as a retoucher for editorial and product. Write a retouching brief for [PHOTO_SET] for [BRAND_NAME]. Specify skin treatment rules, color grading look, contrast curve, grain, vignette, crop rules, and style reference (3 photographers). Include do/don'ts and dodge/burn guidance. Output: brief plus a LUT/preset spec description and a before/after checkpoint list.

94. AI Upscale & Cleanup Prompt

Prompt: Act as a photo editor using AI tools (Topaz, Adobe Firefly, Photoshop Generative Fill). Write an editing plan for [PHOTO] for [BRAND_NAME]: upscale target resolution, noise reduction, cleanup targets, background extension, color matching to brand palette, and consistency across set. Output: step-by-step plan plus a prompt for Generative Fill and a QA checklist.

95. Product UI Empty State Illustration

Prompt: Act as a product illustrator building empty-state art for [BRAND_NAME] app. Brief 5 empty-state illustrations: no messages, no notifications, no search results, no team members, no data yet. For each: metaphor, composition, palette (brand-tied), character usage, and emotional tone. Output: brief table plus one Midjourney prompt per illustration matching the established style.

96. Design Mentorship 1:1 Agenda

Prompt: Act as a design mentor to junior designers at a growing SaaS. Write a 30-minute 1:1 agenda for [MENTEE_NAME] focused on [TOPIC]. Include check-in, wins, blockers, work review, learning topic, homework, and followups. Provide 5 reflection questions grounded in growth mindset. Output: agenda timetable plus 5 questions and a template for mentee prep notes.

97. Design Leadership North Star

Prompt: Act as a head of design at a 300-person SaaS. Write a design team north star for [BRAND_NAME] covering mission, values, 3 yearly goals, rituals (crit, research readouts, demos), hiring bar, and operating principles. Tie to [BUSINESS_GOAL]. Output: one-page doc plus a quarterly OKR template and a 5-rule operating principles list.

98. Style Exploration With AI

Prompt: Act as a creative director using Midjourney to explore brand style for [BRAND_NAME] in [INDUSTRY]. Generate 6 divergent style directions via prompts: minimal, maximal, editorial, retro, futurist, hand-crafted. For each write a full Midjourney v6 prompt and a 1-sentence rationale tied to [BRAND_PERSONALITY]. Output: 6 prompts plus a decision matrix scoring fit, distinctiveness, scalability.

99. Design Hiring Rubric

Prompt: Act as a design hiring manager at a Series-C startup. Write a hiring rubric for [DESIGN_ROLE] across 6 competencies: craft, product thinking, collaboration, communication, leadership, growth. Define 4 levels (IC3, IC4, IC5, IC6) with behavioral indicators per level. Output: rubric matrix (6 competencies x 4 levels) plus 3 sample interview questions per competency and a calibration rule.

100. Design Retrospective Facilitation

Prompt: Act as an agile design coach facilitating a quarterly retro for [BRAND_NAME] design team. Plan a 90-minute retro: safety check, timeline recap, What Went Well / What Didn't / Ideas / Actions, dot voting, and commitments. Apply Prime Directive. Output: minute-by-minute agenda plus 10 prompt questions, a template for action items (owner, due, metric), and 3 facilitation anti-patterns to avoid.

10 — Career, Coaching & Learning

100 Expert Prompts Inside

ATS-optimized resumes · LinkedIn profiles · behavioral & case interviews · salary negotiation · career pivots · executive coaching · performance reviews · learning roadmaps

1. ATS-Optimized Resume Rewrite

Prompt: Act as a senior tech recruiter who has screened 20,000+ resumes at FAANG companies and built ATS parsing systems. Rewrite my resume for a [TARGET_ROLE] at [TARGET_COMPANY] in [INDUSTRY]. Use my current draft: [PASTE_RESUME]. Apply the XYZ formula (Accomplished X as measured by Y by doing Z), inject role-specific keywords from this JD [PASTE_JD], keep bullets under 2 lines, and quantify every bullet. Output: ATS-ready resume in plain markdown plus a 10-point keyword match score versus the JD.

2. Resume Bullet Quantifier

Prompt: Act as a resume strategist who has priced and shipped 3,000+ resumes for \$100K+ roles. Given my raw bullet [BULLET_TEXT] for [CURRENT_ROLE] with [YEARS_EXPERIENCE] years in [INDUSTRY], rewrite it three ways using the CAR (Challenge-Action-Result) framework. Each version must include a quantified business impact (dollars saved, % growth, time reduced, users affected). Output: a table with Version | Bullet | Metric Used | Strength Score (1-10) | Why.

3. Career Gap Explanation

Prompt: Act as an executive career coach who has placed 200+ clients returning from career breaks. I have a [DURATION] gap from [START_DATE] to [END_DATE] due to [REASON]. My target role is [TARGET_ROLE]. Draft three 2-sentence gap explanations: one for the resume summary, one for cover letter, one for interview “walk me through your resume” question. Reframe the gap as an asset using the “skills transfer” lens. Output: three labelled scripts plus a 3-bullet practice drill.

4. Senior Engineer Resume

Prompt: Act as an ex-Google L7 hiring manager who has calibrated senior engineer candidates for 8 years. Transform my resume into a Staff/Principal engineer resume for [TARGET_COMPANY]. Current role: [CURRENT_ROLE], [YEARS_EXPERIENCE] years. Apply the scope-impact-leadership triad per bullet, show cross-team influence, and replace “I built” with “I led/architected/aligned”. Output: rewritten Experience section with 4-6 bullets per role, each tagged [Scope|Impact|Leadership], plus 3 missing “senior signals” I should add.

5. Career Changer Resume

Prompt: Act as a career transition specialist certified by the Career Thought Leaders Consortium. I’m pivoting from [CURRENT_ROLE] in [CURRENT_INDUSTRY] to [TARGET_ROLE] in [TARGET_INDUSTRY] with [YEARS_EXPERIENCE] years. Build me a functional-hybrid resume that front-loads transferable skills using the T-shaped professional model. Map each past achievement to a target-role competency. Output: resume structure with Summary, Core Skills (mapped), Relevant Experience (reframed bullets), and Learning/Certifications — plus a “credibility gap” checklist.

6. Resume Keyword Extractor

Prompt: Act as an NLP-trained ATS expert who understands Workday, Greenhouse, and Taleo parsers. Extract the top 25 keywords from this job description [PASTE_JD] that must appear in my resume to pass ATS filtering. Classify them as: Hard Skill | Soft Skill | Tool | Certification | Methodology. Flag keywords I likely won’t have and give a 1-line “bridge phrase” for each. Output: ranked table plus a copy-paste “Core Skills” block for my resume header.

7. Resume Impact Audit

Prompt: Act as a resume reviewer from The Muse who has audited 10,000+ resumes. Score my resume [PASTE_RESUME] on these 10 dimensions: Clarity, Quantification, Action Verbs, Keyword Density, Relevance, Scope, Consistency, Length, Design, Storytelling (1-10 each). For any score under 7, give 2 specific rewrite suggestions. Output: a 10-row table with Dimension | Score | Issue | Fix #1 | Fix #2, ending with an overall grade (A-F) and top 3 priorities.

8. One-Page vs Two-Page Decision

Prompt: Act as a former Amazon bar raiser who has reviewed resumes across all levels. Given [YEARS_EXPERIENCE] years, [CURRENT_ROLE], targeting [TARGET_ROLE] at [TARGET_COMPANY], decide if I should use a 1-page or 2-page resume. Provide: (a) the industry/seniority heuristic, (b) which of my content gets cut in the 1-page version, (c) a before/after bullet count. Output: clear recommendation with rationale plus a prioritized “cut list” of sections/bullets if trimming.

9. Technical Resume Project Section

Prompt: Act as an ex-Meta engineering manager who interviews 15 candidates/month. I’m applying for [TARGET_ROLE] with these projects [PASTE_PROJECTS]. Rewrite my Projects section so each entry follows: Problem (1 line) > Stack (1 line) > Architecture decision (1 line) > Measurable outcome (1 line) > Link. Prioritize projects that signal [TARGET_SKILL]. Output: 3-5 polished project blocks ranked by relevance, plus one “flagship project” callout for my resume top.

10. Resume Summary Statement

Prompt: Act as a personal branding coach who has written summaries for C-suite at Fortune 100 companies. Write my resume professional summary for [TARGET_ROLE] in [INDUSTRY]. Facts: [YEARS_EXPERIENCE] years, top achievement [ACHIEVEMENT], unique angle [UNIQUE_ANGLE]. Follow this structure: Line 1 = who I am + specialty, Line 2 = signature proof, Line 3 = what I’m seeking. Max 50 words, zero cliches (“results-driven”, “team player”). Output: 3 versions labeled Conservative | Balanced | Bold.

11. Cover Letter From Scratch

Prompt: Act as a cover letter specialist who has achieved a 40% interview conversion rate for clients. Write me a cover letter for [TARGET_ROLE] at [TARGET_COMPANY], hiring manager [HM_NAME]. Use the “why you, why them, why now” framework. Paragraph 1: hook referencing a specific company moment. Paragraph 2: one STAR story matching [KEY_REQUIREMENT]. Paragraph 3: what I’d do in my first 90 days. Paragraph 4: call to action. Output: 4-paragraph letter under 300 words, ready to send.

12. LinkedIn Headline Generator

Prompt: Act as a LinkedIn branding coach who has grown 50 executive profiles to 20k+ followers. Write 10 LinkedIn headline variants for me. Role: [CURRENT_ROLE], target: [TARGET_ROLE], niche: [NICHE], unique value: [UNIQUE_VALUE]. Each headline must

use this formula: [Role/Title] | [Specialty] | [Who I help] | [Outcome I deliver]. Use max 220 characters. Output: 10 headlines ranked by SEO strength, with a 1-sentence rationale for the top 3.

13. LinkedIn About Section

Prompt: Act as a LinkedIn ghostwriter for Fortune 500 executives. Rewrite my LinkedIn About section. Current: [PASTE_ABOUT]. Target role: [TARGET_ROLE], industry: [INDUSTRY]. Structure: (1) bold hook line, (2) origin story paragraph, (3) what I do now + proof points with metrics, (4) values/mission, (5) clear CTA with contact method. Write in first person, conversational tone, under 2,000 characters. Output: full rewrite plus 3 alternative hook lines.

14. Personal Brand Pillars

Prompt: Act as a personal branding strategist who has built 100+ creator brands to 6 figures. Help me define 3-5 content pillars. My expertise: [EXPERTISE], target audience: [AUDIENCE], monetization path: [MONETIZATION], unique insight: [UNIQUE_POV]. Use the “expert-teacher-host” trifecta. For each pillar give: name, topic examples (5), tone, posting frequency, measurement metric. Output: branded pillar table plus a 30-day starter content calendar.

15. LinkedIn Profile Audit

Prompt: Act as a LinkedIn SSI (Social Selling Index) specialist. Audit my LinkedIn profile [PASTE_URL_OR_CONTENT] across 12 sections: Photo, Banner, Headline, About, Featured, Experience, Education, Skills, Recommendations, Activity, Services, Accomplishments. Score each 1-10 versus top 1% of [INDUSTRY] profiles. Output: scorecard with Section | Score | Top Issue | Quick Fix (under 10 min), plus a prioritized 5-day profile upgrade plan.

16. Cover Letter For Career Pivot

Prompt: Act as a career pivot coach certified by NCDA. I’m switching from [OLD_FIELD] to [NEW_FIELD], targeting [TARGET_ROLE] at [COMPANY]. Write a cover letter that addresses the obvious question “why the switch?” head-on in paragraph 1, then uses paragraphs 2-3 to map my transferable skills using the skills taxonomy O*NET style. End with evidence of commitment (courses, projects, side work). Output: 350-word letter plus a “doubt-killer” appendix with 3 concrete proof points.

17. Personal Tagline Generator

Prompt: Act as a brand identity designer who has named 200+ personal brands. Create 15 personal taglines for me. Inputs: profession [PROFESSION], audience [AUDIENCE], promise [PROMISE], personality [3_WORDS]. Mix these formats: “I help X do Y so they can Z”, “The [Archetype] for [Niche]”, benefit-focused 4-word lines, and contrarian one-liners. Output: 15 taglines labeled with format type, plus my top 3 picks with reasoning and where each works best (Twitter bio, LinkedIn, business card).

18. Twitter/X Bio For Job Search

Prompt: Act as a tech Twitter growth hacker with 300k followers. Write my X/Twitter bio (160 char max) optimized for attracting [TARGET_ROLE] opportunities and followers in [NICHE]. Include: role + signature outcome + proof + CTA + 1 personality hook. Avoid emoji spam. Output: 5 bio variants under 160 chars (count each), labeled by angle (Builder, Teacher, Contrarian, Authority, Friendly), plus the #1 recommendation.

19. LinkedIn Content Calendar

Prompt: Act as a LinkedIn content strategist who has scaled 10 profiles past 100k followers. Build me a 30-day LinkedIn content calendar. Niche: [NICHE], goal: [GOAL], target audience: [AUDIENCE], weekly posting capacity: [POSTS_PER_WEEK]. Use the 4-1-1 rule (educational/inspirational/personal/promotional). For each post give: Date, Format (carousel/text/video), Hook, Topic, CTA, Hashtags. Output: full 30-day calendar table plus 5 evergreen hook templates.

20. Elevator Pitch Crafting

Prompt: Act as a Toastmasters World Champion-level speech coach. Build my 30-second elevator pitch. Role: [CURRENT_ROLE], target audience: [TARGET_LISTENER], goal: [PITCH_GOAL], unique credibility: [CREDIBILITY]. Use the 5 C's framework: Context, Challenge, Core competency, Contribution, Call-to-action. Output: 75-word pitch, a 30-word “shortened shark version”, and a 10-word “tagline version” — plus 3 delivery cues (pause, emphasis, body language).

21. Behavioral Interview STAR Bank

Prompt: Act as an interview prep coach who has trained 500+ candidates into FAANG. Build me a STAR story bank. My background: [CURRENT_ROLE], [YEARS_EXPERIENCE] years, top projects [LIST_PROJECTS]. Generate 10 stories mapped to these Amazon LPs or generic competencies: Ownership, Bias for Action, Dive Deep, Earn Trust, Deliver

Results, Think Big, Customer Obsession, Disagree & Commit, Hire/Develop, Invent. Each in strict STAR (Situation/Task/Action/Result) under 250 words. Output: story bank table with Competency | Story Title | STAR summary.

22. System Design Interview Prep

Prompt: Act as an ex-Google staff engineer who has interviewed 400+ candidates for system design. Coach me on this question: “Design [SYSTEM_NAME]”. Walk me through the 7-step framework: (1) Requirements clarification, (2) Capacity estimation, (3) API design, (4) High-level design, (5) Data model, (6) Detailed component design, (7) Scaling & tradeoffs. For each step, ask me 3 prompting questions I should answer, then critique a sample response. Output: a full mock session transcript and a “scorecard” at the end.

23. Technical Coding Interview Drill

Prompt: Act as a LeetCode grandmaster and ex-Meta interviewer. Give me a 2-week coding interview plan for [TARGET_COMPANY] at [LEVEL]. My current strength: [STRENGTH], weakness: [WEAKNESS], available hours/day: [HOURS]. Cover arrays, strings, hashmaps, trees, graphs, DP, recursion, and system-relevant patterns. For each day give: topic, 3 problems (easy/med/hard) with URLs, time budget, and a reflection prompt. Output: 14-day plan table plus a “blind 75 priority” subset.

24. Behavioral Interview Rehearsal

Prompt: Act as an executive interview coach who has prepped C-suite for board interviews. Run me through a behavioral mock interview for [TARGET_ROLE]. Ask me 8 questions drawn from the McKinsey PEI + Amazon LP + Google Googleness buckets. After each of my answers (wait for me to respond), give feedback using the SBI (Situation-Behavior-Impact) model, rate 1-10, and show a rewritten STAR version. Output: ask question 1 first, then wait for my response before moving on.

25. Case Interview Framework

Prompt: Act as a McKinsey EM who has conducted 1,000+ case interviews. Walk me through solving this case: [CASE_PROMPT]. Use the MECE structure-first approach. Phase 1: clarify goal and constraints (ask me 3 questions). Phase 2: build a framework (propose 3 branches with sub-branches). Phase 3: ask me which branch to dive into. Phase 4: quantify via Fermi estimation. Phase 5: synthesize. Output: full case walkthrough with a top-down recommendation at the end, plus a list of “red flag” behaviors I should avoid.

26. Tough Interview Questions Handler

Prompt: Act as an interview coach who specializes in handling curveball questions. I have an interview for [TARGET_ROLE] at [COMPANY]. Give me polished answers for these 10 toughest questions: “Why should we hire you?”, “What’s your biggest weakness?”, “Why are you leaving?”, “Tell me about a failure”, “Where do you see yourself in 5 years?”, “Why [company]?”, “Salary expectations?”, “Disagreement with boss”, “What would you change on day 1?”, “Any questions for us?”. Output: answer table with Question | 60-sec Answer | 1 Trap to Avoid.

27. Questions To Ask Interviewer

Prompt: Act as a former CPO who has interviewed for 12 executive roles. Give me 15 powerful questions to ask the interviewer at [TARGET_COMPANY] for [TARGET_ROLE], sorted by audience: (5) hiring manager, (5) peer/skip-level, (5) executive. Each question must signal curiosity, senior thinking, and diligence — never ask anything findable on the website. Output: 15 questions grouped by audience, each with a 1-line “what this reveals” note and a “red flag if they answer X” tip.

28. Panel Interview Strategy

Prompt: Act as a senior HRBP who has run 100+ panel interviews at unicorns. I have a panel of [N_INTERVIEWERS] at [COMPANY] for [TARGET_ROLE]. Interviewers: [LIST_ROLES]. Build me a panel game plan: (1) who to address for each type of question, (2) how to vary tone per persona, (3) a “thread callback” technique to create cohesion, (4) body language and eye contact rotation. Output: panel strategy checklist plus 3 anticipated questions per interviewer.

29. Product Sense Interview

Prompt: Act as a Meta/Google PM interviewer who has calibrated 500+ candidates. Mock me on this product sense question: “Improve [PRODUCT]” or “Design [PRODUCT] for [USER_SEGMENT]”. Use the CIRCLES method: Comprehend, Identify, Report needs, Cut with priorities, List solutions, Evaluate tradeoffs, Summarize. Ask me to narrate each step and give feedback after each. Output: structured mock session, scoring rubric at the end with Strengths | Gaps | Next Practice.

30. Interview Post-Mortem

Prompt: Act as an executive interview coach. I just finished an interview for [TARGET_ROLE] at [COMPANY]. Here’s what happened: [PASTE_DEBRIEF]. Run a structured post-mortem using Start-Stop-Continue plus the “What went well / Where I

fumbled / What I'd say differently" analysis. Identify the top 3 signals the interviewer likely picked up (positive and negative) and predict my likelihood of advancing. Output: post-mortem report plus a 7-day prep sprint for next round if I advance.

31. Salary Negotiation Script

Prompt: Act as a salary negotiation coach who has secured \$2M+ in raises for clients. I received an offer: [OFFER_DETAILS] for [TARGET_ROLE] at [COMPANY]. My target: [TARGET_COMP]. Market data: [PASTE_LEVELS_FYI_OR_GLASSDOOR]. Write me a negotiation script using the anchoring + BATNA + "I'm excited, and..." framing. Cover: initial response, counter number, justification, silence tactic, walk-away line. Output: full script for email + phone call, plus 3 responses the recruiter might give and my comebacks.

32. Offer Comparison Framework

Prompt: Act as a compensation consultant who has evaluated 1,000+ tech offers. Compare these offers for me: [OFFER_A_DETAILS] vs [OFFER_B_DETAILS]. Build a weighted scorecard across: base, bonus, equity (calculate 4-year TC), benefits, role scope, growth, culture fit, location, risk, exit value. I weigh [FACTOR] most. Output: side-by-side comparison table with scores, a calculated 4-year NPV, and a clear recommendation with 3 deciding factors.

33. Counter-Offer Letter

Prompt: Act as a negotiation expert trained in the Harvard Program on Negotiation. Draft me a counter-offer email for [TARGET_ROLE] at [COMPANY]. Current offer: [OFFER], my ask: [COUNTER]. Use the "thank + reinforce value + data-backed counter + flexible options" structure. Include 3 non-salary asks (sign-on, equity refresh, start date, remote days). Keep tone collaborative, never adversarial. Output: polished 200-word email plus the 3 alternative versions (soft, medium, firm tone).

34. Equity Offer Valuation

Prompt: Act as a startup equity specialist and ex-Carta analyst. Evaluate this equity grant: [GRANT_DETAILS] including strike price, shares, vesting schedule, last 409A, last fundraising valuation, preferred stack, and dilution assumptions. Calculate scenarios: (1) bear (0.5x valuation), (2) base (2x in 4 years), (3) bull (10x exit). Factor in AMT tax risk for ISOs. Output: valuation table with 4-year expected value, break-even exit price, and 5 clarifying questions I must ask HR before signing.

35. Raise Request Pitch

Prompt: Act as a performance management consultant who has coached 300+ employees through raise conversations. I want to request a [X%] raise from [CURRENT_SALARY] to [TARGET_SALARY]. My tenure: [YEARS], recent wins: [WINS], market data: [MARKET_DATA]. Write me a conversation script using the “data + impact + market + ask + next step” flow. Include how to handle “we don’t have budget”, “wait for review cycle”, and “let me think about it”. Output: full script plus a 1-page impact memo to hand to my manager.

36. Internal Promotion Case

Prompt: Act as an ex-Amazon promo panel member who has evaluated 400+ promo packets for L5-L7. Build me a promotion case from [CURRENT_LEVEL] to [TARGET_LEVEL]. My scope: [SCOPE], recent impact: [IMPACT], leadership signals: [SIGNALS]. Use the “scope, scale, skill, span” 4S model. For each dimension, write: (1) where I am, (2) where the next level is, (3) 3 artifacts that prove readiness. Output: full promo packet outline plus a “gap closer” 90-day plan for missing signals.

37. Relocation Package Negotiation

Prompt: Act as a global mobility consultant for Fortune 500 expats. I’m negotiating relocation from [FROM_CITY] to [TO_CITY] for [TARGET_ROLE]. Help me build a relocation ask list covering: moving costs, temporary housing, house-hunting trip, home sale/lease-break support, tax equalization, cost-of-living adjustment, spouse job help, school fees, visa fees, flights home/year. Output: prioritized ask list (must-have vs nice-to-have), market-rate ranges, and a 1-page email to HR.

38. Low-Ball Offer Response

Prompt: Act as an executive recruiter who has placed 150+ VPs. I just received a lowball offer: [OFFER] for [TARGET_ROLE]. Expected: [EXPECTED]. My leverage: [LEVERAGE], competing offers: [COMPETING]. Write a response that is gracious but firm, reopens the negotiation, and anchors on data. Include the “silence pause” technique and a clear deadline-setting move. Output: email reply plus a phone-call talking-points card for the follow-up.

39. Signing Bonus Ask

Prompt: Act as a big-tech negotiation specialist. I’m asking for a signing bonus of [AMOUNT] on top of my [TARGET_ROLE] offer at [COMPANY]. My leverage: [LEVERAGE] (unvested stock, pending bonus, relocation, competing offer). Write me the

justification script that frames the sign-on as “making me whole” not “extra money”.
Cover: how to present it, when to mention (after base is settled), how to respond to “we don’t typically do that”. Output: 3-message sequence (ask, follow-up, close).

40. Total Comp Calculator Brief

Prompt: Act as a compensation analyst at levels.fyi. Convert this offer into a full 4-year total comp breakdown: [OFFER_DETAILS] including base, target bonus %, RSU grant schedule (front-loaded vs flat), sign-on, refreshers expected at year 2-3, 401k match, benefits value. Compare against the [LEVEL] median for [COMPANY] in [CITY]. Output: year-by-year TC table, vs-market delta %, and 3 negotiation targets with highest ROI.

41. Career Pivot Strategy

Prompt: Act as a career strategist certified by the International Coach Federation. I want to pivot from [CURRENT_ROLE] in [CURRENT_INDUSTRY] to [TARGET_ROLE] in [TARGET_INDUSTRY] within [GOAL_TIMELINE]. My transferable skills: [SKILLS], gaps: [GAPS], financial runway: [RUNWAY]. Build me a pivot roadmap using the 3-bridges model (credential bridge, network bridge, experience bridge). Output: 12-week phased plan with weekly milestones, risk map, and success metrics.

42. Industry Switch Research Brief

Prompt: Act as an industry analyst and career researcher. I’m exploring a switch into [TARGET_INDUSTRY]. Profile this industry for me: market size, growth rate, top 10 employers, typical entry paths, salary bands by role, required credentials, day-in-the-life of [TARGET_ROLE], industry jargon glossary (20 terms), 5 must-read publications, and 3 communities to join. Output: full industry intel brief plus a 5-person “informational interview target list” with outreach templates.

43. Side-Project To Career Plan

Prompt: Act as a portfolio career coach who has guided 100+ people from side hustle to full-time. I run [SIDE_PROJECT] alongside [DAY_JOB], making [REVENUE/MONTH] with [HOURS/WEEK] invested. I want to go full-time in [GOAL_TIMELINE]. Build me a transition plan using the Lean Startup validate-pivot-scale stages, financial runway calculations, and risk mitigation (health insurance, taxes, retirement). Output: stage-gated transition plan, monthly revenue milestones, and a clear “go/no-go” trigger.

44. Returnship After Kids

Prompt: Act as a return-to-work specialist who has placed 200+ women back into tech. I took [DURATION] off for [REASON], previously worked as [PREVIOUS_ROLE] with [YEARS_EXPERIENCE] years. Target: [TARGET_ROLE] within [TIMELINE]. Build my comeback plan: skills refresh (courses, certifications), portfolio rebuild, network re-activation (50 contacts), returnship programs to apply to (list 10), and confidence-building practice interviews. Output: 16-week plan with weekly deliverables and a “brag doc” template.

45. Geographic Relocation Career Plan

Prompt: Act as a career relocation coach. I’m moving from [FROM_CITY/COUNTRY] to [TO_CITY/COUNTRY] in [TIMELINE]. My role: [CURRENT_ROLE] in [INDUSTRY]. Build me a pre-move job search plan: (1) visa/work-authorization reality check, (2) target company list (20), (3) LinkedIn geo-optimization, (4) culturally appropriate resume format (e.g., EU CV, US resume, JP rirekisho), (5) timezone-aware networking. Output: 12-week plan with weekly actions and a recruiter-outreach template localized for [TO_COUNTRY].

46. Corporate To Startup Transition

Prompt: Act as an ex-Google-turned-startup-CTO career coach. I want to leave [BIG_COMPANY] after [YEARS] and join an early-stage startup as [TARGET_ROLE]. My fears: [FEARS], financial situation: [FINANCIAL]. Coach me through: (1) mindset shift (ambiguity, ownership, scope), (2) equity vs cash tradeoffs, (3) due diligence on startups (red flags), (4) how to evaluate founders, (5) first 30-60-90 day plan. Output: coaching brief plus a startup-evaluation scorecard.

47. Freelance To Full-Time Plan

Prompt: Act as a freelancer-to-employee transition coach. I’ve freelanced for [YEARS] doing [WORK] making [INCOME/YR]. I want a full-time [TARGET_ROLE] at [TARGET_COMPANY_TYPE] for stability. Help me: (1) reframe freelance as “consulting experience” on resume, (2) handle “can you adapt to structure” interview question, (3) price my worth vs W-2 equivalent (gross-up math), (4) bridge gaps (title, tenure). Output: reframing guide, TC gross-up calculator, and 5 interview prep Q&As.

48. Sabbatical Planning

Prompt: Act as a sabbatical design expert (think “Designing Your Life” Stanford method). I’m planning a [DURATION] sabbatical starting [DATE]. Goal: [GOAL] (reset, travel, learn, build). Budget: [BUDGET]. Current role: [CURRENT_ROLE]. Help me: (1) conversation script to ask employer, (2) financial runway math, (3) identity protection (LinkedIn, resume story), (4) re-entry plan. Output: sabbatical brief, employer proposal letter, and a “return with a trophy” deliverable idea.

49. Layoff Recovery Plan

Prompt: Act as a career resilience coach who has supported 500+ laid-off tech workers. I was laid off from [ROLE] at [COMPANY] on [DATE]. Severance: [SEVERANCE], runway: [RUNWAY]. Build me a 30-60-90 day rebound plan covering: (1) emotional recovery week, (2) “brag doc” creation, (3) network activation (list 30), (4) targeted job search (20 companies), (5) learning sprint for one skill gap, (6) side income bridge. Output: 90-day calendar with daily actions and a weekly mental-health check.

50. Startup Equity-Driven Pivot

Prompt: Act as a career + equity strategist. I’m evaluating whether to join [STARTUP] at [STAGE] with [EQUITY_GRANT], leaving [BIG_COMPANY] where I have [CURRENT_TC] and [UNVESTED_EQUITY]. Build a decision framework: (1) 4-year NPV of both paths with scenarios (bear/base/bull), (2) optionality value, (3) learning value, (4) resume signal value, (5) personal fit. Output: weighted decision matrix, Expected TC delta, and a “deal-breaker” list that would flip the decision.

51. Executive Coaching Session Plan

Prompt: Act as an ICF Master Certified Coach (MCC) who has coached 50+ Fortune 500 executives. Design a 6-session executive coaching engagement for me. Current role: [ROLE], key challenge: [CHALLENGE], goal: [GOAL]. Use the GROW model per session (Goal, Reality, Options, Will). For each session give: pre-work, session agenda, discussion prompts, homework, and success metric. Output: 6-session plan table plus a “Coaching Alliance” contract outlining norms and measurement.

52. First-Time Manager Onboarding

Prompt: Act as a leadership coach who has onboarded 200+ first-time managers. I just got promoted to manage [TEAM_SIZE] direct reports in [FUNCTION]. Background: [MY_BACKGROUND]. Build my first 90-day plan: Days 1-30 listen & observe (1:1 cadence, stakeholder mapping, team health assessment), Days 31-60 diagnose (team

retro, skill matrix, workload audit), Days 61-90 act (top 3 priorities, ritual installation, quick wins). Output: 90-day plan with weekly deliverables and a 10-question 1:1 template.

53. Difficult Conversation Script

Prompt: Act as a workplace communication expert trained in Crucial Conversations and Nonviolent Communication. I need to have a difficult talk with [PERSON] about [ISSUE]. Context: [CONTEXT], desired outcome: [OUTCOME]. Write me a script using the “Start with facts, tell the story, ask for others’ paths, talk tentatively, encourage testing” (STATE) framework. Include opening line, 3 pivot phrases if they get defensive, closing agreement. Output: full 300-word script, plus a “what NOT to say” list of 5 phrases.

54. Delegation Framework

Prompt: Act as a delegation expert and author of the “Eisenhower + RACI” playbook. I’m a [ROLE] managing [TEAM_SIZE] and drowning in work. Tasks on my plate: [TASK_LIST]. Help me delegate using: (1) classify each task by Urgent/Important, (2) apply the “should I do this?” 3-question test, (3) assign R/A/C/I per task, (4) set stretch vs safety delegation level per person, (5) write a handoff brief template. Output: task triage table plus a delegation brief template.

55. Strategic Thinking Drill

Prompt: Act as a strategy consultant (ex-BCG) who has trained 100+ execs on strategic thinking. Run me through a 45-minute strategic thinking drill on this scenario: [SCENARIO/CHALLENGE]. Walk me through: (1) problem framing with 5-whys, (2) MECE option generation (at least 5 strategies), (3) 2x2 prioritization (impact vs effort), (4) assumption stress test, (5) pre-mortem exercise, (6) one-page decision memo. Output: full drill output with my recommendation as a Pyramid Principle one-pager.

56. Stakeholder Influence Map

Prompt: Act as an organizational influence coach certified in Kotter’s change management. For my initiative [INITIATIVE], map my stakeholders: [LIST_STAKEHOLDERS]. For each, identify: role, current position (supporter/neutral/blocker), what they want, what they fear, WIIFM hook, influence tactic (rational/inspirational/coalition/personal appeal), and a next action. Output: stakeholder map table plus a 2-week influence campaign plan with specific messages per stakeholder.

57. Executive Presence Assessment

Prompt: Act as an executive presence coach who has coached TED speakers and CEOs. Assess my executive presence across the 3 pillars (Gravitas, Communication, Appearance) using [YOUR_CONTEXT]: video link/transcript/description. Score 1-10 on: confidence, composure under pressure, credibility, decisiveness, clarity, brevity, storytelling, body language, voice, wardrobe. Output: 10-row scorecard plus a 6-week presence upskilling plan with weekly drills (mirror practice, video journaling, etc.).

58. Difficult Report Coaching Plan

Prompt: Act as a people manager coach. I have an underperforming report: [NAME], [ROLE], [TENURE], issues: [ISSUES]. I want to coach not PIP (yet). Build me a 30-day coaching plan using the GROW model: weekly 1:1 agendas, specific goals with SMART metrics, feedback using SBI, accountability checkpoints, clear decision point at day 30. Include what “success” and “no improvement” trigger. Output: 30-day plan with scripts for each weekly 1:1 and a go/no-go decision memo template.

59. Leadership Vision Statement

Prompt: Act as a leadership development expert and author in the vein of Simon Sinek. Help me craft my leadership vision statement. My context: [ROLE], team: [TEAM], 3-year aspiration: [ASPIRATION], core values: [VALUES]. Use the “Why / How / What” Golden Circle. Draft a 100-word vision that inspires, a 25-word short version, and a 7-word rally cry. Output: all three versions plus 3 ways to cascade the vision to my team (kickoff speech, 1:1 opener, team ritual).

60. Board Communication Brief

Prompt: Act as a Chief of Staff to a Fortune 500 CEO. I need to present [TOPIC] to my board/exec team. Help me build a board-ready 1-pager using the BLUF (Bottom Line Up Front) + Pyramid Principle: headline recommendation, 3 supporting arguments, risks/mitigations, the ask, next steps. Avoid jargon, use executive English (short sentences, power verbs). Output: the 1-pager, a 3-minute verbal pitch, and 10 likely pushback questions with prepared answers.

61. Self-Review Writing

Prompt: Act as a performance review expert who has written 300+ self-reviews that earned top ratings. Write my annual self-review for [ROLE] covering [REVIEW_PERIOD]. Use the STAR-impact format per accomplishment. My wins: [WINS], growth areas:

[GROWTH]. Cover: impact highlights (top 5), goals achieved vs missed, scope expansion, cross-functional wins, leadership moments, growth areas with action plan. Output: 600-word self-review draft plus a “brag doc” one-pager to attach.

62. Manager Review Draft (Upward)

Prompt: Act as an HR business partner who has read 1000+ upward reviews. Help me write a constructive upward review for my manager [MANAGER_NAME]. Their strengths: [STRENGTHS], growth areas: [GROWTH], recent incidents: [INCIDENTS]. Use the SBI feedback framework and keep tone professional, growth-oriented, never personal. Balance 70% strengths, 30% growth. Output: 400-word review with specific examples, 3 concrete suggestions, and a “psychological safety” self-check before submitting.

63. Peer Feedback Writing

Prompt: Act as a performance coach who trains 360-degree feedback programs. I need to write peer feedback for [COLLEAGUE], who works in [ROLE]. Our collaboration: [CONTEXT]. Use the “keep doing / start doing / stop doing” framework, always with specific examples. Balance praise and growth. Address: technical/functional skill, collaboration, ownership, communication, leadership. Output: 250-word peer review plus a 3-strength + 3-growth bullet list for ratings.

64. Performance Review Goal Setting

Prompt: Act as an OKR coach certified by Christina Wodtke. Help me set next-year performance goals for [ROLE] at [COMPANY]. Business priorities: [PRIORITIES], my growth areas: [GROWTH]. Write 5 goals using the SMART + OKR hybrid format: Objective (inspirational), 3 Key Results (measurable), milestones, dependencies, stretch/commit split. Output: 5 goals in a table with Objective | KRs | Milestones | Dependencies | Success Metric | Review Cadence.

65. Feedback Receiving Coach

Prompt: Act as an executive coach expert in Sheila Heen’s “Thanks for the Feedback”. I just received feedback: [FEEDBACK] from [PERSON] during [CONTEXT]. Help me: (1) sort the feedback into appreciation/coaching/evaluation, (2) identify my likely triggers (truth/relationship/identity), (3) script a thoughtful response, (4) plan a follow-up, (5) extract the kernel of value. Output: feedback breakdown, response script, 3-day reflection prompts, and a “what I’ll do differently” commitment.

66. PIP Response Strategy

Prompt: Act as an employment lawyer + career coach combo who has guided 100+ clients through PIPs. I was just placed on a PIP at [COMPANY]. Terms: [PIP_DETAILS], duration: [DURATION], goals: [GOALS]. Help me decide: (1) fight it (hit the goals) or (2) exit gracefully. For option 1, build a survival plan: weekly deliverables, documentation, ally-building, feedback loops. For option 2, build an exit plan: severance negotiation, job search sprint, story framing. Output: both plans side-by-side plus a decision framework.

67. Difficult Feedback Delivery

Prompt: Act as a manager coach trained by the Kim Scott Radical Candor program. I need to deliver hard feedback to [PERSON] about [ISSUE]. Context: [CONTEXT], relationship history: [HISTORY]. Write me a script using the SBI model: Situation (specific), Behavior (observable), Impact (outcome). Include opening line, empathy beat, the ask, and a co-created action plan. Tone: Care Personally + Challenge Directly. Output: 200-word script, 3 variations by personality type (defensive, avoidant, collaborative).

68. Performance Improvement Plan (For Report)

Prompt: Act as an HR director who has authored 50+ legally defensible PIPs. My report [NAME] is underperforming on [ISSUES]. Build me a 60-day PIP: (1) clear performance gaps with evidence, (2) SMART goals per gap, (3) support I'll provide (coaching, training, resources), (4) weekly checkpoints, (5) success criteria, (6) consequences if not met. Tone: firm, fair, supportive. Output: full PIP document plus an "opening conversation" script to deliver it.

69. Calibration Defense Memo

Prompt: Act as an ex-big-tech manager who has run 20+ calibration cycles. I need to defend my report [NAME] for a [RATING] in calibration. Their achievements: [ACHIEVEMENTS], growth: [GROWTH]. Write me a calibration defense memo: (1) rating recommendation, (2) scope/impact evidence vs level expectations, (3) 3 standout artifacts, (4) comparison to level-peers (without naming), (5) growth trajectory narrative. Output: 1-page defense memo plus 3 counter-arguments I might face and responses.

70. Career Conversation Framework

Prompt: Act as a talent development coach and author in the Julie Zhuo style. I'm having a career conversation with [PERSON] (my report/myself with my manager). Build me a 45-min framework using the "Values, Aspirations, Strengths, Gaps, Actions" (VASGA)

model. For each section give: 3 open questions, listening cues, and how to translate into a 12-month development plan. Output: full conversation guide plus a 1-page “career canvas” template to fill out together.

71. 12-Month Learning Roadmap

Prompt: Act as a learning scientist informed by Bloom’s taxonomy and the Dreyfus skill acquisition model. Build me a 12-month learning roadmap to go from [CURRENT_LEVEL] to [TARGET_LEVEL] in [SKILL]. Weekly hours available: [HOURS]. Break into 4 quarters: Q1 Novice->Advanced Beginner, Q2 Competent, Q3 Proficient, Q4 Expert. For each quarter give: learning outcomes (Bloom verbs), resources (courses/books/projects), deliverables, milestones, and a self-assessment. Output: 12-month plan table plus a weekly 7-day template.

72. Skill Gap Analysis

Prompt: Act as a workforce development specialist. I’m a [CURRENT_ROLE] targeting [TARGET_ROLE]. Analyze my skill gap by: (1) pulling 5 representative job descriptions, (2) extracting top 30 required skills, (3) rating me on each (novice/competent/expert), (4) identifying the top 10 gaps, (5) prioritizing by impact + ease to learn. Output: skill matrix plus a 90-day “minimum viable transformation” plan targeting the highest-leverage gaps.

73. Deliberate Practice Plan

Prompt: Act as a deliberate practice expert informed by Anders Ericsson’s research. I want to get great at [SKILL]. Current level: [LEVEL], available time: [HOURS/WEEK], goal: [GOAL] in [TIMELINE]. Design a deliberate practice routine: (1) break skill into micro-components, (2) pick feedback source, (3) define stretch exercises, (4) set session structure (warm-up, focus drill, application, review), (5) weekly progress metric. Output: week 1 routine in detail, plus a 12-week progression plan and 3 common plateau-busters.

74. Learning Project Portfolio

Prompt: Act as a project-based learning expert in the Scott Young “Ultralearning” tradition. I’m learning [SKILL] to reach [GOAL]. Design 5 portfolio projects scaled by difficulty (beginner → capstone) that demonstrate mastery and could go on my resume. For each: problem statement, tech/tools used, learning outcomes, estimated time, deliverable format, how to showcase it. Output: 5 projects ranked, plus a capstone project spec sheet and a GitHub README template.

75. Feynman Technique Explainer

Prompt: Act as a Feynman technique tutor. I need to deeply understand [TOPIC]. Current understanding: [CURRENT_LEVEL]. Walk me through the 4-step Feynman method: (1) explain it to a 12-year-old in my own words, (2) identify gaps where I stumble, (3) study back the gaps using [RESOURCES], (4) simplify with analogies + examples. Ask me to explain each sub-concept and give feedback. Output: initial explanation template, gap identification checklist, and a final polished 500-word explanation at the end.

76. Spaced Repetition Schedule

Prompt: Act as a spaced repetition expert who uses Anki + SuperMemo principles. I'm studying [SUBJECT] with [N] concepts for [EXAM/GOAL] in [TIMELINE]. Build me an SRS schedule: (1) flashcard template (front/back/tags), (2) initial learning session structure, (3) review intervals (1d, 3d, 7d, 14d, 30d), (4) daily review budget, (5) how to handle leeches. Output: 4-week SRS schedule plus 20 sample Anki cards for [SUBJECT] following atomic-note best practices.

77. Certification Prep Roadmap

Prompt: Act as a certification coach who has helped 500+ candidates pass [CERT_EXAM] (e.g., AWS SAA, PMP, CFA, CPA). I'm taking [CERT] on [EXAM_DATE]. Current knowledge: [LEVEL]. Build a prep plan: (1) syllabus mapping (domain weights), (2) weekly study blocks, (3) resource stack (3 tiers: free, paid, premium), (4) practice test schedule with score milestones, (5) final-week exam strategy. Output: week-by-week plan plus a "exam-day checklist" and memory aids for weakest domains.

78. Bootcamp Alternative Plan

Prompt: Act as a self-taught developer career coach who has guided 200+ people to their first dev job without a bootcamp. I want to learn [STACK] to land a [TARGET_ROLE] in [TIMELINE]. Budget: \$[BUDGET]. Design a free + low-cost curriculum rivaling a \$15k bootcamp: (1) curated course list, (2) project sequence (4 projects), (3) open-source contributions path, (4) community integration (Discord, Twitter), (5) mock interview prep. Output: 20-week curriculum plus a portfolio checklist.

79. Mental Model Library

Prompt: Act as a learning coach inspired by Farnam Street (Shane Parrish). I want to build a mental model library for [DOMAIN/GOAL]. Give me the top 25 mental models I should internalize, grouped into: first-principles (physics/math), biology (evolution),

psychology (biases), economics (incentives), systems (feedback loops), military/strategy. For each: 1-line definition, 1 example in [DOMAIN], and a practice question. Output: 25-row table plus a weekly “model of the week” study ritual.

80. Learning Reflection Journal

Prompt: Act as a metacognition expert informed by Barbara Oakley’s “Learning How to Learn”. Design me a weekly learning reflection journal for [SKILL/GOAL]. Include prompts that target: what I learned, evidence of progress, confusion points, deliberate practice wins, spaced review hit rate, retrieval practice score, mental model added, next week’s focus. Output: 8-prompt journal template plus a monthly review template with 5 KPI questions to track progress.

81. Language Learning Plan

Prompt: Act as a polyglot and language learning coach in the Benny Lewis tradition. I want to learn [LANGUAGE] from [STARTING_LEVEL] to [TARGET_LEVEL] (CEFR A1-C2) in [TIMELINE]. Daily time: [MINUTES]. Build a plan using: (1) core vocab (top 2000 words), (2) input (comprehensible input, CI), (3) output (speaking from day 1), (4) grammar (lazy approach — learn as needed), (5) immersion (media, podcasts, italki). Output: weekly schedule plus a “speak from day 1” 30-sentence starter kit.

82. GRE/GMAT Study Plan

Prompt: Act as a top-scoring GRE/GMAT tutor (99th percentile) who has coached 300+ students. I’m taking [EXAM] on [DATE]. Current diagnostic: Quant [SCORE], Verbal [SCORE], AWA [SCORE]. Target: [TARGET_SCORE]. Build an [N]-week plan: weekly focus areas, resource stack (OG + tier-2), drill sets, 5 full-length mocks (with dates), error-log ritual, peak-week review. Output: week-by-week plan plus a 5-question “error log template” and a 3-day exam-week taper plan.

83. SAT/ACT Prep For Teen

Prompt: Act as a private college counselor who has sent 100+ students to top-20 universities. My teen (grade [GRADE]) is prepping for [SAT/ACT] on [DATE]. Current score: [SCORE], target: [TARGET]. Build a 12-week plan: (1) diagnostic analysis, (2) weak-area drill schedule, (3) weekly timed section practice, (4) 4 full-length practice tests with review days, (5) test-day strategy (pacing, guessing, fatigue). Output: 12-week calendar + a teen-friendly “parent accountability” check-in guide.

84. Medical Exam Prep (USMLE/MCAT)

Prompt: Act as a USMLE/MCAT tutor who has coached students to 260+ / 520+. I'm taking [EXAM] on [DATE]. Current score: [SCORE], strongest: [STRONG], weakest: [WEAK]. Build a dedicated prep plan: (1) resource stack (UWorld, Anki decks like AnKing, First Aid), (2) question block schedule (40 Qs/day ramping to 120), (3) weak-system focus weeks, (4) NBME/AAMC practice test schedule, (5) wellness + sleep guardrails. Output: dedicated-period daily schedule plus an error-log template.

85. Interview Question Drill Set

Prompt: Act as a subject matter tutor for [EXAM/INTERVIEW]. Generate 30 practice questions across [TOPIC] ranging from easy (Bloom's "remember") to hard (Bloom's "evaluate/create"). For each: question, ideal answer, 3 distractor wrong answers (for MCQs), explanation, estimated time, difficulty tag. Output: 30-question drill set formatted for self-testing plus a scoring rubric and a remediation guide for missed questions.

86. Exam Day Strategy

Prompt: Act as an exam psychologist who coaches Olympians and grandmasters on peak performance. I have [EXAM] on [DATE]. Format: [FORMAT], duration: [DURATION]. Build my exam-day protocol: (1) night before (sleep, prep, light review), (2) morning ritual (food, caffeine, warm-up questions), (3) during-exam pacing strategy, (4) mental-reset techniques for panic, (5) between-section recovery, (6) post-exam decompression. Output: hour-by-hour exam day protocol plus 3 breathing/grounding techniques.

87. Memory Palace For Study

Prompt: Act as a memory grandmaster in the Dominic O'Brien tradition. Teach me to build a memory palace for [TOPIC]. I need to memorize [N] facts for [GOAL]. Walk me through: (1) choosing a familiar location, (2) mapping 20 loci, (3) encoding each fact with vivid images (PAO system if needed), (4) review walks (spaced), (5) retrieval practice. Apply to [TOPIC] with 10 sample images for the first 10 facts. Output: custom memory palace tutorial + 10 encoded facts.

88. College Application Essay

Prompt: Act as a former Stanford admissions reader who has reviewed 10,000+ applications. Help me write a college essay for [SCHOOL] responding to [PROMPT]. My story arc: [RAW_STORY]. Use the "micro-moment to macro-insight" structure — start

with a specific scene, zoom out to a pattern, land on a personal truth. Show-don't-tell, avoid cliches. Under 650 words. Output: polished essay draft plus a 5-point revision checklist and 3 alternative opening lines.

89. PhD Thesis Progress Plan

Prompt: Act as a PhD coach who has helped 150+ students finish on time. I'm in year [YEAR] of my PhD in [FIELD]. Current status: [STATUS]. Remaining: [REMAINING_CHAPTERS]. Target defense: [DATE]. Build a backward-planned milestone schedule: chapter drafts, advisor review cycles, data collection windows, writing sprints (Pomodoro/Shut Up & Write), buffer weeks, defense prep. Output: 52-week reverse timeline plus a weekly writing ritual and 3 techniques for beating writer's block.

90. Continuous Learning Habit

Prompt: Act as a habit coach trained in BJ Fogg Tiny Habits and James Clear Atomic Habits. I want to build a daily learning habit for [SKILL] — [MINUTES/DAY] for [TIMELINE]. Current struggle: [OBSTACLE]. Design my habit stack using: (1) anchor behavior (existing habit), (2) tiny version (<2 min), (3) scaled version, (4) environment design, (5) identity statement ("I'm a person who..."), (6) tracking method, (7) reward. Output: my habit design doc plus a 30-day habit tracker template.

91. Life Vision & Ikigai

Prompt: Act as a life design coach trained in Ikigai and Designing Your Life (Stanford d.school). Walk me through discovering my Ikigai. Ask me 5 questions per pillar: (1) what I love, (2) what I'm good at, (3) what the world needs, (4) what I can be paid for. After my answers, find the overlap zone and synthesize my Ikigai sentence. Output: 20-question worksheet, my Ikigai synthesis, and 3 "odyssey plans" (different 5-year paths) I could pursue.

92. SMART Goals For The Year

Prompt: Act as a goal-setting expert trained in SMART goals and OKRs. Help me set 5 annual goals across health, wealth, career, relationships, growth. My north star: [VISION]. Current state per area: [STATE]. For each goal give: SMART statement, why-it-matters, 3 key milestones (Q1/Q2/Q3/Q4), weekly actions, metrics, obstacles, support system. Output: 5-goal annual plan plus a one-page "year at a glance" vision board outline.

93. Wheel Of Life Assessment

Prompt: Act as a life coach certified by the Co-Active Training Institute. Guide me through a Wheel of Life assessment. Ask me to score (1-10) these 8 areas: Career, Finance, Health, Family, Relationships, Personal Growth, Fun, Environment. After my scores [PASTE_SCORES], analyze: which areas are most out-of-balance, which is the “keystone” (improving it lifts others), and 3 quick wins per low area. Output: analysis, keystone recommendation, and a 30-day “rebalance sprint”.

94. Habit Tracker System

Prompt: Act as a behavior designer from the Stanford Behavior Design Lab. Design me a habit tracking system for [N_HABITS] habits. Habits: [LIST_HABITS]. My environment: [ENV]. Use: (1) habit loop (cue/craving/response/reward), (2) minimum viable version, (3) streak tracking vs non-streak compassion rules, (4) weekly review ritual, (5) quarterly habit audit. Output: a Notion/paper tracker template, daily checklist, and a “habit audit” 10-question review.

95. Accountability Partnership Setup

Prompt: Act as an accountability coach who has run 100+ peer coaching circles. I want to set up an accountability partnership with [PARTNER] for [GOAL] over [DURATION]. Build us: (1) goal alignment questionnaire, (2) weekly check-in agenda (30 min), (3) a “commitments log” template, (4) escalation rules for missed commitments, (5) celebration rituals, (6) renewal/exit criteria. Output: a full accountability partnership operating agreement and first 4-week schedule.

96. Morning Routine Design

Prompt: Act as a peak performance coach in the Tim Ferriss/Hal Elrod tradition. Design my morning routine for [DURATION_MINUTES] minutes. My goals: [GOALS], energy profile: [CHRONOTYPE], constraints: [CONSTRAINTS] (kids, commute, etc). Include: hydration, movement, breath/meditation, intention-setting, 1 growth input, 1 creative sprint. Optimize for energy + focus not activity count. Output: step-by-step routine with timing, a “lazy day minimum version”, and a 21-day habit-building tracker.

97. Dealing With Procrastination

Prompt: Act as a behavioral therapist trained in ACT and CBT for procrastination. I keep procrastinating on [TASK]. Pattern: [PATTERN], emotional blocker: [EMOTION]. Diagnose using: (1) the procrastination equation (Value x Expectancy / Impulsiveness x Delay), (2) identify which lever is weakest, (3) apply targeted interventions

(implementation intentions, Pomodoro, temptation bundling, 2-min rule, environment design). Output: diagnosis, 5 interventions ranked by fit, and a 7-day anti-procrastination experiment.

98. Confidence Building Plan

Prompt: Act as a confidence coach trained in cognitive-behavioral therapy and Dweck's growth mindset. I struggle with confidence in [AREA] because of [REASON]. Build me a 30-day confidence-building plan: (1) identify core limiting belief, (2) gather counter-evidence (3 per belief), (3) behavioral experiments (small stretches), (4) reframe inner critic, (5) daily "win log", (6) celebrate micro-wins. Output: 30-day plan with daily actions and a "thought record" template for 5 CBT worksheets.

99. Burnout Recovery Protocol

Prompt: Act as a burnout recovery specialist informed by the Maslach Burnout Inventory and Emily Nagoski's "stress cycle". Symptoms: [SYMPTOMS], duration: [DURATION], work context: [CONTEXT]. Build me a 30-day recovery protocol covering: (1) diagnosing which of the 3 burnout dimensions dominates (exhaustion/cynicism/efficacy), (2) completing the stress cycle (movement, breathing, laughter, connection), (3) work boundaries script, (4) re-introducing joy, (5) sustainability rules. Output: 30-day plan with weekly check-ins and 5 "red flag" relapse signals.

100. Quarterly Life Review

Prompt: Act as a life strategist who runs annual retreats for high-performers. Lead me through a quarterly review of the last 90 days. Context: [QUARTER], top goal: [GOAL], what happened: [SUMMARY]. Cover: (1) wins and evidence, (2) losses and lessons, (3) what drained me vs energized me, (4) relationships audit, (5) 12 Favorite Problems (Feynman), (6) next quarter's top 3 priorities, (7) one thing to stop, (8) gratitude list. Output: completed review document plus a 1-page "next quarter game plan".
